Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Sprains, Curls, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

W. B. EDDY & COMPANY, WHITEHALL, N. Y.

478 Valencia Street, San Francisco

IN OR OUT?

NEXT TUESDAY, MARCH 10, is the last day on which the value of every one of your 1908 foals will be increased or reduced.

If they have a \$12,500 engagement they will be worth more money, and will sell more readily than if they have no engagements.

THE HORSE REVIEW of Chicago, Ill., offers you the opportunity to secure such engagements without expense.

A year's subscription, \$2.50 (\$3.50 in Canada), includes the free nomination of EVERY mare owned by you that is due to foal this spring in its \$12,500 Subscription Purse No. 15, for foals of 1908.

Full value is given for the \$2.50, as the REVIEW is as high-class a publication as experience and money can produce. It is published every Tuesday, and is, by thousands of horsemen, considered the best turf paper published.

It has to date distributed \$130,575 among breeders by means of its Futurities, more than double the amount paid out by all other turf papers promoting Futurities.

No such offer has even been made breeders. The idea is original with the REVIEW, and this is the only opportunity you will have of securing a \$12,500 engagement for every one of your 1908 foals without expense.

There is no substitution clause, consequently if your mares are not nominated on or before NEXT TUESDAY, MARCH 10, your colts will lack this engagement.

If you have not time enough to send for entry blank, give name, color, breeding of mares and name of stallion bred to in 1907, enclose \$2.50 (\$3.50 in Canada) for a year's subscription, and forward same to the HORSE REVIEW.

Don't omit any of your mares, even if in doubt as to this or that one being with foal. All are eligible, and all may be included.

This is one of those rare cases where you really have nothing to lose and everything to gain.

There is no liability of any kind. If your colt suits you on November 1st next, it costs but \$5 to keep the entry good. If it don't suit it costs nothing. On May 1, 1909, an additional payment of \$5 is required if you still think well of the foal. After that there is nothing further to pay except starting fees. All payments are at your option.

No simpler, fairer or more inexpensive conditions were ever devised.

REMEMBER, NEXT TUESDAY, MARCH 10, is absolutely the last day on which you can take advantage of this unusual opportunity. To be absolutely sure of the resulting benefits, send in your subscription and list of mares to-day to

AUGUST 10TH TO 15TH INCLUSIVE, 1908.

The Alameda County Fair Association announces the following Early Closing Guaranteed States:

No. 1—The Greater Oakland Stake, Trotting, 2:20 Class.....	\$2500
No. 2—Alameda County Stake, Pacing, 2:20 Class.....	2500
No. 3—Mt. Diablo Stake, Trotting, 2:15 Class.....	900
No. 4—Pleasanton Stake, Pacing, 2:14 Class.....	900
No. 5—Berkeley Stake, Pacing, 2:08 Class.....	900
No. 6—Athenian Stake, Trotting, 2:25 Class, Three-Year-Olds....	900

Entries Close April 1, 1908

When Horses Must be Named.

The complete Programme will be announced later.

In order to keep the best horses on the Coast, there will be a free-for-all Pace and a 2:10 Trot for tempting Purses and liberal programme for other classes.

CONDITIONS:

In No. 1 and No. 2 any horse not standing to win a portion of the purse at the end of three heats will be ruled out. Both races to be declared finished at the end of the fifth heat; \$2,000 of the money to be divided according to the summaries, as follows: \$1,000 to the first, \$500 to second, \$350 to third and \$200 to the fourth horse; \$500 reserved for a Consolation Purse, open to all horses that start and do not win any part of the purse. Two heats, every heat a race. Money division: \$125 to first, \$75 to second, \$50 to third in each heat. No money deducted from winners in the Consolation Purse.

No. 3, No. 4, No. 5 and No. 6 will be three heats, every heat a race. Money division every heat: \$165 to first, \$80 to second and \$55 to third.

ENTRANCE MONEY.

In No. 1 and No. 2 the entrance fee is four per cent, with an additional five per cent from money winners, payable as follows: One per cent due when nomination is made and the balance to be paid on the first day of the meeting.

The entrance fee in No. 3, No. 4, No. 5 and No. 6 is five per cent, with an additional five per cent from money winners. One per cent due when nomination is made and the balance on the first day of the meeting.

In the event of No. 1 or No. 2 securing twenty or more paid up entries, the entrance fee will be three and one-half per cent instead of four per cent; if more than twenty-five entries, three per cent; if thirty or more entries, no money will be deducted from money winners. All money in excess of the purse will be divided among money winners in accordance with the announced division.

In the event of No. 3, No. 4, No. 5 and No. 6 securing thirteen or more paid up entries, the entrance fee will be four per cent instead of five per cent; if twenty or more entries, no money will be deducted from money winners. All money in excess of the purses will be divided among money winners in accordance with the announced division.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race, and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting at which the race is to take place.

Do You Want the Best?

Breed Your Mares to

Zombro 2:11

Son of McKinney 2:11½ and Whisper by Almont Lightning.

Service Fee—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Bellemont 2:09½, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08½ holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list, ten in the 2:15 list and seventeen in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices. Address

GEO. T. BECKERS,
3949 South Figueroa Street,
Los Angeles, Cal.

Bonny McKinney 41383

Son of
McKinney 2:11½

World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippetou; 3rd dam Gladys by Gladiator, etc. Bonnie McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15½ hands high and weighs 1150 pounds. In conformation he is all that the most critical horse-man could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03¾
King of Race Horses.

Reg. No. 34899

Sire of Ray o'Light 2:13½ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11¾, trial 2:05½, Dam Rita B. by Boodle Jr.; 2nd dam Gabilan Girl by Gabilan; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alcyone 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal.

Will be turned to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

Making his wonderful list still more remarkable.

When writing kindly mention this journal. **The Empire City Farms, Cuba, N. Y.**

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11³/₄, the greatest sire of extreme speed living. Dam Helena 2:11³/₄, dam of Wild Nutting 2:11³/₄, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04³/₄; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinneys. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

STALLIONS!

Why do they often become so devitalized, even in a light stud duty, that they require a long rest from such service?

It is due to the absorption into their systems of poisonous bacteria, or germs of disease, both contagious and sexual, in serving mares of all degrees of health and disease. There are many of these bacteria and germs that are very injurious to the stallion. To counteract the growth of such germs in his system and keep him in normal condition there is but one Germicide fit for internal use.

Spoehn's Liquid Distemper Cure

Is Safe, Simple and Sure as a Germicide and Is a Fine Tonic and Conditioner "SPOHN'S" will enable stallions to go through a long stud season and keep them free from any form of Distemper. Give it to them every other day.

All Druggists.

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

Cartridges and Rifles Take Leading Honors

Winchester Cartridges and Rifles again demonstrated their exceptional shooting qualities at the Fourth Annual Tournament of the Indoor .22 Caliber Rifle League, held in Rochester, N. Y., January 27-February 1, making new World's records and winning in the majority of the events, as follows:

CONTINUOUS MATCH—R. Gute, First (tie), four perfect scores of 75.

BULLSEYE TARGET—R. Gute, perfect target of O, a World's Record.

SKIDDOO MATCH—R. Gute, First (tie), four perfect scores of 75.

CHAMPIONSHIP MATCH—R. Gute, tied for second place, score 2460.

RAPID FIRE MATCH—Harry Harrison, First, 81 shots in one minute, score 570. This is a World's Record. Mr. Harrison also made a new World's Rapid Fire Record, firing 101 shots in one minute.

Both Mr. Gute and Mr. Harrison used Winchester Cartridges, and the latter also used Winchester Rifles. The increasing popularity of Winchester Cartridges was evident by the fact that more participants used them than any other make. Their phenomenal showing at this important tournament proves the superior qualities of the Red W. Brand.

No. 13—2:05 CLASS, PACING.....1,000

Be Sure to Make Your Entries in Time!

Entrance fee two per cent, due April 1, 1908; one per cent additional if not declared out on or before May 1, 1908, and two per cent additional if not declared out on or before June 1, 1908; five per cent additional from winners.

Entries Close Monday, June 1st, 1908, in the following Races:

No. 2—2:12 Class, Pacing.....\$ 800
No. 4—2:10 Class, Trotting.....1,000
No. 6—2:17 Class, Trotting.....700
No. 7—2:15 Class, Pacing.....\$ 700
No. 8—2:24 Class, Trotting (3-year-old).....500
No. 10—2:14 Class, Trotting.....800

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of meeting at which the race is to take place.

Money divided 50, 25, 15 and 10 per cent. All races mile heats, best 3 in 5.

Member National Trotting Association. For Entry Blanks and further information address the Secretary.

BEN F. RUSH,
President.

J. A. FILCHER, Secretary.
Sacramento, Cal.

PROGRAMME FOR RUNNING RACES TO BE ANNOUNCED LATER.

\$16,700

Guaranteed Stakes for 4 Days

\$16,700

Meeting to be held in August, 1908.

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

Entries to Close Wednesday, April 1, 1908

PROGRAMME.

Wednesday.

1—2:14 CLASS TROTTING.....\$ 800
2—2:20 CLASS TROTTING, CALIFORNIA STAKES.....2000
3—2:08 CLASS PACING.....800

Thursday.

4—Two-Year-Old Trotting Division Futurity Stakes No. 6 (Closed December 4, 1905).....\$1450
5—2:14 CLASS PACING.....800
6—Three-Year-Old Pacing Division Futurity Stakes No. 5 (Closed October 15, 1904).....1300

Friday.

7—Two-Year-Old Pacing Division Futurity Stakes No. 6 (Closed December 4, 1905).....\$ 950
8—Three-Year-Old Trotting Division Futurity Stakes No. 5 (Closed October 15, 1904).....3300
9—2:05 CLASS PACING.....1000
10—FOUR-YEAR-OLDS TROTTING 2:20 CLASS.....500

Saturday.

11—2:17 CLASS TROTTING.....\$ 800
12—2:20 CLASS PACING, PACIFIC SLOPE STAKES.....2000
13—2:10 CLASS TROTTING.....1000

Entries to Stakes Nos. 1, 2, 3, 5, 9, 10, 11, 12 and 13 close WEDNESDAY, APRIL 1, 1908. Horses to be named with entry.

Entrance fee two per cent, due April 1, 1908; one per cent additional if not declared out on or before May 1, 1908, and two per cent additional if not declared out on or before June 1, 1908; five per cent additional from winners.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting at which the race is to take place.

Money divided 50-25-15 and 10 per cent. All races mile heats, best 3 in 5, except for two-year-olds.

MEMBER NATIONAL TROTTING ASSOCIATION.

THIS JOURNAL has always advocated a change in the system of betting as conducted on the principal racetracks in America. It has repeatedly advocated the system in vogue in Australia and New Zealand, called the "tote" system, or the use of the "totalisator." It is more like the old style; in fact, it is an improvement on the Paris mutuels, so familiar to visitors to our racetracks a few years ago. And now comes the news that the Churchill Downs racetrack managers at Louisville, Ky., Messrs. Grainger, Winn and Applegate, have recently completed arrangements for a system of pari-mutuel and auction pool betting in Kentucky this season. They went to New York to see if they could get the machines and totalizers used on the Eastern tracks when that system of betting was in vogue there. They found the old machines were too rusty to be useful, and that it would be necessary to have new ones made. This will be easy, and fifteen machines are to be put in service at Churchill Downs this spring. Besides there will be auction pools, but bookmakers are to be rigorously excluded from doing business.

Commenting on the proposed change, Grainger is quoted as follows:

"We believe the mutuel and auction pool system to be the ideal one for the protection of the public and for the perpetuation of clean racing, and it is our intention to give it a thorough trial. We favor this scheme of betting because it removes the temptation to corrupt jockeys and trainers and gives the public a chance to express its choice in betting. Under the mutuel system there is nothing in preventing a favorite from winning, and the public always makes the favorite. Even casual visitors to the tracks will be able to see everything that goes on and know, by the number of tickets sold on the horse of their fancy, just how highly those horses are considered by their people."

THE NEWS THAT the California Circuit will be one of the best for light harness horses this year has spread like wildfire throughout the State and our most capable trainers, men of acknowledged ability, have been most agreeably surprised to receive letters from owners of good trotting and pacing horses asking their terms for training. There are scores of yearlings, two-year-olds and three-year-olds which are owned by what are known as small breeders, and these trotters and pacers are entered in the Futurity Stakes as well as the Stanford and Occident Stakes. Some are also heavily entered in the large Eastern Futurity Stakes, and all must be handled for speed. The reputation achieved by our California bred horses is something we are proud of. World's records are shattered year after year, but it will be noticed that the colts and fillies bred and developed in California are always among the first to knock some other great record to pieces, and descendants of California owned sires and dams are, among the most popular sires of early and extreme speed in the Eastern State to-day. We have no men of great wealth like William Russell Allen, H. K. Devereaux, James Butler, John H. Shults, William Bradley or the Uihlein Brothers to whom trotting horse breeders can always rely when they are to sell their horses. The Horses must be developed so as to attract these far-away buyers. California is, or has been for the past seven years, a poor man's country; that is, it is a place where a poor man has a good opportunity of breeding, developing and racing his trotting bred colts and fillies without having to compete with establishments where scores of horses are being trained, highest salaried trainers employed and the very best tracks are kept in order, so that candidates for 2:30 honors and all having engagements on these latter places can have the advantage. The days of Palo Alto, Corbitt's Valensin's, and Rosemeade, are past and on the tracks where all have an equal show, their trotters are handled by men of skill, and the greatest care is exercised in preparing them for the races. They do not have to bring their horses on the circuit to compete with others that have been trained on private tracks, and no "marvelous trials" and "wonderfully fast work outs" loom up like barriers in their path, to frighten and worry them when the bell rings. Owners of youngsters they have taken pride in breeding are aware of this, and as they know their colts will have an equal show with those belonging to their neighbors, do not feel that they have much to be afraid of; that no big stock farms are having a score of good ones tried out so that the very best one will be "pitted against theirs," that is why there is so much activity among this class at present. Besides, they see that there are more opportunities offered for racing their colts and enhancing their value than there have been for years, and they see that the men who have won the largest stakes and the most money are situated just as they are; therefore, they are willing to "take a chance."

THERE IS ONE thing which enthusiastic horse breeders and owners must avoid, and that is they must not get overstocked. The desire to increase their possessions of choicely bred trotting stock is naturally very strong. To peruse a sale catalogue and see therein some colt or filly which they believe represents their ideas of correct breeding arouses an interest which is never allayed until the animal is sold. If one should have room for only a few, and if that colt or filly should fall into his possession, the first thing he should do is to consign one of his others that is not quite so suitable in breeding, conformation and speed, to the sales ring. The accumulation of large numbers of horses by men who are not in a position to properly care for and develop them is a serious mistake. The market is good for horses now, and the best time to sell is when prices are good. For the last year many people have wanted good, useful, well-bred and pure-gaited horses, but have managed to get along without them because they could not find such as they wanted even at the big prices which they have been willing to pay. Yet many breeders and owners have held on to their surplus stock, demanding higher and in many, very many, instances unreasonable prices. The man who has too many should sell now, especially if he has too many that do not come up to his expectations. He should put them in good shape for the big auction sales, such as the one to be held at Pleasanton next month, and sell them to the highest bidder. A change of owners often never tried, excellent results followed. The colt

that in one trainer's hands proves a disappointment often proves to be a great race winner when handled by another. The one who sold the colt has nothing to regret, for he had worked steadily to get the colt going right and failed; but, by some system he had never tried excellent results followed. The colt was well sold and, whatever he brought, he made room for another and the sale was a beneficial one. A man who is "horse poor" is to be pitied, for he has no one to blame but himself. If he has not judgment enough to keep from getting into this predicament, especially if he is not owner of enough pasture land to raise them or is not endowed with enough of this world's goods to keep the youngsters well fed, well cared for and well trained, should consign all but those he can attend to in this way to the public sales or get rid of them at private sale.

SECRETARY J. A. FILCHER of the State Agricultural Society has just issued a circular regarding the purposes of the Pacific Coast Fair Circuit, established at a recent meeting of the Western Fair Secretaries and Directors at Portland. The circuit was formed with the aim in view of inducing livestock breeders to exhibit their stock outside of their respective States. The pamphlet says:

"It has been a common complaint among breeders that they could hardly afford to get their stock in condition for one fair. The circuit system overcomes this objection, not only with live stock breeders, but with all others who have something for which they desire public recognition and who are looking for opportunities to obtain the greatest results at the least cost. Then again, the greater the inducements the farther people will go to participate in them, and it is believed that the aggregate premiums and advertising advantages of the fairs of the Pacific Coast circuit will induce quite a number of breeders from the Mississippi valley and other Eastern States to fit up herds or stables and bring them here for the special purpose of showing them at the California, Oregon, Washington and Idaho fairs. It is hoped and expected also that many breeders in the Northwest will get their stock in condition in time to begin the circuit at the California State Fair, while California breeders, having prepared their stock for their own fair, will be in shape to continue the circuit and reap the benefit of showing in half a dozen big fairs, including the great National Stock Show at Portland. This arrangement should be an inducement to every breeder of good stock in California to show at the next California State Fair. He will be assured of being in good company, he will get a better idea of the relative merits of his stock when compared with the best, he will have opportunities for selling or exchanging, and he will be privileged and prepared to continue on the circuit if deemed advisable to do so. Nearly every breeder has more or less surplus which he desires to dispose of. There is no better place than fairs for selling good stock. At the recent big show in Denver about three hundred head of cattle, thirty horses, and large numbers of swine and sheep were sold during the week."

It is the intention of the various fair secretaries and directors to give as much publicity as possible to the aims of the circuit.

ENTRIES WILL close April 1st for the State Fair race meeting, the Alameda County Fair Association's meeting to be held at Emeryville August 10th to 15th inclusive, the Fresno County Agricultural Association's meeting, the Pacific Coast Trotting Horse Breeders' Association, and \$10 will be due on yearlings (foals born in 1907) in the Breeders' Futurity Stakes No. 7, value \$7,000. Just as soon as these are closed programmes for other California race meetings will follow, and then the great Northern Circuit will have its programme ready. All these meetings spell money and good money for horse owners and breeders, and it is of the utmost importance to them that they do not miss the date, April 1st; otherwise it will be an April Fool day, and one never to be forgotten.

THE ATTENTION of horsemen who intend to campaign in California is called to a mistake that appeared in the advertisement of the coming meeting at Oakland. The Mount Diablo Stake is for 2:14 trotters and not for 2:15 trotters, as erroneously given. The other classes for this meeting will be announced next week.

NOTES AND NEWS

Dione 2:07½, that good, game trotting mare which the late Thomas Keating handled for Mr. A. B. Spreckels, was recently shipped to Santa Rosa, Cal., to be bred to Lynwood W. 2:20½.

Remember, entries for a number of trotting meetings close April 1st.

The names of the contestants in the last race at the recent Pleasanton meeting are Quindo, a two-year-old (owned by Dr. Colestock), the winner, and Dick (Mr. Peache's), second. Time 3:14.

One of the finest looking and best proportioned trotting yearlings in Alameda county is owned by Rev. Father Powers of Livermore. This youngster is from his favorite driving mare Missie Medium (dam of Happy Madison, tral 2:12), by Rampart; second dam Belle Medium 2:20 (dam of Stam B. 2:11, etc.), by Happy Medium 400. The sire of this colt is the great Bon Voyage 2:12½, and in every way he is a credit to his royal breeding. His dam is in foal to Bon Voyage 2:12½ again.

Mr. W. J. East of Rohnerville, Cal., wishes all stallion owners would send him their stallion cards. Mr. East is an enthusiastic horseman and is the owner of some fine trotting stock.

Mr. George L. Warlow of Fresno writes: "I hope the 2:10 class pace may fill and give us a good contest. That is what pleases the public, even if the battle is not with the extremely fast class. Horse interests seem to keep up well and I am getting inquiries for stake colts (highly bred that will make good sires), from Arizona, New Mexico and Nevada, as well as from California. I sold the colt McCola for \$550, which is a very fair price for a yearling, although this youngster is an excellent individual and well staked in all the California Futurities."

It will be news that The Harvester, the colt by Walnut Hall 2:08½, dam by Moko, that brought \$9,500 at the recent New York sale, has been shipped to E. F. Geers, who will train and race him. The Harvester brought the highest price in recent years paid for a practically untried colt. While he was wonderfully well bred, and had great finish and conformation, as far as public trial was concerned, he had never been tested. He is said to possess a rare turn of speed, however, and with his rich breeding he can hardly help it if breeding counts for anything. Walnut Hall was a great trotter, while Moko became at an early age one of the greatest sires of trotting speed. Hence he is bred right on both sides of the house for a really great trotter, and now that he has gone into the hands of a man who is a past master of the training art, it will indeed be a disappointment if he does not make good.

Frank Lieginger of Stockton is one who is looking for fast pacers, and has sent over Maud L., a mare by Alex's Button, Bonnie W. 2:22½, and a mare by Booth, out of a Hawthorn dam to Star Pointer 1:59½.

C. Matteson of Haywards is the owner of Wm. Harold 2:13½ and will make the season of 1908 in Alameda county. Wm. Harold has a number of fine colts and fillies in different parts of the county, and they are all good.

There are several "prospects" at Willows this year and a number of horsemen are considering a proposition to build a half-mile track there to see what they will do. Dr. Randall has a three-year-old by J. A. Davis' stallion Dialect out of a Wilkes mare. Morrie Mye has two sisters, a two and a three-year-old by Dialect out of Morrie M.'s dam. One is a trotter and the other a pacer. The pacer is a good one and the making of a very fast performer.

"Columbus," in the Western Horseman, has an able and comprehensive article on the Morse Horse 8 in the last issue of that able journal.

A. S. Ashbrook, Lexington, Ky., this week sold the well-known trotting sire San Mateo 2:13½ by Simons 2:28, dam Moonstone by Sultan, to R. T. Tyler of Hickman, Ky., and the stallion is now at his new home, a companion in the stud to Alfred G. 2:19½. San Mateo is the sire of sixteen in the list, including May Earl 2:10½ and others.

"Farmer" John Abernathy of Mansfield, O., claims to have the banner colt of Ohio by Rey Direct 2:10, out of the good pacing mare Fanny (trial 2:13), by Joe Patchen 2:01½.

The trotting filly Ruth Dillon (3) 2:15½ by Sidney Dillon has grown greatly this winter and is now a big sturdy looking mare, which Millard Saunders thinks capable of a record below 2:10 any time she is asked to do so.

Drink Jackson's Napa Soda.

William Bradley is planning to beat the double team record this year with George G. 2:05½ and Sweet Marie 2:02, hooked to pole. If the great trotters take kindly to the work together, they will be started in double harness next summer for an attempt to beat 2:07½, the team record made by The Monk and Equity in 1904.

Favorita 2:25½, one of the few surviving daughters of George Wilkes, died last week at the Wellington Stock Farm, Wellington, O. She was the dam of Shaughran 2:08½, Poteen 2:12½ and Jack Dawson 2:16½.

A mass meeting was recently held in the City Hall to consider what should be done with the race track property recently bequeathed to Marysville by Mrs. Knight. After some discussion it was decided that the meeting should recommend to the Common Council that a five-acre piece at the south-east corner of the tract be set out to trees immediately, and that the race track and buildings be leased to the Yuba and Sutter Driving Association for one year at a nominal rent.

A corporation composed of prominent citizens of Indianapolis has bought the A. B. Clark 20,000-acre ranch on the Tongue river at Garland, Montana. Mr. Clarke was the originator of the range horse sales in this western country and managed by dint of hard work and doing the square thing with all his customers to build up a very lucrative business. It is estimated that it netted him annually many hundreds of thousands of dollars. Since his death the property has been managed and conducted under the name of the A. B. Clarke estate.

The third annual polo tournament and race meeting of the Southern California Polo and Pony Racing Association is to commence to-day, March 14th, and continue until March 21st, at the Coronado Country Club grounds near San Diego. Representatives from San Mateo, Burlingame, Del Monte, Santa Barbara, Los Angeles, Riverside and Coronado will be there with their ponies, and they are fit and ready to give the best exhibition of racing and polo playing ever witnessed in California.

It would pay the federal and state governments to buy up all the scrub stallions in the country and destroy them.—Horseman. Does this refer to the Breeding Bureau "cast offs," too?

The draft horses listed for sale at Pleasanton on the 16th of April are largely made up of matched pairs which have been worked together. Many of the teams weigh 3,000 to 3,300 pounds.

Harry Plummer, a well-known horseman, recently purchased a handsome three-year-old colt by Red Nuttle, out of a mare by Lustradon; second dam Blanche Wilkes by Ayer's Mambino Wilkes, for \$800 from A. F. Baker of Sonoma. This is a perfectly pure gaited trotter and will be entered throughout the California circuit this year.

R. E. ("Gil") Curry, that well-known, clever and capable trainer and driver of harness horses, who years ago, prior to his becoming identified with the runners, was one of the most prominent reinsmen in the country, has been spending most of the winter at Emeryville, Cal., at the big running meeting; but says that he is ready to quit that game and re-enter the harness horse arena permanently and in earnest and that he will soon determine upon some favorable location where he will open a public training stable. It will be remembered that a few years ago Gil, for a time, did forsake the runners and attended a number of Eastern and Western harness race meetings, incidentally driving some of the Salisbury horses in the Great Western Circuit, notably Bolivar, p. 2:00½ and the trotter Danube 2:12½, both being notable winners for him.

The Virginian horses, descendants of English importations and Spanish of a more remote date, were very small. Mr. Wallace examined numerous advertisements for strayed and of "found" horses, etc., about the period of 1750, and these clearly establish the fact that the average height was a small fraction over 13 hands 1 inch. Most were described as of 13 hands, and nearly all were between 13 hands and 14 hands. From advertisements also Mr. Wallace says he gleaned conclusive evidence that just two-thirds of them were natural pacers, while one-third were natural trotters. "Thus for more than a hundred years they had retained the peculiarities of their English ancestors in the reign of James I. in color (the Virginian horses were of all colors), size and gait."

Mr. B. A. Packard, territorial fair commissioner and manager of the Turkey Track Cattle Company of Naco and Tempo, Arizona, has recently purchased the beautiful stallion Direct View 2:08½, by Direct 2:05½, out of Formosa by Mansfield 1358, and placed him at the head of a very choice band of trotting bred mares on the Tempo farm. Numerous requests for the services of this horse have caused Mr. Packard to breed him to a few of the most approved mares; it would not be surprising if in a few years Arizona will be occupying a prominent position on the map as a place where the very highest class of trotters can be bought.

The patrons of light harness racing in Hanford are deeply interested in the race track which Mr. M. S. Daggs, one of the foremost citizens there, contemplates building. He is an enthusiastic horseman and it is understood that all the other lovers of a good trotter and pacer in that portion of Kings county have signified their intention to help him in every way to make this new enterprise a success. Great efforts are being made to have a race meeting there on May Day.

Horsemen who have "kept tab" on the speed of the trotters during the years 1906 and 1907 on this Coast claim that there are two races which should draw the crowds—a 2:10 class and a free-for-all, and cut out the 2:10 class, as only one or two that are eligible are in California at present.

The Oakland meeting is being well advertised and every horseman should send a nomination for it.

The beautiful McKinney mare Yolande 2:14½, owned by Dr. C. Masoero of this city, has wintered well at La Siesta Farm, near San Jose. Patsy Davey has had charge of her, and everybody knows what a splendid caretaker he is. It would not be asking too much of this mare to see her get a mark of 2:06 this year. She is one of the handsomest as well as best bred McKinneys in the United States, her dam, Muscovita, being by Guy Wilkes 2:15½, out of Muscova 2:28 (dam of Mamie R. 2:15½, Oro Belmont 2:15½), by Belmont 64; third dam Mosa (dam of five in 2:30), by Woodford Mambrino 2:21½; fourth dam Hermosa (great broodmare), by Edwin Forrest 49; fifth dam Black Rose by Tom Teemer.

About the best formed yearling in Pleasanton is a seal brown by Star Pointer 1:59½, out of a mare by Direct 2:05½. Charley De Ryder is the proud owner, and by the way he shakes his head when asked to name a price, one is convinced that he "knows a little about this one's speed anyway, if he is not sure of any other in his string."

J. W. Marshall, owner of Aerolite 2:11½, was at Pleasanton Saturday last, and after timing his filly Berenice (sister to Owhyo 2:07½), he put his timer back in his pocket and said: "I think she will do; I am satisfied." But he did not say how fast she had shown.

L. Crellin's twenty-four-year-old mare Bertha (dam of Diablo 2:09½ and eight others in 2:30), is due to foal February 24th. The sire of this much looked for youngster is the great Aerolite 2:11½. Bertha will be returned to his court again.

Two mares that raced through the Northern Circuit last year, Nutwood Princess, close up in 2:12½, and her full sister, with a trial of 2:15, will be sold at Pleasanton on April 17th.

Carey Montgomery's mare Effie Logan (dam of Sir Albert S. 2:03½), recently dropped twins that were sired by Star Pointer 1:59½. Both foals died shortly after birth, and Mr. Montgomery, although deeply disappointed, determined to send the mare to the "King of Pacing Stallions" again this year.

Budd Doble and Mr. McDoel of Chicago spent a very interesting day at Pleasanton last Saturday, talking over old times, looking at the horses and admiring the youngsters by Kinney Lou 2:07½. These Kinney Lous are the talk of the horsemen on this celebrated course.

P. W. Bellingall of Alameda has a Kinney Lou filly, out of a mare by Secretary, in Charles De Ryder's care at Pleasanton, that is one of the fastest and purest gaited trotters the latter has ever handled.

Byron Lacey will show on April 15th that he is up to a mile in 2:07. He sells on the 17th.

An Onward mare with a trial of 2:12, bred to Star Pointer 1:59½, is a sample of the "class" at the Pleasanton sale.

Grove L. Ayres of San Francisco is the owner of a beautiful three-year-old trotting filly by Cupid 2:18. She is called Queen of Hearts; her dam is Lady (sister to Yolo Maid 2:12), by Alexander Button; second dam Molly by Dietz's St. Clair; third dam Jenny Louis by Young St. Louis, etc. This filly is now at N. D. Dutcher's place, Livermore.

The prospects for a "banner" year in California for farmers, orchardists, vineyardists, stock men and horse breeders were never better than they are this year.

At La Grande, Oregon, a carload of twenty-one horses was purchased by a dealer for \$4,000. They were all geldings and weighed from 1,350 to 1,600. The shipper refused \$500 on his purchase before the train left the depot. This shows that horses are not decreasing in price.

Helen Norte 2:09½, owned by Judge Brents of Walla Walla, is in charge of Harrie Jones, Rushville, Indiana, and will likely be raced on the great Western Circuit this year. Her full sister Magladi 2:10½ is in Fred Ward's stable at Los Angeles and will be raced on the Pacific Coast.

It is stated that the ex-American stallion Baron Rogers 2:09¾, a son of Baron Wilkes 2:18, has sired more than forty trotters in Russia that have beaten 2:30 in that country. Baron H. 2:19, an own brother to Baron Rogers, was purchased by Frank Caton at the New York auction last fall and is now in stud at Moscow.

A horse belonging to J. Lanerlann of Oak Park, Sacramento, was struck by lightning and instantly killed during a thunderstorm which occurred at that place one day last week. James Brown, who was leading the animal, barely escaped death. The storm lasted for about fifteen minutes, and when it had blown over, the ground was covered with hail to the depth of perhaps an inch. When the lightning struck the horse Brown was knocked to the ground, but not injured. The storm, while it lasted, was the heaviest that has been experienced in that vicinity for years.

Stock stallions, Searchlight pacers and trotters, and a few other speed burners, together with fancy road horses and brood mares, is the programme for Pleasanton on the 17th.

When the many improvements now under way at Ardmaer Stock Farm, Raritan, N. J., are completed, William Bradley, owner of Major Delmar 1:59¾, Sweet Marie 2:02, George G. 2:05¾, Guy Axworthy 2:08¾, Todd 2:14¾, etc., will have one of the finest equipped breeding establishments in the East. The main barn will be an eighth of a mile in length and, beside having a straightaway track the entire length of it, will contain accommodations for 164 horses.

At the sale at Pleasanton, under the auspices of the Chamber of Commerce, every horse, every consignor and every buyer will look alike and get the best efforts of everyone connected with the sale.

Mr. W. T. McBride, who is at present at Pleasanton gathering some choice young mares, intending (if they show speed enough), to have them trained, but above all other things he intends to start in breeding on a small scale on a farm "up in Oregon," and as one of the select band has purchased from J. D. Kalar of Salinas the filly "Peaches," which has been the subject of so much praise in that "old Monterey town." Peaches was sired by Searchlight 2:03¾, dam Lildine by Boodle 2:12¾; second dam Gabilan Maid (sister to Lady Ellen, dam of six in 2:30), by Carr's Mambrino; third dam Ida May Jr., by Owen Dale; fourth dam Ida May by Williamson's Belmont; fifth dam by Red Buck. She is one of the members of Henry Helman's string preparatory to being sent North.

The best and greatest of all sales held in the West will be the big sale at Pleasanton race track, under the auspices of the Pleasanton Chamber of Commerce, April 16th, 17th and 18th. Each day, and from early morning until the noon hour, consignors will be afforded every opportunity and assistance in showing their horses to buyers who are bound to be present from all over the country, catalogue in hand, looking over the consignments. The track scene promises to be one continuous race meeting. Choice locations in the catalogue are being reserved at the request of consignors, who will send more good horses than were ever booked for one sale. Write for catalogue and make arrangements to spend the week at Pleasanton.

In the greatest horse parade ever seen in Walla Walla, Wash., on March 1st, were a number of well-known horses, Zolock 2:05¾ being in the lead, and George Kelley's Bonnie McK. and William Hogoboom's Teddy A. being just behind him in the group of standard-bred horses. Everybody in Walla Walla "has the fever" and the greatest excitement prevails over the prospects for fine prices for good horses in that locality this year.

A number of farmers living in the vicinity of Yolo have effected an organization known as the Yolo Draft Horse Association. A. M. Bemmerly was elected President and G. H. Hoppin Secretary and Treasurer. The other members are Charles Hoppin, L. Cramer, August Kergel, James Taylor, E. L. Pockman and J. Giguere. The association has completed a deal with A. E. Mapes, local representative for Dunham-Fletcher Company of Illinois, for the purchase of the Belgian stallion Nogi. This horse is a handsome black animal, imported from France about four months ago. He is four years old and weighs a ton.

On "St. Patrick's Day in the Morning" there will be great preparations made for a matinee race on the association track at Redlands. The drivers will disregard the color line and the orange will blend with the green on this beautiful course.

The young Jay Bird stallion Alconda Jay is commanding a high class lot of mares this season. Among those received at his harem last week were two sent up from Salinas, Cal., by J. B. Iverson, breeder of Dictatress 2:08¾, North Star 2:11¾, etc. One is by Diablo 2:09¾, out of Annie Fay, by Antee; the other by Stam B., out of same mare; a McKinney mare—full sister to Greco B. (trial 2:12¾); Lady Mowry 2:09¾, by McKinney; and "Twenty Third" (dam of Sterling McKinney 2:09¾), by Director 2:17.

The Bonnie Directs will be sold on the 17th. This bunch will set fast trials on the 15th.

Can any one find fault with the outlook for good harness horse racing on the Pacific Coast this year?

Perhaps, a beautiful filly by Searchlight 2:03¾ out of Bertha (the greatest speed-producing mare in America), is to be bred to Star Pointer this month.

Have you noticed the advertisement of the Charter Oak meeting in this issue?

The draft horses that furnish the "opener" at the Pleasanton sale are worth going a long way to buy.

A full sister to Directly 2:03¾ and a mare by Direct 2:05¾, out of Lilly Stanly, will be bred to Star Pointer 1:59¾ this season.

Chicket 2:10 is in foal to Aerolite 2:11½ and will drop a foal this month. Mr. Meek will breed this wonderful mare back to this great son of Searchlight 2:03¾.

A. J. Clifford of Turlock, Cal., has sold Gentrode 2:19, by John R. Gentry 2:00½, to D. E. Gilroy of the same place. Gentrode is one of the handsomest stallions in the San Joaquin valley.

If this warm weather continues the track at Santa Rosa will be fit to work horses on in two weeks.

Over \$2,000 are to be spent in constructing a new half-mile race track at Auburn. A gang of laborers has been working some time on it. A grandstand, stables and other buildings will be built in time for the county fair which is to be held there this fall.

March the 21st the Pleasanton Matinee Club will race off a programme of four races. There will be from four to six starters in every class, and as there is now at the track at least thirty horses that are up to fast miles, and "itching for a race," visitors may expect real racing and a few miles around 2:10.

The Sidney Dillons will be very much in the lime-light on the California Circuit this year. On almost all the principal racetracks are a few sons and daughters of this great sire, and they are either trotting or pacing remarkably fast. At Los Angeles Walter Maben has a five-year-old mare called Rapidan Dillon. She is out of By By (dam of Guy Dillon 2:23¾, etc.), by Nutwood 2:18¾; second dam Rapidan (great brood mare), by Dictator, etc. On Saturday last Mr. Maben drove her a mile on the racetrack in Los Angeles in 2:14½, last half in 1:06, last quarter in 32 seconds. Mr. Maben says she can trot the mile in 2:12 just now, as she went this mile so easily, having to "talk her back" all the way, he does not want to do any better for a few weeks. She belongs to Jos. H. Bohon of Los Angeles.

Entries to the big sale in Pleasanton close March 16th—next Monday. This is the last notification.

Frank S. Turner of Santa Rosa, the lessee of the beautiful track there, has signified his intention to open a public training stable. Serving a long apprenticeship at the famous Jewett farm near Buffalo, N. Y., and having been for twelve years superintendent of the Santa Rosa Stock Farm, where he broke, handled and drove nearly all the best horses there—and no one ever saw better trained horses than those he handled—Mr. Turner is thoroughly qualified by temperament, experience and skill to balance and fit horses for campaigning purposes. His honesty is unquestioned, and as a caretaker a look at his horses at any time will be his best endorsement. He should have no trouble in getting a number of good ones to handle. Every horseman who knows him wishes him success.

Owners of standard bred stallions in California report that there will be more richly bred mares stunted this year than during any other for the past fifteen years.

By Guy (dam of Guy Dillon 2:23¾ and Martha Dillon 2:29¾), by Guy Wilkes 2:15¾ out of By By by Nutwood 2:18¾, etc., is due to foal to Lynwood W. 2:20¾ March 28th. The prospective foal should be a good one.

General Robert E. Lee's famous charger, Traveler, was a product of Greenbrier Farm, W. Va., which is now the home of General Watts 2:06¾.

S. B. Wright's mare Maud P. 2:29¾ dropped twins (both dead) last week. They were by Lynwood W. 2:20¾. On an adjoining farm near Santa Rosa, By By (sister to Lockheart 2:08¾), by Nutwood met with the same misfortune. They were by Guy Dillon 2:23¾.

Frank L. Gilpatrick of this city made another purchase last Wednesday, a beautiful chestnut mare by his stallion Washington McKinney out of Hazel Turk by Silas Skinner; second dam Miss Brown (dam of Tietam 2:19, Dan Oaknut 2:24¾, Major Brown (3) 2:28, and Dan Brown 2:24¾), by Brown's Volunteer, etc. Terms private. This mare is five years old and has never been trained and is as handsome as a picture.

Robert A. Smith, the well-known horseman of Los Angeles, whose leg was fractured by a horse kicking him, is on the fair road to recovery. At one time it was thought amputation would be necessary.

Princess 2:13¾ is booked to Alconda Jay.

The matinee which was to have taken place at Los Angeles last Saturday has been postponed until next Tuesday, March 17th, on account of the wet weather.

The first trotting foal of the season at Hamburg Place, Lexington, Ky., is a bay colt by Vice Commodore, 2:11, out of Silicon, 2:13¾ (dam of Siliko 2:11¾), by Wilton. This new half-brother to the winner of the Kentucky Futurity, which was sold last fall for \$35,000 to go to England, is the property of Edward and Joseph Madden. It was foaled March 4th and is considered one of the most valuable trotting foals born in Kentucky this season. The sire is a grandson of Nancy Hanks, 2:04, who is spending her last days at Hamburg Place.

THE CHICO RACE TRACK.

The directors of the Chico Drivers' Association met in the office of Secretary O'Connor last Monday afternoon and proceeded to lay plans for the rushing of the work on their track southeast of Chico, and intend to have it in shape within six weeks. No expense will be spared to make it one of the finest and fastest race courses in the state.

Water will be furnished from a well to be constructed in the center, and a motor will pump the water into large tank. The station has been named Speedwell and the Northern Electric cars will stop at the site. The railroad people intend to build a side track and switch in order to accommodate the cars of stock which will be shipped in and out of the track.

Contracts were let this afternoon for the erection of one hundred stalls, and twenty scraper teams will be put to work leveling the track immediately.

Thomas Stiles was instructed to plant umbrella and walnut trees the full length of the track on the outside and will give it a fine appearance besides furnishing plenty of shade. Figures for a fence to encircle the track were also taken. The track is to be 80 feet wide with the corners banked four feet.

The directors anticipate holding a race meet this spring early in May. This will be for local horses only. Later in the season horses from outside will be brought in and a series of races will be pulled off.

The directors estimate that there are over 200 horses owned by local horsemen that will be entered in the association and a large number of animals from the outside are expected as soon as the track is in shape.—Record.

KENTUCKY ANTI-POOLROOM LAW.

The anti-poolroom bill drafted by Senator A. R. Burnham, the former Chief Justice of the Kentucky Court of Appeals, passed the Senate at Frankfort March 4th, by a vote of 33 to 4, and will unquestionably pass the House and will be signed by Governor Wilson.

The bill makes it unlawful "to provide, open, control, manage or keep any room, building, float vessel, or premises" in the State wherein bets upon horse races can be made. The penalty for operating a poolroom is a fine of from \$1,000 to \$5,000 and imprisonment in the county jail from six months to one year. For an agent or employee, six months in jail, for a person who leases a place for betting from \$1,000 to \$5,000, for persons who assemble to make wagers from ten to thirty days in jail, and any officer with police power who fails or refuses to enforce the law will be imprisoned in jail for six months to one year, shall forfeit office and be ineligible to hold any office in the gift of the commonwealth.

It is provided that this act shall not apply to inclosures wherein horse racing is conducted under license from the State Racing Commission, and it shall not apply to inclosures wherein trotting and pacing races are being conducted by regularly organized associations for that purpose.

SOMETHING NEW FOR CHECKING HORSES.

One of the best devices on the market of its kind is the Ellis Improved Hutton Patent Checking Device which is advertised in another column of this issue. These devices are guaranteed in every respect, both as to materials and workmanship, and if they don't accomplish all that is claimed for them the purchase price will be refunded. G. S. Ellis & Son have been putting out this guarantee for the last two years, and so far only two have been returned, one from a party who never opened the package and the other from a man who wrote that his mare was in foal and stated that as soon as the colt was foaled he would want one of them.

G. S. Ellis & Son of Cincinnati are one of the largest manufacturers of harness goods in the country. They are thoroughly reliable and by honest business methods have built up a large mail order business throughout the United States. They make a specialty of mail order trade, and any one wanting anything in their line need have no hesitancy in sending to them, as they can count on the prices being right and the goods all that is claimed for them. Any one who owns a horse should have one of their catalogues. See advertisement.

DEATH OF JOHN KELLY.

Trotting horsemen all over the country will hear with genuine sorrow of the death of John Kelly, one of the best known horse trainers and race drivers of the harness turf.

John Kelly began his early career as a trainer near Chicago, where he came into public notice by many victories in the balmy days of the once famous Dexter Park track.

From there he moved to Janesville, Wis., and was training a large string of fast horses when he was engaged by Monroe Salisbury, at that time at the height of his fame as the owner of the most formidable string of horses ever brought East from California.

The first and most noted horse Kelly raced when in the employ of Salisbury was the stallion Directum, for seven years the world's champion trotting stallion.

On September 4, 1893, Kelly drove Directum to a record of 2:07, lowering the world's championship trotting stallion mark from 2:07½, held by Kremlin. On September 15th of the same year he gave the stallion a mark of 2:06½ in a start against time, at the Washington Park track, Chicago.

At Nashville, Tenn., on October 18th, he reduced this record to 2:05½, which stood until 1900, when it was lowered to 2:04½ by Cresceus and then to 2:02½ by the same horse a year later, which still stands as the world's record for a trotting stallion.

Because of the wonderful showing of Directum, Kelly was popularly known as John "Directum" Kelly. Other noted horses which he trained and raced were Direct 2:05½, Flying Jib 2:04 and several others.

After leaving the employ of Monroe Salisbury, Kelly trained the East View Farm string of James Butler with great success, among others marking Directum Kelly 2:08¾.

He abandoned the turf to conduct a training and boarding stable on Dyckman street, near the Speedway, New York, and for several years was quite successful in the business. He handled a large number of the fastest horses driven on the Harlem River Drive, among his regular boarders being Peter Sterling, 2:11½, the world's champion trotting gelding, owned by Frank Work.

Early last spring Kelly was once more attracted by the racing bee and sold out his stable to Dave McClary. He went down the line of the Grand Circuit with the trotting mare Tuna, which was left in his stable during the pending suit between the owner of the mare and Jack Curry, who raced her in 1906.

Kelly had only partial success with Tuna and near the close of the season he was reported to have sunk a lot of money in trying to race the mare. He was in New York until the Old Glory sale, where he sold Tuna and left for Janesville, Wis., where he died.

While the title of "Directum" Kelly was given to him for many years and which was written in letters on the walls of his Dyckman street stable, yet to the thousands of trotting horsemen he was merely "Honest" John Kelly, as few race drivers of the harness turf enjoyed as good a reputation during their long careers as Kelly, and surely few were as popular as the deceased.

Throughout his long and honorable career on the turf, driving some of the most famous trotters and pacers, Kelly was always looked upon as a reinsman who drove his races to win, and his name had never been linked with any scandal of any nature.

Immediately after leaving New York, Kelly was taken sick and confined to his room with a malady from which there was no cure. He leaves a widow and a child.

While the deceased was working for Monroe Salisbury many incidents are related of the affection that existed between them. John Kelly was a small, hardy young man, a very capable driver, and had as much "nerve" as any driver ever Mr. Salisbury had. He was remarkably quiet and taciturn, and on this account alone seemed to suit Mr. Salisbury, for he never liked a "two-minute talker." The last time I saw Mr. Kelly it was at the Old Glory sale, New York, talking with Andy McDowell, and he was as an enthusiastic lover of California as any of us there. He referred to a day which I had almost forgotten. When I arrived with Mr. Salisbury at Pleasanton it was in the month of April, 1893. John was getting Directum ready for his Eastern campaign, and the horse that week had developed a new trick (he was always doing something extraordinary), and that was "boring in" to the inner rail of the track, and, in his desire to show how much superior he was to every other horse, he seemed to delight in crashing the sulky wheels into the fence and unseating Kelly. As soon as we came in Kelly limped over to greet Mr. Salisbury and in a few words related his mishaps with the colt. The "old man," as he was affectionately called, stood still for a moment, looked over to the stall where the horse was, and said: "Well, John, this won't do. He is the king and he knows it. He will have to learn something he never knew before, and I guess this is as good a time as any. Hitch him up to that old skeleton wagon and I'll drive him." Kelly was alarmed and suggested: "A breaking cart would be better, wouldn't it, Mr. Salisbury?" "No!" was the reply. "Give me the wagon!" Directum was hitched and kept standing until Mr. Salisbury returned with a very long buggy whip, which he borrowed from a gentleman who was sitting behind a team of horses just outside the track.

Getting into the wagon, he turned around and smilingly said: "Now, John, you and Mr. Layng go down to the first quarter and see the fun. I'll teach this fellow what the upper hand is." We walked over to the point designated, and crossing the track Kelly said he was afraid some accident would happen. After scoring up and down the stretch a few times we saw Salisbury urge the black stallion on. Just before reaching the turn he shifted the lines to his right hand, and taking the buggy whip in his left he leaned over and, just as Directum was bolting for the fence, he brought the cracker of the whip across the left side of the face of the surprised horse and repeated it with all the strength that was in his powerful arm. Directum jumped away from the fence as if it would hit him, too. After repeating this lesson Mr. Salisbury drove Directum to where we were standing and said: "John you get in there and show that fellow that your left hand is a good upper hand. He will have more respect for you and for that fence from this time on." John did as he was told, and Directum acted well in all his races until he got to Grand Rapids, Mich., when Mr. Salisbury "repeated the dose" and the "King" surrendered.

THE BLUE RIBBON SALE.

Attention is called to the "Blue Ribbon" auction at Cleveland, Ohio, the week of May 18th to 22d. This has always been the favorite auction for California breeders and owners, and in the past Messrs. Fasig, Tipton Co. have made many sensational sales for their account.

The scarcity of racing material in the East, particularly green trotters and pacers, that can show winning ability, and the great demand for this class of horse has enabled them to get higher prices the past winter for good horses than at any time since they have been in business. They believe that at this May sale they can obtain more than satisfactory results for any horses—good horses—that may be sent from California.

The Cleveland sale last May set a new record for spring sales. At this sale Blacklock sold for \$17,500; George G., \$10,000; Major Delmar, \$12,000; while the entire sale amounted to \$135,880, the 238 head sold averaging \$570, the highest average obtained in any sale of recent years. This is sufficient evidence that Cleveland is one of the greatest markets in the world.

They would be glad to have a consignment from any of our California horsemen for this sale, believing that it is an opportunity they cannot afford to overlook. If they have but one or two head to sell, they can communicate with Mr. Chas. L. De Ryder, Pleasanton, Cal., who will have a consignment for the sale and with whom arrangements can be made in the matter of preparation, shipping, etc., thus reducing in a large degree the cost of shipping East.

The California consignments have always been made the "features" of these sales, the very best positions have been assigned them and the best of care has been given all equine "Natives of the Golden West," both prior to and during the sale.

W. B. ZIBBELL GETS \$70,000.

Willard B. Zibbell must accept a reduction in award of damages from \$100,000 to \$70,000 or take his chances on an appeal by the railroad company to the Supreme Court.

This was in effect the conditional ruling on the motion for a new trial made by Judge Church last Monday in the case of the young horseman against the Southern Pacific Company for injuries sustained in being run over by a train at the depot at Fresno one evening before the Trotting Horse Breeders' Association races four seasons ago.

Zibbell lost both arms and a leg, and the case is notable for the fact that the jury rendered judgment for the full amount prayed for, namely \$100,000. The case stands of record also in the United States for the largest verdict ever rendered by a jury in a case for personal injuries received. The railroad asked for a new trial on the ground of excessiveness of damages, and Judge Church's ruling was to grant the new trial unless the plaintiff consents to a reduction of the award of damages to \$70,000.

Judge Church stated that even this award is the highest known to him in a case of this kind. There is another case pending against the railroad, growing out of the accident in which Zibbell was maimed. It is the one by the mother of Blaine S. McMahon, who was a reporter for the Breeder and Sportsman, and whose injuries proved fatal.

SEND FOR ONE.

The Houghton Sulky Company of Marion, Ohio, have issued their catalogue No. 4. It is a work of art and should prove interesting and profitable reading to anyone who cares to know what is the latest and best in sulkies, carts and all classes of speeding and pleasure vehicles. Catalogue will be sent on application, and every one who has a horse should send for one.

Wm. Kinney, the "bike" man, says: "Business is beginning to boom with me ever since the programmes of the race meetings appeared. I sold one of my new carts yesterday to J. K. Chell and am getting in a new supply."

SALINAS TRACK NOTES.

Salinas, Cal., March 6, 1908.

Editor Breeder and Sportsman:

The weather and track have been very good here all winter, but the heavy rains of last week have made the course heavy. There are about thirty horses in training. Mr. Williams has Highland C. 2:19½, Sidonis, a green trotter that worked a mile in 2:12 last year, and Diabull, belonging to Mr. Griswall. This last named is a fast pacer. He also has a black trotter by Wild Nutling owned by James Smith. This one looks like ready money. He has a two-year-old colt by Del Coronado 2:09½, owned by James B. Iverson, a black pacer by Del Norte and a chestnut stallion called Major that is trotting very fast for the short time he has been handled.

Mr. Coombs has a three-year-old called Albert Drieda which is a beautifully gaited and fast moving pacer. He also has a half sister to this one, but she is a two-year-old. Her sire was Hambletonian Wilkes. He is also handling a three-year-old trotter by Strathstone.

I have fifteen head and have not been a mile in 2:40 yet, as I believe there is plenty of time for fast work. It is my intention to race North Star 2:11½, Della Derby 2:17, Ray o'Light 2:13½, Salvia, a green pacer by Dictatus Medium, that showed me she would do when she came in third to Magladi and McFadyen at Woodland two years ago. I have Elam 2:22½ and Red Robin by Robin, a grand big trotter that belongs to Paul Bianchi, and two three-year-olds, trotters, by Delphi 2:12½; also two two-year-olds by Delphi. One is owned by James B. Iverson, who is also the owner of a two-year-old by Lecco 2:09½. My colts are all in good shape and trotting all the time. I have a fine six-year-old mare by McKinney 2:11½, dam by Nutwood Wilkes 2:16½—the Golden Cross. I drove her a quarter in forty seconds as a two-year-old. She is the property of Robert Garside.

Minna B., by Electioneer, foaled a fine colt by Oro Guy which I have named Main Guy. By the way he trots he looks like he will be a Futurity winner. North Star and Della Derby are both very high in flesh. I have only worked the mare a few times and she showed me that she has not lost any of her speed.

Mr. Kalar has sold his mare Peaches by Searchlight 2:03½, out of Lilinde by Boodle 2:12½, and has commenced on a two-year-old pacer by Delphi, out of Duplicate by Charles Derby 2:20, that looks, acts and paces like his daddy, and my only hope is that he has the speed. I cannot see, however, why he will not be as good as any in this pretty valley. Yours,

C. WHITEHEAD.

RIVERSIDE NOTES.

Editor Breeder and Sportsman:

Mr. Thomson of the Tourist Stable and Mr. Holland of the People's Feed Yard have joined the Driving Club.

Mr. Pete Beatty will keep his string of horses at the race track. Virgil Campbell will take care of them.

Mr. Lockett of Corona has taken his McKinney stallion home to breed to a few choice mares. In two months' work this horse trotted a mile in 2:36½.

McO'D., the green pacer sold by Mr. Nelson to Mr. Pounder of Los Angeles, will start in the free-for-all pace at the big matinee meeting to be given by the Los Angeles Driving Club March 17th.

"Worth While," by Allerton, has been leased by Mr. Bonnell and taken to the San Bernardino track, where he will make the season of 1908. Mr. Judd only jogged him until two weeks ago. In three workouts he stepped a mile in 2:36.

Mr. Lozenby has sold his fast pacer "Dewey" to Mr. Hudson of Highgrove, who will use him for a road horse.

Dr. Fletcher, who has established a fine veterinary hospital here, has joined the Driving Club and acted as one of the judges at the last matinee.

Mr. Roy Davis of the Citizens' Bank has a fine looking pacer which he will matinee soon.

There should be a fine race between Lauretta and Marigold at San Bernardino on the 17th, as they finished very close together here.

Mr. Potter will start his Zolock mare. If properly warmed up she ought to trot close to 2:30. His young Stanton Wilkes colt is showing up nicely.

H. G.

ANOTHER NEW RACETRACK.

A number of horsemen in Oroville, Butte county, met last Monday evening and decided to organize a driving association, which step had been under consideration for some time. A site for a race track has been selected. It is at the junction of the Palermo and Wyandotte roads, about a mile from Oroville, and the cost of acquiring it will be about \$8,000.

To raise this sum and the amount necessary to convert the tract into a racing park and equip it with stables, an association will be incorporated and shares of stock will be offered for sale.

Those promoting the enterprise are J. A. Huntington, Dr. Tucker, Dr. Marks, M. King, W. J. Sharkey, E. B. Fry, Oscar Pauley and John Colm.

Only One "BROMO QUININE." Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 Cents.

1908 - ?			

A QUARTER OF A MILLION.

When the Judges on Labor Day at Hartford, Connecticut, answer the query set forth on the tablet accompanying this sketch by announcing the winner of The Charter Oak, the associations which have controlled that course since 1883 will have paid a quarter of a million for the event. At each renewal of this race it has been worth \$10,000, except in 1894, when it was won by Ralph Wilkes. That year it was worth but one-half that amount.

Since it was established The Charter Oak has always resulted in memorable contests. While its conditions made it a heat race but two horses won it off the reel. They were Patron and Ralph Wilkes, the latter being forced out in 2:12½, 2:12¾, 2:10¾ by Mahogany. In Director's year Wilson and Fanny Witherspoon won heats before Goldsmith got the black horse in front, while King Almont also won a heat from Harry Wilkes in 1884. The following season Joe Davis, Adelaide and Kenilworth each had two heats to their credit when they appeared for the deciding mile. Joe Davis won it, with Adelaide second, Kenilworth being distanced.

Michigan made a bold bid for first honors in 1886 with Belle F. She won the first two heats, but was unable to finish better than third in the next three, which were won by Oliver K., with Prince Wilkes second in each of them. The latter was also second to Patron the following season, while Kit Curry won a heat from Spofford in 1888.

The struggle between Nelson and Alcryon was one of the memorable events of 1889. Nelson won the first heat away off in 2:14¾. This was within a quarter of a second of the race record of the Grand Circuit. The "Northern King," however, was unable to stall off Alcryon in the second mile in 2:16¾, after which the blind horse had it all his own way.

The next two Charter Oaks were won by The Village Farm with Prince Regent and Nightingale, both of which were by Mambrino King. Nine heats were required to find the winner in Nightingale's year. Another Nightingale also won the race in 1892. The black daughter of Osgood's Patchen swept all before her from Detroit until she met Kremlin in the Transylvania at Lexington. In that event the gallant son of Lord Russell avenged his defeat at Hartford and proved himself a magnificent race horse.

The Charter Oak of 1893 was trotted at Fleetwood Park, New York, where it was won by Harrietta, a daughter of Alcyon, she being the second representative of that sire to secure first honors in this event.

After Ralph Wilkes' year there was a skip until 1898, when the present management took charge of Charter Oak Park. It reopened the old event and sixteen horses took a word in it. The first heat was won by Mattie Patterson, while the honors and the beautiful cup offered in addition to the purse went to John Nolan, a product of Montana, which was owned at the time in New Haven, Connecticut. He placed the record for the race at 2:09½. The following year Lord Vincent reduced it to 2:09¾. The present record for the race was made by Georgena in 1900, when, after losing a heat to Alameda in 2:09¾, she came back in 2:07¾. Both of the winners in the next two years stepped heats better than 2:10, but Nutboy, the winner of 1906, is the only one that has as yet equalled the record made by the flying daughter of Epaulet, although many consider Wilkes Heart's second mile in 2:08¾ over a heavy track last fall the best that has yet been made in a race for The Charter Oak.

Of the winners of The Charter Oak six were bred in Kentucky, five in New York, two in Ohio, two in Illinois, while Montana, Pennsylvania, California, Michigan, Washington, Iowa and Mississippi have each contributed one. The query now is—what state will produce the winner of The Charter Oak in 1908 as well as the winner of the Nutmeg for 2:07 pacers? The money is ready for both of them, while the conditions under which they can compete for it appear in our advertising columns.

John A. McKerron, the well-known harness and horse boot manufacturer, reports: "Business improving and trade prospects brightening."

AMAZONIA, DAM OF ABDALLAH I.

It has been said that all great men and great horses have had mothers that possessed unusual ability in the particular lines in which their sons gained distinction. Abdallah I was the most remarkable trotting sire of his day. Horsemen who were well qualified to judge have expressed the opinion that Abdallah was fully as much indebted to his dam, Amazonia, for his superior trotting quality as to his sire, Mambrino, a thoroughbred son of imported Messenger.

Amazonia, though a very homely animal, was a remarkable mare both in regard to trotting speed and endurance. She must have inherited these qualities from some of her ancestors. Her breeder is not positively known for his name has never been given. Her history, as recorded, begins at the time when, as a four-year-old, she was found, as one of a pair, near Philadelphia, Pa., by Mr. B. T. Kissam, a wholesale merchant of New York City, while he was on a pleasure trip. Mr. Kissam bought her for his private pleasure driving on the roads or boulevards around New York City.

But little attention was paid to pedigree at that time and no effort was made to learn the breeding of Amazonian, until after her son, Abdallah, had become noted as a sire of trotters. Mr. B. T. Kissam was not then living, but his brother, Mr. Timothy T. Kissam, remembered that B. T. Kissam stated that the man from whom he bought Amazonia told him that she was by a get of imported Messenger and nothing further has ever been learned concerning her ancestry.

Amazonia was described by those who knew her as a "chestnut in color, fifteen hands three inches high, a coarse, flat-sided mare, with a big, rough head, very wide between the eyes, long, homely ears, ragged hips, a rat tail and powerful flat legs, covered with coarse hair at the fetlocks." All accounts agree in saying "she was a trotter of the highest type, a road mare of great distinction, many said without an equal." After driving Amazonia on the road for a time Mr. Kissam sold her to his uncle, John Tredwell, a resident of Long Island, N. Y., the man who bred Abdallah. It is said that while owned by Mr. Tredwell she was engaged in a number of races on the old Newmarket Course, Long Island, as early as about 1817, and trotted a mile, according to the recollection of an old-time horseman, in about 2:52, which was very fast for that early day.

There was a son of Messenger in the section of the country where Amazonia was raised named Saratoga, whose get were noted for inclination to stick to the trot and for unusual speed at that gait. Saratoga was also a very plain and somewhat angular animal, and some of his get were even plainer and more angular than himself. Mr. Wallace said of Saratoga that "he was a flea-bitten gray, a great strong horse, that was driven in harness and did service in several counties in Pennsylvania. He was kept at work on the farm of his owner, covering mares only as opportunity offered. He was a slashing-gaited trotter but it was only when his owner was away from home and got an extra drink or two that anybody had an opportunity to see how fast he could go."

The statement of the seller of Amazonia, the location with the conformation of the mare, her inclination to stick to the trot, her speed at that gait, and her endurance as a roadster, make it highly probable, if not absolutely certain, that she was by Saratoga. There was a stallion, called Dove, raised in the locality where Amazonia originated that bore so close a resemblance to Amazonia in general appearance and characteristics as to indicate a very close relationship between the two. A Mr. Edward VanMeter, an aged and eminent lawyer of Salem, N. J., who knew this horse, Dove, described him as follows:

"Dove was a gray stallion about 15½ hands high. It was claimed that when urged Dove could pass every horse on the trot that came in contact with him from 1817 until he was injured and unfit for service. There was never a stallion in the county of Salem so much ridiculed as was this stallion, Dove, in his day. He was the ugliest (most ungainly) stallion living. His general appearance was rough as rough could be. He had raw bones, big head, long ears, legs flat and wide, feet large and flat. I had an opportunity to know much of Dove's progeny. They were fit for all service, the plow, the team or the road, kind and docile at work, prompt and free drivers, and when pushed for a display of speed the average of the whole progeny could go away from any horse on a trot that could not beat 3:30 to a mile."

In general appearance and characteristics Amazonia was so like Dove as to lead the late H. T. Helm, author of American Roadsters and Trotters, to believe that Dove was the sire of Amazonia. This, however, was impossible, for Amazonia was foaled earlier than Dove, if dates as given were approximately correct. It is far more probable that Amazonia may have been a full sister of Dove, or was bred in similar lines. Mr. Wallace, who registered Dove in volume one of the American Trotting Register, evidently did not take the trouble to carefully investigate the breeding of Dove's dam. Mr. Helm states that the dam of Dove was by Sir Solomon, second dam by imported Expedition, and third dam by imported Messenger.

The color of Amazonia was chestnut. This is not a Messenger characteristic, and must have been inherited from some other source. The second dam

of Dove was by imported Expedition, and Expedition's color was chestnut. The difference in color of Amazonia, a chestnut, and Dove, a gray, of itself need raise no doubt as to their being by the same sire and from the same dam. There have been many instances of a similar kind. Maud S. 2:08¾ was chestnut. Her full sister, Lady Russell, was gray. Her full brother, Lord Russell, was bay. Nutwood 2:18¾ was chestnut. His full sister, Cora Belmont 2:24¾, and his full brother, Nutbourne, were both gray in color.

Imported Expedition was a chestnut stallion that stood for public service in New Jersey and a number of his descendants were raised in the vicinity of the region where Saratoga was kept for stock purposes. Though a thoroughbred, and so registered in the English Stud Book, Expedition's blood was evidently of the plastic kind, or not antagonistic to the trotting gait. American Boy, sire of Williamson's Belmont, was by Seagull, a registered thoroughbred son of imported Expedition, and the dam of Williamson's Belmont was a daughter of Expedition, making Belmont very closely inbred to Expedition. The sire of Expedition was Pegasus, a son of English Eclipse, and Active, the dam of Expedition, was by Woodpecker, a son of Herod, one of the most noted sires of race winners in England in his day.

The blood of Williamson's Belmont, whose sire was strongly inbred to Expedition, mingled so kindly with trotting blood that it is found quite close up in the dam of Directum 2:05¾, that holds the world's champion four-year-old trotting record and is also found quite close up in the dam of Sidney Dillon, sire of Lou Dillon 1:58¾, the fastest trotter yet produced. These and several other instances which might be named indicate, as already stated, that the blood of Expedition was not antagonistic to trotting action.

It is of but little consequence at this late day what the blood inheritance of Amazonia may have been. That she was a near descendant of imported Messenger there is not the shadow of a doubt. Her age, the location where she was raised, and her characteristics all point quite conclusively to Saratoga, a son of imported Messenger, as her sire, also to an Expedition cross in her dam. Abdallah, the sire of Rysdyk's Hambletonian, was almost as closely inbred to imported Messenger as was One Eye, Hambletonian's second dam. One Eye was a son and from a daughter of Messenger. Although she was a trotter herself, it is doubtful if One Eye was a faster trotter than Amazonia.—Horse Breeder.

AFTER WILD HORSES.

The office of Attorney-General Stoddard of Carson City is high deluged with letters and telegrams these days asking for information regarding the proposed slaughter of the wild horses on the forest ranges in Lander county. Letters and telegrams have been received from people in Kansas, Minnesota, South Dakota, Missouri, Kentucky and from almost all the Central and Eastern States, making inquiries in regard to the matter. One man back in Kansas telegraphed to know whether or not the State of Nevada owned the horses, and if it did what would be the price of 300 thoroughbreds. Others desired the privilege of coming to Nevada and corraling all the horses and then taking them East to sell.

As the matter has been referred to Supervisor Bartlett of the forest reserves, in accordance with his request, all letters and messages were referred to him or the senders referred to the government officials. The Attorney-General states that the State now has nothing to do with the matter, as the present laws only provide that when persons kill domestic horses they shall be prosecuted.

A resident of Lander county in this city yesterday stated that the number originally stated as in the herds, 15,000, was about right. He also said that the animals were practically useless. For generations the beasts have inbred so that those now running on the ranges are undersized and stunted, many of them half or wholly blind, and they are practically unfit for any practical use. Owing to this blindness many of the animals have fallen into holes or been otherwise crippled, and the horses present a sorry sight on the range. "Some of them are about the size of first-class coyotes," said the Lander county man, "and are far less valuable. The ranchers down there will welcome their extermination."

ANOTHER RACING ASSOCIATION.

The Southern Arizona Racing Association was organized last week at Bisbee, Arizona. It has been capitalized for \$25,000, and will build a race track on land donated for the purpose at Warren townsite, near Bisbee. It is to hold annual meets just before or after the Phoenix fair, the idea being to get the same horses that race at Phoenix.

The organizers of the Southern Arizona Racing Association are the following leading citizens of Bisbee, Douglas and Lowell: H. A. Smith, J. E. Brophy, J. J. Bowen, R. S. Grier, W. J. Eddleman, L. A. Brown, L. W. Powell, F. E. Shine, Ed Fletcher, E. A. Tovrea, J. C. McNair, R. E. Johnson and Fred Sutter, and J. T. Hood and Frank B. Moson of Hereford. The board of directors of the corporation are: J. E. Brophy, E. A. Tovrea, William Adamson, H. A. Smith, F. E. Shine, R. S. Grier, J. J. Bowen, L. A. Brown and Frank B. Moson. The name of H. A. Smith was suggested as president of the association; J. J. Bowen, vice-president; Fred Sutter, secretary, and J. E. Brophy, treasurer.

SOUTHERN CALIFORNIA CLUBS INVEST MILLIONS IN SHOOTING PRESERVES.

When the average citizen of Los Angeles, Pasadena, or any nearby beach town, sees one or more men carrying a string of ducks along the streets, the thought is sometimes expressed that a man is foolish to spend valuable time chasing after ducks through mud, slush, rain, fog and water in order to kill birds that cost the hunter twice as much as he would pay at his meat market. Some of the curious also wonder where the ducks are killed, and how it is possible for any man to leave Los Angeles on an electric car in the early morning and return at noon, sometimes, with the legal number of thirty-five fine, fat birds. It is because all the clubs are near the electric lines.

It is made possible by the fact that the duck shooting in Southern California is one of the most popular of sports and probably has more money invested in it than all other forms of sports combined, writes E. L. Hedderly, a popular Los Angeles sportsman and well-known authority on sportsmen's topics. There are no less than thirty-six duck clubs in this end of the State, representing over 20,000 acres of land, and an investment of something over \$3,000,000. They give steady employment at good wages to probably 100 men in various capacities, and aside from the pleasure afforded the 1,000 or more busy business men who make up the membership, the duck clubs have put much money into circulation by the purchase of land, and have conferred great benefits on some sections by reclaiming and improving lands that had previously been practically worthless.

The only objection that can be made to the clubs is that they have almost a monopoly of the duck shooting, and while this is true, the clubs are using their own land, and shoot on preserves that their own money has been spent on. They have merely purchased or leased land that was open to purchase or lease, and while the ducks naturally go to the preserve, on account of the water, they are also attracted there by the fact that the clubs spend hundreds of dollars every year for grain that is put out for the ducks to eat.

Ten years ago there were no duck clubs along the southern coast in the vicinity of Los Angeles. It is believed the big Bolsa Chica, with its 3,000 acres of land and its forty rich members, was really the first club to be organized for duck shooting. It came into existence eight or nine years ago, and will probably continue to be primarily a duck club for years to come, for the membership doubtless represents a combined capital of from \$75,000,000 to \$100,000,000, such men as H. E. Huntington, Count Jaro von Schmidt, E. T. Earl, John S. Cravens, James Slauson, John B. Miller, John J. Fay Jr., M. J. Connell, Dr. Milbank Johnson, O. P. Posey, Gen. Sherman, F. E. Wilcox and W. R. Staats in the membership list. These men will not be forced to sell the land.

The Lomita Club was probably the second one to be regularly organized, and then followed the Westminster in 1904, and the others that have come in rapid succession. The organization of the many clubs has come as a great blessing to many small farmers and land owners, who found a ready market for thousands of acres of land that were covered with alkali and swamps, and really good for nothing but duck-shooting grounds. The greater part of this land has been reclaimed and made valuable for farming, and the increased taxable value has been of considerable importance to Orange and Los Angeles counties.

The duck season, which closed last month, has been one of the best the clubs have had, for until a month previous, when the heavy rains came, the shooting was about all that could be desired and the number of limit bags killed went up into the hundreds. The good thing about the shooting was that almost every club had sport worth going after, and this in face of the fact that there was practically a continuous bombardment. Almost every club had a semi-weekly shoot, the squads going out on Wednesday and Saturday, Wednesday and Sunday or Thursday and Sunday, and some of the hunters who could not shoot on their regular squad day have made up for it by shooting on an off day, such as Monday or Tuesday. Some clubs had no regular days, and the members shot whenever they pleased, so the shooting kept up continually.

The fact that there was such good shooting may give an idea of the great number of ducks that must come to Southern California to spend the winter. Like all tourists, they are heartily welcomed, and there is no reason to think that new generations of birds will not come again next fall.

It has been practically impossible to get all the facts about all the clubs in this end of the State, but a glance at the map of Southern California shows that they are strung out from Playa del Rey to Newport Beach and Balboa. The ones closest to Los Angeles are the Recreation, Santa Monica, del Rey, Centinella and El Patrone, which are clustered in a line back from the ocean on the low lands between Venice and Playa del Rey. The next in line

is the Dominguez, at "Nigger Slough," and then come the Greenwing, Cerritos and Pasadena, which are directly south of Clearwater and half way between that place and the ocean, down the coast from Long Beach. Then come the Alamitos and the Alamitos Annex, south of Artesia, and then a great number of clubs are bunched in together back of Sunset and Bolsa beach. The clubs the greatest distance from the city are the San Joaquin and the Aliso, off south of Santa Ana. Each one has from two to forty members.

The following is a resume of the principal clubs, with the estimates of property valuation given by the members of the clubs:

Golden West, sixty acres; water supply from overflow; P. F. Schumacher, president; W. D. Longyear, secretary; land and improvements valuation, \$15,000.

Old Greenwing, 300 acres, leased; T. L. Ely, president; A. M. Goodhue, secretary; five wells, seven ponds; valuation, \$2,500.

Lomita, 1,050 acres; H. W. Lewis, president; Dr. O. P. Roller, secretary; fifteen wells; 300 acres of water; land and improvements valuation, \$350,000.

Newport, 225 acres; I. E. Ingraham, president; E. W. Murphy, secretary; four wells; all land practically covered with water; land and improvements valuation, \$50,000.

Olympic, 160 acres; E. J. Brent, president; Frank Bowles, secretary; five wells, fifteen ponds; land and improvements valuation, \$25,000.

Pacific, 1,190 acres; W. A. Holmes, president; F. M. Notman, secretary; seven wells, four ponds; valuation of improvements, \$150,000.

Recreation, 300 acres; Jud Saeger, president; Ed Strasburg, secretary; three ponds of overflow water and forty acres of fresh water; valuation \$20,000.

Surf, 250 acres; George Pillsbury, president; E. F. Wehrle, secretary; twelve-room house on beach front; improvements and valuation, \$50,000.

Short Line, sixty-seven acres; L. Burek, chairman executive board; overflow water used; clubhouse; valuation, \$20,000.

Bolsa Chica, 3,000 acres; F. E. Wilcox, president; W. F. Botsford, secretary; thirty wells; twelve ponds; 1,000 acres of fresh water for bass; clubhouse and other improvements; valuation, \$1,000,000.

Blue Wing, 160 acres; Lee Stephens, president; H. N. Manington, secretary; six wells; eleven ponds; clubhouse and improvements; valuation, \$30,000.

Algonquin, twenty acres; W. H. Neiswender, president; J. W. Kemp, secretary; two wells; three ponds; valuation, \$5,000.

Centinella, 800 acres, leased; H. H. Rose, president; F. K. Eckley, secretary; ditch water supply; three big ponds; lease and improvements; valuation, \$14,000.

Cerritos, 2,500 acres, leased; W. L. Valentine, president; F. W. Flint Jr., secretary; three wells; five ponds; lease and improvements valuation, \$10,000.

Chico, 420 acres; C. Krempel, president; Ed Goltner, secretary; two big wells; one pond of 120 acres; clubhouse; land and improvements valuation, \$100,000.

Creedmore, 167 acres; F. W. Pitcher, president; E. G. Wood, secretary; one well; nine ponds; valuation, \$25,000.

Center, eleven acres; V. W. Guercio, president; Charles Anderson, secretary; one well; land covered with water; valuation, \$5,000.

Del Rey, 300 acres; George Bayly, president; Willard Stimson, secretary; three wells; one large pond; valuation, \$75,000.

Dominguez, 1,100 acres, leased; Joe Carson, president; J. J. Jenkins, secretary; two big ponds of natural water; reorganization of an old club; valuation of improvements, \$500.

Canvasback, eighty acres; E. L. Hedderly, president; Sam Hall, secretary; three wells; nine ponds; clubhouse; valuation, \$20,000.

Christopher, 120 acres; W. A. Frick, president; J. A. Crook, secretary; three wells; two ponds; clubhouse, valuation, \$35,000.

Westminster, 200 acres; four wells; twenty ponds; clubhouse; valuation, \$50,000. Stoddard Jess, president; W. R. Leeds, secretary.

Los Patos, forty acres, almost all of which is under water; clubhouse; valuation, \$10,000.

El Patrone, eighty acres; four wells; one big pond; clubhouse; valuation, \$5,000.

Aliso, 3,400 acres, leased; six wells; fourteen ponds; valuation, \$10,000. W. H. Burnham, president; R. H. Sanborn, secretary.

Alamitos, 500 acres, leased; twelve ponds of overflow water; clubhouse; valuation, \$2,500. S. J. Myrick Jr., president; F. P. Burch, secretary.

Alamitos Annex, 150 acres, leased; use clubhouse of Alamitos Club. E. W. Hopperstead, president; J. E. Fishburn, secretary.

Sunset, 120 acres; five wells; sixteen ponds; 100 acres in water; clubhouse and improvements; total valuation, \$50,000. Bert Collins, president; Dr. Dillingham, secretary.

These are the principal clubs to which the residents of Los Angeles belong, and, in addition to the list, are the El Moro, Los Angeles, Pasadena, Santa

Monica, San Joaquin, San Pedro and Sheriffs clubs, some of which are practically inactive, and on which there is only intermittent shooting.

Notwithstanding the glowing reports concerning the sport and its attendant accessories down south, a similar recount of the Suisun gun clubs and their properties, as well as of several clubs of other localities in the Sacramento and San Joaquin valleys would give just as flattering reading. The Limit, owned by W. W. Richards; the Achilles Roos and the Harriman preserves, the latter shooting preserve formerly a favorite resort of the late Herman Oelrichs; the Family Duck Club preserve, and innumerable other shooting grounds on the Suisun, would compare more than favorably with the foregoing account, in comfort of accommodation and in good duck shooting.

In this respect we quote a recent letter of Mr. Allen Chickering, who in company with several sportsmen friends a few months ago purchased the famous old Suisun Gun Club preserve:

"The number of shoots at our club during the past season, of which we have record, is fifty-four, and the average number of birds killed at each shoot was eighteen. This average, while I consider it a good one without any explanation, is nevertheless rather unfair, as it includes several shoots the results of which were poor owing to causes other than scarcity of ducks, as for example, one day when all of us shooting were engaged in endeavoring to catch poachers. The score on this day was only thirteen for the crowd. Eliminating such days, our average would be twenty-two or twenty-three per shoot. We had many limits, the first one having been obtained on October 13th, and the last on January 26th. Our best shoots were December 15th, 22d and 29th, and January 12th and 26th. During the period when some of the San Francisco newspapers were knocking the Suisun marsh so much, to-wit, during the months of October and November, our average was about seventeen birds to the shoot, which in my judgment falls far short of putting the Suisun marsh among the 'has-beens.'

"You ask for my opinion with regard to the shooting of the past season in general. I have been shooting on the Suisun marsh for a good many years, as you know, and I consider that the season which has just passed has been a fair one on the upper end of the marsh. It is quite true that I have heard reports from some of the middle and lower portions of the marsh which lead me to the belief that the gentlemen shooting in these portions did not have as good shooting as usual, but the upper end of the marsh, and by that I mean the Pringle and Suisun Gun Clubs, have certainly had as good shooting this year, according to the best of my recollection, as usual. The first day was a little disappointing in some places, and I have seen better first days on the Suisun Gun Club grounds, but I attribute this largely to the earlier opening of the season. To the same cause I attribute the fact that for several weeks thereafter the shooting was a little slack. We have only so many birds which breed locally and which offer the shooting for the first few weeks, and the northern flight was exceptionally late in coming this year. This, with the earlier opening of the season, made the local birds stand the brunt of the shooting for a much longer period than usual. Even so, I find on the records of our club that the limit was killed several times during this period, and good shooting was had nearly every week. As for the latter end of the season, I consider that it was better on our grounds than any year since I have been shooting on the Suisun marsh. There was certainly a grand flight of canvasbacks when they did come. The members of our club had great sport with them, as did our neighbors the Pringle Pond Club, where many a limit of "cans" alone was scored. There is no accurate record of the old days on the Suisun Club marsh, but I very much doubt if for eight years back anyway, there would be found a better average on canvasbacks after the first of the year than we made this year.

"According to the information gleaned by me in talking with my friends, the members of other clubs, and from personal observation, I should say that the Joyce Island Club, the Teal Club, the Pringle Pond Club and the Suisun Gun Club have no cause for complaint with the past season, and so far as the Suisun Club is concerned, we are certainly satisfied with our investment in the Suisun marsh, and if we can have as many ducks to shoot at in the future as we have had this year, it will be the fault of our shooting if we do not have satisfactory bags from now on. I have particularly mentioned several clubs for the reason that I am better acquainted with the results achieved on their grounds than with those of others, but I dare say that investigation would show that most of the others had very much the same stories to tell, despite the oft published statement of a certain sportsman that the Suisun marsh has 'had its day,' that the ponds are stagnant, and that the ducks are not interested in them any longer. In addition to the above, I have noticed an unusual flight of geese of the various varieties this year, and at our club we have been unusually successful with them."

Another report from up the valley near Colusa, a great duck shooting country for many years past, states:

The Colusa Shooting Club's east side reserve consists of the undivided half of thirteen hundred acres of as fine shooting grounds as can be found in the State of California. The club has a membership of thirty-five, have their own well appointed ark and

during the shooting season have two, sometimes three attendants.

The season which closed February 15th last has not been as good as on former years; still many of the members have had great sport and the limit bag of thirty-five ducks has been brought in on numerous occasions.

During the past season the members have killed 3,892 birds, ducks and geese. Of this number an even six hundred of the kill were geese, and of the remainder 1,240 of the ducks were of the mallard variety.

This has been one of the poorest years for canvas-back ever experienced on the Colusa grounds, and during the entire shooting period only forty-three of these toothsome birds have fallen to the sportsmen's guns. Four hundred and thirty-six teal were killed, 473 sprig, 609 widgeon, 113 blackjack, 44 gadwells, 101 spoonbills and 229 wood-ducks.

Of the thirty-five members, the following were among those who had the greatest kills to their credit: Fred Watson bagged 589; R. L. Welch, 309; A. Ahlf, 257; W. B. De Jarnatt, 224; Judge H. M. Albery, 162. Many others made large scores, but as they shot with company most of the time, it was impossible to estimate their kills.

As stated above this was a poor season from a standpoint of the number of birds killed. During the season of 1905-6 more than double, or, to be more exact, 8,729 birds were bagged.

Sacramento sportsmen have a number of well equipped shooting preserves. Most of them are of easy access from the Capitol city. The up-river shooters are keenly alive to the rapidly enhancing values of shooting grounds and have recently organized several clubs for winter shooting. Among others may be cited the Monitor Club.

If there are any ducks in the marshes next year this club with its grounds in Sutter county is going to get its share of the feathered flock or know the reason why. Every inducement known to the expert duck hunter will be offered to the broadbills to go to the Sutter preserves, for the members of the club contemplate making great preparations for enticing the birds there.

The Monitor Club owns about 1,000 acres of land and marshes in the north and has recently leased it for a term of five years, states the Sacramento Bee. Under the terms of this lease a fifty-yard strip is to be left from the edge of the tules and no cattle or sheep will be allowed to graze on the lands. The lessee is to utilize the land for raising vegetables.

At a meeting of the directors of the club it was decided to plant Egyptian corn, barley and buckwheat in the ponds and around the tules to cater to the fastidious taste of next season's birds. The Egyptian corn will be planted on the fifty-yard strip that has been reserved and a committee consisting of Ben Gallup, Bill Gould and Charles DeMerritt will take charge of the planting which will be made this coming June. The barley and buckwheat will be sowed in the small ponds and pot holes during the fall. None of the cereals will be harvested.

The idea of the members of the club is to make their grounds one of the best in the state and the steps taken are in pursuance of this policy. Last season the lands were used for pasturing sheep, with the result that every blade of grass was nipped off close to the ground. No grazing whatever will be allowed for the next five years, and it is believed that this course alone will improve the grounds to a certain extent. The planting of the cereals is merely an experiment, but is based on the recommendation of some of the oldest duck hunters. Should the club deem it necessary during the fore part of the duck season when the water is low, an electric pump will be installed and fresh water will then be pumped into the marshes and ponds, affording the hunting that usually does not come until the water from the Auburn ravine flows on to the grounds, which is after the rainy season commences.

The members of the club are enthusiastic over the steps that are being taken to entice the ducks to the grounds, and they consider the leasing of the grounds under the above conditions a wise step, not only because it will better hunting conditions but as a business proposition as well.

The Gridley Gun Club controls shooting rights over 7,000 acres of ground that offer a pleasing variety of sport. If we are not mistaken this preserve is the only one in the state where wild rice has been successfully grown, there being large patches of the wild cereal where the ducks find plenty of food each season.

Before concluding we will briefly refer to the Empire Gun Club's domain of over 3,000 acres in Monterey county at Elkhorn station. Many desirable acres of this preserve are owned by the club. This shooting ground affords excellent quail and snipe shooting, grand duck shooting—all varieties almost—and lastly good deer shooting, a combination that can be claimed by but few similar clubs.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

BROOKDALE HATCHERY.

Against the prophecies of a few of the doubting Thomases among the sportsmen of Santa Clara county, the tri-county hatchery deal which is to include Santa Clara, San Mateo and Santa Cruz counties and will center about Brookdale, in the Santa Cruz mountains, is practically consummated.

Last Sunday the supervisors who dwell in and about the Surf City met John McBain, delegated to represent San Mateo, Dr. J. W. Davy and George L. Baker from Santa Clara county and three members of the State Fish Commission, General Stone, F. W. Van Sicklen and Chief Deputy Vogelsang, in a conference at Brookdale, and practically finished arrangements whereby the counties named will be given an almost unlimited supply of fish for the streams, which action will add to the enjoyment of more people of these counties than many times the amount of money spent in any other way.

This is the status of affairs as they were at the close of the meeting of the above-mentioned gentlemen on Sunday. The State Fish Commission proposes, if control can be gained of four or five miles of Scott's creek near Brookdale, to bear the expense of putting in dams, of patrolling the stream the year round, of spawning the fish and giving practically the entire output to the hatchery at Brookdale as the pro rata belonging to the three counties. The only expense to be borne by the counties is the cost of keeping up the hatchery. This liberal proposal is better than was thought possible by the most sanguine among the enthusiasts of the rod and line.

The supervisors of both San Mateo and Santa Clara counties have very wisely and very generously promised to pay the required proportion from their respective districts, and now the only thing that stands in the way of the completion of the deal is the control of the four or five miles of fishing right along Scott's creek. This, it is said, can undoubtedly be done without any difficulty, as there are but two or three men to be dealt with, and the section over which the fishing right is desired is a very wild one and one that is good for but little for any purpose except that for which it is wanted by the Fish Commission.

Chief Deputy Vogelsang says that the Commission expected to find a little eight-by-ten experiment station at Brookdale, and were surprised beyond measure that so large, so complete and so well-conducted an establishment as this one was kept up at the expense of a single county. He states that the output of this hatchery can be raised to six or eight million fry per year. This means that Santa Clara will get not less than two million fry for her streams every twelve months, to say nothing of San Mateo's quota.

The whole proposition, then, means that these three counties are soon to be stocked as they never were before, and all as the outcome and the generosity and the liberality of the supervisors and of the State Fish Commission.

AN ARROW-ROOT ROD.

We have heard of Oregon arrow-root as a material for rods that possessed many desirable qualities for a wood rod, toughness, resiliency, etc. Several weeks ago Mr. Fred M. Haight showed us some arrow-root joints that were roughly shaped, the first specimens of the material we had ever seen. We were informed that the "wood" of a grain and color somewhat like rock maple, was the root of a small bush or shrub found growing in Oregon. The root sticks were used by the Indians for the making of arrows. The pieces shown were none of them over 20 inches in length and were warped and set to such an extent as to make doubtful their future efficiency in a rod. The grain was checked and irregular to the extent that planing was practically out of the question.

The pieces, six in number, were given over to George Barnes, a skilled local rod maker; in due course he turned out a five-joint rod, with an extra tip, that for balance, spring and general make-up of good promise is a very pleasing piece of work. This rod weighs 8½ ounces, has a separable butt and German silver trimmings, and seemingly will be the proper thing for black bass fishing "up the river." For that matter, if the material bears out its reputation, it will do great work on striped bass, that is in the sizes we run against now in our bay waters and tributaries.

We shall watch the career of this rod with interest and curiosity, for it is in the custody of a skilled angler who will give the arrow-root a test from start to finish. Should the material live up to its reputation, the possibility of a regular supply of arrow-root rods on the market is a problem. The source of supply, methods of seasoning, working and all the details necessary to put a finished product in the hands of the consumer are for the present unknown to the writer. Should these lines be read by any angler who can give us further information regarding Oregon arrow-root we would appreciate any favors in this respect.

A report from Dawson City states that the largest herd of caribou ever seen in Alaska is now in that vicinity, estimates as the number of animals ranging are from one to two millions.

FINE FISHING TACKLE.

In accordance with an annual custom of twenty-five years' practice, Golcher Bros., 511 Market street (formerly Clabrough Brothers, Clabrough, Golcher & Co.), have stocked up with a line of rods, flies, reels, lines and the many requirements of the angler that cannot fail but please the most fastidious and exacting devotee of trout or salt water fishing.

The assortment of Leonard rods is one of the largest and most varied that has ever been shipped to this city. The models, styles and finish of these high-class rods are superior to anything the maker has yet sent to the Coast. Some tournament rods for fly and bait-casting are to be seen to get the proper idea as to what is the best in this particular line. The assortment of rods for the stream is replete with every requirement for any particular water.

For trolling and salt water fishing there is a stock of rods built on the lines adopted by the light tackle clubs. These rods are reasonable in price and made to do satisfactory work.

A new model of a fishing basket, made by Mills, will appeal to the fisherman. A show case full of sample reels affords opportunity for a wide selection for anything from the best tuna reel down to the lightest casting reel.

The stock of enameled, silk and cuttyhunk lines is complete. In fact, an enumeration of the many lures, baits, fly-patterns, gut stocks, fly-books—among the latter one of the best designed combination fly and leader books put on the market—would take up more space than at command. The goods should be seen to be appreciated. In this respect, we will guarantee that no angler will look over the display without making more purchases than he intended originally. We know the weakness of the brotherhood when they see a good thing.

SAN FRANCISCO FLY-CASTING CLUB.

The annual fly-casting contests will begin this season at Stow lake in Golden Gate Park this month. The schedule of the meetings is the following:

Saturday contests, starting at 2:30 P. M.—No. 1, March 21st; No. 2, April 4th; No. 3, April 25th; No. 4, May 9th; No. 5, May 23d; classification re-entry, June 6th; No. 6, June 20th; No. 7, July 11th; No. 8, August 1st; No. 9, August 29th; No. 10, September 12th; class re-entry 2, September 26th.

Sunday contests, starting at 10:30 A. M.—No. 1, March 22d, No. 2, April 5th, No. 3, April 26th, No. 4, May 10th, No. 5, May 24th; classification re-entry, June 7th; No. 6, June 21st, No. 7, July 12th; No. 8, August 2d; No. 9, August 30th; No. 10, September 13th; class re-entry, September 27th.

The first five contests will determine the class placement of the contestants. Two re-entries will be allowed in each class before and after classification.

The meetings at the lakeside for the fly-casting series of 1908 promise to be well attended by the club members. For the convenience of the members, Mr. H. B. Sperry, the secretary-treasurer, has issued a neat card schedule of the various contests, upon the back of which is a score card tabulation.

Sempervirens Club.—At the annual meeting of the Sempervirens Club of California, held recently in San Jose, the following board of directors was elected: A. P. Hill, Mrs. W. C. Kennedy, Mrs. A. T. Herrmann, Mrs. A. P. Hill, Mrs. Lovell White, A. P. Murgotten, A. M. Free, L. A. Spitzer, W. D. J. Hamblly, J. Z. Anderson and W. W. Richards.

The following officers were elected for the ensuing year: A. P. Hill, president; Mrs. W. C. Kennedy, vice-president; A. P. Murgotten, secretary; Mrs. A. T. Herrmann, financial secretary; L. A. Spitzer, treasurer.

Mrs. W. C. Kennedy, president of the club during the past year, was renominated to fill the position, but she declined in favor of Mr. Hill, on the ground that she could not give the necessary time to the work.

Reports of the officers for the year were read. All showed the club to be in a prosperous and growing condition.

Game Law Violators Fined.—Four violators of the game laws were fined at Redding on the 24th inst. by Judge Carr for having deer meat and gray squirrels in their possession. Clarence Sharp and Edward Sharp were fined \$40 each for selling deer meat during the closed season. P. Sarfenni and Joe Pelligrenelli, two Italians, each received a \$30 fine for shooting gray squirrels after the season closed. All paid their fines except Edward Sharp, who was unable to raise the necessary amount and was taken to jail.

J. S. White and L. N. Lorenzon, forest rangers, and also game wardens, stationed at Delamar, arrested Clarence and Edward Sharp near Delamar. The two Italians were caught on Pitt River by the deputy game wardens. The game law violators presented a rather maimed appearance—Edward Sharp has only one leg, while Joe Pelligrenelli has only one arm.

Captain Tom Lewis, of the Union Gun Club, has severed his connection with the O. A. Bremer-Lewis Company, and announces that he will soon start in business again.

DOINGS IN DOGDOM.

Entries for Oakland close positively on March 26th. The Oakland office of the club is located at 454 Ninth street; phone Oakland 602. The San Francisco office is at 1491 Post street; phone West 7508. From either office intending exhibitors can get premium lists and entry blanks. Entry fees are \$2.00 for the first class and \$1.00 each for every additional class.

The prizes in the regular classes will be gilt lettered ribbons with club medals for firsts in all winners classes.

The premium list announces ninety cups and prizes, beginning with the Mayor's Challenge Cup and following with as enticing a roster of cup prizes as could be desired by the most captious exhibitor—cups for almost every breed, and good ones, too.

The classification totals up 431 classes, with full classification and winners in nearly all breeds.

The bench show committee is composed of: George W. Ellery, J. Maxwell Taft, George B. M. Gray, H. H. Carlton, Dr. L. W. Spriggs and E. M. Tidd. This means that the show will be successfully conducted. Spratts will bench and feed, and that is another pleasing factor to note.

This show should be the record entry for Oakland if preliminary indications are any criterion.

Friscio show preparation is going on apace, and coming so soon after Oakland will be a corker. Some pleasing novelties, of which more later, will be introduced during the Auditorium show.

The Pacific Bulldog Club was organized Tuesday evening, March 10th, during a meeting of representative fanciers at the residence of Dr. J. Auburn Wiborn.

The purposes of the club are the stimulation and advancement of interests of the Bulldog on the Pacific Coast; to encourage the propagation and exhibition of the carefully bred Bulldog by declaring for the recognized standard and offering suitable trophies for competition; to create greater public understanding and admiration for that reliable and devoted branch of the canine world and to promote and foster good fellowship among the fanciers themselves.

The membership fees shall be \$5.00 annually. Initiation fee temporarily suspended to allow charter membership to include other coast fanciers. The following officers were elected: President, Dr. J. A. Wiborn; vice-president, Walter H. Reed; secretary and treasurer, Mrs. J. P. Norman. The board of governors consists of the officers, C. W. Conlesk and T. W. Smith.

At the Oakland show the Pacific Bulldog Club will offer a cup for the best dog shown by a member and a cup for the best bitch shown by a member. At the San Francisco show the President offers a cup for the best of either sex shown by a member of the club. The club offers a cup for best of opposite sex shown by a member to winner of President's cup. Dr. Smith offers a cup for best novice of either sex exhibited by a member. The club offers a cup for the best puppy of either sex exhibited by a member, a cup for the best Pacific Coast bred, and a cup for reserve winners, if owned by a member.

Wonderland Kennels' good bitch Little Mother is due to whelp on Monday next to Freeman Ford's Ch. Boylston Prince II.

Ch. Dick Dazzler served W. Venus March 10th. Endcliffe Onyx, a newly arrived matron at the San Mateo Kennels, will be served by Dazzler.

Mrs. Ella Morgan's fine bitch Vixen II. is booked to be served by Ch. Dick Dazzler.

The following from the Honolulu Commercial Advertiser is rather interesting. The mongoose is a pest on nearly every island of the Hawaiian group, and aside from the tinge of humor (invariably used by the scribes who know little about dogs), there seems to be a foundation of merit here into that, it is to be hoped, will eventually materialize into something on the desired lines:

To Hawaii in general and to Messrs. Ryan and Kelley, the local dog fanciers, in particular, belongs the credit of having introduced a new breed to the great family of dog. The latest in dogs is a mongoose hound, and from all accounts it's a wonder.

Paddy Ryan declares that the introduction of the 'mongoose' will mark the greatest epoch in canine history since the discovery of the Fox Terrier, which occurred quite a speel of years ago.

The two individuals named have been experimenting for four years with the view of breeding a dog which could be relied upon to kill the elusive mongoose in all weathers and at any time of the day, night or year. At last he claims to have succeeded, and is proudly showing to his friends a litter of five tiny doglets prettily marked with black and tan and only a couple of weeks old.

"The new breed," said Ryan, "will be known as the Hawaiian Hound, and we shall have the puppies on exhibition in a few weeks. The dog will be low to the ground and admirably adapted to chase mongoose, as its long low body will permit it to make rapid progress through the underbrush in which the mongoose takes refuge when pursued. Its ears will be long, like a Dachshund's, but its nose won't be as snippy as the German dog's. In appearance, however, it will resemble the Dachshund somewhat, but will be more stumpy and altogether a better and stronger dog."

Two previous litters of the mongoose hound have

been born, but only two of the puppies were saved, the remainder not coming up to the breeders' ideal in appearance. One of the survivors died and the other in a number of tests made here proved itself to be exceedingly rough on mongoose. It is now in the hands of Al Newman, the well known San Francisco fancier, who writes that it is the greatest rat dog that he had ever seen (Al and Fred Baltzer used to have some very good deer hounds together, dogs that jumped many a buck in the Marin and Sonoma hills.—Ed.) It is a splendid burrower and possesses the tenacity of a Bulldog.

"Honest" John Kelley makes no bones in stating his belief that a Hawaiian hound would kill a wildcat, provided it had the chance.

Mrs. E. E. Edelhoff of Los Angeles, a successful exhibitor of French Bulldogs, has registered the kennel name Fortuna. May past good fortune at various shows stay with Fortuna Kennels.

Portland will show April 29th to May 2d. The recently elected officers are: W. M. Davis, president; W. B. Fechheimer, vice-president; E. T. Chase, secretary-treasurer; F. E. Watkins, H. L. Corbett, H. J. Litt and W. O. Van Schuyler, trustees.

TOO MANY QUAIL?

While in the frequented quail-hunting grounds of Riverside county the birds have become so scarce that it is almost impossible at present to get limit bags, reports come from Smith Mountain that the quail are so numerous that they are a menace to the crops.

The farmers are too busy with their ranch work to hunt them, and sportsmen have not been there with their guns because it is remote from the beaten track. Undisturbed by hunters, the birds have multiplied until the farmers have applied to Capt. C. H. Vosburgh, County Game Warden, for relief.

It is understood that an application will be made by Vosburgh to the State Fish and Game Commission for permission to trap the birds in order to ship them to Riverside. It has been suggested that they be liberated in the hills within a radius of ten or twelve miles of that city before the breeding season. The Smith Mountain section from which the quail would be taken, is about twenty miles southeast of Hemet.

A meeting of the Riverside County Game Protective Association will be held to discuss this proposition, and also to confer with the County Game Warden as to the placing of the Hungarian grouse and wild turkeys which are to be sent to Riverside county.

AT THE TRAPS.

The Ingleside trap shooting card for to-morrow is the first regular club shoot of the Golden Gate Gun Club for this season. A good programme has been arranged, which will doubtless draw a large attendance of shooters.

The fourth Sunday shoot will be under the auspices of the Trap Shooters' League, beginning March 22d and ending August 23d.

The officers of the League for this year are: Tony Prior, president; Mark J. Iverson, vice-president; C. C. Nauman, secretary-treasurer; Edgar Foster, W. E. Murdock, M. O. Feudner, A. J. Webb and Ed Schultz, directors.

Arrangements are under way for a three-day tournament May 28th, 29th and 30th. A feature of the shoot will be the "money back" system—refunding the entrance fees, less the price of birds, to all contestants (excepting trade representatives, who will shoot for birds only) who fail to annex a certain amount of the moneys.

The Union Gun Club shoot last Sunday was but fairly attended. The scores following were furnished by the official scorer:

Du Pont trophy, 20 targets, distance handicap, 20 yards—C. A. Haight 19, Dick Reed 18, D. Daniels 15, E. Holling 15, E. A. Hoelle 8; 18 yards—D. Burfiend 15, Barber 9, Smith 1; 16 yards—J. Lynch 13, Daniels 11, Jones 8.

Club race, 25 targets, class shooting, 16 yards—Reed 24, Holling 23, Haight 21, Hoelle 21, Burfiend 20, Jones 20, Daniels 19, Lynch 17, Murdock 15, Barber 13, Daniels 13, "Rugalin" 12, Lewis 11, Noonan 10.

Medal shoot, 25 targets—Haight 24, Holling 24, Reed 24, Burfiend 22, Hoelle 22, Haight 22, Reed 22, Daniels 20, Lynch 20, Daniels 19, Staunton 18, 18, Hoelle 18, Noonan 17, "Mysterious" 17, Barber 16, Murdock 14, "Triple" 12, White 12, Lewis 11.

Added money event, 10 singles, 5 pairs—Holling 18, Haight 18, Reed 17, Lynch 17, Holling 16, Hoelle 16, Reed 16, Haight 16, Staunton 15, Hoelle 14, Daniels 14, Lynch 14, Staunton 13, Burfiend 11, Daniels 7.

Twenty-five bird race—Haight 22, 22, Holling 21, Burfiend 20, Reed 18, Lynch 18, 12, Daniels 11.

Secretary Sessarago of the Vallejo Gun Club writes us:

"The regular annual meeting was held March 6th and the following officers were elected: President, James V. O'Hara; vice-president, O. L. Rose; secretary, A. Sessarago; treasurer, P. G. Magistrini; captain, Walter A. Roney; lieutenant, C. L. Wisecarver. The club will shoot on the same grounds as last season, just north of the new ball grounds. The following committee will prepare the same for

the first regular shoot early in April: Messrs. Roney, Wisecarver and King.

The club has a membership of over fifty, and many of the officers and men on the warships of this station (Mare Island) have expressed their intention of joining the club.

The DuPont Powder Company has donated a handsome trophy to be contested for and the club will furnish gold medals for the first, second and third class high guns. The coming season promises to be the most prosperous in the history of the club."

The Vallejo shooters are the right sort and will no doubt have a lively season this year. Visiting shooters always receive a royal welcome at Vallejo.

The Capitol City Blue Rock Club will burn powder for the initial club shoot this season on March 29th. At the recent annual meeting Bert Adams and J. M. Inman were re-elected president and secretary-treasurer respectively.

The Sacramento valley trap shooters have under consideration the organization of a Northern California league, with the prospect in view of holding tournaments at Chico, Marysville, Gridley and Oroville, all of these points now being on the route of the Northern Electric railway. Frank Newbert and J. M. Inman have been appointed a committee from the Capitol City Blue Rock Club to bring about the coalition of valley shooters.

Live bird shooting is on the boom at Salinas. On March 1st W. E. Greene, R. J. Vierra and Fred Chappell were the high guns. Over 600 birds were used. The shoot was conducted by L. A. Bevers, who announces another wing shoot for to-morrow.

There was a good attendance at the grounds of the Los Angeles Gun Club, near Sherman, Sunday, March 8th, at the regular weekly shoot of the club. All the Los Angeles regulars were on hand and quite a few devotees of blue rock shooting were present from Ocean Park and Santa Monica, and Gus Knight arrived from San Bernardino to practice for the San Diego tournament this month.

The day was an ideal one from the shooters' point of view and good scores were made. Ed. Vaughan, the dean of the trap shooters, just to encourage the "youngsters," broke ninety-eight blue rocks out a possible one hundred, while Bungay of Ocean Park was only one behind Vaughan, with a score of ninety-seven out of one hundred.

After a couple of squads of five had shot two scores of twenty-five birds each, Gus Knight challenged Marcus Lane, the holder of the club medal, to a twenty-five bird shoot for the medal. On the first twenty-five they tied with a score of twenty-three apiece. The second try was a tie with a score of twenty-one birds apiece. On the third score Knight secured twenty-three birds to Lane's twenty-one, winning the medal.

The Crescent Bay Gun Club now has grounds between Venice and Playa del Rey. A tournament will be held in August.

The dates for the Coronado Gun Club shoot at San Diego are March 27, 28, 29. There will be \$500 in added money and several trophies.

The Winchester Repeating Arms Company have issued an artistic hanger that will appeal not only to sportsmen but to all lovers of the beautiful. The illustration shows a returning hunter, at the close of day, on his sturdy pony riding down a steep snow-covered mountain trail. Behind follows a pack horse with a trophy of the chase—an elk, strapped to the saddle. The hunter, while taking a puff at his short-stemmed pipe, is looking down into the valley, with pleasant anticipation of a warm welcome and the creature comforts that a tired hunter can appreciate—such being implied by the window light and the curling smoke from the chimney of the log cabin nestling close to the pine trees. We venture to say that this picture will be in strong demand by every lover of outdoor life, and justly so.

The annual prize shoot of the Hawaiian Gun Club at Honolulu, H. T., will take place March 22.

A feature of the Owl Rod and Gun Club shoots at Modesto this year will be the Du Pont trophy shoot.

Nevada sportsmen have outlined a trap season for 1908. The Reno Gun Club held an election of officers last week and will hold regular shoots this season. The Riverside Gun Club held a practice shoot on the first inst. Matches with Carson and Garnerville shooters are in prospect.

The Riverside Gun Club has been presented with a handsome trophy by the Du Pont Powder Company—a beautifully framed picture of national field trial champions, which will be contested for in a special event at the club shoots.

The Port Townsend Rod and Gun Club held an informal preliminary blue rock shoot on Washington's Birthday at Port Flagler. The scores in a 25-bird race were: B. W. Owsley 21, Captain Buck 15, Dr. Edwards 14, G. L. Ide 10, Dr. Mills 9.

The club will endeavor to establish a shooting ground on the "railroad flats" near town, thus enabling the members to indulge in the sport close to Port Townsend.

POINTS OF SHEEP.

An authority on sheep says the points to be looked for in a ram—and the ewe as well, in proportionate degree—are a large though well proportioned head, width between the ears and eyes, a thick neck or scrag, a widely distended nostril, thick, heavy loins, crops and twists; broad, full chest and brisket; level, strong back and full, level flanks. Such are invariably "good cutters" and carry mutton of the best quality. A ram weak in scrag, loin or twist is entirely unfit to head a flock. There seem to be pretty well-defined laws in sheep breeding. For instance, a shapely twist is usually the companion of a well-sprung rib and well-developed crops. This rule, however, has its exceptions, for many a heavy fronted animal lacks in hindquarters and particularly in the twists; but the animal with heavy twists has almost invariably heavy, well-developed frontquarters. It would seem, judging from our wild animals, that nature has intended that the male should be disproportionately (according to man's ideas), or proportionately (according to nature's ideas) developed in its frontquarters in contrast to the female. Any one versed in the breeding of our domestic friends must be aware how much easier it is to breed a male animal that is heavier in front than in the hindquarters than it is to breed one even and smooth all over, which is one of the greatest points to attain in the breeding of our domestic animals.

Some people wonder how it is that when cattle are so low in price the pound for porterhouse steak. The fact is, the cattle breeders do not furnish a sufficient quantity of the right stuff. The market wants an animal all porterhouse steak and no bone. Take a side of dressed beef weighing 300 pounds, which costs the retail butcher 5 cents a pound. There is, roughly speaking, twenty pounds of steak which will retail at 25 cents a pound, thirty-five pounds at 20 cents; the round, fifty pounds at 12½ cents; the rump, fifteen pounds at 8 cents; the kidney and suet, fifteen pounds at 8 cents; the flank, ten pounds at 6 cents; the soup bone, ten pounds at 5 cents, and the forequarter, 150 pounds, will not average more than 8 cents a pound, the neck being often given away or sold for dog meat. Under the circumstances, by the time a porterhouse steak, weighing 1½ pounds, is delivered by wagon two miles off it is surely worth 30 cents.—Exchange.

FILES, CURED IN 6 TO 14 DAYS.
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Files in 6 to 14 days or money refunded. 50 cts.

GOMBAULT'S CAUSTIC BALM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of **Caustic Balm** sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

TWO PACING STALLION COLTS WANTED.

A yearling or two-year-old by Star Pointer and one by Zombro. Must be good color, natural pacers, standard bred and registered, or eligible to registration. Bay or brown. Little or no white, of good size, neat heads, not too high on leg, standing and traveling square on their feet. Must have plenty of knee and hock action. Must be absolutely sound and out of good mares. Address giving price, pedigree and full particulars as to speed, if worked, etc., **F. W. KELLEY, Breeder and Sportsman, 366 Pacific Building, San Francisco.**

FOR SALE.

Star Medium by Dictatus Medium, dam Diva (dam of Helen Keyes 2:05), by Piedmont. He is a fine looking colt and has great promise for speed. He is entered in Futurity Stake No. 5, to take place this fall. He will be three years old April 15th, is well broken; can show better than a three-minute gait. Price, \$500. Address **E. P. LATEROP, Hollister, Cal.**

IMPORTED HACKNEY STALLIONS

At one-half other people's prices. If you want bargains, write at once to **E. P. STERICKER, West Orange, N. J.**

FUTURITY NOMINATIONS WANTED.

Several nominations wanted in Pacific Breeders' Futurity Stake No. 7 for foals of 1907. Any one whose entry has made last payment and whose mare failed to have a foal or the foal or mare is dead, can sell his nomination or substitute another colt. The amount paid for entrance will be returned to the nominator whose nomination is sold. Apply to **F. W. KELLEY, 363 Pacific Building, San Francisco, Cal.**

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and making your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on check rein, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the United States when cash accompanies order.

First Annual Speed and Draft Horse Sale

PLEASANTON, - Alameda County, Cal. APRIL 16-17-18, 1908

Under the Auspices of the
PLEASANTON CHAMBER OF COMMERCE.

250 Head will be sold, including Trotting, Running, Driving, Draft and all purpose horses.

OVER 100 HEAD OF DRAFT HORSES WILL BE SOLD ON THE 16TH. THE 17TH AND 18TH WILL BE DEVOTED TO TROTTERS AND PACERS, SPEED AND ROAD HORSES. YOU CAN SEE THEM PERFORM AT PLEASANTON.

SOME OF THE GOOD THINGS—On the 16th we will sell the Big Ones. A lot of big growthy two-year-olds, a nice bunch of broke three-year-olds and a choice selection of five and six-year-old geldings and mares weighing from 1,500 to 1,700. Several mares in foal. The best lot of Draft Stock ever got together for an Auction Sale. Then, on the 17th, "The Trotters."

Among others to be sold will be the Griffith & McConnell Consignment, all sired by **Bonnie Direct** 2:05½; one of this bunch has already been a mile in 2:16½, a half in 1:04 and a quarter in 30¾ seconds; another a mile in 2:15¼, and another a mile in 2:26¾ as a two-year-old. A standard and registered trotting filly (3) by Chas. Derby. Partola 37413, and Menlo Boy 37401, two grand big stock stallions by Prince Airlee, a son of **Guy Wilkes** 2:15¼. Nutwood Princess, close second last season at North Yakima, Wash., in 2:12¼, and her full sister, Eulala 2:24¼ (trial 2:15). Lou

Onward (trial 2:12), by Onward, out of a registered mare by Hambrino, bred to **Star Pointer** 1:59¼. Calwa, a speedy pacer that will show a mile in 2:12 sure, on sale trial day, April 15. A fast trotting mare by William Harrold, a son of Sidney, out of Anteeo Wilkes, by **Guy Wilkes** 2:15¼. Guy Light, a young trotter by Searchlight 2:03¼, that has just been a mile in 2:30½, and will show fast by sale time. Billy Taft, another young trotter by Stam B. out of La Muscovita, the dam of Yolande 2:14, by **Guy Wilkes**. A pacer by Searchlight out of a Director mare that can fly. Billy

B., a fun horse that will trial a mile close to 2:12 on the 15; he is a pacer without the underwear, and will do to take to the races. August Barron, a trotter that is billed to trial on the 15 a mile better than 2:15. Byron Lace 2:14¼, a race horse without boots or straps that is set down for a mile in 2:07 this year sure; he is by Prince Lovelace, the sire of that other good pacer, Lord Lovelace 2:10. Buzz Saw 43455, a handsome young stallion by Strathway out of Idlewells by General Logan.

WE KNOW we can obtain satisfactory results for Consignors. Indications all point to a Great Sale. Arrange to spend the week at Pleasanton.

ENTRIES CLOSE MARCH 16.

(High Grade
Sulkies
and Carts

MIDDLEING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

FAIRMONT HOTEL

The Handsome and Sound Stallion
CRESCO WILKES 2:10¼.

Record Made as a Four-Year-Old in a
Winning Race Against Aged Horses.

Having a three-year-old full brother to this stallion, I offer **Cresco Wilkes** for sale. He is a bay with black points, has fine conformation and is all right every way. He weighs 1,200 pounds. Last year he was started without proper preparation against Sir John S. 2:04½, Miss Georgie 2:08½ and others at Pleasanton, and was separately timed the first heat in 2:08½. In condition, he should pace a mile in 2:06. He is now seven years old, and in competent hands has a good earning capacity in the stud or on the track. **Cresco Wilkes** was sired by Nutwood Wilkes 2:16¼, sire of John A. McKerron 2:04½, etc., and his dam is Allie Cresco 2:13¼, by Cresco 4908, sire of five in the list. He can be seen at my place in Alameda. For price and further particulars apply to

BREEDER AND SPORTSMAN,
616 Golden Gate Ave.,
San Francisco, Cal.

PETER SAXE & SON, 513 Thirty-second street, Oakland, Cal., Importers, Breeders and Dealers for past thirty years. All varieties Cattle, Horses, Sheep, Hogs. High-class breeding stock. Correspondence solicited.

A good cow should produce from 7,000 to 10,000 pounds of milk a year, and this will yield from 250 to 300 pounds of butter fat. The best record is 800 pounds of butter fat in a year. A dairyman with twenty cows on not more than twenty or thirty acres should produce at least 5,000 pounds of butter fat in a year which, at an average price of 25 cents a pound, would be \$1,250. The skim milk, at 20 cents per cwt., a low estimate, is worth \$300 more. His proceeds from calves, pigs and chickens should be at least \$300 more, which would make an income of \$1,850. This does not include fruit and vegetables. This is, of course, a comparatively small dairy.

Charter Oak Park

HARTFORD, CONN.,

Announces the Following Purses For Its Grand Circuit Meeting, Sept. 7th to 12th.

To Close Thursday, April 2d, 1908.

No. 1—"THE CHARTER OAK," 2:09 Class, Trotting.....\$10,000
No. 2—"THE NUTMEG," 2:07 Class, Pacing.....\$5,000

ENTRIES CLOSE THURSDAY, APRIL 2, 1908, WHEN HORSES MUST BE NAMED

Charter Oak Park is a member of The National Trotting Association, whose rules will govern. Liability of nominator ceases when written notice of withdrawal is lodged with the Secretary. Payments are due in Cash on dates specified. The Charter Oak will consist of Three Races of one mile each.

No. 1—"THE CHARTER OAK"\$10,000

For Trotters eligible to the 2:09 Trot, April 2, 1908, divided as follows:
First Race—\$1,500 to winner, \$500 to second, \$300 to third, \$200 to fourth.
Second Race—\$1,500 to winner, \$500 to second, \$300 to third, \$200 to fourth.
Third Race—\$1,500 to winner, \$500 to second, \$300 to third, \$200 to fourth.
\$2,500 to the horse winning the greatest number of races.
He will be declared the winner of "The Charter Oak." In case of a tie between two or more horses, they shall race off the tie until the winner is decided.

HANDICAP ENTRANCE ACCORDING TO RECORD
The Slower Your Record, the Less You Pay.

Registered Trade Mark

SPAVIN CURE

The Proof of Its Power

NOTE ITS MIRACULOUS WORK ON BROKEN-DOWN TENDONS

W. A. REDMOND,
ATTORNEY, MCGILL BUILDING. Washington, D. C.

I used "SAVE-THE-HORSE" Spavin Cure first on a thoroughbred, which had bowed both tendons and which had been fired once and blistered a number of times, but every time he was trained one or the other of the legs would fill. This happened three years in succession. Last spring I bought a bottle of "SAVE-THE-HORSE" and used it according to directions with the result that he started seven times, at all distances in July last, and won three times, second three times and third once—an excellent record—and he appears to be perfectly sound to-day. I am firmly convinced without your remedy he would not have been worth a dollar as a race horse.

I have a roadster which stepped in a hole at pasture and wrenched a hind ankle—so badly that he could not put his feet on the ground. I was advised to shoot him, as it was claimed that he had injured his hip. Upon close examination, I found a growth between the coronary band and the ankle which developed into ringbone. I used one bottle of "SAVE-THE-HORSE" on the growth, and it entirely disappeared. He has not taken a lame step since. I recommend it to all horse owners of my acquaintance. Very truly,

(Dictated.) W. A. REDMOND.

Plymouth, Ill. Franklin Park, Saugus, Mass.
Troy Chemical Co., Binghamton, N. Y.—
Gentlemen: I used a bottle of your "SAVE-THE-HORSE" here on a bone spavin of some two and one-half years' standing. It has made a complete cure. Yours truly,
H. S. BLODGETT.

Positively and permanently cures Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Wind-puff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for a copy and booklet.
\$5.00 AT DRUGGISTS AND DEALERS, OR EXPRESS PAID.

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park. (Take Hayes, McAllister or Devisadero Street Cars.)
Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars

DEL CORONADO 2:09 $\frac{3}{4}$ CARLOKIN 2:13 $\frac{1}{2}$ COPA DE ORO 2:07 $\frac{1}{4}$

Del Coronado 2:09 $\frac{3}{4}$

Reg. No. 45122. By McKinney 2:11 $\frac{1}{4}$, dam Johanna Trot by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles, Fresno, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13 $\frac{1}{2}$

Reg. No. 36458. By McKinney 2:11 $\frac{1}{4}$, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasie (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07 $\frac{1}{4}$

By Nutwood Wilkes 2:16 $\frac{1}{4}$, dam Atherine 2:16 $\frac{1}{4}$ by Patron 2:16 $\frac{1}{4}$ (son of Hancock 2:21 $\frac{1}{4}$ and Beatrice, dam of Prodigal 2:16 $\frac{1}{4}$); second dam Athene, etc. He is a beautiful light bay stallion, stands 15 $\frac{3}{4}$ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Hancock-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27 $\frac{1}{4}$ by Dawn 2:18 $\frac{1}{4}$. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. B. Davenport, a prominent physician of Sheridan Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and I say with out hesitation that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write to W. B. Eddy & Co., Whitehall N.Y.

SATURDAY, OCTOBER 3.

11. Trotting, 2:10 class 1000

Entries to all races close Wednesday, April 1, 1908. Horses to be named with entry.

In purse races entrance fee, two per cent, due April 1, 1908; one per cent additional if not declared out on or before May 1, 1908; and two per cent additional if not declared out on or before June 1, 1908. Five per cent additional from winners.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for the privilege due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting at which the race is to take place.

In Stakes Nos. 1, 4, 6 and 9, \$10, April 1, 1908; \$10 June 1, 1908; \$10 August 1, 1908, and \$20 ten days before the first day of meeting. Association adds \$200 to each Stake.

Money divided 50, 25, 15 and 10 per cent. All races mile heats, best three-in-five, except for Two-Year-Olds, which are best two-in-three.

Association reserves the right to declare any race off not filled satisfactorily.

ENTRANCE AND PAYMENTS.

MEMBER NATIONAL TROTTING ASSOCIATION.

For Entry Blanks Address

GEO. L. WARLOW,
President.

R. A. POWELL,
Secretary, Fresno, Cal.

\$10 Due on Yearlings on April 1, 1908

NOTHING MORE TO PAY BEFORE 1909 IN THE

Pacific Breeders Futurity Stakes No. 7---\$7000

FOR FOALS BORN 1907, TO TROT OR PACE AT TWO AND THREE YEARS OLD

Entries Closed November 1, 1906

\$4,250 for Trotting Foals. \$1,750 for Pacing Foals. \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

Entrance and Payments—\$2 to nominate mare on November 1, 1906, when name, color, description of mare and stallion bred to bust be given; \$5 April 1, 1907; \$5 November 1, 1907; \$10 on yearlings April 1, 1908; \$10 on two-year-olds April 1, 1909; \$10 on three-year-olds April 1, 1910.

Gen. J. B. Frisbie 41637

And his full brother

Constructor 39569

Handsome Sons of McKinney 2:11½, greatest sire of the age; dam the great broodmare, Daisy S. (dam of Tom Smith 2:13½, sire of Katalina 2, 2:22½, General Vallejo 2:22½, Little Mac (3) 2:27, Sweet Rosie 2:28½, Vallejo Girl 2:16½ and Prof. Heald 2:23) by McDonald Chief 3583, son of Clark Chief 89; second dam Fanny Rose, great broodmare (dam of Geo. Washington 2:16½, Columbus S. 2:17), by Ethan Allen Jr. 2993. General J. B. Frisbie is handsome, good gaited, black, seven years old. He is a full brother to Tom Smith 2:13½; shows McKinney speed and will be trained for the races this season.

Constructor is a beautiful black stallion, stands 16.2½ hands, weighs 1,200 pounds; perfect in every way.

Will make the Season of 1908 at my Stables in Vallejo.

Good Pasturage, \$3 per Month.

TERMS—\$25 for the Season. Usual return privilege.

THOMAS SMITH, 1021 Georgia St., Vallejo, Cal.

General Watts 2:06½, World's Champion three-year-old stallion by

"AXWORTHY" (3) 2:15½

And winner of American Horse Breeder Futurity. It pays to book to such a sire.

When writing kindly mention this journal The Empire City Farms, Cuba, N. Y.

Ray o'Light

2-y-o Rec. 2:13½ By SEARCHLIGHT 2:03½
Reg. No. 46270. King of Race Horses

His dam is Carrie B. 2:18 by Alex. Button 2:26½ (sire of Yolo Maid 2:12, Tom Ryder 2:13½, etc.); second dam Carrie Malone (dam also of Cassiar 2:22, Moorland Lass, dam of Pinkey H. 2:17½), full sister to Klatawah (3) 2:05½, holder of world's record, Chas. Derby 2:20, etc., by Steinway 2:25½; third dam Katy G. (dam of 7 in 2:30; Saraway, sire of 6, and Carrie Malone, dam of two, two dams of two in 2:30); by Electioneer 125; fourth dam Fanny Malone by Niagara; fifth dam Fanny Wickham (20-mile trotter), by Harold; sixth dam by Imp. Trustee; seventh dam by Imp. Sir Charles; eighth dam (dam of the unbeaten race horse Boston), by Ball's Florizel, etc.

Ray o'Light (2) 2:13½ is one of the handsomest as well as best bred young stallions in America. He will be allowed to serve only ten mares this year, at Salinas race track, as he will have to be prepared for his engagements as a three-year-old.

He will make the Season of 1908 at the Low Service Fee of \$40, with usual return privilege. For further particulars address

E. S. TRAIN, Salinas, Cal.

Bonnie Direct 2:05½

Fee for 1908 \$100

Bonnie Steinway 2:06½

Fee for 1908 \$40

Usual return privilege. Good pasturage.

CHAS. GRIFFITH, Pleasanton, Cal.

ALMADEN 2:22½

(At 2 years)

By the great DIRECT 2:05½.

Dam by McKINNEY 2:11½

Sire of 12 in the 2:10 list.

Sire of 17 in the 2:10 list.

All money winning race records.

The only combination of these two great producers, and the only trotting stallion of class out of a McKinney mare. Be progressive and breed your grand-daughter of McKinney to Almaden and get in line for grand circuit winners. Almaden has every point of a great sire, no horse can show a more promising lot of foals, age considered. Fee: \$40 for the Season. Usual return privilege.

226 LANSING, Upper Stockton Road—Race Track Cars.

M. L. LUSK, Sacramento.

HART BOSWELL 13699

By Onward 2:25½ out of Nancy Hanks 2:04

Sired by Onward 2:25½ (sire of 198 in 2:30 list) out of Nancy Lee (dam of Nancy Hanks 2:04, Nancy Stam 2:30, Dictator Wilkes, sire of 11), Director Moore, a sire, and the producing dams Meta S. and Lady Boone, by Dictator 113; second dam Sophy (great broodmare) by Edwin Forrest; third dam Sophrina by Parker's Brown Pilot. Hart Boswell's progeny are noted for their size, disposition, style and action.

We will make the Season of 1908 at Laurel Creek Farm, San Mateo, for the Low Fee of \$25, with usual return privilege. Address

K. O'GRADY, San Mateo, Cal.

California's Banner Meeting Oakland Race Track

Will this Year be held at

AUGUST 10TH TO 15TH INCLUSIVE, 1908.

The Alameda County Fair Association announces the following Early Closing Guaranteed States:

No. 1—The Greater Oakland Stake, Trotting, 2:20 Class.....\$2500
No. 2—Alameda County Stake, Pacing, 2:20 Class..... 2500
No. 3—Mt. Diablo Stake, Trotting, 2:14 Class..... 900
No. 4—Pleasanton Stake, Pacing, 2:14 Class..... 900
No. 5—Berkeley Stake, Pacing, 2:08 Class..... 900
No. 6—Athenian Stake, Trotting, 2:25 Class, Three-Year-Olds.... 900

Entries Close April 1, 1908

When Horses Must be Named.

The complete Programme will be announced later.

In order to keep the best horses on the Coast, there will be a free-for-all Pace and a fast Trot for tempting Purses and liberal programme for other classes.

CONDITIONS:

In No. 1 and No. 2 any horse not standing to win a portion of the purse at the end of three heats will be ruled out. Both races to be declared finished at the end of the fifth heat; \$2,000 of the money to be divided according to the summaries, as follows: \$1,000 to the first, \$500 to second, \$350 to third and \$200 to the fourth horse; \$500 reserved for a Consolation Purse, open to all horses that start and do not win any part of the purse. Two heats, every heat a race. Money division: \$125 to first, \$75 to second, \$50 to third in each heat. No money deducted from winners in the Consolation Purse.

No. 3, No. 4, No. 5 and No. 6 will be three heats, every heat a race. Money division every heat: \$165 to first, \$80 to second and \$55 to third.

ENTRANCE MONEY.

In No. 1 and No. 2 the entrance fee is four per cent, with an additional five per cent from money winners, payable as follows: One per cent due when nomination is made and the balance to be paid on the first day of the meeting.

The entrance fee in No. 3, No. 4, No. 5 and No. 6 is five per cent, with an additional five per cent from money winners. One per cent due when nomination is made and the balance on the first day of the meeting.

In the event of No. 1 or No. 2 securing twenty or more paid up entries, the entrance fee will be three and one-half per cent instead of four per cent; if more than twenty-five entries, three per cent; if thirty or more entries, no money will be deducted from money winners. All money in excess of the purse will be divided among money winners in accordance with the announced division.

In the event of No. 3, No. 4, No. 5 and No. 6 securing thirteen or more paid up entries, the entrance fee will be four per cent instead of five per cent; if twenty or more entries, no money will be deducted from money winners. All money in excess of the purses will be divided among money winners in accordance with the announced division.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race, and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting at which the race is to take place.

MEMBER NATIONAL TROTTING ASSOCIATION.

For Entry Blanks and further information address the Manager,

BEN BENJAMIN,

Care Breeder and Sportsman,
366 Pacific Building, San Francisco, Cal.

No road too rough. Has cushion tires and carries weight over the wheels, not on the axle. It has the strength. Never a tired driver after a long workout day. Why? The long spring makes it easy riding and does away with all horse motion. Furnished with Pneumatic tires.

McMurray

Sulkies and Jogging Carts

Do You Want the Best?

Breed Your Mares to

Zombro 2:11

Son of McKinney 2:11½ and Whisper by Almont Lightning.

Service Fee—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Bellemont 2:09½, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08½, holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list, ten in the 2:15 list and seventeen in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices. Address

GEO. T. BECKERS,
3949 South Figueroa Street,
Los Angeles, Cal.

Bonny McKinney 41383

Son of
McKinney 2:11 $\frac{1}{4}$

World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustie; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonnie McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03 $\frac{1}{4}$
King of Race Horses.

Reg. No. 34899

Sire of Ray o' Light 2:13 $\frac{1}{4}$ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11 $\frac{1}{4}$, trial 2:05 $\frac{1}{2}$. Dam Rita B. by Boodie Jr.; 2nd dam Gabian Girl by Gabian; 3rd dam Clara by Elmo 831, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal. Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

Alconda Jay 46831

By Jay Bird (sire of Hawthorne 2:06 $\frac{1}{4}$, Allerton 2:09 $\frac{1}{4}$, others in 2:10), dam Alma Wilkes (dam of Oakland Belle 2:22 $\frac{1}{4}$) by Baron Wilkes, sire of 140.

Baron Bowles

3-y-o Rec. 2:25.

By Baron Wilkes, Jr., one of the best bred sons of Baron Wilkes, (sire of Bumps 2:03 $\frac{1}{2}$, Rubenstein 2:05, 4 in 2:10 list), dam Susie May by Dignus, sire of Johnny Again 2:05 $\frac{1}{4}$, etc.

ALCONDA JAY 46831

BARON BOWLES (3) 2:25
Fee: Alconda Jay, \$40.
Baron Bowles, \$30.

Usual return privilege.

A Game Race Horse in the Stud

Bay stallion, stands 15.3, weighs 1,150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 $\frac{3}{4}$, Athasham 2:09 $\frac{1}{4}$, Sue 2:12, Listerine 2:13 $\frac{1}{2}$ and 8 others in 2:30), he by Matadon by Onward 2:25 $\frac{1}{4}$, out of Athalle (dam of Athanio 2:10, Ira 2:10 $\frac{1}{4}$ and 5 others in 2:30), by Harkaway 11808, etc. Athasham's dam was the great broodmare Cora Wickersham (also dam of Nogi (3) 2:17 $\frac{1}{2}$, winner of three-year-old trotting division Breeders' Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22 $\frac{1}{2}$ (sire of dams of Geo. G. 2:05 $\frac{1}{2}$, etc.); second dam Maud Whippleton (dam of one) by Whippleton (sire of 7); third dam Gladys by Gladiator 8336, son of Geo. M. Patchen Jr. 2:27. Athasham has a great future before him as a sire. He is bred right and made right, and has every qualification one can expect in a sire. He has been timed in 2:06 $\frac{1}{4}$ in a race, and his courage is unquestioned.

He will make the Season of 1908 at Orchard Farm, Fresno, Cal., for a Fee of \$50, with usual return privilege. For further particulars address this place, care of

CHAS. MIDDLETON, Manager,

R. R. 1, FRESNO, Cal.

The Blood That Produced **LOU DILLON 1:58 $\frac{1}{2}$** and **SWEET MARIE 2:02**

GRECO B. 43129

Trial 2:12 $\frac{1}{2}$. Black colt, foaled 1900. Sire McKinney 2:11 $\frac{1}{4}$, sire of Sweet Marie 2:02, 17 in 2:10 list, world's champion sire of speed. Dam Aileen 2:26 $\frac{1}{4}$ (dam of Mowitza 2:20 $\frac{1}{2}$, Sister 2:20 and Greco 2:32, trial 2:20) by Anteo 2:16 $\frac{1}{2}$, sire of dams of Directum Kelly 2:08 $\frac{1}{4}$, Grey Gem 2:09 $\frac{1}{2}$, W. Wood 2:07, etc. Grandam Lou Milton (dam of LOU DILLON 1:58 $\frac{1}{2}$, Redwood 2:21 $\frac{1}{2}$, etc. Greco B. is a handsome young stallion and a splendid representative of the McKinney family. His oldest colts are 3 years old, only two have been trained and they show 2:20 speed at the trot.

Will make the Season of 1908 at the **State Fair Grounds, Sacramento**

Fee: \$40. For particulars call or address

JOHN QUINN,

3710 Cypress, Ave., Sacramento, Cal.

Sweet Marie 2:02.

Chehalis 2:04 $\frac{1}{4}$.

Kinney Al 2:14 $\frac{1}{4}$

Reg. No. 47167.

Winning race record.

Bright bay horse 15.3, foaled in 1901 and sired by McKinney 2:11 $\frac{1}{4}$, dam Mary A. 2:30, dam of Velma Z. (trial) 2:17, Moline (trial) 2:23 $\frac{1}{2}$, Sadie C. (trial) 2:25 by the great sire, Altamont (wagon) 2:26 $\frac{1}{4}$, sire of Chehalis 2:04 $\frac{1}{4}$ and six others better than 2:10. Kinney Al combines the blood of the two greatest speed sires ever west of the Rocky mountains, is a fast and game trotter himself and possesses all the qualities necessary in a successful trotting sire.

Will make the Season of 1908 at

BERRENDOS PARK, RED BLUFF, Cal.

\$30 for the Season. With usual return privilege

Or money refunded at my option in case mare does not get with foal. Pasturage for mares at \$2 per month, but no responsibility assumed for accidents or escapes. For tabulated pedigree and further particulars address

W. R. JOHNSON,

Box 161.

SANTA CLARA, Cal

Four more in 2:15 have already been credited this season to

"McKINNEY" 2:11 $\frac{1}{4}$

Making his wonderful list still more remarkable.

When writing kindly mention this journal. **The Empire City Farms, Cuba, N. Y.**

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire McKinney 2:11 $\frac{1}{4}$, the greatest sire of extreme speed living. Dam Helena 2:11 $\frac{1}{4}$, dam of Wild Nating 2:11 $\frac{1}{4}$, Dobbell 2:22 and Hyita (trial) 2:32 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04 $\frac{1}{4}$; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinneys. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

STALLIONS!

Why do they often become so devitalized, even in a light stud duty, that they require a long rest from such service?

It is due to the absorption into their systems of poisonous bacteria, or germs of disease, both contagious and sexual, in serving mares of all degrees of health and disease. There are many of these bacteria and germs that are very injurious to the stallion. To counteract the growth of such germs in his system and keep him in normal condition there is but one Germicide fit for internal use.

Spohn's Liquid Distemper Cure

Is Safe, Simple and Sure as a Germicide and Is a Fine Tonic and Conditioner "SPOHN'S" will enable stallions to go through a long stud season and keep them free from any form of Distemper. Give it to them every other day.

All Druggists.

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

WINCHESTER

Cartridges and Rifles Take Leading Honors

Winchester Cartridges and Rifles again demonstrated their exceptional shooting qualities at the Fourth Annual Tournament of the Indoor .22 Caliber Rifle League, held in Rochester, N. Y., January 27-February 1, making new World's records and winning in the majority of the events, as follows:

CONTINUOUS MATCH—R. Gute, First (tie), four perfect scores of 75.

BULLSEYE TARGET—R. Gute, perfect target of O, a World's Record.

SKIDDOO MATCH—R. Gute, First (tie), four perfect scores of 75.

CHAMPIONSHIP MATCH—R. Gute, tied for second place, score 2460.

RAPID FIRE MATCH—Harry Harrison, First, 81 shots in one minute, score 570. This is a World's Record. Mr. Harrison also made a new World's Rapid Fire Record, firing 101 shots in one minute.

Both Mr. Gute and Mr. Harrison used Winchester Cartridges, and the latter also used Winchester Rifles. The increasing popularity of Winchester Cartridges was evident by the fact that more participants used them than any other make. Their phenomenal showing at this important tournament proves the superior qualities of the Red W. Brand.

PROGRAMME FOR RUNNING RACES TO BE ANNOUNCED LATER.

\$16,700

Guaranteed Stakes for 4 Days

\$16,700

Meeting to be held in August, 1908.

PACIFIC COAST TROTting HORSE BREEDERS ASSOCIATION

Entries to Close Wednesday, April 1, 1908

PROGRAMME.

Wednesday.

1—2:14 CLASS TROTting.....\$ 800

2—2:20 CLASS TROTting, CALIFORNIA STAKES.....2000

3—2:08 CLASS PACING.....800

Thursday.

4—Two-Year-Old Trotting Division Futurity Stakes No. 6 (Closed December 4, 1905).....\$1450

5—2:14 CLASS PACING.....800

6—Three-Year-Old Pacing Division Futurity Stakes No. 5 (Closed October 15, 1904).....1300

Friday.

7—Two-Year-Old Pacing Division Futurity Stakes No. 6 (Closed December 4, 1905).....\$ 950

8—Three-Year-Old Trotting Division Futurity Stakes No. 5 (Closed October 15, 1904).....3300

9—2:05 CLASS PACING.....1000

10—FOUR-YEAR-OLDS TROTting 2:20 CLASS.....500

Saturday.

11—2:17 CLASS TROTting.....\$ 800

12—2:20 CLASS PACING, PACIFIC SLOPE STAKES.....2000

13—2:10 CLASS TROTting.....1000

Entries to Stakes Nos. 1, 2, 3, 5, 9, 10, 11, 12 and 13 close WEDNESDAY, APRIL 1, 1908. Horses to be named with entry.

Entrance fee two per cent, due April 1, 1908; one per cent additional if not declared out on or before May 1, 1908, and two per cent additional if not declared out on or before June 1, 1908; five per cent additional from winners.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting at which the race is to take place.

Money divided 50-25-15 and 10 per cent. All races mile heats, best 3 in 5, except for two-year-olds.

MEMBER NATIONAL TROTting ASSOCIATION.

For entry blanks and further information address the Secretary.

E. P. HEALD,
President.

F. W. KELLEY, Secretary,

366 Pacific Building,

SAN FRANCISCO, Cal

THE WEEKLY BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICES: 363, 365 and 366 Pacific Building,

Corner Market and Fourth Streets,

SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCEMoney should be sent by Postal Order, draft or letter
addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but
as a private guarantee of good faith.

STALLIONS ADVERTISED.

A MEETING of the Pacific District Board of Appeals of the National Trotting Association has been called for Thursday, March 26th, at which time a number of cases will come before it.

NEW RACETRACKS are being made in many parts of California, Arizona, Oregon and Washington, and in all these places are scores of horses waiting until the gates open so that they can go in and show their anxious owners what they can do.

COMMENCING in our next issue we will publish a series of very interesting articles relating to the early trotting and running horses of California and the pioneers who brought them to this State, and engaged in breeding not only horses but also highly bred cattle and sheep.

FRED CHASE & CO., the well-known auctioneers, announce that on May 4th they will sell for the Aptos Stock Farm about thirty head of fine trotters and coach horses, and on May 11th they will sell every horse, mare, colt and filly owned by George H. Fox of Clements. There are some fine ones in this consignment by Cresceus 2:02¼, Silver Bow 2:16, Daedalion 2:08½, etc. Catalogues will soon be issued.

UPON every racetrack in California there are horses in training for the meetings to be held on the Pacific Coast, and as the weather for the past five weeks has been almost perfect, many of the trotters and pacers have shown wonderful improvement. We would caution trainers to "go slow." There will be no opportunities to win money with their horses until next August, and the promising candidates for fast records they have may either become stale, track sour or lame if these fast tryouts every week are continued.

THIS IS the time of year when owners of mares think seriously of breeding them to some good stallions, and it is also the time when students of blood lines carefully scan the pedigrees of the various stallions advertised, and in one form or another tabulate the pedigrees of the sires they consider the best and combine them with the pedigrees of their mares. The "clerical" work being accomplished, they visit the places where the stallions are and carefully note their mental and physical characteristics, watch the stallions in repose and in action, and mentally compare the gaits with those they know their mares have. It is not always the best plan for an owner of a good mare to mate her with the most fashionable stallion. There are certain things to be taken into consideration, and the well-educated, observant horseman who has given this subject any study will be very careful not to send his mare to a stallion that has the same defects or weaknesses he knows his mare possesses even if the stallion is the "greatest on earth." As a rule, trotting horse breeders in the past did not use care enough in studying the bloodlines, conformation, gait and disposition of their stallions and the mares they were to mate with them. They kept on breeding year after year and have wondered why the produce had neither speed, style, nor class as individuals. The breeders of the present day are profiting by the mistakes of these ignorant horse breeders. They have learned that such indiscriminate breeding has worked an irreparable hardship on the stallions and mares, in fact has injured their reputations; and they have seen how often the produce of such matings are shunned by buyers in the salesring. The Year Book, Register and leading trotting horse journals have accomplished wonders during the past ten years in educating all who are interested in light harness horses on the question of selection and breeding. And, even now, we are far from reaching the goal we are striving for. There are failures enough when the most careful selection is made, and the safest plan to pursue is to make a careful selection of stallion and mare and then see if that kind of mating in the past has not resulted in producing something valuable. Our only guide in breeding is the experiences and results of the past and a careful study of the laws of nature and reproduction; and we may, to a certain extent, assist nature by providing her with the very best materials with which to achieve success. There are many, very many stallions standing for service in California to-day that are "bred in the purple," and are bred to suit almost any mare, but the question remains: "What is the best one to breed to?" This can only be answered, as stated above, by study, observation and comparison, and the chances are far better for getting a 2:10 performer that way than by breeding in a haphazard fashion, without using good judgment and without taking into consideration what the result will be. The most successful horse breeders of the present day do not breed all their mares to the only stallion they own. That was once the fashion and it ruined hundreds of prominent horsemen. They send their mares to the stallions they believe will mate well with them, so the same care should be exercised in breeding trotters and pacers as is exercised in breeding thoroughbreds, if good colts and fillies are wanted.

EVERYBODY INTERESTED in light harness horses on the Pacific Coast from Washington to San Diego is delighted with the prospects for 1908. The announcements published have infused new life into every owner, breeder, and trainer, and every endeavor is being made by them to have entries in the races on the circuit from the green classes to the free-for-alls. There can be no fault found with the stakes and purses offered. The associations apparently are vying with each other in giving large amounts of money. The knowledge that in almost every county in Washington, Oregon and California there are candidates for the big Futurity stakes has started owners to thinking it will be well to "get a string" and go "down the line" with some good ones, for crops will be good and prices for all products of field, orchard, and vineyard high; and as a sequence, money will be plentiful. The associations are to have their tracks in perfect order this year, even if they have to hire automobiles to draw the tooth-harrows, scrapers and smoothers around the track between heats at a three-minute clip, as they do on the racetracks in the East. It is the noblest work that an automobile can be used for—preparing the course for all equine candidates for two-minute honors. Fences will be repaired, grandstands

cleansed, box stalls and barns whitewashed, and everything made as neat as possible for the reception of the big processions of trotters and pacers that will come from all parts of the Pacific Slope to furnish close and exciting races. Good judges, qualified timers, and the most careful of track officials will be ready when the bell rings; and, as California's reputation for the conduct of meetings is second to no other State in the Union, we believe the attendance at each and every meeting will surpass any held in California since the days of Stamboul, Arab, Guy Wilkes and Harry Wilkes. The amateur meetings which have been given during the past three years have created an interest in the sport that is as widespread as it is beneficial; and many an amateur driver will be ready when the races end to pay long prices for the ones that will suit them. In every city of note in California are speedways (if there are no racetracks), and the members of the driving associations in these places are taking a greater interest in the outcome of the Pacific Coast circuits this year than ever, and all of them will endeavor to be in attendance at every race meeting. Horse owners, breeders and trainers are to be congratulated upon the outlook for this season's racing, and great credit is due the management of the various associations for their endeavors to make the meetings successful by granting every favor asked of them by the horsemen; so it is "up to the latter to make good" by sending in their entries and having their horses ready "when the bell rings."

THE YEAR BOOK for 1907, that indispensable help to all interested in light harness horses, has just been issued. In appearance and general make-up it is modeled upon the same lines as its predecessor of last season. It is, however, somewhat larger, containing 968 pages, as against 917 in Vol. 22, a gain of 51 pages. The portion devoted to racing summaries of 1907 covers 326 pages, which is 21 more than those for 1906. A count of the meetings indexed shows a total of 1,136. In 1906 there were indexed but 1,092; showing a gratifying gain of 44 meetings for the year, at each of which standard time was made. There is also a slight gain in the total number of new standard performers to be noted. For 1906 it was 2,107; for 1907, it is 2,131. Of these 2,131 new standard performers 1,013 are trotters and 1,118 are pacers. In 1906 there were 1,009 new trotters; showing a gain for 1907 of four only. In 1906 there were 1,098 new pacers; showing a gain for 1907 of 20. While the pacing gain has been greater than the trotting, the number of new trotters is the largest since 1897—ten years before—when the returns showed 1,146. The grand total of standard trotters to date is given as 23,251. The grand total of standard pacers is given as 15,045. The official number of all standard performers to the present writing is, therefore, 38,296. There are several features which should be added to every year book. One is a chapter on corrected pedigrees; another on sires of two or more dams, and one of sires of sires and dams, such as are to be found in Volumes VIII and X. They would have occupied but a few extra pages and would be invaluable in the compilation of pedigrees. Great credit is due Registrar Best of the Trotting Register Association for the able manner in which he has issued this book.

LAST THURSDAY the San Francisco Driving Club Committee, consisting of Messrs. C. J. Lecari, Thomas Corcoran and W. J. Kenney, met the Park Commissioners at the Fairmont Hotel and with Mr. Kilpatrick urged upon the commissioners the necessity of having a grand stand for the Park Stadium. The consent of the commissioners was granted and the building will be erected at once. The design is an excellent one, the sides of the structure being enclosed in glass. A magnificent view will be obtained from it of the track and grounds in front and the ocean in the rear.

THE DETROIT DRIVING CLUB advertises its Twenty-fourth Annual Blue Ribbon Meeting in this issue, and the attention of horsemen contemplating taking their trotters and pacers East is called to the liberal purses offered, entries for which close Tuesday, April 7th. Every horseman in the United States is familiar with the able manner in which race meetings are held under the auspices of this club, and a cordial welcome is extended to all who bring their horses there.

NOTES AND NEWS

Remember the date for the closing of entries in a number of meetings is April 1st, one week from next Wednesday.

One of the handsomest fillies at the Santa Rosa race track is by Major Dillon, out of Guycara by Guy Wilkes 2:15½.

Daniel Misner has a five-year-old mare by Bay Bird, dam by Sidney 2:19½; second dam The Morgan Hill mare by David Hill Jr., that trotted a quarter in 36 seconds on the Stadium last Monday. She belongs to Benj. Cram of this city, and horsemen who saw her work declare she is the best gaited trotter ever seen on this track, and that 2:10 will be her record this fall.

By Guy (dam of Guy Dillon 2:23½ and Martha Dillon (2) 2:29½), by Guy Wilkes 2:15½, dam By By, by Nutwood 2:18½, is in foal to Lynwood W. 2:20½.

The handsome stallion Washington McKinney was taken from Pleasanton to Santa Rosa last week. There is no doubt this horse will make a good season there. He is owned by one of the most enthusiastic horsemen on this Coast.

Mr. Wm. J. Dingee has presented his beautiful young Zombro stallion Edward McGary to Mr. F. J. Kilpatrick, who will take the horse to Santa Rosa to stand this season, hoping to cross him with some of the mares by his horse Washington McKinney, Sidney Dillon, Wayland W. or Lynwood W. There are few better bred young stallions in California than this one.

The Diablo horse Don Diablo paced in 2:16¼ and repeated in 2:14 on the Pleasanton track Saturday. Don Diablo is out of a mare by Cropsey's Redwood.

On the Pleasanton race track last Saturday F. J. Kilpatrick drove Princess W. and Mr. Dick Ables drove Lady McKinney three heats in 2:18¾, 2:18 and 2:24, last half of the last mile in 1:06¾. Lady McKinney went on the outside and could have gone much faster.

Mr. E. Dunn drove his Lecco filly in 2:30¼ and his Searchlight three-year-old pacer in 2:17¼ at Pleasanton last Saturday.

Farmer Bunch drove his McKinney mare last Monday in 2:17½, and when he dismounted smilingly said: "I think she can beat that every time I ask her."

F. J. Kilpatrick of San Francisco has entered four horses at Pleasanton. Two are brothers, Phil, a four-year-old, and Bill, a five-year-old by Chas. Derby 2:20, dam Nannie Smith (full sister to Phil Thompson 2:16½), by Red Wilkes. This is one of the finest teams in this State. They stand 15.3 hands, blood bays with black points, and trot together perfectly. Buck Derby by Chas. Derby 2:20, out of Clara by Bucaneer, a fast pacer; Allan Pollock, record 2:23¾, by Nutwood Wilkes 2:16½, out of Black Line by Direct Line. He stands 15.1 hands, is thoroughly broken, kind and gentle, has trotted a half in 1:09, full mile in 2:22½. He is five years old this spring and is stylish and handsome.

That the value of registration is being more fully appreciated is evidenced in the fact that nearly 2500 horses and mares were registered in January and February, 1908. This is the largest registration in the history of the American Trotting Register Association for the same period of time.

The list of nominations to the fifth renewal of the American Horse Breeders' Futurity, open to mares bred in 1907 and for foals of 1908, numbers over 2350, a most gratifying showing. California is well represented in this list.

The great broodmare Lulu Wilkes died at Shulthurst Farm on Friday of last week. She was foaled in 1882, and was, therefore, 26 years old. She was the dam of five in the list, all trotters, and two producing sons and one producing daughter. Her list includes Advertiser 2:15½, sire of seventeen; Gazote 2:16½, Wellbeck 2:22½, sire of one; Alla 2:21½, Leda Worthy 2:29½, and one of her daughters also produced Pussy Pumpkins 2:29½. Lulu Wilkes was a black mare, sired by George Wilkes 2:22, and her dam was Lula 2:15 by Norman 25. Lula Wilkes was one of the best mares ever brought to Palo Alto.

April 1st is the date set for the closing of the most of the race meetings for the California Circuit, the coming season, and those wishing to select prospects should look the field over at once, and in doing so should not overlook one of the best prospects in the five-year-old Neernut colt General Torres, dam Concha, by A. W. Richmond. This is a very fine colt. He has shown quarters in 33 second, with but little work. Call and see him at Agricultural Park, Los Angeles. Mr. W. R. Wynn will be pleased to show him.

California Dillon by Sidney Dillon, out of Caritone, is pacing fast at Santa Rosa and will get a low mark this fall.

James A. Murphy, the wealthy New Yorker, is in the city. At one time he was keenly interested in light harness racing and owned the famous pacer Star Pointer 1:59¼. Mr. Murphy was out here in 1891, when he sold Hambletonian Wilkes to Colonel Moorhead of Santa Clara.

The following "vets" attended the quarterly meeting of the California State Veterinary Medical Association, which convened at Hanford on the 11th inst. Considerable business relative to the best interests of the profession was transacted and a royally good time was enjoyed by all: Dr. David Fox of Sacramento, president of the association; Dr. C. M. Harring of Berkeley, secretary; Drs. H. A. Spencer, P. H. Browning and T. W. Healy of San Jose; R. A. Archibald, J. J. Doherty, Emil Wischke and M. A. Ryan of Oakland; H. A. Turner of Stockton, H. J. Hammond, Charles Keane of Sacramento; E. J. Creely of San Francisco; Otis Longley of Fresno; W. F. Betzold of Selma, Arthur Paul, Frank Griffith and George and W. D. Gordon of Hanford.

Sancier, a \$3,000 Percheron stallion, dropped dead in San Bernardino last Monday. On a post mortem examination it was discovered he had been poisoned. Whether by accident or design is not known.

Monday a drunken blacksmith named Murry passed a team of horses tied by the Russ House, near Modesto, and for some reason best known to himself, took out a knife and deliberately inflicted a long cut on the animal's flank. The act was seen by several, and in a few hours Murry was booked for Modesto, to serve a six months' sentence in the County Jail for malicious mischief. The cut was not deep enough to permanently injure the horse.

The shortest cut to the ideal American carriage horse is through the American trotter, and the Government breeders are likely to learn this important truth if they keep in close touch with the trotting horse breeders they have invited to co-operate with them. The best type of well bred trotting horses to-day are little more than an intensified type of the carriage horse. They have the best conformation for road work of any horse in the world. The best for the heavier work of pulling a big carriage. They have been bred until they possess a harmony of good points unknown in any other horse. All of these Searchlights are desirable in the carriage horse.

The \$21,000 Kentucky Futurity will not be made a two-in-three-heat race. At a meeting of the directors of the Kentucky Trotting Horse Breeders' Association recently it was agreed that it would not be well to change the conditions of a race that had become the chief event on the trotting turf of America, and that it was no hardship for a three-year-old as late as October to race in a three-in-five-heat event.

The well-known Los Angeles trainer Wm. Durfee has taken charge of the training of Regalo for the owners, Cline & Bonfilio. Mrs. Bonfilio having bought a one-half interest in the horse. The horse has a mark of 2:09, and stepped a quarter recently under 30 seconds, and great things are expected of him. He is thought so well of by his owners that they have entered him in three of the big stakes on the Grand Circuit, and will send him East when the season begins. Among the big races he is entered in are the Merchants' and Manufacturers' Stake at Detroit; the Readville Charter Oak, and the Buffalo Stake event of \$10,000. Local horsemen who know what he can do expect him to duplicate the feats of Sonoma Girl, on the showing he has made so far this spring. He is not the only flyer that will represent Los Angeles on the Grand Circuit, for the pacers Pig 2:03¾ and Copa de Oro 2:07¼ will be taken East.

It is possible that W. A. Clark Jr. of Los Angeles will dispose of a number of his long string of trotters and pacers and horsemen are awaiting the expected dispersal sale with a great deal of interest, for Clark has many good ones in his barns. He finds that his string is too long to handle, and may let some of his cracks go.

The Pleasanton Matinee Club will give some fine races to-day (Saturday). A good program is promised, and judging from the excellent one given at the last meeting, those who attend are insured a good time. In order to lend interest to the occasion three handsome cups have been offered as prizes by The Crown Milling Co., Dr. Ira Barker Dalziel of San Francisco and the Pleasanton Hotel.

Mr. John Grimes, the owner of McMyrtle, is breaking and developing several McMyrtle colts that are showing such wonderful flights of speed as to amaze the natives. We saw a ten-month-old colt trot a 3:20 clip last Saturday. He has yearlings that can show any day in the week a 2:40 gait. One of these colts will race in the Sonoma County Driving Club's race, purse \$500, to be held next fall at Santa Rosa. Mr. Grimes would be pleased to show his McMyrtle colts any day in the week except Sunday. His headquarters are at First and D. streets, Petaluma.

J. H. Jack of Berkeley has sent his mare Winnie Wilkes 2:17½ to Santa Rosa to be bred to McMyrtle.

H. K. Devereux of Cleveland, O., has entered Harry McKerron (3) 2:24¼, the fast young son of John A. McKerron 2:04½, in the great Russian International free-for-all race to be trotted next year. Frank Caton will probably prepare him if he is sent abroad for it.

Pasadena will not have a horse show this spring. Secretary E. D. Neff is credited with having said that the passage of the anti-docking bill in this State has so disgusted many horsemen that they have sold their stables.

The Angelus, consigned to the Pleasanton sale, will show a mile on the 15th that will make buyers sit up and take notice. He is by Zombro 2:11, out of Hazel McKinney 2:09¼.

The Limit, in the stable of Sutherland & Chadbourne, stepped a mile last Saturday in 2:12½, eased up all the last sixteenth. This Searchlight colt will be worked carefully a while longer, given a mile in 2:10 and then turned out until next year. He was given a mile last year in 2:15, which seemed easy for him. This year a mile in 2:10 will be just as easy. He will be raced for the money next season.

At a meeting of the Sacramento Driving Club held at the Capitol Hotel last Tuesday evening the following officers were elected: I. Christy, president, and F. H. Metz, secretary. It is the intention of these officials to "boost" this club for all they are worth in the interests of horse owners, and will endeavor to increase the roll of membership. Matinees will be held about twice a month throughout the summer, and beautiful prizes will be awarded the winners. There are rumors flying that the Oak Park Driving Club will join this organization, and under the new rules for amateurs fast racing and close contests will be seen.

Del Coronado 2:09¼ is siring some speedy ones, all of his progeny trot fast early. Wm. Durfee recently drove a twenty-months-old daughter called Cora Madison a quarter in 35¼ seconds with only thirty days' handling, and Wicki Wicki, a son, a mile in 2:14, last half in 1:03¾.

Wm. Durfee has made a number of entries in the Peoria, Illinois, meeting and will in all probability race The Pig, Copa de Oro, Del Coronado, Carlokini, Dredge, Petigru, Murray M. and Wicki Wicki. He may leave something in California in the 2:10 trot.

Quite a number of good horses are working at Los Angeles. Mr. Garland of that city recently purchased a very likely looking green trotter from L. J. Rose Jr. for \$2,500. This fellow is very promising; worked a mile in 2:13½ and acts like a high class one. He was sired by Jas. Madison 2:17¼, out of a mare by Albert W. 2:20. Mr. Garland also owns a very promising five-year-old by Del Coronado 2:09¾. He recently worked a half in 1:05½. Murray M. and Petigru are going sound to date and to all appearances will continue so. The former has been a mile in 2:15 and Petigru has been eighths in 15¼ seconds to cart this spring.

Byron Lace 2:14¼ is a sure enough race horse. He will be sold at the big Pleasanton sale to close a partnership.

Write for catalogues and arrange to spend a week at Pleasanton during the big sale.

Since the publication in these columns of the pitiable condition of the widow of Frank S. Malone, the well known horseman, many of the leading horsemen of Sacramento have signified their intention of holding a matinee at the race track there for this old lady's benefit. At a meeting soon to be held by the Sacramento Driving Club a program will be arranged. Messrs. F. S. Smith, W. Pearson, Albert Elkus, J. Wheeler and Mr. Mitchell will no doubt bring this subject up, as it is a most deserving charity. There should also be a matinee held at the Stadium in Golden Gate Park by the driving clubs of San Francisco to swell this fund. Every horseman on the Coast knew Frank S. Malone. In the days of his affluence he never refused a donation for any charitable purpose and was always anxious to contribute his share. We earnestly hope that something will be done immediately to smooth the rough path of this delicate lady.

The Pig, pacer, trial 2:03¾, by Titus, full brother to Direct, was let down and stepped the last half in 1:06, last quarter in 0:29½. He is now in W. A. Durfee's stable and will be extensively entered down the Grand Circuit. Mr. Durfee will also take Regalo, matinee record 2:09 trotting. These two ought to cut a wide swath in the slow classes in the big rings. Mr. Durfee is at present training upwards of forty horses.

The fast green mare Zomalto, developed by W. G. Durfee, who worked her a mile in 2:09, last half in 1:01, has been leased to W. A. Clark Jr., with an option of purchase. She is working nicely for Red Gerrity. This mare is a trotter and not a pacer, as has been published.

Dr. Defoe has six head of very promising trotters and pacers on the Brace track, near Santa Clara.

W. R. Johnson, the well known trainer, is very busily engaged handling a string of "green" trotters and pacers at the race track, near Santa Clara. He is more than pleased with the way some of them are showing.

Ten associations in Oregon offer \$37,000 for trotters and pacers this season. The State of Washington offers \$45,000, while California will give away something like \$90,000.

There are more light harness horses in training at Agricultural Park, Los Angeles, this year than ever before. Pleasanton is next to Los Angeles in numbers, while Woodland, Fresno, Santa Rosa, Alameda and Sacramento tracks are well patronized.

G. M. Vail is training Toronado, a three-year-old brown gelding by Del Coronado 2:09½, at the Los Angeles track.

Can anyone give us the address of a horseman named George Dewart. He resided in San Jose about 1901?

That the Sir John S. stock, of which Marysville is proud, will attract further and greater attention from the lovers of racing horses was again demonstrated this week, when Tonopah, a four-year-old son of Sir John S., driven by W. L. Vance, covered in 2:26 the first mile he has jogged in four months over the track at Red Bluff.

Walter Mahen, the well known reinsman of Los Angeles, has the best string of trotters and pacers in his care he has had for twelve years, and will be a factor on the California Circuit this year. Walter is well liked by everyone and the drivers, as well as the public, are always pleased to see him "teaming."

J. B. Rodman's beautiful McKinney stallion Merry Mac 2:19½, out of Advocatrix 2:40, by Attorney, has been leased by J. L. Charlton of Ukiah to replace the stallion 'Dumont' K. he recently sold to F. E. Alley of Roseburg, Oregon.

The Brook Nook Stock Farm of Madison county, Montana, is getting 115 head of choice colts and fillies ready for the spring sale. They are sired by Alcane, Jubilee De Jarnette, The King Red and Keeler 2:13½. They are nearly all four-year-olds and a better looking and more promising collection was never broken on this celebrated farm.

There promises to be a big revival of light harness racing during this year throughout the entire Pacific Coast. It is estimated that \$200,000 will be distributed by the States of California, Oregon and Washington. The purses this year are much bigger than ever before offered. The addition of Oakland and Portland has made the Pacific Coast Circuit the third best in the country. To show the possibility of the Pacific Circuit it is only necessary to state that a green horse can be entered in stakes aggregating \$25,000. Already fifteen stakes have been announced, varying in value from \$2,000 to \$5,000. There will be at least sixty purses of \$1,000 in value. It will be seen that the earning capacity of the California light harness horses will be double that of any previous year. The guaranteed stakes for the Breeders' Association, Oakland, Fresno and State Fair meetings close on April 1st, while nominations are not due for the Portland, Seattle, Salem, North Yakima, Spokane, Walla Walla and other northern points until May 25th.

SPEEDWAY GRANDSTAND.

The members of the Park Amateur Driving Club held an important meeting last Thursday night and besides transacting a lot of routine business took steps towards getting a grandstand erected on the speedway track. A committee was appointed consisting of D. H. Aigeltinger, I. L. Borden, Dr. Dalziel and J. C. Kirkpatrick. This committee will in the course of a few weeks have a meeting with the Park Commissioners.

The new stables, in which twenty box-stalls are completed, are being erected on the lot owned by the club and adjoining the speedway and by next week the horses and racing carts will be transferred to the new headquarters.

The season will begin in April and tryouts will be held shortly. A greater interest is being manifested in the sport and the membership has increased fifteen since last fall. The club now numbers sixty-seven members. Several members have acquired more horses and plan to carry off a good many of the blue ribbons.

Meetings will be held from time to time and at each session new projects will be brought up.

Frank Thompson, who is secretary of the club, says that the members are anxiously awaiting the opening matinee.

GOOD THING FOR STALLION OWNERS.

A reliable Impregnator is one of the things that everyone needs who owns a breeding stable and desires to get in foal all mares bred, increase the income from their stallions and eliminate disappointing services. A full line of first class Impregnators sold by Crittenden & Co., Dept. 3, Cleveland, O. Write them for descriptive catalogue, which is interesting and instructive.

ANSWERS TO CORRESPONDENTS.

In reply to a question regarding the pedigrees of certain sires whose progeny appeared on the race tracks last season, one of our readers from Alhambra, Los Angeles, kindly sends us the following: Wapolo was a 17-hand brown stallion, sired by a horse called Cahen's Tom Hal (once called Southern Chief), said to have been brought from Kentucky, and he sired the most serviceable lot of horses in this town. His dam's pedigree, according to her owner, a Mr. Peabody, was never traced. Jim Cahen, former owner of Tom Hal, is now in the asylum, so no information can be gathered there. He was, at one time, considered one of the best criminal lawyers in this State. Thos. Rysdyk 2:28 was by Rysdyk (sire of Clingstone 2:14), out of a mare by Gen. McClellan 144 and he sired Johanna Treat 2:24½, dam of Del Coronado 2:09½. He was brought to San Diego by C. C. Seaman and was last owned there by E. J. Delovey of the Los Angeles Driving Club, who sold him, I believe, to go to Arizona.

What is the breeding of Woodmon? L. R. Ans.—Woodmon 2:28½ (formerly Monwood) is standard and registered, his number being 29189. He was sired by Monon 4071, dam Nora D. by King William. Monon was by Nutwood 2:18½, out of Verbera by Princeps 536; second dam Lindora by Hambletonian 10; third dam by Imported Conster-nation.

Where did Kinney Al get his record? L. R. Ans.—He started November 12, 1907, at Phoenix, Ariz., in the 2:20 class trot and won in straight heats in 2:17½, 2:14½ and 2:17½.

Will you please insert in your next issue the breeding of the following pacers by Diablo 2:09½: Devil-etta 2:10½, Diablass 2:11, Mephisto 2:17 and Teddy A. 2:14½? Dr. R. A. Cushman, Talmage, Cal.

Ans.—The pedigrees of the dams of these four do not appear in the Year Book. The secretaries who sent in the summaries of the races failed to make them out, and the probabilities are they will never appear in another issue of the Year Book. If anyone knows how these pacers are bred and will send the information to us we will publish same.

1. Can you tell me if Vela by McKinney 2:11½ is registered? 2. Is her dam, Clues Wilkes, by Wilkes Boy? J. Walker, Los Angeles.

Ans. 1.—No. There is a Vela by Stranger registered. 2.—No.

Will you please tell me how Sally Pointer 2:06½ is bred? I have a filly by Star Pointer 1:59½, out of Myrtle Kinney; is it necessary to give exact time of foaling to register her; I find it difficult to ascertain.

Ans. 1.—Sally Pointer 2:06½ was sired by Sky Pointer 2:4567, dam Sister McKinney by McKinney 2:11½; second dam Aileen 2:26½ by Anteeo 2:16½, and state circumstances with your application for registration.

Will you please publish the summary of the three-mile dash won by my horse Senator L. at the Bay 2.—No; if you send the certificate of the breeding District track about 1894. Chas. A. Smith, Phoenix, Arizona.

Ans.—You have made a mistake. He won a two-mile race at the Bay District track August 11, 1894, defeating a field of six; time, 4:54, 4:46½. But in San Jose the same year he started to beat the four-mile record, 10:52½, and did so handily in 10:12, which still stands as the world's record. He never started in a three-mile dash.

Can you give me the pedigree of Candidate? 2. Also of John G. Carlisle. E. E. S., San Gabriel, Cal.

Ans. 1.—Candidate 2:26½ was by Electioneer 125, out of Mary Hulse by Messenger Duroc. 2.—John G. Carlisle 2:20 sired by Norval 5335, dam Meta (dam of Old Crow 2:22) by Idol Patchen; second dam Molly Clay by American Clay 34.

Will you please publish the breeding of Comet Wilkes? J. T. K., Oakley, Cal.

Ans.—Comet Wilkes 2:21 was sired by Guy Wilkes 2:15½, dam Mamie Comet 2:23½ (also dam of Macleay 2:22½), by Nutwood 2:18½; second dam Black Betty by Sportsman, a son of Easton's David Hill; third dam by St. Clair.

Did Yolo Maid ever hold a world's record? S. Hogan, Woodland, Cal.

Ans.—Yes. As a four-year-old her mark was 2:12½. That was the world's record for a mare of that age at the time. Gold Leaf, a four-year-old gelding, had a record the same year (1889) of 2:11½.

Please give breeding and record, if any, of the dam of Rupee 2:11½ by Guy Wilkes 2:15½. P. C. Byrne, Hanford, Cal.

Ans.—Rupee's record was 2:11. He was out of Sable Hayward by Poscora Hayward; second dam Sable (dam of Sable Wilkes 2:18, etc.), by The Moor, etc. Sable Hayward had no record.

How many races did Robert I. start in when East? Tom McCoy, Salt Lake, Utah.

Ans.—After winning money in every one of his ten races in California in 1902 and getting a mark of 2:10, he started East, won twice, was second once, was third once and unplaced four times.

What record has Cranky Thorn? H. B. E., Ingo-mar.

Ans.—2:22½.

What is the breeding of Kinney Rose? Answer—He was sired by McKinney 2:11½, out of Golden Rose by Falrose 12598; second dam Lady Gray by Alaska by Electioneer; third dam Lady Harper by Algona, son of Almont 33; fourth dam Carrie by Oddfellow, son of Echo.

AUSTRALIAN NOTES.

Andrew Robertson, the well known Australian horseman, writes from Sydney as follows: With the exception of a few days' rough weather after leaving San Francisco we had a splendid passage down, all the horses landed in great shape. The weather was very trying on the horses in the tropics, the breeze being behind us. One or two took sick, but a good dope fixed them. Marvin Wilkes 2:12½ is absolutely the best traveler I ever had anything to do with; no trouble whatever and such an excellent doer. The horses are still in quarantine, where they have now been for three weeks. I expect to get them out by the end of the fourth week, and then take them on to Melbourne.

The first of the Abbey Bells (Bow Bells-Russia) stock to race in this country—Twinkle Bells (Abbey Bells-Twinkle)—won a race in good style at the Richmond race course, Melbourne, on February 13th. This filly is only two years old. Dan Patch 2:11, goes against his own record on the same track (half-mile) about the end of March.

Dugald Taylor of Truganini Stock Farm, Melbourne, writes: I am pleased to see that the progeny of my horse Owyhee 2:11, although limited in numbers, are doing well. Here in Australia his services are much sought after. He is getting splendid looking stock—prize winners in the show ring. Two of his sons have raced here, one O. Y. M., just got beat two lengths in a two-mile race, time 4:43, standing start. He will have a number of representatives in the races this coming season. All are showing speed. My other stallion, Osterley, by Childe Harold, died last week. He has been the premier stallion of Australia for years. He has twenty with records below 2:20, and two below 2:20. Osterley was twenty-one years old. Sihambra by Prince Red has a record of 2:25 for a mile, starting 280 yards behind the mark. She has won eight firsts and four champions in the show rings of Sydney and Melbourne. I have two fine colts from her and Osterley.

OREGON HORSE IN LONG RACE.

Fred T. Cromwell, a la Sir Thomas Lipton, will race Shamrock II. against Homer Davenport's Arabian horse across the continent, instead of Shamrock I., who injured his hoof a week ago and has gone lame. Mr. Cromwell says:

"I have bet \$5,000 with some Eastern sportsmen that our Western horses will beat the Arabian, because I think my horses will stand the mountains better. Shamrock II. traveled 600 miles in the Canadian mountains last summer and will go over the Rockies without hurting himself a bit.

"He is really an Oregon horse. He is six years old and came to Alberta from Eastern Oregon. He is from Kentucky stock matched with a Western range mare. The racers will all leave San Francisco in June and ought to be in Washington in three months and a half. Elliott, one of my cowboys, will ride Shamrock II."

Mr. Cromwell is a wealthy Edmonton cattleman, who has been visiting friends in this city a few days. There will be four horses in the Transcontinental race. Besides Homer Davenport's Arabian steed and Shamrock II. the Government will have a soldier with an Army horse and the Denver Post has entered a mustang and a cowboy.

ANOTHER STALLION PURCHASED.

The handsome Belgian stallion Felix d'Herlaemont, belonging to J. Crouch & Sons of Lafayette, Indiana, which made such a fine impression at the horse show last Saturday at Livermore, has been purchased by a company there.

The purchasers are, with the single exception of H. B. Wagoner, farmers living in the northern part of the Livermore Valley. They have organized under the name of the Livermore Belgian Horse Company, with the following stockholders: G. W. Teeter, Manuel Gomez, H. B. Wagoner, A. J. Olivera, Jos. Bellam, Arthur St. Clair, Beck Bros., Wm. McDonald, D. V. Massell, Manuel G. Bettencourt.

Felix d'Herlaemont will be five years old in May. He was imported on July 22, 1907. He is a sorrel in color and weighs 2040 pounds. The company certainly has a magnificent animal and he ought to do much to maintain the standard of local draft stock.

SANTA MARIA DRIVING CLUB.

Tuesday evening, March 10th, the Santa Maria Driving Club held its annual meeting and elected the following gentlemen as officers for the coming year: President, S. Fleisher; vice-president, R. L. Jones; secretary, C. W. Smith. The club also appointed a committee to arrange meetings and races, consisting of Robert Earl, Wm. Mead, J. Dolan, Frank Jessee and G. L. Blosser.

The track is being put in first-class condition, and the gentlemen interested in the club and the track are spending considerable money on it this year. It has been plowed and now the outside curves are being thrown up and it is the intention to make the track a very fast one for the summer season and the fall meetings.

The San Luis Obispo track is nearly finished, and with the two fine tracks so near to each other it is probable that many good races will be seen at the matinees this year.

LIVERMORE HORSE SHOW.

Livermore gave its best horse show last Saturday, and the advertising given its draft stock interests were certainly far-reaching. Much good to the industry will certainly result, as every one of the many horsemen present went away with a good impression.

The weather was all that could be desired. The stallions made a magnificent showing. One enthusiastic visiting horseman declared that the exhibition far exceeded in numbers the parade of draft stallions at the State Fair last year.

The affair throughout was a grand success. The committee deserves great credit, especially President H. M. Christensen and Secretary Theodore Gerner, who devoted their entire time for weeks to arranging the details, and to Announcer Wm. McDonald, who gave much time to preparing for the show, in addition to his fine work on the stand.

Following is a list of the entries and a synopsis of Announcer McDonald's description of each:

Wilson Coats showed Sid, a likely looking young stallion by Welcome, out of a mare by Blue Bull.

Sylvan Bordes had Welcome Jr., by Welcome, out of a mare by Ploughboy, second dam a Patchen mare.

Chris Anderson's Chas. Derby stallion Alika was followed by Belle and Beauty, two of his daughters, out of Beauty by Le Dard.

Thos. H. Green's Electric was in line with seven of his get, which made a good showing for the son of Richard's Elector and Stemwinder. Electric's colts shown were John Sweeney's Beauty, out of a mare by Starboul, second dam by Monroe Lion; John Galway's Dot, out of Alma Grey; F. R. Fassett's Beauty, out of Alice Lamb, daughter of a son of Richard's Elector; Rasmus Christensen's Nettie, out of Nellie G.; Wm. Clark's Baby Ruth, dam bay filly by Dick Patchen; H. M. Christensen's Lady Green, out of Black Jessie, she by Munch's Flying Morgan; James Taylor's Sultan, out of a Nutwood mare. John Frick's Jack Nelson, son of Jack Nelson, and Lottie F., by Newland Hambletonian.

Young Bros. showed Grant, son of O'Hara's Granger, out of a mare by Direct.

H. Olsen of Haywards made a good showing with five of as well bred and stylish looking animals as any owner can boast of. Joe and Morgan, two grand looking sons of Welcome 2:10½, were driven as a team and make an ideal carriage pair. Belle by Diablo, out of a mare by Director, attracted much attention, she being a very stylish and handsome animal. Ironwood by Iran Alto, out of Nellie Nutwood, is a very classy horse. Ned Dennis by Mendocino, out of Lucy Shaw by Cropsey's Redwood, is a handsome three-year-old gelding of fine finish and racy appearance.

Otto Schultz showed a high class road mare in Lady Belle, a daughter of Diablo Jr., out of Polly by John Knight.

Frank Collier showed a handsome young road team in Jip and Dan, a son and a daughter of Tanglewood, out of Kit by Young Rifleman.

Wm. Mohr entered Billy, a fine looking young road horse by Girard, out of Grey Pet.

F. A. Schrader's handsome road mare Anna was in line. Anna is a daughter of Director, out of a mare by James Lick.

Andrew Christensen was up behind his famous road horse Enterprise, son of Jack Nelson and Birdie Morgan.

In the German coach horse division were Machus 3929, Alastor 4250 and Odin 8974. Machus is a newcomer to California and is owned by the German Coach Horse Company of Danville, where he will make the season under the management of B. W. Bennett. Machus is a grand looking individual and ought to be a great producer. Alastor and Odin are now making their third year in the stud and their colts are proving them to be good producers. Alastor is owned in Haywards and Odin is owned by Max Berlin of Livermore. Odin's get in line were August Hagemann's Dick, dam Molly; A. Baxter's Max B., dam the Cleveland Bay mare Nance.

The draft horse division was well represented, and at the head of this division came Master Clarence Anderson mounted on Miss Dora Anderson's Iceland pony Dot. In his hand he carried the banner of the dead Trappiste, champion Belgian stallion of the world at one time, owned by the Belgian Horse Company of Livermore. Next came Nadailac, owned by the Belgian Horse Company of Livermore, and Colino, owned by the Percheron Horse Company of Altamont.

N. D. Dutcher was in line with his two Shire stallions, Bay Oaks and British Oaks, and King Clyde, a four-year-old Clydesdale stallion. All three of these stallions have been tried in the stud and are proving to be good producers. Five of the get

of Bay Oaks were in line and one would have to travel a long distance to find five better colts of their age. Mr. Dutcher also showed Twinkle, a handsome trotting bred mare, whose pedigree is of the gilt-edge variety, she being by Sir Rodman, he by Gold Rose, he by Sterling, he by Egmont, he by Belmont. Sir Rodman's first dam was Lady Armington by Anteeo, second dam Abbottine by Abbotsford, third dam Lena Bowles by Vick's Ethan Allen. Twinkle's dam was Twinkle by Echo, he by Hambletonian, second dam Lena Bowles, third dam Lady Schafer.

H. P. Mohr of Pleasanton, one of the best posted and most progressive draft horse breeders in the State, made a fine showing with his four entries—Directox by Traitor Gomer by Perfection Model Prince the Fourth by Model Prince, and Enterprise by Bijou Bernie. Directox and Perfection are both imported Shires and are both registered in volume V. of the American Shire Horse Stud Book and are splendid specimens of fine draft horses. Model Prince the Fourth is a grand looking young Clydesdale stallion of Mr. Mohr's own breeding, being by Model Prince, one of the best sires ever owned in California, and his dam was Rosie, an imported Clydesdale mare. Mr. Mohr's fourth entry was sired by John Meyn's imported Belgian stallion Bijou Bernie, and is out of Pet by Canny Jamie.

Antone Goulart of Santa Rita showed a handsome Percheron stallion in Lustre Noir, a son of Prince Noir 8444, out of Queen 32234. Mr. Goulart also showed Nateby Ensign, an imported Shire, by Blithewood Harold 15492, out of May Blossom 10432.

John Crouch & Son of Lafayette, Indiana, had on exhibition a fine young five-year-old Belgian stallion that was much fancied by the draft horse men.

John Meyn's imported Belgian Bijou Bernie and Max Berlin's imported Belgian Barnum de Limellette were each represented by a number of their colts. Barnum de Limellette's colts were H. M. Christensen's yearling Berlin, out of Jane by Le Dard Jr., and two other yearlings owned by H. B. Wagner, while Bijou Bernie's colts were H. P. Mohr's Enterprise, out of Pet by Canny Jamie; John Meyn's Queen, out of Meg by Adolph; J. B. Nunez's Pleasanton King, out of Kate by Raglan; Peter Kruger's Oakwood, out of a mare by Bogwood; Paul Freydenal's yearling colt John M., dam Peggy by Oregon; Vaul Freydenal's Baby Berie (10 days old), out of Nellie by Sultan; August Hagemann's Fanny, out of Sally by Adolph; John Luders' Bernhard, dam Fanny (untraced).

N. D. Dutcher's Bay Oaks made an excellent showing with his get, which were Oak Leaf, an eleven-months-old colt, owned by D. Dieckhoff, out of Sally by Raglan, Oak Leaf being the kind that any breeder can be proud of; Geo. W. Teeter's Red Leaf, a yearling by Bay Oaks, is also a good one, while D. M. Teeter's Tom, out of a mare by Raglan, Livermore Queen, out of a mare by Raglan, and Livermore Bay, out of a Starlight mare, were all high class colts.

Andrew Fregolia of the Vasco Ranch showed Ulema Jr., out of Ulema, and Kate by Raglan.

J. H. Martin's Oregon Jr. is another grand individual of California breeding, being by Oregon, out of Nellie by Adolph Second, dam by Eugene.

M. Dineham was in line with John Armstrong's Minstrel Boy, a husky three-year-old by Oregon Jr., out of Maud by Le Dard, dam a Punch mare.

Henry Coldewei's Moltke, son of Sultan and Lizzie, showed well.

A good son of Raglan in the line was Tony Basso's Black King.

Emperor by Young Adolph, owned by John Collins, never looked better and his colts are all high classed.

H. B. Goecken showed Native Son, a Livermore Valley bred horse, sired by Raglan, first dam Nellie by Adolph, second dam Pet by Snowflake. Native Son took first prize at the Tanforan Horse Show in 1902, and his owner has such faith in him as a producer that he offers to show the colts of Native Son against the get of any five stallions in Alameda county for \$100 a corner, winner to take all, at any time in the fall of 1909.

One of the best features of the parade was the four broodmares—Nellie, Queen, Flora and Rose—entered by H. M. Christensen. These mares would weigh on an average of 1600 pounds and are of Mr. Christensen's own breeding, being by his own stallion, Le Dard Jr., a horse that left behind him some of the best horses ever raised in Murray township.

The judges in the colt competition were John H. Marlin of San Lorenzo, Joel A. Harlan of Walnut Creek and T. D. Coffman. Owing to a misunderstanding the judges were given no chance to judge the colts, as many of them were started for home after the parade.—Herald.

THOROUGHBRED STALLIONS NOT WANTED.

[William G. Layng.]

Since Governor Hughes of New York stated his views upon racing and advocated the abolishment of gambling on race tracks a few of the turf journals, as well as the leading dailies, have published columns showing that this sort of betting should not be disturbed and that there is no harm in it; that without its influence racetracks would close and the "sport of kings" would die. I have nothing to say about this form of wagering and do not believe Governor Hughes can shut his eyes to the fact that if he enforces such a law he will also have to issue proclamations stopping card playing, church lotteries, betting on elections and stock gambling. What I do protest against, however, is the formation of Breeding Bureaus by the Jockey Clubs of Kentucky and New York which have for their object the introduction of thoroughbred stallions into the agricultural districts for the purpose, as they say, of improving the types of harness horses, but more covertly to get the political support of the farmers to any schemes they may wish to carry through the Legislature.

The long articles (prompted no doubt by the earnest pleadings (?) of these Jockey Clubs), which have appeared in the public press, paint in glowing colors how rich the farmers will become if they only send their mares to these Bureau stallions, which are only "discarded skates" purchased or donated by the members of these great jockey clubs to be used on "cold blooded" and trotting bred mares. Here is an excerpt from the Kentucky Farmer and Breeder, a representative turf journal. In reading it one would be led to believe that we are just entering into the horse breeding industry in the United States and that we are ignorant of the influences of thoroughbred blood; in other words, we are just entering into this pursuit and the year is 1822:

"The beauty of the thoroughbred blood is its refining influence on that of other strains. It is the basic blood of the horse world, and the coarsest type of the farmers' drudge, when bred to a smoothly turned thoroughbred horse, frequently produces a prize winner. Great care has been exercised by the members of the Breeding Bureau to select only sires, of fine temper, of smooth conformation and good bone and color, and all must be at least 15.3 hands high. There are a number of fine mares of trotting or saddle blood scattered throughout the State and these make an ideal cross for this type of stallion. It is the product of such matings which change hands for prices up in the thousands in the horse markets of the world. Most of them are bought in the rough from the farmer and are fitted by skilled horsemen for the markets in New York or abroad. It is the intention of The Jockey Club, through its Bureau of Breeding, to inaugurate a campaign of education for the farmer, so that he will prepare his young stock for the market himself, thus doing away with some of the profits which have been hitherto going into the pockets of the middleman. He will be taught how to care for his mares prior to foaling, how to rear the colt so that it will reach its development at the earliest possible moment, for feeding is a factor of cost, and then will follow instructions on the breaking, biting and shoeing of the young things so that they may be turned into money as early as possible. Another advantage of the thoroughbred cross is its early maturity, and while the cold-blooded product would scarcely be available before he is four years of age, the half-bred is ready for the market at three. In fact, the time is coming when those horsemen who say that we have no definite type of the equine family in this country to compare with the Orloff of Russia, the hackney of England, or any of the other accepted families which breed with uniformity and perpetuate characteristics of color, gait and conformation will be convinced that the United States is not to remain in eclipse in the work of improving the breed of horses."

The above reads very smoothly, but it will not mislead any enlightened horsemen who have been reading our trotting horse and agricultural journals. Before going further it is well, perhaps, to know that these worn out crippled stallions, the majority of them being forced to race with their systems filled with "dope," were not considered good enough by their late owners to breed to thoroughbred mares. Some have achieved reputations as sprinters; very few having been able to run a mile and repeat race carrying top weight and make as fast a record as horses which faced the flag thirty or more years ago. Ye Gods! The idea of improving the breed of light harness horses with such castoffs. Why, it is preposterous. During the past twelve years I sold many sound thoroughbred stallions to owners of the largest stock farms in California and Nevada, and I have yet to hear of a good light harness horse resulting from such matings. The owners have had these "half-breeds" driven in droves to every California market and were glad to get anything for them. The fillies that they could not sell or give away were sent back to the range and bred to large standard bred stallions purchased here to cross with them, and even then, the produce is far from being what their owners expect. San Francisco buyers fight shy of these light-limbed, light-headed and light-waisted animals, and any one who has begun unfortunate enough to possess any of them will agree with me that the wildest mustangs of the plains are as docile as sheep in comparison. But the farmers of New York and Kentucky are handed these "gold bricks" on a silver platter and told that by patronizing these stallions the produce will bring them thousands of dollars in three years from the time the composite foal is dropped.

In olden days we find, by reviewing turf statistics, that some of our fastest trotters and pacers trace to some thoroughbred sire. Admitting this, let us see if the latter were not far superior to the "doped skates" that the Breeding Bureaus are scattering like bird shot into the rural districts. It will be noted that these Bureaus are not sending any

thoroughbred mares which trace to long distance race horses to be bred to our trotting stallions. It was to this kind of breeding, however, that some of our fast trotters and pacers trace. In a few of the dailies writers make a great ado about the horse Venture 2:27½, which they claim was a thoroughbred, and the only one to get such a record; besides his daughter Stemwinder was the dam of Directum 2:05½, the trotting king. To enlighten these scribes I am impelled to say that "Venture 2:27½ was not a thoroughbred" according to the rules of the American Jockey Club. He was sired by Williamson's Belmont, a thoroughbred, out of Fanny Mostyn by American Boy Jr., a trotter, if there ever was one. He was the sire of Lady Washington (dam of Ewing 2:21¼, Kate Ewing 2:21¼, etc.), and Grey Dale (dam of Longworth 2:19, a sire, and Silverthreads, sire of the grandam of Oakland Baron 2:09¼). On page 346, Vol. 3, of the American Stud Book, American Boy Jr.'s pedigree is given as follows (although a mistake is made regarding the place he was foaled. He was not a Native Son of the Golden West, but was foaled near Cincinnati, Ohio, and brought to California by W. H. and Henry Williamson, at the same time they brought out Williamson's Belmont). American Boy Jr. was by American Boy, dam by Shakespeare, second dam by Cincinnatus, third dam said to be thoroughbred. Mr. W. H. Williamson claimed he could not run a mile in 1:58, but he was a beautiful driver. So much for the only "thoroughbred" trotter in the Stud Book.

Some of the thoroughbred daughters of the following named great sires when bred to gait-controlling, level-headed trotting stallions produced daughters which were noted as great broodmares, such as Alma Mater, Miss Russell and Midnight. These are the most successful representatives of this breeding. There were others not quite so great. But, before going further let us take a hasty glance through the list of the principal thoroughbreds which figure in the annals of trotting horse history, with the understanding that during the periods when these great stallions were in their prime there were not so many railroads as there are to-day, horseback riding was almost universal and many owners of the best mares bred them to these thoroughbreds; but is it not singular no 2:30 trotter ever appeared to gladden the heart of the broodmare owner? The members of the Breeding Bureau can see by the following list that these horses not only sired great racehorses, but they were great themselves and transmitted their good qualities to their daughters (those which proved successful matrons when bred to sons and grandsons of Hambletonian 10, Pilot Jr. 12, Geo. M. Patchen Jr. 2:27, and a few other representatives of the Clay family).

Sir Charles, a great racehorse at three and four-mile heats, the leading American sire for half a dozen seasons, is the sire of Bonnets of Blue, Trifle and the record-breaker Wagner.

Sir Archy, sire of Sir Charles, was far and away the best horse of his time at four-mile heats, and no stallion was to be compared to him. He sired Flirtilla, Arab, Flirtilla Jr., Henry, Vanity, Reality, Sumpter, Bertrand, Sally Hope, Gabriella, Sir Richard, Timoleon (sire of Boston), etc. He was a son of Imported Diomed and Castianira by the great English horse Rockingham.

Imported Bonnie Scotland (half brother to Blink Bonny, winner of the Derby and Oaks), won the Liverpool St. Leger and ran third for the Doncaster St. Leger. A "stayer" and a sire of stayers besides a number of fast sprinters.

American Eclipse, never defeated, winner of the great match—I think it was in 1822—of North vs. South over Sir Henry. He was a wonderfully good sire, notwithstanding his races were at four-mile heats. He sired Ariel, Black Maria, Shark, Mingo, Midas, Gano, etc. His best son was Medoc.

Imported Glencoe, winner of the 2,000 Guineas, Ascot Cup and Goodwood Cup. He was considered the best stayer and gamest horse of his day. He sired Vandal, Reel, Charmer, Blonde, Sally Lewis, Davis and many other good long distance racers. These names are all familiar to the student of trotting horse literature; so is that of Imported Margrave, winner of the Doncaster, St. Leger and other good events. He was a noted stayer, having splendid knee and hock action.

Imported Australian, a winner at two-mile heats, ran under the name of Millington and won the Dowsell Stakes, mile heats, at New Orleans, and Produce Stakes, two-mile heats, at Lexington, Ky., as a three-year-old. He was a splendid sire and begot many famous horses, among them being Spendthrift, Miser, Rutherford, Wildide (four-mile race winner), Fellowcraft, Baden Baden, Abd-El-Kader, Abd-El-Koree, Maggie B. B., Lizzie Lucas, Atilla, Mate, Leinster, Springbok and the great Helmbold, besides the dams of Falsetto, Iroquois, Bramble, Bramaletta, etc.

Imported Trustee was a brother to Mundig, winner of the English Derby, and a half brother, I believe, to Cotherstone, winner of the St. Leger. Imported Trustee was a very fair racehorse and a great stayer. His sire, Caton, when taken on the race track in Yorkshire, England, had to be whipped to get him to shift from a trot into a gallop, and this characteristic he imparted to his progeny to a marvelous degree. Trustee sired the great Fashion, Revenue and several others whose names I cannot recall.

Planet, his son, was a wonderfully good, consistent racehorse, one of the very highest class. He was also foaled in Virginia, and like his sire and grand-sire, seemed to love to trot. His dam was Nina

by Boston, a horse that appears in the pedigree of Nutwood 2:18¾, and whose sons, Jack Hawkins, Cracker, Lexington and Boston Boy, sired daughters who were the grandams of many of our greatest record holders. Boston was the undefeated champion and most successful four-mile race winner in America, the greatest horse ever foaled. He started in forty-five races in all parts of the country and won forty of them. Thirty of these races were of four-mile heats. Boston was a great sire.

Lexington, his son, was also one of America's finest race horses in the days when opiates, nerve stimulants and hypodermic syringes were unknown. Norfolk, the champion, was by Lexington out of Novice by Imported Glencoe.

Imported Hercules by Kingston (winner of the Goodwood Cup, etc.), out of a daughter of Toscar by Bay Middleton (unbeaten winner of the Derby), Hercules sired Alpha, Gipsy, Bonnie Jean (dam of Peter the Great), Brown Bess, Lady Hercules, Beauty, Brown Maria, Mamie C., Mary Watson, Bob Wooding, etc.

Williamson's Belmont, I believe, was never raced much, as he was never properly trained and his speed developed, but his progeny were wonderfully game and first-class "stayers." He sired Langford, the best horse of his day, in fact, the first high class one bred in California. He beat Ashland mile heats in a match race and sired Thad Stevens, the famous record-breaker and four-mile heat winner. Belmont sired Gladiator, Pele, Owen Dale, Don Victor, Bonnie Belle and a number of others. Belmont was a perfectly gaited natural trotter and all his progeny were noted for this trait. His breeding was of the richest and if trained as horses are trained to-day he would have been a great one.

Grey Eagle was another noted thoroughbred and "stayer." His match race with Wagner, so beautifully described by Frank Forrester, showed how highly he was esteemed and how many thousands believed he was invincible.

Wildide, the great four-mile race horse that won so often at the Bay District track, San Francisco, was by Imported Australian. He was owned in his declining days by the late Mr. Judson of Santa Clara, and when turned into the big paddock adjoining his large box stall trotted as purely as I have ever seen Director or Electioneer.

Enough has been given to show that these stallions were proven race winners, and to their daughters more than to themselves are we indebted for such mares as the following, which appear in the great broodmare table. This list only emphasizes the fact that no thoroughbred sires are needed. And we can get along very well without the mares when we consider how small a proportion the best of them are in comparison with "colder blooded" ones: Emma Arteburn, Columbine, Norma, Laura C., Cecil, Emma Robson, Lady Ellen, Aloha, Fen, Little Fortune, Mambrino Ridge, Anna Belle 2:27½, Susie 2:26½, Minna Drake, Tullahoma, Vanity Fair, Penelope, Betsy and I, Alma, Bashaw Belle. Ella by Cripple, Fadette, Fanny Williams, Heiress, Waxana, Mamie, Telie, Cuba, Ella G. and perhaps ninety-six more; but even the majority of the above mares cannot be traced to the fifth dam.

This is a very poor showing compared with the thousands of our very great broodmares, and while I do not wish to detract from the merits of the greatest representative trinity of this half thoroughbred breeding, Miss Russell and Midnight, both by Pilot Jr., and Alma Mater by Mambrino Patchen, I know that the two former bred very unevenly in size and color, while some of the latter's colts and fillies had dispositions that were not the sweetest in the world. Nevertheless, these mares (considering that other trotting bred stallions were bred to thoroughbreds for over eighty years and the matings proved farcical) should be given all the credit possible. But the members of the Breeding Bureaus can enlighten themselves as to the harmful effects of injecting any more thoroughbred infusions into the trotting horse family by studying the great broodmare table. It will teach them that in this, the two-minute age, we have no cause to go back to the days when three-minute speed was the extreme limit. They will see the names of Beautiful Bells, Green Mountain Maid, Minnehaha, Bertha, Emeline, Bicara, Clara by American Star, Athalie, Tecora, Belle of Clarence, Chapp, Mosa, Ned, Old Dolly, Elaine 2:20, Gretchen, Hannah Price, Ingar, Soprano, Mamie, Kate, Lady Yeiser, Lucia, Four Lines, Sontag Dixie, Nancy Lee, Maggie McGregor, Eventide, Venus, Waterwitch, Willie Wilkes, Sweetness 2:21¼, Sable, Santa Claus, Salinas Belle, Mayflower and 5,684 more producers of speed, great broodmares which do not have any close infusions of "hot" blood.

There is another point to be taken into consideration by the farmer who intends to patronize these thoroughbred stallions at a "merely nominal figure," and too dear at that. It will be impossible to get the offspring of such mares registered in 1909, and we all know how much non-standards are worth in any community.

Returning again to the vital question, "Thoroughbred in the Trotter." The late Senator Leland Stanford must have expended \$250,000 to get a Palo Alto 2:08¾, a very game trotter, although his legs gave way in training. Yet he never sired a trotter that could come within five seconds of his record. Sunol 2:08¾, the ex-queen of the turf and a failure in the stud with one exception, I understand, a filly in Georgia that is not like the rest of the produce of this nervous, giddy trotter, a cat-hammed knee knocker of the first class. Expressive 2:12½ was

another and the best three-year-old of her day, but her Eastern campaign crippled her and when put to breeding has proven a dismal failure. Can any of the farmers in New York and Kentucky afford to spend as much money as this splendid judge and close student and get such an insignificant return. Besides he owned two of the greatest gait-controlling stallions in America, Electioneer and Gen. Benton. He lived to see how uncertain were the results of introducing so much thoroughbred blood into the ranks of his broodmares. If he could have lived twenty years longer and bred some of the pure bred trotting stallions to those mares, he might have accomplished something; but twenty years is a long time, and the probabilities are he would have died firmly convinced that he had been misled and had sunk a fortune to find that he was on a "barren lead."

The trotting horse industry is not going to retrace its steps. It will not surrender one inch to the Breeding Bureaus, and these organizations are in a fair way to be taught a few lessons; and it is hoped they will put their castoff stallions to some other use than to the one they so plausibly try to do. These men must be taught that we are not breeding saddle horses or hunters, and if their studs are not good enough to get race horses from they are unfit to be bred to our light harness mares, whether registered or not. They must be taught that the intelligent farmers of the present day have no time to waste in trying to make a breed that was proven a rank failure long before Lee's surrender. They must be taught that in Australia, New Zealand, Great Britain and Europe this kind of breeding to short distance sprinters that were called "dogs," "hounds" and "weeds" never produced a saleable foal. Such stallions as the Breeding Bureau is peddling are not in the same class with those of bygone days which I have enumerated. Another lesson they must be taught, and that is, that farmers are not breeding horses for love; they are breeding for the money they can get for their stock, and that in the big sales markets of New York, Philadelphia, Chicago, San Francisco, or any of the large cities, there is no sale now, nor never will be, for the nondescripts which will result from breeding as directed by these Bureaus.

I hope to see every light harness horse organization, every agricultural association, as well as all who are interested in the breeding and development of the best and most useful horse on earth, "The American Trotting Horse," take steps at once to present the facts in their true light as to the outcome of this clandestine scheme to add disgrace to the breeding operations of the men who have spent millions of money and years of toil and study to bring the breeding of the trotting horse to the high plane it occupies to-day. I also hope that steps will at once be taken to offset any of the work undertaken by these Bureaus, and point out to unsuspecting farmers the fact that even the United States Government would not take one of these "skates" as a gift to place on its experimental farms; and advise them also to shun these animals as they would any afflicted with a malignant disease. We do not need them, for there are over 45,000 trotting stallions already registered and we cannot afford to waste our mares with any that are non-standard, even if they are thoroughbreds, unfitted by breeding, conformation and reputation to sire race horses.

THE STALLION HENRY BAKER.

Among the best representatives of the great Electioneer family standing for public service is the handsome bay stallion Henry Baker, who has been awarded first premium wherever exhibited. He was sired by Anteeo 2:16½, the best son of the great Electioneer, sire of Sunol 2:08¾. His dam is Lottie by Jupiter, son of Green's Bashaw (for pedigree see Trotting Register, page 68), sire of Almont Bashaw 2:15½, a grandson of Charles Kent's mare, dam of Hambletonian 10, sire of Electioneer. Bashaw ranks with Hambletonian 10, George Wilkes and Pilot Jr. 12.

Jupiter's dam by Hambletonian 10 (grand sire of Nancy Hanks 2:04), she from Julia (for pedigree see American Trotting Register, page 181) by Pilot Jr., sire of Miss Russell, dam of Maud S. 2:08¾, etc. Dam of Lottie was by Gilpatrick, thoroughbred, a four-mile horse, with extreme power of endurance.

Henry Baker is a beautiful bay, with star and two white hind feet, stands 16½ hands, with excellent feet and limbs of fine trotting action. No better bred horse can be found—world beaters on both sides as trotters—and backed up by the thoroughbred, going back to the best foundation possible.

Notice the Hambletonian 10 on both sire and dam sides of Henry Baker—making him a perfect horse in every respect; none but the envious can find a single fault. No weak points in his ancestors. Anteeo trotted a last half of a mile in one minute when more than a dozen watches were held on him.

"Hambletonian 10 will always be considered the foundation of the American trotting horse,"—Breeder and Sportsman.

Henry Baker is not only known in this country, but by horsemen all over the United States, therefore the name alone bestows pride on his colts and will help to sell them. Anteeo, the sire of Henry Baker, was sold for \$10,000, then for \$25,000; third time for \$55,000, and the fourth time for \$65,000, and his service fee was \$1,000. His book was full at that price. Now you have an opportunity to breed to one of the finest stallions not only in California, but in the United States or Europe.

Henry Baker will stand this year for public service at or near Monterey, and for particulars in regard to service fee, etc., address R. C. Austin, Monterey, Cal.

STOCK FARMS THAT PAY.

All the stock farms that pay, it is a noticeable fact, are those that advertise and get out catalogues of their stock. Every stock farm ought to get out a catalogue, the sale of one colt pays the expense. The cost is very little if you get experts in this line to do the work. Magnus Flaws & Co., 358 Dearborn street, Chicago, get out ninety per cent of all the stock farms published, and they compile and print them at ridiculously low prices. Write them for samples and prices.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

PHEASANTS BENEFICIAL TO THE FARMER.

Pheasants are supposed to have come originally from Asia, although they were known in Greece and France many centuries ago, and were introduced by the Romans into England, where they have since flourished on the wild pasture lands and in the extensive game preserves. They were early under legal protection, and were artificially reared and fattened by breeders selected by the royalty. Pheasant shooting from time immemorial has been one of the favorite sports of the English sportsman.

A few years ago Mongolian pheasants in considerable numbers were turned loose in several Western New York counties, states the Farm Stock Journal, and under the protection of a game law forbidding killing them until the season of 1910 they have increased quite rapidly, especially in the counties of Genesee and Livingston. [What has been accomplished in Washington and Oregon in the propagation of the Mongolian pheasant is well known. In the Hawaiian Islands the introduction of the several varieties of the pheasant has also been very successful.—Ed.]

There is a wide difference of opinion among farmers relative to the economic value of these birds. Some hold that the vast amount of weed seed and insects they consume amply repays for all the grain they eat. Others regard them as of doubtful value. In the farming districts remote from the towns and Italian settlements they have become almost as tame as chickens, feeding with the barnyard fowls in winter time. When the hunting season opens three years hence, it is believed that hunting them with dog and gun will be little better sport than shooting chickens in the farmer's yard.

The final deduction of the Eastern writer, as to the lack of sport essentials in hunting the birds, is not borne out by results shown in the various localities where the birds have been introduced successfully.

Pheasant breeding is a large and profitable industry in England and on the Continent. The business has been gradually growing in the United States until at the present time large pheasantries are conducted with profit in a number of the Eastern and Western States.

Some practical suggestions and valuable information is given in a paper recently read at the annual State Horticultural Convention last month at Canon City, Colorado, by Mr. W. F. Kendrick, the proprietor of the famous pheasantry in the City Park at Denver and also at Littleton, Col.

"The actual, computable benefit to be derived from the addition to a farm or orchard of a score or more of insectivorous birds is one regarding which neither the professional mathematician nor the watchful, intelligent crop grower can reach a definite, dollar-and-cents conclusion.

"But it is a certainty, that any winged creature which devours or annihilates insect pests, or the common field mouse; or which uproots and destroys noxious weeds and the persistent dandelion, is of incalculable benefit to the fruit and grain grower; and all of this the pheasant does. Though absolutely definite figures are, from the nature of the losses, an impossibility, yet fair approximations are constantly being made and are accepted by those conversant with local conditions, some portions of the conclusions being decided, others being comparative.

"The appalling extent of the slaughter of insectivorous birds is proven beyond question by the tremendous annual increase in the losses to fruit and grain crops through caterpillars, worms, mice, scale and the scores of other pests infesting the orchards, the grain, cotton, alfalfa and sugar beet fields of this country; which losses to the horticulturist and the farmer were recently estimated by the president of the National Audubon Societies, Mr. William Dutcher, to foot up the amazing yearly total of a greater sum than the complete capitalization of the national banks of the United States, and amounting to nearly as large a sum as there is now on deposit in the postal savings banks of France.

"And this enormous amount a yearly and total loss, which destruction is entirely due to the rapid decrease in the number of insect destroying birds." Vide Mr. Dutcher's report.

"That the loss of this \$800,000,000 each year is preventable by the exercise of a fair amount of protection on the part of the farmer and the pomologist, and by the strict enforcement of the game and penal laws now on the statute books, is readily acknowledged; but where the transgressor of these laws is a neighbor, or a friendly pot hunter, the farmer too often extends to him the mantle of his protection, thus exposing the fruits of his own labor to the onslaughts of the great hordes of crop pests which daily come to life with the return to earth each day of a genial sun.

"The proverbial tendency of neighbors is towards protection, but such a line of conduct must be frowned upon in this particular instance if insect pests in general are to be either wiped out entirely or reduced to a minimum by the protection afforded insectivorous birds.

"The present public apathy must be aroused, attention properly applied, action stimulated, and crops of all kinds must be preserved from the minute destroyers of orchard and field, grains and fruits, and the wealth of the nation thereby be conserved.

"In the earlier days of the country the owl and the night hawk aided the tiller of the soil and the grower of fruit in suppression of the caterpillar, the field mouse, and other pests sui generis; but with the practical extinction of these valuable assistants and the constantly diminishing numbers of another highly esteemed and important aid—the black bird—the attention of students of natural history in conjunction with "the man behind the hoe," has been drawn to the seriousness of making a determined and constant effort to exterminate insect pests, rodents and ground worms, that prey on grain, grasses, fruit, trees and young nursery stock, the result being shown in the importation of many varieties of that delightfully adorned feathered Asiatic, commonly known as the pheasant.

"The pheasant was recognized by the early Romans, long prior to the Christian era, as facile princeps, the most gorgeously adorned and most toothsome game bird then known world over, and was carried by the numerous cohorts of the most famous Caesar over the Alps and through Gaul to the Normandy coast, and across that arm of the sea known as the present day Straits of Dover, past the great chalk cliffs of the south of England, and then freed many of the multi-colored bunches of loveliness among the Druidical followers of the Iceni—the first historically known residents of what has long been known as Great Britain. Since that long distant day the fortunes of the Angles, the Norwegians, the Saxons and the Norman conquerors and their successors have met with varying success and vicissitudes. But throughout all of the following nearly 2,000 years the incalculable value of the imperial importation of long tailed and brilliant hued game birds was recognized by Norman and Celt, Angles and Saxons, and the always increasing covets were jealously guarded both against the poacher and for the protection of the tree and crop growth of the British Isles, heavy fines being imposed throughout the kingdom, in some instances as high as "an hundredth punds" for injury done 'fesawnts of grate pryse.'

"With the advance of civilization, the discovery of countries heretofore unknown, and the increase in the human race, rapid additions to the products of the farm became a necessity, and protection for the insectivorous friends of the soil tiller became more and more insistent and indispensably requisite to life, until to-day we have the modern state game commissioner, armed with almost plenary authority to meet almost any emergency and extend the required protection to the killers of insects, 'that we, too, might live.'

"With the growth of horticulture and agriculture, the federal and state governments formed separate departments with prominent executive heads for the collection and dissemination of data pertaining to the betterment of the business of people engaged in those pursuits.

"But it has been left, thus far, largely to the individual to advance and carry to successful proof the idea that in birds with insect and rodent killing propensities lies the salvation of the crops of the farmer, the fruit grower and the raiser of sugar beets and alfalfa; and, after several years of experimenting, I concluded that, taking them all in all, the Asiatic pheasant—of many varieties—was the bird superior to all others for that purpose. With the object in view of assisting in the improvement of farming and fruit growing conditions, as well as adding a new industry to this State, I brought to the Rocky Mountain section a collection of the hardest pheasants I could procure; and, with careful propagation and frequent additions, I now have left in my breeding enclosures, after liberating thousands of my young pheasants for the benefit of the public, several thousand of as healthy and hardy Chinese and English Ring-neck, Golden, Lady Amherst, Silver and several other varieties of these lovely plumaged birds as are to be found anywhere in the world, and certainly the largest and finest collection of these magnificently embellished feathered pieces of meaty daintiness to be seen in America.

"The expense attending my efforts has been considerable, but the great pleasure afforded me in seeing the mountains and valleys of our State alive with the loveliest, gamest and most toothsome bird that takes wing is far in excess of the money cost incurred in rearing and freeing great numbers of so beautiful and decidedly useful a bird.

"The grower of sugar beets, cabbage and other vegetables is in an especial manner a victim of persistent little wormy crawlers, which actually in a few days will nullify his best labors, unless he is diligent enough to spray the leaves of his tender crop in due time.

"This heavy expense may be avoided by bringing into the district, and protecting for a few years, a few pheasants and quails, which not only eat these

worms, but hunt out the hiding places in which the larvae is deposited, and voraciously devour them, thus using the old prescription 'an ounce of prevention,' etc.

"Upwards of 1,200 wire worms have been taken from the 'crop of one pheasant,' says an authority. This number being consumed at a single meal, the total destroyed must be almost incredible. It is stated that from the crop of one pheasant 440 grubs of the crane fly or daddy-long-legs were taken, these being destructive of the roots of grass, grains and vegetables. Independently of the unquestioned utility of the pheasant in destroying larvae, and worms, caterpillars, scale insects and other like small but dreadfully destructive pests, they are the inveterate foes of the common field mouse—those persistent destroyers of young nursery stock and girdlers of fruit trees—and whose pernicious nibblings have brought ruin to many an orchardist, and serious loss to thousands of growers of that succulent fodder alfalfa, and to the husbandman who plants the tender clover, as well as the grower of grain.

"When the inestimable value of the tireless and beautiful pheasant is given just a little consideration; when the unbought and without-cost-assistance rendered all branches of grain culture and pomology by the introduction into this State of these gorgeously plumed game and valuable insect destroying birds is conned over, then, I ask, why don't the farmers, the ranchmen and the fruit grower join in the propagation, liberation and protection of so wonderfully useful a bird? The destruction of crop eating and fruit destroying insects would add a considerable percentage to the incomes of the raisers of grain and fruit in this country.

"Then I ask the horticulturist and the alfalfa raiser, and the small grain grower, is this splendid increase income worth reaching out for?

"I say it is worth reaching out for, because you have it literally within your reach in engaging these birds in your service, breeding and freeing them, and in giving them an opportunity to gobble up the little pests that will certainly wreck you if you are not persistently mindful of their presence.

"An orchard free from pests is a pleasure and source of great profit, while one infested with scale, etc., is a disappointment and a loss.

"The losses to the farmer annually are stated to vary from 10 to 50 per cent of the crop affected, while to the fruit grower it is at times even worse.

"Added to the uncountable value of the pheasant as the friend of the tiller of the soil and the grower of fruit is to be considered the further highly important item that pheasants of all kinds are among the richest taste delicacies that the most epicurean taste could desire, and that the plumage from any of the males is an elegant adornment for bonnet or hat, and is extensively used by milliners.

"An excellent lesson in natural history is afforded lovers of bird life by a visit to the Kendrick pheasantries in Denver's City Park, where, in addition to the breeding fields in the country—where the main portion of my pheasant stock is raised—I keep in scores of breeding pens the largest collection of Chinese and English Ring-Neck, Silver, Golden, Lady Amherst and other varieties of these lovely Asiatics to be found in any public park in the world, and several times as many as there are in all the other public parks of the United States and Canada combined; an examination and study of which will gladden the heart of any lover of ornithology.

"During the breeding season, a number of hatchings of pheasants, partridges, quails and a few other game birds are produced and reared where they can be seen by the public, as a matter of education for those interested in the rearing of these birds, and for the pleasure and amusement of other visitors. The interest taken by the public in these—the most valuable as well as beautiful of all game birds—is evidenced by the thousands of people who visit the pheasantries daily in good weather, and the fact that several hundred of the leading newspapers and magazines of the United States and Canada have given extended mention to these pheasantries, until they have become the direct means of giving widespread advertising to Denver's City Park and are recognized by across-the-continent tourists as of absorbing interest and entertainment.

"The game laws of the State of Colorado are good and are being well administered by an excellent fish and game commissioner, Mr. Farr, and his trusty assistants, but transgressions are many and convictions are hard to obtain.

"By the joint efforts of the fruit growers, farmers and stock raisers of Colorado, we may have all the suitable grounds of the State, to an altitude of 10,000 feet, stocked with these birds in the next five years. It will mean much to the State in an increased crop value and the furnishing of one of the most delicious and healthful foods; the means of outdoor sport, good fellowship and a source of great attraction for local people and tourists. A pleasant feature of the rearing of pheasants is that the occupation is more healthful and profitable than the raising of common, or fancy, poultry; a dozen pheasants bringing net returns equal to a hundred hens. The work of rearing pheasants is almost wholly in mild weather, the laying season extending from March until August; is largely on grassy ground where it is clean and healthful, and during the balance of the year little attention is needed."

Drink Jackson's Napa Soda.

BIG GAME IN MEXICO.

Most interesting stories of a great game country have recently been told by Mr. Virgil Lockett of Pasadena, who has just completed a trip through the State of Tampico, Mexico. Many pictures and trophies of the chase were secured by Mr. Lockett.

Besides hunting, he reports great fishing, and in the Panuco River he declares that there is better fishing than is found off Catalina Island. Tarpon, jewfish and an abundance of yellowtail are found in the river near the bay where the Panuco River empties.

His hunting expedition that proved most successful was in the neighborhood of Hacienda Alamitus Ranch, in the State of Tamaulipas. Something of the extent of the country is better gained from an interview published in the St. Louis Republican with Charles H. Genslinger, one of Mr. Lockett's party, and a prominent sportsman of St. Louis. It reads:

"The second day of my stay at Tampico, I went up the Panuco River, from the harbor, to test the strength of these famous sea fish. I did not land my tarpon, and was greatly relieved when he made his escape into the bay, carrying my line and pole with him. I was completely exhausted after my two hours' fight with the monster fish. Tarpon are caught in the Panuco River and not in the bay, as many suppose. If the fish once gets into the bay you may as well let him go, for there is little chance of landing him here. The fish are so large that they cannot be landed in the boat, but must be run into the shore. Besides, to attempt to land the fish in the boat would result in a capsize and there are always sharks ready to get the fishermen.

"I used a live mullet about eight inches long as a bait, and with my guide in the long thirty-foot 'dug-outs' so common there, rowed about three miles up the Panuco River before casting my line. One would suppose that the long, heavy canoes would be cumbersome, but they are lively enough under the oar of the Mexican guide and the antics of the tarpon, after you have made your strike.

"The moment my tarpon struck the hook he sprang six or eight feet up out of the water, I gave a hard jerk on the line, and the battle was on. The guide endeavored to keep the fish up the river, so it could be landed on the bank. Unfortunately, the tarpon got the start toward the bay and all my efforts to guide him into the bank were futile, and I finally had to give up when about half a mile from the open water. I was ready to quit, however, and sank to the bottom of the boat completely exhausted. I did not make the second try at the tarpon, but spent the remainder of the day at Tampa catching yellow-tails and jewfish, a number of which weighed twenty-five pounds, and in hunting in the jungle along the Tamesi River.

"The bay around Tampico and the Panuco and Tamesi rivers are alive with thousands of game fish found nowhere else in the world. The jungles of the Tamesi, where we hunted for several days on which is known as the Hacienda Alamitus, are rich in game and the bright colors of the tropics lent a charm to the place which was a delight to the soul of the sportsman.

"The Hacienda Alamitus, or Alamitus ranch, is a tract of 260,000 acres, 45 miles long and 20 miles wide, and was originally owned by the friars. Some idea of the wildness of the district can be imagined when it is known that less than 200 people live in the entire area.

"But the game! It is estimated that over 100,000 deer are on this ranch, besides hundreds of wild hogs, jaguar and other wild game. These wild hogs, known to the natives as javalin, are one of the most dangerous animals found in the State of Tamaulipas, in which the Alamitus ranch is located. They will attack a man on sight, and must be shot down at once before they reach the hunter. Deer are tame on the Alamitus. I shot three times at a big buck before he finally ran. It is unnecessary to say that I didn't hit him.

"On our first day at the ranch I saw 200 deer and caught sight of seventeen in one bunch in less than half an hour after leaving our camp. On the evening of the third day, about 4 P. M., I saw over 3,000 wild parrots flying over our heads on their way to their roosts in the jungles. We often were awakened in the morning by the incessant racket of the wild turkey around our camp. We killed nine of these birds one morning for breakfast. I am not exaggerating when I say there are millions of quail on the Alamitus and Gonzales ranches—the latter ranch being the once proposed location of the prophet Dowie.

"Our camps were eighty-one miles inland from Tampico and we soon grew tired of killing the ordinary game—there was always some new kind of wild animal or birds to encounter. We could have killed probably carloads of game while we were in camp had we wanted to be murderers. The district is one of the richest agricultural sections, naturally, I believe in the world, though, of course, is not cultivated.

"And wild ducks and geese! I wish some of those hunters who believe these game birds are disappearing could once see the mallards and teal and geese at Tampico and along the Tamesi and Panuco rivers. The islands and bayous in this section are literally alive with them. The rising and falling tide of the Gulf keeps the bayous around Tampico filled with water and here the ducks and geese feed during the winter months. I saw at least 10,000 mallards on one small lake near Tampico. The

birds remain here until early spring, when they begin their flight back northward.

"I remember one incident near Tampico which goes to prove that the Mexicans will not tolerate the presence of 'pot hunters,' if they know them. One man received permission to trap quail in the interior above Tampico for the purpose of stocking a game preserve in Texas. He remained out for thirty days, in which time he trapped over 15,000 quail. The unusual zeal of the supposed sportsman aroused suspicion and it was learned on investigation that the man was shipping quail to San Antonio, Texas, for commercial purposes. This man could not probably return to Tampico now if he so desired.

"On our last day on the hunting trip into the interior of Tamaulipas and while returning down the Tamesi River, we encountered thousands of beautiful tropical birds—cranes, pelicans, loons, royal pheasants and flamingoes arose from the river with a roar of flapping wings and circled and re-circled beyond and above us. Then, for the first time in my life I realized what it was to see wild fowl.

"We finally returned to Tampico after having killed eight cougars and puma, besides a number of coyotes. We had for the time grown tired of fishing and hunting."

Mr. Genslinger declared he would visit the Tampico region again next winter. With him in the party were Ulric Stuyvesant Genslinger, the 14-year-old son of Mr. Genslinger; George Price, Cleveland, Ohio; Virgil Lockett, Pasadena, Cal.; George W. Clines, of Tampico; G. L. Stewart, Palmyra, Mo.

Mr. Genslinger said that the hotels at Tampico were so crowded with sportsmen from the United States and European countries that many had to sleep for nights in the parlors. This, perhaps, he said, was the only disagreeable feature of the trip, as accommodations were wholly inadequate for the hundreds of sportsmen who visit that section. The trip was not an expensive one, he said, the railroad fare being only about \$25. Tampico is about 1,500 miles from St. Louis, nearer by rail than California.

Mr. Genslinger brought back with him eight jaguar skins, which he expects to mount. No duty is charged on green pelts from Mexico, he said.

WILD TURKEYS FROM MEXICO.

Wild turkeys for the San Bernardino Mountain foothills are to be brought from Mexico by W. E. Van Slyke, a pioneer mining man of San Bernardino.

Mr. Van Slyke arrived in the county last week from San Francisco, whither he had been in consultation with the Fish Commissioners for the purpose of discussing the practicability of bringing the turkeys for propagation in this State.

Mr. Van Slyke closed the contract with the commission to supply the birds, and will depart on the 15th inst. to spend four months or more in the State of Sinaloa on the west coast of Mexico and where wild turkeys are found in abundance. He has orders to get just as many as he can and expects to ship at least 500 before returning.

"I expect to leave for the south within a month," said Mr. Van Slyke in discussing the matter. "I will proceed to Guaymas by rail and thence by steamer to Mazatlan, near which place the wild turkeys are found. Back from the coast a ways are the foothills of the Sierra Madre mountains, and between them flow many streams out of the wide gulches. In these foothills and gulches dwell many wild turkeys.

"This is about forty miles inland, near the town of Rosario, and about forty miles from Colonel Dan Burns' Candelaria mines. Within thirty miles in circumference, with Rosario in the center, I expect to get the turkeys. They will have to be trapped, and I will probably ship them in small lots as I get them."

Mr. Van Slyke has been instructed to ship the turkeys to Senator Willis of Santa Barbara, at least the first shipments, and until further orders.

Rifle Association.—A meeting of the California State Rifle Association was held in Sacramento last week with a view to instilling new life into the association this year. It is purposed to have Adjutant General J. B. Lauck renew the gold bar championship contest. The object of the association is to interest civilians in rifle shooting and to encourage the organization of clubs along this line.

An election of officers was held and the following were chosen: Captain J. G. Lee of Company F, Woodland, president; Colonel B. A. Smith of the Fifth Infantry, vice-president; Colonel A. W. Bradbury, Assistant Adjutant General, executive officer; Lieutenant C. B. Nichols of F Company, National Guard, secretary; Colonel H. I. Seymour of Sacramento, treasurer.

A beautiful black sea otter measuring 3 feet 8 inches in length was shot in Monterey bay last week by Captain Bentley of the E. B. fishing launch while fishing off Carmel. The pelt is jet black, and, it is claimed is one of the finest ever taken on the Coast. These animals are now so rare on the Coast that it seems a pity to kill them. The value of the fur, however, is too great to save the sea otter.

The Southern California Rod and Reel Club has been offered a site at Santa Ana by F. W. Beckwith for the erection of a clubhouse. The matter has been taken into consideration by the club.

AT THE TRAPS.

The Trap Shooters' League will hold a smokeless powder seance at Ingleside to-morrow, the first of the regular Sunday shoots of the organization.

A representative attendance and good weather conditions made the Golden Gate Gun Club shoot at Ingleside, March 15th, a pleasing outing for members and visiting shooters.

Tony Prior and Emil Holling were high guns in the champion class of the club race at 100 targets, each losing but four birds. King and Iverson were high in the first class; Price and Ashcroft in the second class; Lemon and Leek led in the third class.

Prior (20 yards), Iverson (18 yards) and King (18 yards) were high at 25 singles in the Du Pont trophy race.

Shooting at doubles, Holling and Feudner, 14 each, were the leading scores. The scores in the Du Pont trophy shoot:

Twenty-five targets, 20 yards—Prior 21, Holling 19, Golcher 18, E. Schultz 17, Feudner 15. At 18 yards—King 21, Iverson 21, Hoelle 19, Klevesahl 17, F. Schultz 14. At 16 yards—Lynch 19, Ashcroft 17, Patrick 16, Price 15, Thomas 14, Haas 14, Ashlin 13. At 14 yards—Lemon 11, Biller 10, Herring 9, Roos 8.

Doubles, 10 pairs—Holling 14, Feudner 14, Golcher 13, Iverson 12, Hoelle 11, Thomas 10, Schultz 10, Lynch 8.

Club race, 100 targets, 16 yards—

Champion class—

Tony Prior	23	22	24	25—94
E. Holling	23	23	25	23—94
M. O. Feudner	22	23	25	22—92
E. Schultz	25	21	23	23—92
W. J. Golcher	24	19	21	24—88
E. J. Foster	22	21	23	18—84

First class—

King	23	22	21	22—88
M. J. Iverson	22	22	23	19—86
E. Klevesahl	22	19	17	20—78
F. Schultz	21	17	21	16—75

Herring	10	12	16	7—45
Biller	11	12	11	8—42
Roos	9	9	10	20—..

Harvey McMurchy of the Hunter Arms Company, Fulton, N. Y., and Captain Du Bray, representing Parker Bros., were in this city during the week. Both sportsmen are well known to and popular with Coast shotgun devotees.

Clarence Nauman and the Captain enjoyed a wild goose shoot near Willows, Colusa county, last week.

Both of the visitors are famous trap shots and will participate in the League shoot at Ingleside to-morrow.

The Hanford Gun Club has reorganized for the season of 1908 and will conduct a series of regular trap shoots. Dr. H. T. Hendricks is president and Fred Ross secretary.

George Prytz and Ray Standish of Gridley are organizing a gun club among the shooters of Crockett and Valona. There is good material in that section to crack out some excellent blue rock scores.

At the Reno Gun Club annual election the following officers were elected: S. J. Hodgkinson, president; R. B. Hawcroft, vice-president; F. J. Peck, secretary and treasurer; George Litch, J. E. Johnson and James Brennan, committee on grounds and club house.

The club now has a membership of forty-six, within four of the number allowed by the charter. The club plans extensive improvements and considerable activity during the coming year.

The Clovis Gun Club was recently organized at Clovis, Cal., by San Joaquin valley sportsmen, with the following membership: George Carr, Charles Fraier, Jacob Rough, J. H. Atkinson, J. G. Nichols, F. L. Mitchell, R. E. L. Cobb, M. A. Birge, W. Kuhn, C. A. Fox, W. H. Elwell and Dr. L. C. Clay.

A trap has been set up on the grounds and a stock of blue rocks purchased for a club campaign at inanimate targets.

The Santa Rosa Gun Club is in line now for a series of trap shoots this year. At the annual meeting the officers elected were: President, L. W. Juilliard; vice-president, Dr. E. H. Crawford; secretary, J. S. Rhodes; treasurer, W. E. Morrow; directors, A. P. MacGregor, F. R. Mead and C. A. Williams.

Two handsome club trophies, a challenge trophy and high average prizes will be put up for competition in the club shoots.

The Rocky Mountain Handicap will take place September 1, 2 and 3, instead of the last week in

August. This change was made on account of other shoots that clashed in dates with the Denver tournament.

The first shoot of the season under the auspices of the San Luis Boat and Gun Club was held at the Gaxiola grounds, near San Luis Obispo, on Sunday, March 8th. The score was as follows:

Targets—

E. Taylor	12	20	20	20	12	12
W. A. Martin	15	17	16	12	9	11
J. C. Hill	8	18	18	16	12	11
Lee Parsons	8	13	17	14	8	7
W. C. DeNise	8	17	15	10
James Guthrie	7	14	13	11	10	6
A. B. Van Scoy	7	13	10	10	6	10
C. T. Greenfield	6	13	6	7
Louis Steen	7	16	10	14	8	..
	16

Another shoot will be held March 22d, and everybody interested is invited to be present and participate. The officers of the club are: C. T. Greenfield, president; J. E. Van Schaick, secretary; P. J. McCaffrey, treasurer.

The Owl Rod and Gun Club tournament at Modesto on the 15th inst. was participated in by sixty shooters, a splendid turnout for the valley sportsmen. Among the visitors were: C. A. Haight of the Du Pont Powder Company; Hip Justins and Dick Reed, U. M. C. and Remington representatives; Harry Hoyt of the Winchester Repeating Arms Co., and Captain Bartlett, Peters Cartridge Co.

The shoot was a big success; the club members were royal hosts and made every visitor comfortable. Secretary Harry Garrison won the praises of every one present for his management of the shoot. The program embraced ten 20-target races, a merchandise prize for high gun in each; two 25-target races, one for trade representatives, a medal for the high gun, and a race for club members only, for a silver trophy. The regular program called for 200 targets.

The number of entries prevented shooting out the full card; darkness prevailing cut down the events to eight, 160 targets. High amateurs were: H. Garrison and W. E. Sperry, 140 each out of 160. High professional averages were: Dick Reed, 150 out of 160, and F. Willett, 143.

Reed won the medal in the "trade" race at 25 targets. The scores were: Reed 23, Bartlett 23, Justins 22, Willett 22, Haight 21, Hoyt 20. Tie shoot at 20 birds—Reed 19, Bartlett 19. Second tie at 20 birds—Reed 18, Bartlett 15.

Owl Rod and Gun Club, Modesto, Cal., March 15.

Dick Reed	17	18	20	20	18	17	20	150

The Western Gun Club of Los Angeles, forty-two members, and the Crescent Gun Club of Ocean Park and nearby resorts, forty members, have consolidated. The rumor is current that the Los Angeles Gun Club will join the combine also.

Manager Robert H. Bungay of the Crescent Bay Gun Club announces that the new grounds on the Short Line Beach tract, near Venice, will be put in readiness within a few days for the use of the members and friends of the organization. A tournament is planning for the month of August, when prizes and purses will be offered that will attract lovers of trap shooting from all sections of Southern California.

Plenty of ammunition and targets, together with the latest improved traps, and an ideal location, where sand storms and dusty atmosphere will not interfere with the sport, are among the attractive features that will be offered to scatter-gun shooters who may wish to spend a day at the beach with their families and enjoy an hour or two at the shooting grounds at the same time without further effort than a short walk from the short line cars to the adjacent grounds. Such conditions have been provided for by the management.

A large consignment of blue rocks has been shipped to Carson for the use of the Capitol City Gun Club, which expects to contest the Nevada State championship with Reno later on.

Negotiations have been completed whereby the South Tacoma Gun Club gains possession of a new location for its shooting grounds and club house for the coming season. The tract is located near De Koven Hall station, which is easily in reach of either the Tacoma Railway & Power Company's or Pacific Traction Company's lines.

Shooting traps and a club house are to be fitted up at once, and the club will begin shooting during the first week in April. The interest in the plans of the club is greater than ever, and a record-breaking membership is expected by the time the season opens.

At a meeting of the club officers for the ensuing year were elected as follows: John Cooper, president; Harry Schofield, vice-president; George Trumbull, secretary; E. W. Cooper, treasurer, and Frank Richards, field captain.

Last season the club's shooting grounds were located on the tideflats on the east side of the Tacoma city waterway, and the nearness of the location to the city was an advantage, but the surroundings were not pleasant and the club was troubled by sneak thieves, who carried away fittings for the traps and any other apparatus which could not be kept under lock and key.

The new location decided on yesterday is an ideal one for the requirements of the club and the Washington sportsmen are very much pleased with the outlook for the coming season.

Steelhead Running.—There was a great run of steelhead trout on in the San Lorenzo river recently. Every afternoon between 2 and 4 at the Logan dam below Boulder Creek they can be seen jumping; on the sandy bottoms of the riffles and in the deep pools the fish are to be found in larger numbers than for the past three years, a condition doubtless due to the restocking of the stream from the product of the county hatchery.

Several reports have been circulated that the irrepressible small boy and rifle have been shooting up stream, but though the boy and rifle are in evidence, wounded steelhead are scarce. On Kings creek, opposite the Vogler ranch, that old fisherman, Peter Vundt, reports a dam where the steelhead suffer severely from depredations by foxes and coons, owing to the water being shallow and banks low.

Here the half-eaten carcass of a fish is no uncommon sight and adds argument to the necessity of proper fishways at dams. All in all, early conditions along the river and tributary streams point to an extraordinary fishing season, and to Game Warden Welch is due proper credit for a successful patrol of the river that has enabled the steelhead to reach their spawning grounds in this vicinity without total extermination.

DOINGS IN DOGDOM.

Remember, entries for Oakland will positively close next Thursday, March 26th.

Exhibitors are advised to read in particular all of the additional rules adopted by the Oakland Kennel Club, for it is the intention to enforce the rules rigidly.

We will again call attention of intending exhibitors to post up in A. K. C. rules, Rule V regarding registration and listing, also to Rules VI, VII and VIII, relating to the identity of dogs, stud book numbers, fines and cancellation of wins. Exhibitors are liable for mistakes in making entries. Dogs wrongly entered cannot be transferred by the show officials, vide Rules VII and XIV, A. K. C.

Dogs may be entered for specials only, or for exhibition as per A. K. C. Rule XII.

All of these rules are published in the Premium List.

Follow the directions plainly printed in the entry blanks and possible complications with the rules or show officials will be avoided.

The foregoing suggestions are respectfully given for the benefit of fanciers who are newly interested in the sport, and at that, some of the veteran exhibitors we have known to overlook essential technical directions at times.

From what we have gathered it looks as if the coming Oakland show will be the best yet held on the other side of the bay.

The list of specials is one that will be hard to beat, the classification is a wide one—431 classes in all.

The San Francisco Kennel Club office, in charge of Mr. J. P. Norman show secretary, will be opened at 469 McAllister street (Robison Bros.' bird store) on or about March 20th. The premium lists have been printed and were practically all mailed this week.

Entries will close Saturday, April 11th. The show dates, show hall and judges have already been repeatedly announced in these columns.

Mr. William Jeffery of Salinas is the owner of a well bred black Pointer bitch and is desirous of securing stud service by a good black Pointer dog.

Several years ago we knew of several good ones, Dave Thom's Nap and Jas. Maynard's Thom among others, but the whereabouts of a desirable black Pointer on the Coast at present is a problem to us that we will ask the kindly offices of some of our readers to solve, if possible, and inform Mr. Jeffery accordingly.

Mr. A. G. Hoffman of Forest Grove, Or., requests the addresses of St. Bernard breeders in this State.

Seattle will show May 6 to 9 inclusive. The following officers of the Seattle Dog Fanciers' Association were elected for the ensuing year: President, L. B. Youngs; vice-president, Arthur Murphy; secretary, William B. Bailey; treasurer, J. E. Hubbard; trustees, William Matheson, Oscar Jones, R. M. Palmer; bench show committee, Walter Piper, C. W. Ireland, W. S. Tarrant, J. E. Hubbard, Arthur Murphy, R. C. Callahan, William Matheson. Oscar Jones is superintendent of the bench show committee.

The A. K. C., through the Pacific Advisory Committee, has approved the Fresno Kennel Club license for a two day show April 17, 18 (between Oakland and Frisco).

It is reported that George S. Thomas will be the judge for all breeds. Billy Chute has been engaged as superintendent. Premium lists are to be issued March 21. Entries close Saturday, April 4.

For further particulars address either O. F. Lundelius, secretary, Fresno, Cal., or W. E. Chute, superintendent, 469 McAllister street, San Francisco.

Secretaries of Coast kennel clubs are respectfully requested to forward marked catalogues of their club bench shows to Mr. E. C. Powell, secretary of the Pacific Advisory Board, C. K. C., Vancouver, B. C.

Col. Jim Brooks, the popular Los Angeles fancier and proprietor of the Ascot Boston Terrier Kennels, had the extreme bad luck to lose his good dog Ascot Roseben two weeks ago by the poison route.

Col. Brooks, who resides at 401 West Thirty-third street, it is stated, was walking with three of his dogs one morning in the vicinity of his home. About half way between Figueroa street and Grand avenue, on the south side of Thirty-first street, Roseben picked up a piece of meat. Within ten minutes after reaching home the dog was dead. Col. Brooks prized Roseben above all his other dogs. He was an extremely classy dog and was the winner of numerous prizes.

The Pacific Kennel Review made its initial bow to Coast dogdom this week and will hereafter be issued as a monthly the 15th of each month.

In style and typographical appearance the new journal will appeal favorably to the fancy. The first number is full of newsy material and nicely illustrated. Billy Chute is in the editor's chair. Several original contributions anent recent shows are of general interest.

A movement is taking shape in Los Angeles to form a dog owners' protective association—a coalition of defense and prosecution of and against the dog thief and the dog poisoner.

Portland sportsmen will soon have perfected in organization the Portland Field Trial Club. Dr. J. M. Myer, E. A. Parsons and Will F. Lipman are the leading spirits. To stimulate support and interest among Oregon owners of bird dogs it is proposed among other things to offer a \$500 purse for the initial Derby and All-Age Stakes.

A novel feature for the coming bench shows in Seattle and Portland will be the matching of five puppies of standard breeds from each city for \$100 a side. The puppies will be shown in both Portland and Seattle shows. The dogs winning the greatest number of points in the two shows will take the purse.

Vacaville dog and cat owners are anathemizing a dispenser of poisoned meat who has been depleting the ranks of household pets and companions to an exasperating degree.

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 Cents.

Weight in horses is a leading factor in determining their commercial value. A close-ribbed horse has a short back and good length from elbow to elbow to the stifle. When of this conformation he will stand the strain of heavy hauling without injury. Long-backed, short-ribbed, horses are usually rough gaited. The wasp-waisted horse usually sprawls behind and paddles in his front action. Breeders should reject stallions that are short-ribbed, slab-sided and rough-gaited, for the law of breeding implies that sires will transmit their imperfections as well as their good qualities to their progeny.

Lambs with Down blood in them fatten much more rapidly than Merino lambs.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For the Human Body

It is penetrating, soothing and healing, and for all Old Sores, Bruises, Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

REMOVES THE SORENESS—STRENGTHENS THE MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than \$100.00 paid in doctor's bills."

Price \$1.50 per bottle. Sold by druggists, or sent by express prepaid. Write for Booklet R.

The LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints.

SAVE-THE-HORSE

Registered Trade Mark

SPAVIN CURE

WM. H. COOPER, D. D. S., 211 Sand Beach Ave.

Bad Axe, Mich., Jan. 15, 1908.

If you ever want a recommend use me. I sent for a bottle some time ago for a valuable mare with a very bad bog spavin. She was so lame on the right hind leg that she could hardly walk and then only with urging. I applied "SAVE-THE-HORSE" twice, hitched her to my runabout and have been driving her every day, and no one could ever tell she had any such trouble. Everyone here said I would never be able to use her again as she was so bad, but now as frisky as a colt. My neighbor is using "SAVE-THE-HORSE" on my recommend and it is doing the business. Yours respectfully,

W. H. COOPER, D. D. S.

Winnipauk, Conn., Jan. 2, 1908.

I enclose order for — dollars, for which send me one-half dozen Condition Powder, 50 cent size. "SAVE-THE-HORSE" Spavin Cure cured a ringbone on a horse owned by a local blacksmith, to whom I sold a bottle sometime ago. As both the horse and his owner are well known it has proved a great advertisement. Yours respectfully,

W. J. ANDERSON,

Care of Anderson Stock Farm.

"SAVE-THE-HORSE" permanently cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Windpuff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet, and also letters from bankers, business men and breeders throughout the country.

At Druggists and Dealers or Express Paid.

FUTURITY NOMINATIONS WANTED.

Several nominations wanted in Pacific Breeders' Futurity Stake No. 7 for foals of 1907. Any one whose entry has made last payment and whose mare failed to have a foal or the foal or mare is dead, can sell his nomination or substitute another colt. The amount paid for entrance will be returned to the nominator whose nomination is sold. Apply to San Francisco, Cal.

Ellis' Improved
Hutton Patent
Checking Device

Absolutely
the Greatest
Controller on
Earth for Road
or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and making your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on check rein, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the United States when cash accompanies order.

First Annual Speed and Draft Horse Sale

PLEASANTON, - Alameda County, Cal. APRIL 16-17-18, 1908

Under the Auspices of the
PLEASANTON CHAMBER OF COMMERCE.

250 Head will be sold, including Trotting, Running, Driving, Draft and all purpose horses.

OVER 100 HEAD OF DRAFT HORSES WILL BE SOLD ON THE 16TH. THE 17TH AND 18TH WILL BE DEVOTED TO TROTTERS AND PACERS, SPEED AND ROAD HORSES. YOU CAN SEE THEM PERFORM AT PLEASANTON.

SOME OF THE GOOD THINGS—On the 16th we will sell the Big Ones. A lot of big growthy two-year-olds, a nice bunch of broke three-year-olds and a choice selection of five and six-year-old geldings and mares weighing from 1,500 to 1,700. Several mares in foal. The best lot of Draft Stock ever got together for an Auction Sale. Then, on the 17th, "The Trotters."

Among others to be sold will be the Griffith & McConnell Consignment, all sired by **Bonnie Direct 2:05½**; one of this bunch has already been a mile in 2:16½, a half in 1:04 and a quarter in 30¼ seconds; another a mile in 2:15½, and another a mile in 2:26½ as a two-year-old. A standard and registered trotting filly (3) by Chas. Derby. Partola 37413, and Menlo Boy 37401, two grand big stock stallions by Prince Airlee, a son of **Guy Wilkes 2:15¼**. Nutwood Princess, close second last season at North Yakima, Wash., in 2:12¼, and her full sister, Eulala 2:24¼ (trial 2:15). Lou Onward (trial 2:12), by Onward, out of a registered mare by Hambrino, bred to **Star Pointer 1:59¼**. Calwa,

a speedy pacer that will show a mile in 2:12 sure, on sale trial day, April 15. A fast trotting mare by William Harrold, a son of Sidney, out of Anteco Wilkes, by Guy Wilkes 2:15¼. Guy Light, a young trotter by Searchlight 2:03¼, that has just been a mile in 2:30½, and will show fast by sale time. Billy Taft, another young trotter by Stam B. out of La Muscovita, the dam of Yolande 2:14, by Guy Wilkes. A pacer by Searchlight out of a Director mare that can fly. Billy B., a fun horse that will trial a mile close to 2:12 on the 15; he is a pacer without the underwear, and will do to take to the races. August Barron, a trotter that is billed to trial on the 15 a mile better than 2:15.

Byron Lace 2:14¼, a race horse without boots or straps that is set down for a mile in 2:07 this year sure; he is by Prince Lovelace, the sire of that other good pacer, Lord Lovelace 2:10. Bonnie Strathway 43455, a handsome young stallion by Strathway, out of Idleweiss by General Logan. The sale will open on the 18th, with The Angelus heading the consignment of P. W. Hodges. This young stallion is considered the best trotting prospect on the Coast. F. J. Kilpatrick will sell a fancy pair, and some **Matinee material**. Other choice consignments include a James Madison trotter that has been a mile in 2:12½, Martinez Boy, mile in 2:13½, Hunkydory 2:18 on the trot, and a few stock stallions, fancy pairs and single drivers.

WE KNOW we can obtain satisfactory results for Consignors. Indications all point to a Great Sale. Arrange to spend the week at Pleasanton. Call or write to J. R. FRONEFIELD, Pleasanton, Cal. **FRED H. CHASE & CO., Auctioneers,** 478 Valencia Street, San Francisco.

BREEDING OLD SOWS.

Many swine breeders contend that young sows are more profitable than old ones, because they are much more active and are less liable to tramp upon or smother the young pigs. But there are so many things in favor of old sows that I would really prefer one good four-year-old sow, one that has been proven a good suckler, to two young sows that would be doing well if they raised four pigs each.

In summing up the records of sows of different ages, Prof. Geo. M. Rommel found that yearling sows farrowed, on an average, 6.65 pigs per sow; the 2-year-old sows averaged 7.56; the 3-year-old sows 8.28, and the 5-year-olds 8.40. With the right feed and care old sows will raise stronger pigs and raise larger litters. There is a stamina about pigs of very young sows. Unless an old sow has gotten into bad habits, such as eating her pigs, or is a chicken eater, keep her at work. Her value ought to increase each year until she is 5 or 6 years old.

PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50 cts.

THE

Detroit Driving Club

FOR ITS TWENTY-FOURTH ANNUAL

BLUE RIBBON MEETING

---- July 27, 28, 29, 30, 31, 1908 ----

Announces the Following Stakes:

No. 1—2:24 Class, Trotting, Merchants' and Manufacturers' Stake.....\$10,000

No. 2—2:13 Class, Pacing, Chamber of Commerce Stake.....\$5,000

No. 3—2:11 Class, Trotting.....\$3,000

No. 4—2:07 Class, Pacing\$3,000

CONDITIONS:

Entries Close Tuesday, April 7

When Horses Must Be Named,

except that entries bearing postmark not later than noon of the day following will be accepted.

The Detroit Driving Club is a member of the Grand Circuit, the National Trotting Association and the American Trotting Association. Rules of the American Trotting Association will govern except as otherwise specified. Hopples are allowed.

The above Races will be decided by the best 3-in-5 heats, limited to a maximum of five heats—that is, all races not sooner decided will be declared finished at the end of the fifth heat according to the summary, unless there shall be a tie for first place, when the horses so tied shall race an extra heat to decide the winner.

Money will be divided 50 per cent, 25 per cent, 15 per cent and 10 per cent. Entrance is 5 per cent of purse and 5 per cent additional from winners of each division of same, payable in easy installments as follows:

	April 7.	May 5.	June 9.	July 14.
M. & M.	\$75	\$100	\$150	\$175
C. of C.	50	60	65	75
2:11 Trot and 2:07 Pace.....	30	35	40	45

Liability of nominator ceases when written notice of withdrawal is lodged with the secretary. Entrance must be paid on each horse named as per schedule above.

A HORSE NOT ENTERED APRIL 7 CANNOT START

When the entries close you know exactly what you will have to race with. There is no chance to buy a nomination for the fastest green horse that appears.

Probable Arrangement of Stakes: Tuesday, C. of C.; Wednesday, M. & M.; Thursday, 2:11 Trot; Friday, 2:07 Pace.

Other events will be announced later to complete the racing program with classes to suit campaigning stables, especially those represented in the stakes. The faster classes will be 2 in 3 events.

North more to pay before 1909. Be sure and make payment in time. Address all communications to the Secretary.

C. A. CANFIELD,
President.

JNO. W. SNOWDEN, Secretary,
526 San Pedro St., Los Angeles, Cal.

DEL CORONADO 2:09³/₄**Del Coronado 2:09³/₄**

Reg. No. 45122. By McKinney 2:11¹/₄, dam Johanna Treat by Toots Brydick 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13¹/₂

Reg. No. 26458. By McKinney 2:11¹/₄, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07¹/₂

By Nutwood Wilkes 2:16¹/₄, dam Atherine 2:16³/₄, by Patron 2:16¹/₄ (son of Pancoast 2:21¹/₄ and Beatrice, dam of Prodigal 2:16¹/₄); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3¹/₂ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or bopples. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27¹/₂, by Dawn 2:18³/₄. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

Agricultural Park, University Station, Los Angeles, Cal.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years. It is the best remedy I have ever used. It will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

W. B. Eddy & Co., Whitehall, N. Y.

\$7000 Guaranteed Stakes and Added Money **\$7000**

And winner of American Horse Breeder Futurity. It pays to book to such a sire.

When writing kindly mention this journal The Empire City Farms, Cuba, N. Y.

Ray o'Light

2-y-o Rec. 2:13½, By SEARCHLIGHT 2:03½
Reg. No. 46270. King of Race Horses

His dam is Carrie B. 2:18 by Alex. Button 2:26½ (sire of Yolo Maid 2:12, Tom Ryder 2:13½, etc.); second dam Carrie Malone (dam also of Cassiar 2:22, Moorland Lass, dam of Pinky H. 2:17½), full sister to Klatawah (3) 2:05½, holder of world's record, Chas. Derby 2:20, etc., by Steinway 2:25½; third dam Katy G. (dam of 7 in 2:30, Saraway, sire of 6, and Carrie Malone, dam of two, two dams of two in 2:30), by Electioneer 125; fourth dam Fanny Malone by Niagara; fifth dam Fanny Wickham (20-mile trotter), by Harold; sixth dam by Imp. Trustee; seventh dam by Imp. Sir Charles; eighth dam (dam of the unbeaten race horse Boston), by Ball's Florizel, etc.

Ray o'Light (2) 2:13½ is one of the handsomest as well as best bred young stallions in America. He will be allowed to serve only ten mares this year, at Salinas race track, as he will have to be prepared for his engagements as a three-year-old.

He will make the Season of 1908 at the Low Service Fee of \$40, with usual return privilege. For further particulars address

E. S. TRAIN, Salinas, Cal.

Bonnie Direct 2:05½ Fee for 1908 \$100

Bonnie Steinway 2:06½ Fee for 1908 \$40

Usual return privilege. Good pasturage.

CHAS. GRIFFITH, Pleasanton, Cal.

ALMADEN 2:22½ (At 2 years)

By the great DIRECT 2:05½, Dam by McKINNEY 2:11½
Sire of 12 in the 2:10 list. Sire of 17 in the 2:10 list.

All money winning race records.

The only combination of these two great producers, and the only trotting stallion of class out of a McKinney mare. Be progressive and breed your grand daughter of McKinney to Almaden and get in line for grand circuit winners. Almaden has every point of a great sire, no horse can show a more promising lot of foals, age considered.

Fee: \$40 for the Season. Usual return privilege.

226 LANSING, Upper Stockton Road—Race Track Cars.

M. L. LUSK, Sacramento.

HART BOSWELL 13699 By Onward 2:25½ out of Nancy Hanks 2:04

Sired by Onward 2:25½ (sire of 198 in 2:30 list) out of Nancy Lee (dam of Nancy Hanks 2:04, Nancy Stam 2:30, Dictator Wilkes, sire of 11), Director Moore, a sire, and the producing dams Meta S. and Lady Boone, by Dictator 113; second dam Sophy (great broodmare) by Edwin Forrest; third dam Sophrina by Parker's Brown Pilot. Hart Boswell's progeny are noted for their size, disposition, style and action.

He will make the Season of 1908 at Laurel Creek Farm, San Mateo, for the Low Fee of \$25, with usual return privilege. Address

K. O'GRADY, San Mateo, Cal.

Entries Close April 1, 1908

When Horses Must be Named.

The complete Programme will be announced later.

In order to keep the best horses on the Coast, there will be a free-for-all Pace and a fast Trot for tempting Purses and liberal programme for other classes.

CONDITIONS:

In No. 1 and No. 2 any horse not standing to win a portion of the purse at the end of three heats will be ruled out. Both races to be declared finished at the end of the fifth heat; \$2,000 of the money to be divided according to the summaries, as follows: \$1,000 to the first, \$500 to second, \$300 to third and \$200 to the fourth horse; \$500 reserved for a Consolation Purse, open to all horses that start and do not win any part of the purse. Two heats, every heat a race. Money division: \$125 to first, \$75 to second, \$50 to third in each heat. No money deducted from winners in the Consolation Purse.

No. 3, No. 4, No. 5 and No. 6 will be three heats, every heat a race. Money division every heat: \$165 to first, \$80 to second and \$55 to third.

ENTRANCE MONEY.

In No. 1 and No. 2 the entrance fee is four per cent, one per cent of which is due when nomination is made and the balance to be paid on the first day of the meeting. The usual five per cent of the amount of the stake will be deducted from money winners.

The entrance fee in No. 3, No. 4, No. 5 and No. 6 is five per cent, with an additional five per cent from money winners. One per cent due when nomination is made and the balance on the first day of the meeting.

In the event of No. 1 or No. 2 securing twenty or more paid up entries, the entrance fee with be three and one-half per cent instead of four per cent; if more than twenty-five entries, three per cent; if thirty or more entries, no money will be deducted from money winners. All money in excess of the purse will be divided among money winners in accordance with the announced division.

In the event of No. 3, No. 4, No. 5 and No. 6 securing thirteen or more paid up entries, the entrance fee will be four per cent instead of five per cent; if twenty or more entries, no money will be deducted from money winners. All money in excess of the purses will be divided among money winners in accordance with the announced division.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race, and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting at which the race is to take place.

MEMBER NATIONAL TROTTING ASSOCIATION.

SAN FRANCISCO, CAL.

Do You Want the Best?

Breed Your Mares to

Zombro 2:11

Son of McKinney 2:11½ and Whisper by Almont Lightning.

Service Fee—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Bellemont 2:09½, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08½ holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list, ten in the 2:15 list and seventeen in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices. Address

GEO. T. BECKERS,
3949 South Figueroa Street,
Los Angeles, Cal.

Bonny McKinney 41383

Son of
McKinney 2:11 1/4
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03 1/4
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13 1/2 (2-year-old champion of 1907), Aerolite (2-year-old record) 2:11 1/4, trial 2:05 1/2. Dam Rita B. by Boodle Jr.; 2nd dam Gabilan Girl by Gabilan; 3rd dam Clara by Elmo 94, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Turor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal. Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11 $\frac{1}{4}$, the greatest sire of extreme speed living. Dam Helena 2:11 $\frac{1}{4}$, dam of Wild Nudging 2:11 $\frac{1}{4}$, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Maubrine, sire of dam of Sweet Marie 2:04 $\frac{1}{4}$; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinnys. He is a large, powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

STALLIONS!

Why do they often become so devitalized, even in a light stud duty, that they require a long rest from such service?

It is due to the absorption into their systems of poisonous bacteria, or germs of disease, both contagious and sexual, in serving mares of all degrees of health and disease. There are many of these bacteria and germs that are very injurious to the stallion. To counteract the growth of such germs in his system and keep him in normal condition there is but one Germicide fit for internal use.

Spohn's Liquid Distemper Cure

Is Safe, Simple and Sure as a Germicide and Is a Fine Tonic and Conditioner "SPOHN'S" will enable stallions to go through a long stud season and keep them free from any form of Distemper. Give it to them every other day.

All Druggists.

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

WINCHESTER

Cartridges and Rifles Take Leading Honors

Winchester Cartridges and Rifles again demonstrated their exceptional shooting qualities at the Fourth Annual Tournament of the Indoor .22 Caliber Rifle League, held in Rochester, N. Y., January 27-February 1, making new World's records and winning in the majority of the events, as follows:

CONTINUOUS MATCH—R. Gute, First (tie), four perfect scores of 75.

BULLSEYE TARGET—R. Gute, perfect target of O, a World's Record.

SKIDDOO MATCH—R. Gute, First (tie), four perfect scores of 75.

CHAMPIONSHIP MATCH—R. Gute, tied for second place, score 2460.

RAPID FIRE MATCH—Harry Harrison, First, 81 shots in one minute, score 570. This is a World's Record. Mr. Harrison also made a new World's Rapid Fire Record, firing 101 shots in one minute.

Both Mr. Gute and Mr. Harrison used Winchester Cartridges, and the latter also used Winchester Rifles. The increasing popularity of Winchester Cartridges was evident by the fact that more participants used them than any other make. Their phenomenal showing at this important tournament proves the superior qualities of the Red W. Brand.

STATE FAIR RACES

To be given at the California State Fair, August 29th to September 5th, inclusive, 1908

SACRAMENTO, CAL.

Guaranteed Stakes for Harness Horses!

PROGRAMME:

SATURDAY, AUGUST 29.

No. 1—Occident Stake (closed Jan. 1, 1906)—
No. 2—2:12 Class, Pacing.....\$ 800

MONDAY, AUGUST 31.

No. 3—Amateur Roadster Contest—
No. 4—2:10 Class, Trotting.....1,000

TUESDAY, SEPTEMBER 1.

No. 5—2:08 Class Pacing.....1,000
No. 6—2:17 Class Trotting.....800

WEDNESDAY, SEPTEMBER 2.

No. 7—2:15 Class, Pacing.....\$ 700
No. 8—2:24 Class Trotting, 4-year-olds.....500

THURSDAY, SEPTEMBER 3.

No. 9—Stanford Stake (closed June 1, 1906)—
No. 10—2:14 Class Trotting.....800

FRIDAY, SEPTEMBER 4.

No. 11—2:20 Class, Pacing.....2,000
No. 12—Free-for-all, Trotting.....1,000

SATURDAY, SEPTEMBER 5.

No. 13—2:05 Class, Pacing.....\$1,000
No. 14—2:20 Class, Trotting.....2,000

Entries Close Wednesday, April 1st, 1908, in the following Races:

No. 12—FREE-FOR-ALL, TROTTING.....\$1,000
No. 14—2:20 CLASS, TROTTING.....2,000
No. 5—2:08 CLASS, PACING.....1,000
No. 11—2:20 CLASS, PACING.....\$2,000
No. 13—2:05 CLASS, PACING.....1,000

Be Sure to Make Your Entries in Time!

Entrance fee two per cent, due April 1, 1908; one per cent additional if not declared out on or before May 1, 1908, and two per cent additional if not declared out on or before June 1, 1908; five per cent additional from winners.

Entries Close Monday, June 1st, 1908, in the following Races:

No. 2—2:12 Class, Pacing.....\$ 800
No. 4—2:10 Class, Trotting.....1,000
No. 6—2:17 Class, Trotting.....700
No. 7—2:15 Class, Pacing.....\$ 700
No. 8—2:24 Class, Trotting (3-year-old).....500
No. 10—2:14 Class, Trotting.....800

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of meeting at which the race is to take place.

Money divided 50, 25, 15 and 10 per cent. All races mile heats, best 3 in 5.

Member National Trotting Association. For Entry Blanks and further information address the Secretary.

THE MEETING of the Pacific District Board of Appeals of the National Trotting Association called for Thursday, March 26th, has been postponed to Tuesday, April 7th.

THERE ARE always a few important dates in the career of every trotter and pacer which owners anticipate with a great deal of interest. The first is the date when entries are to close. This must not be overlooked by the owner, whether the horse is to be raced or not, for if he is not to be raced the fact that the horse is entered in valuable stakes is evidence that he must have shown some speed; thus his value is enhanced if he is to be leased or sold. If the horse is to be raced an air of mystery is created about those opposing him on that other eventful day, the one on which he is to "face the starter" and "score for the word." Rumors (some founded on fact and some that are not) about the wonderful flights of speed shown in workouts by many of the contestants in the race keep all other owners guessing, and to defeat such mythical speedy ones is an honor that is as indescribable as it is gratifying. But, in the first place, the horse must be entered in the stakes and purse events, and, as there are several meetings in California for which entries will close next Wednesday, April 1st, it is of the utmost importance that this indispensable preliminary to the races must be attended to immediately. Horse owners and trainers have been notified repeatedly in this journal, and also by notices sent out by the secretaries, that entries for the State Fair races, the Guaranteed stakes for the Pacific Coast Trotting Horse Breeders' Association, the California Banner Meeting at the Oakland Race Track, and the Fresno Agricultural Association's meeting close next Wednesday. After that the entries will be published, and more associations will advertise meetings and more opportunities will be offered owners to make entries. The outlook for 1908 never

looked brighter or better than at present. More money will be given; purses will be larger; the circuit will be longer (no intermissions), and the tracks will be in better shape than they have ever been. Secretaries are expecting the largest number of entries they have ever received, and it is a foregone conclusion we shall have the best racing we have seen in years on the Pacific Coast if owners will only send their entries in, this is their last notification.

LIKE AN OCEAN of prohibition whose waves touch every shore is the anti-race track feeling which is spreading from the Atlantic to the Pacific. In New York, the devotees of the sport are struggling to keep race tracks open and are anxiously waiting until the Legislature is through with the bill which has had the endorsement of Governor Hughes and which he has asserted will receive its signature and become a law. In Louisiana, where the New Orleans race-tracks have been attracting thousands every winter, petitions for their abolishment are being scattered in every city, town and village for signatures, and doubtless at the next election it will be one of the issues. In Kentucky it looked for a time as if the game was downed, but a compromise was agreed upon and racing will continue without the presence of the bookmakers. At the Bennings track, near Washington, D. C., betting has been prohibited and in a few weeks race meetings will be a thing of the past in the District of Columbia. In California rumors are flying thick and fast as to what will be accomplished at the next Legislature. They were first noticed in Los Angeles, where the Arcadia track, one of the most beautiful in the United States, is situated. The people there have urged the Supervisors to pass an ordinance, which they did, prohibiting not only the publishing of tips but preventing the distribution of all papers containing charts. Any paper containing any mention of the betting on a race is to be barred from sale in the city. The race meeting there will close about April 4th. Whether anything will be done toward killing the racing game next winter in California is problematical. Should the anti-racing bill become a law next Wednesday in New York State everybody interested in thoroughbreds will be affected more or less, and the "sport of kings," so far as the United States is concerned, will receive a blow from which it will never recover.

THE ARTICLE "Thoroughbred Stallions Not Wanted," which appeared in this journal last week, has met with the universal endorsement of every one interested in light harness horses who has read it. The arguments advanced are founded on facts, and, as the majority of the Eastern newspapers and a few of the trotting horse journals which have been kept alive by the patronage of trotting horse men have strongly endorsed the action of the Jockey Clubs of New York and Kentucky in this departure—no doubt, for monetary conditions—it will afford them food for serious thought as to whether they, the class journals, are helping the great industry by advocating the use of such thoroughbred counterfeits to mate with mares that, bred to any of the standard bred trotters standing for public service in almost every city, town and village in the land, would, at least, produce useful, saleable horses.

A SYNOPSIS of the list of trotters and pacers to be sold at Pleasanton April 15th appears in this issue. The greatest interest is being taken in this event and a large crowd of people from all parts of the Pacific Coast will attend. Many of these youngsters are in training and ready to be entered in the race meetings. Seekers after royally bred young stallions and fillies will find a good collection to select from. Catalogues will be issued on Wednesday and sent to all applicants.

SCARCITY OF MAMBRINO PATCHEN BLOOD.

In studying the list of mares bred to Electioneer and his sons at the Palo Alto Stock Farm, it was noticed that there was but one mare bred to any of them that traced to Mambrino Patchen, the wonderful broodmare sire, whose daughters have contributed so much in the Eastern States in the production of standard trotters. That mare was Lady Ellen 2:29½, and she was not from a daughter of Mambrino Patchen, but by one of his sons and the only one in California bred to Electioneer. She produced Helena 2:1¼ (dam of Dobbell 2:19¼, Orlean 2:27, and the pacer Wild Nutting 2:11¼), Eugeneer 2:28½ (sire of Princess 2:16, and the dam of North Star 2:24), Elleneer 2:28¾, Ella 2:29, Ellene 2:28¾ by Electricity, and Ellenwood 2:14¼ by Wildnut, the sires Coronado and Elliston both by Electioneer. It proved that a great mistake was made in not getting

more of the blood of Mambrino Patchen on this farm. The greatness of this cross has been exemplified by the marvelous success since achieved by the sons and grandsons of Electioneer that were sent East and bred to mares carrying plenty of this blood. In California there should have been some Guy Wilkes mares bred to Electioneer, for he was out of a Mambrino Patchen mare, but for certain reasons—jealousy being the most prominent—none were mated with him.

At the Oakwood Park Stock Farm, however, where Electioneer's greatest speed producing daughter, Katy G., when bred to Steinway 2:25¾, produced Chas. Derby 2:20 who, whenever he had an opportunity to be bred to any mares carrying the blood of Mambrino Patchen, showed how rich the blend became. When mated with Bertha by Alcantara, he made her the greatest producer of extreme speed in the world, for from these matings the following resulted: Don Derby 2:04¼, a son of one in 2:10, Derbertha 2:07¾, Diablo 2:09¼ (sire of six in 2:10, etc.), Demonio 2:11¼ (a 2:10 sire), Arner 2:17¾, and Jay Eff Bee, a yearling with a record of 2:26½. When Chas. Derby was bred to None Better 2:23¾ by Allandorf 2:19¼ (his dam was Alma Mater by Mambrino Patchen); she produced Much Better 2:07¼, and Little Better 2:11¼. When bred to Ida Wood by Simmons 2:28 (he out of a Mambrino Patchen mare); second dam Ida W. by Mambrino Patchen, the wonderfully game trotting four-year-old Owyho 2:11, the best of his year appeared. On the Valensin Stock Farm, where Sidney 2:19¾ stood, he never was bred to any descendants of Mambrino Patchen during the time G. Valensin lived, because there were none there. But since Sidney found a home in the East doubtless many mares bred in these lines were sent to his court.

Monroe Salisbury had no mares on the Pleasanton Stock Farm that traced to Mambrino Patchen when he had Director 2:17, or his son, Direct 2:05½. This is also a matter of regret now, for when Bon Bon 2:26 by Simmons 2:28 (he was out of a mare by Mambrino Patchen) was sent to him by Captain Millen Griffith the produce was Bonnie Direct 2:05¼, one of the greatest campaigners and very best sons of the "Little Black Rascal."

McKinney 2:11¼ was by Alcyone (he was out of Alma Mater by Mambrino Patchen), and when this blood was crossed with our California bred mares, some by A. W. Richmond, Effingham, Electioneer, Dexter Prince, Echo, Dashwood, his list of performers increased wonderfully, but when he was bred to Lady Rivers by Carr's Mambrino, Sweet Marie 2:02 was the result, thus emphasizing the fact that if we had more Mambrino Patchen blood here California's list of great performers would be considerably augmented.

THE LIMIT, TRIAL 2:10.

When Searchlight 2:03¼ was brought to California five years ago, Mr. Lou Crellin, who at one time owned him, was very desirous of getting a colt by him, so he tried to induce Mr. Boyd of the Oakwood Park Stock Farm to lease him the great broodmare Bertha (she was then the dam of fifteen foals). Mr. Boyd sold the mare to him in preference, knowing she would have a good home. Mr. Crellin bred her to Searchlight and as the result a big bay foal appeared. He was larger than any this mare had ever had, and trotted as fast as his mother could across the alfalfa paddock at Ruby Hill. As Mr. Crellin thought that was her last foal, he called this one The Limit. As a three-year-old he shifted from the trot to the pace, and Messrs. Sutherland & Chadbourne of Pleasanton believed he was as great a prospect as Aerolite. With very little work The Limit paced a mile for them in 2:15. He was then returned to the farm. This spring these gentlemen again took The Limit in hand. He had grown into a fine, large, upstanding, well-turned horse. He never needed any boots, but, for safety, they put his quarter boots on, and last Saturday, even during the heaviest windstorm seen in Pleasanton (a very unusual occurrence, by the way), The Limit, wearing a new set of John A. McKerron harness, and hitched to a big Miller cart, was driven on the track by Jas. Sutherland. After warming him up his driver nodded for the word, and The Limit started on his journey. He paced to the half in 1:06 and came home the last half in 1:04, last quarter in 29¾ seconds. Some of the timers claimed the time faster. Mr. Crellin, who had never seen him pace before, was highly elated by this remarkable showing. All the horsemen there claim it was the greatest performance ever witnessed on this track. The Limit wears no boots except quarter boots and is an ideal pacer. He will not be raced this year, but next season as a five-year-old will, if nothing happens, be one of the sensations of the season. If this performance stood as a record, Bertha would have five in the 2:10 list, four inside of 2:18 and one, a yearling, with a mark of 2:26½. She is due to drop her twentieth foal to-day. Its sire is Aerolite 2:11½, trial 2:05½, another son of the great Searchlight 2:03¼.

The Park Amateur Driving Club held a meeting on Thursday night at the Fairmont Hotel. E. A. Aigeltinger presided. It was decided to hold the next meet of the club at the Stadium on April 11th. It was also decided to have a celebration on April 24th, which will take the form of a beefsteak dinner. It was arranged that the directors and the classification committee should meet on April 7th, when the various classifications will be made.

NOTES AND NEWS

Entries close Wednesday for four important California meetings.

F. J. Kilpatrick will campaign two or three on the California Circuit.

In the Horse Review Futurity Stakes No. 15 there were 4,378 nominations and 1,286 nominators. This breaks all Futurity records and shows how popular this able turf journal and its stakes are.

Geo. L. Warlow of Fresno says: On March 17th (St. Patrick's Day) Cora Wickersham foaled a bay colt, without white, by Athadon. He is a fine, toppy handsome fellow, and being a full brother to Athasham 2:09½. I expect him to prove as great a trotter. I have him entered in all the Futurities, as well as the Occident and Stanford Stakes, and am looking around to see if I cannot get him in a few more.

Joe Cuicello will race the beautiful mare Queen Derby, out of Addie Ash, on the California Circuit; and also the mare Lady Inez by Nutwood Wilkes 2:16½, out of Cora by Ira.

Local horsemen are considering at San Bernardino the leasing of Association Park for a number of years, with the idea of putting the track into first-class condition for winter racing and training. It is said that with a light resurfacing the track would be one of the best on the Coast, and as the climatic conditions there are probably better for the race horse than any other portion of Southern California, it would be little trouble to induce the horsemen to bring their horses there.

No owner of a green pacer or trotter should overlook the Greater Oakland and the Alameda County Stakes. These events close next Wednesday, besides four other stakes scheduled for the big meeting at Oakland. The Greater Oakland is for 2:20 trotters and the purse calls for \$2,500. The conditions are so framed that there will be at least eight money winners. The Alameda County Stake for 2:20 pacers is conditioned similar to the Greater Oakland.

After alighting from the sulky in which he had driven Diablo Mac his first winning race at Pleasanton Saturday last, Chas. De Ryder remarked: "There is the most promising, level-headed and purest gaited green trotter I ever pulled a line over. He is a race horse if there ever was one, and I am more than satisfied with this work to-day." Diablo Mac was bred by Messrs. H. and I. Pierce, who also bred Lou Dillon 1:58½. He was sired by Diablo 2:09¼, out of Hazel Mac by Director 2:17; second dam by McCord's Tricks; third dam Katy Tricks (dam of Conde 2:19¼ and Empress 2:24), by The Colonel. He is now owned by Lewis Pierce of Suisun, and it was deeply regretted that his owner was not there to see him come second to Lady McKinney in the splendid time of 2:12¼, and then win the race and cups in 2:15¼ and 2:16.

Patsy Davey will bring a string of good ones to Pleasanton April 1st, consisting of Yolande 2:14¼, Vallejo Girl 2:16¼, Siesta by Iran Alto 2:12¼, out of Wanda 2:14¼, Roman Boy by Zolock 2:05¼, out of Wanda 2:14¼, Lord Isle by Zolock 2:05¼, and It, a yearling by Bonnie Direct 2:05½, out of Wanda II., sister to the Roman 2:09½.

Starlock is the appropriate name for a classy looking two-year-old at the Pleasanton track belonging to Mr. Chas. F. Neal of Alameda. He is "bred in the purple." Sired by Zolock 2:05¼, dam by Gossiper 2:14¼; second dam Fanny Vasto by Vasto 2:16¼; third dam Fanny McGregor by Robert McGregor 2:17½; fourth dam Fanny Patchen by Mambrino Patchen 58, etc. There are few as well bred in America as this one and few as promising.

A full sister to The Limit (trial 2:10) has been bred to Star Pointer 1:59¼. She belongs to Mr. Lou Crellin, who intends to always keep her for a broodmare.

Frank McNally of Livermore is the owner of the good mare Ruth C. by Guide, a son of Director 2:17, and she has as handsome a filly by Bon Voyage by her side as one could wish to see. Ruth C. was bred to The Limit this year.

One of the best made foals in Alameda county is coal black in color, and was sired by Barney Simpson's pacer Arner 2:17¼, out of Grace Cole by Nutwood Wilkes 2:16½; second dam Lily Langtry (dam of two) by Nephew; third dam Belle Mahone by Norfolk. The mare and foal belong to H. D. Brown of Pleasanton.

Thos. H. Brants of Walla Walla writes that his black colt Northalis by Del Norte, out of Miladi B. by Chehalis, which was entered in Breeders' Futurity No. 7 for foals of 1907, died about a month ago.

Deviletta 2:10½, W. S. Harkey's good Marysville pacer, was bred to Aerolite last Saturday.

There was an error in the statement regarding the ownership of Effie Logan (dam of Sir Albert S. 2:03¾). She belongs to J. Elmo Montgomery, not Carey Montgomery.

There is an excellent plan in vogue among horsemen in Australasia which should be adopted by owners and trainers here and that is that all horses led, driven, ridden or placed on cars en route from one race track to the other are made to wear heavily lined knee pads as a protection. Many a good colt in America has been ruined because this precaution has never been taken.

Trainers who have Breeders' Futurity candidates will have a chance to try out their three-year-olds in the Athenian Stake at the Oakland meeting. This event calls for \$900 and promises to secure a good entry list, as there are many three-year-olds in training this year. Do not overlook the fact that entries close next Wednesday.

Chas. De Ryder is in doubt about going East, the California purses and programs look so tempting. He has discovered so many really fast horses among those sent to be handled that if he had not made other arrangements he believes he would be in front in many of the events here. He has in Diablo Mac a crack-a-jack; another is Yosemite by Monterey. The other day he drove this horse so easily in 2:18 that he was astonished. He has others that are "threatened with speed" of a very fast order and is more than pleased with the way they are working every day.

Next Wednesday, April 1st, will be a red letter day in the history of light harness racing in California. Entries for four meetings close on that day.

The manager of the Oakland meeting is planning to give a big purse in the effort to get all the fastest trotters together on the opening day of the coming fair.

W. H. Graham of Fresno recently purchased Malula, a full sister to Directly 2:03¼, and bred her to Star Pointer 1:59¼ last week.

Peter Williams has taken charge of the San Lorenzo trotting park and will handle a number of horses there this summer. He has decided not to take Monterey 2:09¼ to Santa Rosa, but will stand him at the Alameda track and also at this track.

A. B. Coxie of Paoli, Pa., purchased a mare called Reina del Diablo by Diablo 2:09¼, out of a mare by Sidney 2:19¼, from W. A. Clark Jr. of Los Angeles before he started East. He also got prices on several McKinney mares while here.

Work is progressing rapidly at the Chico track. L. McIntosh, one of the foremost trotting horse breeders in Butte county, declares it will be one of the best in California when the gates open.

A number of very fast trotters and pacers are being worked on the Woodland track. One of the latter by Diablo 2:09¼, out of Hattie B. 2:15½ by Alexander Button, is a candidate for 2:05 honors this year.

Lord Alwin has sired a filly out of Louise Carter (3) 2:24 by Chestnut Tom 2:17¼ (he by Nutwood Wilkes 2:16½, out of Zeta Carter by Director 2:17; second dam Lida W. 2:18¼ by Nutwood 2:18¼, etc.); The second dam of this filly was Ingar (dam of John A. McKerron 2:04¼, Lord Alwin, etc.), by Director 2:17, etc. She is one of the purest gaited and best ever bred by Martin Carter, and will prove one of the fastest. She is inbred to Director three times and Nutwood twice through Lida W.

George Wilkes continues to the head of the largest tribe within the trotting family. Of his sons 103 are sires of 2,004 trotters and 1,000 pacers, while 109 of his daughters are producers with 142 trotters and fifty-six pacers. Nutwood's sons, 150, have sired 574 trotters and 494 pacers, while 168 of his daughters have produced 228 trotters and seventy-seven pacers. Electioneer's 104 sons that are sires have to their credit 1,134 trotters, 324 pacers; 107 daughters have produced 136 trotters, twenty-two pacers.

W. F. Ingwerson, secretary of the Tulare County Agricultural Association, Tulare, writes that all the property at the fair grounds was transferred to the Tulare County Agricultural Association, and the ownership of the land, the buildings and all other appurtenances is now vested in the association. Plans for the coming fall were formulated, the first step being to claim the date for the fair, which is to be held during the week from September 21st to the 26th inclusive. The event will be known and advertised as the Tulare County Fair and Blue Ribbon Sale. The speed program will be the biggest thing ever offered in Tulare county, and is expected to be the best in the valley. For the early closing stakes there will be four purses of \$1,000 each, one for the 2:15 trot, one for the 2:15 pace, one for the free-for-all trot, and one for the free-for-all pace. These purses will surely bring some good horses. Entries for these purses will close April 15th. On the first of August the remainder of the program will be published, and for these races the purses will each be \$500.

Remember, this is the last call for entries on the best circuit ever seen in California.

When the late Capt. Millen Griffiths and Henry Pierce were visiting the East in 1892 they stopped at the Tattersall's, Chicago, Ill., and saw a little grey mare led by the latter that could out trot the running horse on which an attendant was riding and trying to lead her. These gentlemen decided to buy that filly and did so for a long price. She was called Nettie O., and was sired by Lakeland Pilot 4656, out of Alice Grey by King of the West; second dam Graves Maid by Volunteer 55; third dam by Oneida Chief. She is registered standard in volume XI., page 668. Mr. Pierce sold his interest in her to Capt. Griffiths years ago, and Chas. Griffiths, owner of Bonnie Direct 2:05¼, has several foals from her.

In an item regarding the wonderful work of Benj. Cram's Bay Bird mare at the Stadium last week our informant was in error regarding her breeding. She was out of a mare by Sidney 2:19¼; second dam Morgan Hill mare by Le Grand; third dam Old Lady by David Hill Jr.; fourth dam by Williamson's Belmont.

C. W. Williams has just sold at a long price to C. T. Larrabee of Montana the yearling colt Hollis Allerton by Allerton 2:09¼, dams by Constantine 2:12¼, Baron Wilkes 2:18, etc. The colt is a large, grand individual and a perfect gaited, high going trotter.

The Montana State Fair at Helena, September 28th to October 3d, will offer two \$2,500 harness races, one for 2:11 pacers and the other for 2:14 trotters. The other classes are: Trotting, 2:30, \$400; 2:24, \$300; free-for-all, \$500. Pacing, 2:25, \$400; 2:18, \$300; free-for-all, \$500. The appropriation for the harness division was increased. Advertisements containing conditions will be published in this paper in a few weeks.

G. H. Palfrey of Melbourne writes: "There is talk of a new trotting horse register being compiled similar to the one issued in New Zealand. Trotting in Victoria is making rapid strides. My colt by Owyhee is as fine a looker as I have ever seen. I will see that he is prepared for the races."

It is extremely probable that within six weeks the Vallejo race track will be placed in condition for the holding of a series of races under the auspices of the San Francisco Driving Club. The meets held there last season under the auspices of this organization met with instant favor among the Solano county horsemen, and Manager Luke Marisch is said to have decided to renew racing this summer and fall.

Conifer, the sire of Bonnie Russell 2:10¼ and John Trouble 2:15, was out of Carlotta (trial 2:21), by Nutwood 2:18¼; second dam Lady Mayberry (grandam of Dubec 2:17, Mista 2:29, Geo. W. McKinney 2:14¼, El Molino 2:20 and Washington McKinney, sire of the wonderful trotting mare Lady McKinney 2:19¼, matinee record 2:12¼, etc), by Chieftain 721.

C. W. Marks, Washington C. H., O., is planning a very extensive campaign the coming season with Wallace McKinney, his now five-year-old son of McKinney 2:11¼. Wallace McKinney could trot in 2:20 as a two-year-old, but was worked lightly as a three and four-year-old, being in the stud. He is out of Leonor 2:24, the dam of Jennie Mac 2:09, Dr. Book 2:10, Miss Jessie 2:13¼, Judd 2:24¼, and the grandam of Silver Coin 2:10 and Create (3) 2:18.

The ex-California pacer U. R. Welcome 2:17¼, by Welcome, is in training at Louisville, Ky. He showed close to 2:08 last fall.

The success of the "Down East" auction sale of trotters, to be held by the Fasig-Tipton Co. at the Readville, Mass., track during the week of May 25th-30th, is already assured, since many entries of high-class horses have been made.

J. J. Jermyn of Scranton, Pa., has begun suit against the City of Hornell, N. Y., claiming \$15,000 damages for the loss of the pacer J. J. J. 2:06¼, that was destroyed after having been injured by falling into a manhole.

John Splan returned to Lexington, Ky., from Chicago, having been pronounced beyond any possible danger of hydrophobia from the injury that he recently received from a rabid dog.

The International Sales Company will hold its inaugural sale at Eatontown, N. J., April 20th to 25th. William MacFarland of Philadelphia is the president of this new company and Ken Walker, formerly secretary of the Kentucky Sales Company, is the secretary and manager. Eatontown is thirty minutes' ride from New York City, and here the new company has an extensive plant. Among the consignments are fifty head from the MacFarland Park Stud, representing such sires as Cresceus, Direct Hal, Rhythmic, Be Sure, Jay McGregor, Owyho and others; a dozen from W. F. Redmond of Madison, N. J., representing such sires as Joe Patchen, Handspring and others.

Among the horses buried in the infield at Cleveland are the trotters Askey 2:08½, Arch W. 2:11¼, Penelope 2:12¼, Hazel Ridge 2:11¼, Choir Boy 2:10½, Greenleaf 2:17¼ and Wyandot 2:19¼, and the pacer Derbertha 2:07¼.

Andy McDowell will be located at Hudson River Driving Park, Poughkeepsie, N. Y., this season, where he will train a public stable. Mrs. McDowell is expected to join her husband soon, she having remained in Vienna when Andy came over early in the winter.

Members of the San Joaquin Valley Driving Club will assemble at the Stockton race track to-morrow and develop their muscles by building a fence around the track wherever the original fence has been broken. W. J. Hersom, the Constable, has been appointed to collect fines from all members who fail to show up, or who are inclined to shirk work after they arrive on the grounds. The club has been given a 4,000-gallon water tank, with a windmill, to keep the members supplied with liquid refreshment while they are at work. The track is being put into good condition now, and speeding will commence as soon as the weather is settled.

Last Tuesday Homer Rutherford, as trainer, left San Bernardino for Salem, Ore., with three horses—Lady Josephine, belonging to William Russell; Ambush, belonging to "Bud" Strong, and Delilah, belonging to the estate of the late Ben Davies. The fourth, the famous Zolock, also belonging to the Davies estate, is already at Walla Walla, and will join the string at that place. The horses will be in Oregon for a few weeks, and will then come back to Southern California to enter on the Western Circuit. Rutherford is said to be one of the best horsemen in California, and if this is true some great things are to be looked for from the San Bernardino horses this season, for every one of the quartet is in the pink of condition and fit to do his best.

The leading sires as indicated by the Year Book just issued are: Alcantara, 118 trotters, 50 pacers; Allerton 135, 41; Axtell 101, 13; Ashland Wilkes 69, 57; Baron Wilkes 106, 30; Chimes 69, 37; Electioneer 158, 2; Elyria 88, 19; Gambetta Wilkes 95, 102; Jay Bird 106, 12; Norval 80, 26; Nutwood 137, 37; Onward 154, 47; Pilot Medium 102, 24; Red Wilkes 128, 49; Robert McGregor 98, 13; Sidney 63, 47; Simmons 103, 34; Sphinx 71, 49; Wilkes Boy 76, 26; Wilton 11, 24. According to Registrar Best no sire has yet reached the 200 mark, Onward having 198 and Gambetta Wilkes 197. As a sire of trotters only Electioneer leads, with Onward second, Nutwood third, Allerton fourth.

The sons of George Wilkes have sired an even 1000 pacers.

There are two "best times" to sell a horse—and every horse "needs selling" sometime. One of these is just before you make up your mind that said horse is the very greatest in the world, and the other time—really the first and best time—is when you are offered a good, fair price which leaves you a nice, clear profit, leaving the other fellow the "get-plum-rich-quick" proposition.

When George W. Leavitt purchased Bingen 2:06¼, then a yearling, in Kentucky, neither he nor any one else could have had an idea of how great an influence the purchase of the colt would have upon the harness horse interests of Massachusetts, and, indeed, of all New England. The colt was purchased because he showed great promise of becoming a fast trotter, but no one then thought of the son of a practically discarded son of Electioneer from a mare that had no record and had produced nothing, as a coming great trotting sire. He was indeed a youngster of much promise, and a grand individual, but that was a far cry from becoming the most sensational speed sire of his day. However, the colt was not only a wonderful colt performer, but trained on to a very fast record as an aged horse and was retired to the stud as sound as the day he was foaled. As a race horse he fulfilled every expectation. The next question was, would he reproduce the extreme and early speed that he possessed, which is the test of a sire these days. From the time that his oldest crop of foals were trained there has not been any doubt on this score. They are all fast.

With 200 men and forty teams at work on it, Portland's new race track is being rushed to completion. The Portland Country Club and Livestock Association, which is putting in the big stables, show pavilion and mile track in the valley between Rose City Park and Montavilla, expects to expend \$150,000 before the work has been completed. One hundred thousand dollars of the money has been provided, and stock will be issued soon for the remaining \$50,000. On the north side of the track a hillside rises fifty feet, upon which will be built a grandstand to seat 5,000 people. The work will be completed some time in May. Toward the city from the track the big stables and pavilion will be built. The pavilion will be 150 by 200 feet and will first used for the Pacific Stock Show, September 16th to 21st. That show, which follows the State Fair, will be held in connection with a week's harness racing, for which two \$2,500 purses have been hung up and several \$1,000 purses.

SANTA CLARA'S NEW RACE TRACK—NOTES AND COMMENTS.

Santa Clara, March 19, 1908.

Editor Breeder and Sportsman: Two years ago Mr. Henry Brace purchased a tract of land on the Alviso road, adjoining the Southern Pacific Railroad, about one-half a mile from the depot, just on the outskirts of the town of Santa Clara, and less than three miles from San Jose.

Mr. Brace's object in purchasing this land was to establish a small stock farm for the breeding and raising of a few choicely bred trotters. After the closing of the old race track at Agricultural Park, San Jose, two years ago the first of next month, horsemen located there, had no place to go and were at their wit's end to know what to do. A number of them were permanently located, having their own homes, and it was almost out of the question for some of these to move their horses to some distant track. The result was that some retired from the business, while others at a great inconvenience to themselves moved to Woodland, Pleasanton, Sacramento, Salinas and other places.

Seeing their dilemma, Mr. Brace came forward and made the horsemen a very liberal offer to construct a first-class training track on his place if they would give him their support and co-operation. This offer they rejected for no other reason than that they were unanimously of the opinion that the soil was not suitable for a desirable winter track, besides they had hopes that there would be a track built in another location near and convenient to San Jose that would make a superior winter training place.

There never was a more disagreeable place to winter horses than the old San Jose track, from which they were compelled to leave, and while there was a prospect of getting a new one out on the Alum Rock road on soil high and dry, where they could discard their mud shoes and move around on top of the earth, they hailed it with delight, and rejected Mr. Brace's offer. The project of building the "ideal" winter track on the Alum Rock road was undertaken by prominent horsemen and capitalists, and everything looked bright and rosy, when along came the never-to-be-forgotten earthquake and knocked all the thoughts of race track out of the heads of the promoters.

When Mr. Brace realized that he could not obtain the co-operation of others to build a track on his place, he concluded to build a half-mile track for his own use and to test and prove the suitability of the land for a first-class track. This he did, and the soil has proven to be of the very finest quality for a race track. It is of dark sediment, entirely free from grit and gravel; it has an elastic nature that does not become hard, yet furnishes a firm, safe footing that does not give way or cup; it requires less water and less work and care in the summer time to keep it in first-class condition than any race track I have ever seen, and while there are a number of tracks I have never seen, I have seen and worked on a few of the best ones in existence between the Atlantic and Pacific.

Several green trotters worked miles around 2:15 on it last summer and practically received their development in the few months that they were trained there, which speaks volumes for its suitability for the quick development of speed. I have never seen any faster ground. With a smooth surface and practically no cushion, I have seen horses step fast on it when I could not hear their feet strike the ground. That is what I call on ideal track for training. If there is another of that kind in the State of California I don't know where it is. Some might mention the Alameda track in comparison, but it is not necessary.

In regard to its adaptability for winter use I will say that it is only a question of drainage. Any porous soil that does not require artificial drainage by means of grading and ditches is not suitable for a first-class track, as it contains more or less sand and gravel and will form a hard cement-like surface, or cup and break up, making an unsafe and dangerous track, which means the ruin of many a good horse, although the absence of mud in such sandy, porous soil makes it very agreeable ground to be located on during the wet season. Mr. Brace's track is well drained, and although not as much pains have been taken with it in that respect as would be with a mile track intended for public use, it dries off very quickly and gets in condition for use after a rain fully as quick as the famous winter track at Pleasanton, and, in fact, I think quicker than that track in its present condition.

If Mr. Brace had received a little encouragement two years ago we would now have a first-class track in the Santa Clara Valley, more accessible and convenient to a greater number of people than any other track in the State and with a better climate than that of Pleasanton—not so cold in winter and not so hot in summer. Some have objected to the location, claiming that it would not be a San Jose institution, as Santa Clara lies between it and that city. I cannot see where that would make any difference, as it is less than three miles from First and Santa Clara streets, and I only know of one location where suitable land can be obtained that would be nearer the heart of the city or more accessible and that land would cost \$1,000 per acre, which puts it out of the question. It would be much nearer and more convenient than the Sacramento track is to that city, and the same can be said of Los Angeles and nearly every other city in the United States that boast of a track. The S. J. & S. C.

Electric Road would, without a doubt, extend their line right to the ground just as soon as the needs of the public justified doing so, which would not be long after the track was built. The Southern Pacific Company has promised to lay a side track there, so that horses could be unloaded right at its gates; also make a flag station for the accommodation of passengers. At the present time the distance from the Santa Clara depot and the S. J. & S. C. car line is not as great as it is from the Pleasanton depot to the track at that place. The abundance of pure artesian water, with which the place is supplied, is a valuable feature that should not be underestimated, as it is only necessary to turn the water loose from a flowing well and fill the ditches on either side of the track in the summer time and by sub-irrigation insure an elastic and springy track at the time of year when our California tracks are usually dry and hard.

The moisture coming to the surface during the night is sufficient to lay the dust for the following day, and a light nail-harrow would do the rest—and behold! the finest, fastest and safest track any man ever worked a horse upon. The same never failing fountain of water will insure an abundance of alfalfa and green feed during the dry summer time, and that is something that cannot be had everywhere.

Every one interested in the light harness horse within the radius of 100 miles of San Francisco realizes and appreciates the need of such a track, and yet horsemen have spurned the offer and "knocked" the proposition; have refused the gift proffered them and discouraged the goose that would have laid the golden egg, and must continue to train their horses over a track managed by one who is not willing to do the veriest trifle to improve the conditions existing there.

But, while I am writing, surveyors are at work laying out a mile track on the above mentioned place, and there is a prospect after all that we will have a new track, and I hope that those who have opposed the scheme will experience a change of heart and lend the proposition their support and thereby insure us a much needed place to train in an accessible and desirable location.

C. C. C.

TO OWNER, BREEDER AND TRAINER.

Can the California Circuit be made second to no State in the Union? It can be by the united efforts of breeders, trainers and the track managers. Let's all get together and establish a circuit in line with the importance of California as a great breeding State. Every year we produce some of the famous stars of the season, but the admirers of light harness horses in this State have had little chance to see them perform. This is because the California Circuit was permitted to lose in prestige, year after year, principally on account of the inactivity of promoters and the inability to properly boom the meetings. However, the decadence of the California Circuit was, in a great measure, due to lack of united action. Owners were obliged to ship East on account of the negligence of associations in not announcing their programs. These undesirable conditions do not prevail this year. Associations on the Pacific Coast have at last realized the importance of making early announcements, and as a result Will Durfee and Chas. De Ryder will be the only stables shipped East this year. Every other stable will be campaigned in California, Oregon and Washington.

The light harness game is on the eve of a big revival in California. There are plenty of good horses in this State, and the home circuit is the right place to develop them. Last year we turned out half a dozen stars. We had Grand Circuit material in the pacing division. Now, the readers of the Breeder and Sportsman know all about the light harness horses that are bred in California, so I will get down to business.

The object of this letter is to urge on owners and trainers, the necessity of being liberal with their entries next Wednesday. I took hold of Oakland at the request of many different people interested in the breeding and racing of light harness horses throughout this State. The opinion prevailed that Oakland was ripe for a big meeting. It undoubtedly is, but much rests with the owners and trainers.

I want the support of the men interested in popularizing the light harness game. I want to start off with the best entry list ever obtained by a Coast association. It will make the skeptics sit up and look. There are many who predict that sulky racing has seen its best day. I contend there are thousands of admirers of the sport ready to patronize the right kind of racing. That is the kind I most desire to offer at Oakland this coming August. Won't you furnish some of the horses? A successful meeting at Oakland means considerable to the breeders and trainers of the whole Pacific Coast. It means bigger purses and higher prices for the standard bred horse. Yours very truly,

BEN BENJAMIN.

At a sale of horses held by Samuel Grigsby in Woodland, Cal., last week the average price received was \$200.

Pearl, the famous Canadian high-jumper, alleged to have cleared the bar at 7 feet, 8 inches, is dead. The cause of death is given as anaemia, the veterinarian stating that after death he could find no red blood in her veins.

PLEASANTON MATINEE RACES.

The largest crowd that ever attended a matinee race meeting in Pleasanton assembled last Saturday. The weather was not pleasant, a strong north wind was blowing continually, but the fact that there were rumors that some fast records would be made acted as an incentive to draw people there, and notwithstanding the prevalence of the high wind which carried clouds of dust directly over the grandstand, where at least 1,000 gentlemen and ladies were seated, the enthusiastic spectators remained until the last race. The events were all well contested. Had there been purses of \$1,000 suspended from the wire the drivers could not have striven harder to win. Among the people who cheered the winners and showed that the trotting horse industry is still "the best on earth" were the following:

F. McNally, F. H. Burke, C. H. Griffiths, F. McAnerney, W. Mendenhall, Asa Mendenhall, W. S. Harkey, J. Parsons, J. C. Kirkpatrick, H. C. Holland, H. Dunlap, C. H. Wempe, J. Neal, F. Horner, C. Crosby, Chas. F. Neal, Hugo Asher, Dr. Colestock, Jas. Murphy of Chicago, C. R. Dunn, P. Williams, J. Eoff, Wm. Hendrickson, Capt. W. Ford Thomas, Wm. S. Brabury, W. Bellin, gall, John Thoms, Lou Crellin, J. Sutherland, Fred Chadbourne and M. B. McGowan.

Those who officiated and helped President Lee Wells to carry through the long program without a hitch or mistake were: Judges John A. McKernon, W. S. Vance of Marysville, W. H. Graham of Fresno. The starting judge was Ira Barker Dalziel, who at once established himself as one of the best seen at this track. His work was excellent.

There were several surprises. The Washington McKinney mare Lady McKinney, ably driven by her owner, F. J. Kilpatrick, started the day's enjoyment by winning the first heat of the first race in the remarkably fast time of 2:12½, the best record ever made in a race on this historic track. She never lifted her head from start to finish, although she had to be driven all over the track to avoid being run into. If nothing happens she will be a 2:06 performer on the meetings on the California Circuit ends. Her rival, Diablo Mac, owned by Lewis Pierce, of Suisun, was only a neck behind and in the two following heats, which he won in 2:15 and 2:16½, Lady McKinney was right at his throatlatch.

In the first heat of the second race Mr. Kilpatrick's pacer Don Diablo finished second, being quite lame and was withdrawn, so Senator Clark won easily.

Jas. C. Smith's Lady Inez won the third race. In the first heat she went to the half in 1:06, closely pressed by F. J. Kilpatrick's Princess W., the latter broke and fell back. Lady Inez won by four lengths in 2:16½. Zella Mac second. In the next heat Zella Mac led, but Lady Inez lay in third position behind Princess W. Down the stretch it was a nip and tuck finish, Princess W. passing Zella C., and when twenty yards from the wire Joe Cuicello called upon Lady Inez, she responded gamely and won the heat by a head from Kilpatrick's good mare. Time, 2:17.

It was anybody's race in the fourth event, but Hunky Dory won the first and third heats just by a margin, Hellman's Carrie C. winning the second.

The fourth race furnished more exciting finishes, but Joe Cuicello handled the pacer Queen Derby splendidly and landed her a winner. Riley Kent with Polly Gar showed that he has a mare not to be overlooked. Bonnie Belle is another good one, while Calva, the "wine horse from Fresno," although only handled six weeks, showed that he will do. He is a stout, rugged-built son of Athadon, and was taken out of a wine cart and sent to Mr. De Ryder six weeks ago.

The three-year-olds furnished an excellent sport. Thos. Ronan, the "Dean of the Pleasanton Track" handled his three-year-old Antrim colt in a manner that elicited the praise of all, and when he got the hardly broken youngster straightened out he drove him as well as any man could. Sobra was the class of the race, however, and won handily, Zinda being a little steadier than Birdseye, but did not have as much speed. The prizes were beautiful. Chas. De Ryder getting two and Joe Cuicello two. Taking it all in all, it was a day never to be forgotten, everybody returning home delighted with the day's enjoyment. Following are the summaries:

Class A, trotting, Pleasanton Hotel Cup—
Diablo Mac by Diabolo (Durfee) 2 1 1
Lady McKinney by Washington McKinney (Kilpatrick) 1 2 2
Berta Mac by McKinney (Helman) 3 3 3
Time—2:12½, 2:15, 2:16½.

Class A, pacing, Crown Milling Co. Cup—
Senator Clark by Prodigal (De Ryder) 1 1
Don Diablo by Diabolo (Kilpatrick) 2 d
Time—2:15½, 2:19.

Class B, trotting, Dr. Ira Barker Dalziel Cup—
Lady Inez by Nutwood Wilkes (Cuicello) 1 1
Zella Mac by McKinney (Bunch) 2 3
Princess W. by Washington McKinney (Kilpatrick) 5 2
Antionette by Anthony (De Ryder) 3 4
Alto McKinney by McKinney (Montgomery) 4 5
Time—2:16½, 2:17.

Class C, Orchard and Farm Cup—
Hunky Dory (Walker) 1 2 1
Carrie S. (Helman) 3 1 2
McKinney Belle (Kilpatrick) 2 3 2
Time—2:29, 2:28, 2:28.

Class B, pacing, Thomas Silver Cup—
Queen Derby by Chas. Derby-Addie Ash (Cuicello) 1 4 1
Polly Gar (Kent) 3 1 2
Bonner Belle (Dunn) 4 2 3
Calva (De Ryder) 2 3 4
Time—2:17½, 2:15½, 2:16.

Three-year-old trot—
Sobra (O'Keefe) 1 1
Birdseye (Ronan) 3 2
Zindo (Colestock) 2 3

MATINEE RACING AT LOS ANGELES.

The matinee race meeting at Agricultural Park on St. Patrick's day was well attended. The races were close and exciting. One of the novel features of the day, and one that probably will not be duplicated again soon, was the fact that five of the six races on the program were won in straight heats. The exception was the fourth race, the free-for-all pace. This was a three-horse affair, with Siegfried, Silver Dick and Cleopatra as the contenders.

F. C. Payton, who owns and usually drives Silver Dick, concluded to stay off the sulky and turned his horse over to the care of Frank Williams of Pasadena. The latter handled the gray gelding in such a masterful manner as to cause much favorable comment, and won the first and third heats. The finish to the deciding heat was the most exciting episode of the afternoon.

In the opening heat Silver Dick beat out Siegfried in a "heart disease" finish in the time of 2:10.

The second heat was finished in another blaze of enthusiasm and excitement. Captain J. D. Springer, who was driving the Long gelding, got off last to a bad start, but gamely stayed with the race and came down the stretch abreast of his white-faced rival, winning out by a head in 2:11½.

The final heat proved to be a three-horse race. The Payton gelding assumed the lead at the half, this distance being marked off in 1:05½. Coming into the stretch the three horses were bunched so closely that one blanket would have covered them all, and the spectators rose to their feet in anticipation of a killing finish. The game little garland mare was doing her best to make it an all night session by taking the "off" heat.

Williams rated the trim gray to a nicety and took him under the wire a winner in 2:11, putting an end to a day's program that satisfied the most exacting of harness horse lovers. Summary:

First race, 2:40 pace, mile heats, 2-in-3—
Gray Bess (P. J. Ramroth) 1 1
Bud B. (L. L. Bricker) 2 2
Time—2:36, 2:35.

Second race, free-for-all trot, mile heats, 2-in-3—
Hazel Kinney (J. H. Reynolds) 1 1
Zombretta (J. D. Springer) 3 2
Ida Millerton (E. J. Delorey) 2 3
Time—2:15, 2:15½.

Third race, 2:25 pace, mile heats, 2-in-3—
Rob Roy (C. C. Willis) 1 1
Miss Thelma (Harry Messmore) 2 2
Irish (J. H. Snowden) 3 4
Angie Durveau (Dr. Humelbaugh) 4 3
Lady Sefton (Joseph Walker) 5 5
Time—2:22, 2:22.

Fourth race, free-for-all pace, mile heats, 2-in-3—
Silver Dick (Frank Williams) 1 2 1
Siegfried (J. D. Springer) 3 1 2
Cleopatra (Wm. Garland) 2 3 3
Time—2:10, 2:11½, 2:11.

Fifth race, 2:20 pace, mile heats, 2-in-3—
Shecam (Jake Levy) 1 1
Zella Z. (G. W. Dickson) 2 2
Zomwolsey (E. E. Sherwood) 3 3
Wild Rose (M. J. Silverthorn) 4 4
Time—2:19, 2:19.

Sixth race, 2:25 trot, mile heats, 2-in-3—
Charles M. (J. O. Donohue) 1 1
Phylis C. (C. A. Holcombe) 2 d
Genetta (L. P. Keller) 3 d
Sadie McKinney (Wm. Garland) 4 d
Time—2:20½, 3:10½.

FANNY EASTER.

The above is a likeness of Frank Overacker's filly by Arner 2:17½, out of Fanny Vasto 2:16½. She is 153 hands high and weighs 1075 pounds. She is three years old this spring and is entered in the Futurity Stakes. Fanny's disposition is of the kindest; she appears to be the pet of the children of Centerville.

NEW ZEALAND NOTES.

In New Zealand there are many promising trotters. R. O. Duncan, president of the New Zealand Trotting Club in Christchurch, has a mare called Sal Tasker which he is willing to wager \$5,000 can defeat any other in Australasia, and so far his challenge remains unanswered. He also owns a good one called King Cole, a three-year-old, by Rothschild out of Kola-Nut. He won three races in succession last month in three successive days, on a heavy, muddy track, and the last was a two-mile dash in 4:59. Sal Tasker was taken over to Grey-mouth for exhibition purposes after a five days' sea voyage from Australia. She paced the first day over the half-mile track in 2:21½, the second in 2:18½, and the third in 2:16. The track was heavy and at no time did her driver, Dave Price, resort to the whip. By the way, Dave Price is the "Ed. Geers of the Southern Hemisphere," and is, in the estimation of all Americans who have seen him drive, the peer of any reinsman in America. He drove in thirteen races at this Grey-mouth meeting, won twelve and was second once. In his early boyhood Dave was the premier jockey of New Zealand and seems just as much "at home" riding pacers or trotters as he is in the sulky. He stands head and shoulders above every trainer there. He was the one who trained and drove Ribbonwood 2:09½ to his wonderful record.

A number of mares have been shipped from New Zealand to be bred to Abbey Bells 38584, who is at the Allendale Stock Farm, Mentone near Melbourne. Mr. Duncan is sending over several of his this month, a 2:50-mile journey.

The McKinney-Elsie stallion Galindo, which was purchased from Charles Durfee, was bred to Mrs. R. O. Duncan's mare Vanquish by Abbotsford 2:19½, out of Agnes by John Nelson 187, and the foal is the handsomest ever seen in Christchurch. He is bred to "stay the route" and should be a fast one. Galindo is doing better than any California stallion shipped to New Zealand.

James Pettie, who purchased the Charles Derby mare Norice and several others at Pleasanton, is located near Gisborne and has a colt called Sweet Patch that is attracting a great deal of attention. This colt is by George M. Patchen (Rothschild-Bundoora), out of Creole by Pinole Patchen, he by Liberty Patchen. This horse Rothschild has been achieving such wonderful success is by Child Harold 414 out of Belle Briggs by Jim Lick, he by Homer, a son of Rysdyk's Hambletonian out of a gray mare said to be by Messenger. Jim Lick trotted in several races in California. His daughter, Belle Briggs, that was sent to Australia, was owned by Billy Briggs, an old-time sporting man well known in San Francisco.

NO THOROUGHbred FOR HIM.

Speaking of new infusions of blood to improve the trotter brings to mind the fact that Hamilton Busbey, one of the most bitter opponents of the late John H. Wallace's theories, when that rigorous writer made his views public in Wallace's Monthly, has at last come to the conclusion that it will be a mistake to introduce crosses in our trotting pedigrees. When Mr. Wallace expressed the belief twenty years ago that the way to breed trotters was to breed a trotting mare to a trotting horse and keep on doubling up the trotting horses and advised breeders to let thoroughbred blood alone, denominating it as "rummy foolishness," Mr. Busbey presented arguments, ridicule and downright abuse to show that the hard-headed Scotch-Irish founder of the Register was all wrong in his belief. Recently, in The Horseman, Mr. Busbey practically admitted the correctness of Mr. Wallace's views when he said:

"All thoroughbreds trace to the Orient, the roots being the Arab and the Barb, but the modern race horse is so far superior to the Arab of 13 or 14 hands as to make ludicrous a close comparison between the two. No breeder of experience would think for a moment of trying to produce a second Collin or Sysonby from an Arab mare. A step of this kind would be equivalent to reversing the wheels of progress.

"Messenger, a thoroughbred, is at the base of the trotter, but were the famous gray stallion now in the flesh would any person breed to him in expectation of producing in the first cross the equal or superior of Lou Dillon?

"Since the days of Messenger we have bred for a distinct purpose, and the trotting type has from year to year become more strongly established. An abrupt return to the thoroughbred for the advancement of the trotting breed would be just as sensible as a direct return to the Arab for the type that wins the English Derby.

"The last trotting horse breeder of prominence to experiment with strictly thoroughbred mares was John H. Shults. The results were not satisfactory, and in December last he sold at public auction for a song such well-bred mares as the Spinner, by George Kessler (son of Salvador and Miss Woodford), dam Spinning Time, by Merry Go Round, by Scottish Chief; Serious, by Arkle of Arklow, by Ben d'Or, dam Sedate, by Rousseau, by Eolus, by imp. Leamington, and Sabilla, by Tyrant (son of imp. Great Tom), dam Stella, by imp. Mortimer, second dam Estella, by imp. Australian.

"The man who now attempts to introduce thoroughbred mares into his trotting stud will have no just cause for complaint when he finds the produced barred from the American Trotting Register."

With this admission from this old-time antagonist and the decision of the Register Association to make it impossible for horses having new infusion of thoroughbred blood to be registered as standard, Mr. Wallace, had he lived to see it, would have felt that the contentions he so vigorously defended had been fully established.

RACING AT SAN BERNARDINO.

The management of the San Bernardino Driving Association has been somewhat apprehensive during the past week as to how the public would accept the plan of helping pay the expenses of the meet.

Many claimed that few people would patronize the event if they had to pay, but as it turned out there was not the least cause of fear, for the meet this week drew out people from all parts of the valley and Riverside as well. Nor did the people go to the park, but they also paid for the seats without a murmur, and in return were given excellent sport.

Probably the best event was the three-heat race between Adalanth, owned by G. W. Prescott of Highland, and Lauretta, owned by W. A. Hayt of Riverside, the horses stepping the fastest heat in the phenomenally good time of 2:15, two seconds faster than the class in which they were entered. Lauretta passed under the wire a winner by a nose in the first heat, but Adalanth braced up and took the two remaining heats, although there was little room to spare. The results of the events yesterday were:

First event, 2:35 trot—
Bolock, J. H. Kelly 1 1
Emma Z. L. Foster 2 2
Prince Valentine, G. M. Carrigan 3 3
Time—2:42, 2:32.

Second event, 2:20 mixed—
Adalanth, G. W. Prescott 2 1 1
Lauretta, W. A. Hayt 1 2 2
Time—2:21, 2:23, 2:18.

Third event, 2:40 mixed—
Redlands, R. T. Curtis 1 1
Orin A. Harry German 3 2
Ben Z. Rutherford & Young 2 3
Time—2:31, 2:30½.

Fourth event, 2:25 trot—
Marigold, R. F. Garner 1 1
Bonnie June, J. E. Fairchild 2 2
Time—2:26, 2:29.

Fifth event, 2:25 pace—
Scratched because of inability of horses to appear.

Sixth event, 2:30 pace—
Vampo, A. S. Mettler 1 1
Mammy, A. B. Miller 2 3
Coupon, J. T. Garner 3 2
Time—2:32, 2:30.

Seventh event, 2:40 trot—
Eugenia E. E. F. Binder 1 1
Queen, Mr. Parker 2 2
Mark Twain, Thomas Wells 3 3

"An annual stallion card," writes a successful stallion advertiser, "benefits the stallion owner in more ways than one. First, of course, is the direct benefit received from service fees. But the indirect benefits are worth much more than the cost of the ad. The broodmare owner will be anxious to secure another colt by your horse if his first colt sells well, and the produce of a well-advertised stallion always sells better than the unadvertised horse. The same applies when the stallion owner wants to sell his own colts. So well do I think of this latter phase of the question that if I never expected to receive any outside patronage and owned only half a dozen broodmares, I should certainly advertise my stallion every week in the year, and if I sold only one colt, I believe it would sell for enough more than the ordinary price to pay for the advertisement. The colt by the well known sire sells at a good price when the colt by an unknown sire goes begging."—Western Horseman.

JOHN NELSON 187.

Notes on California's Earliest Horsemen and Stock Breeders.

[By a Special Writer for the Breeder and Sportsman.]

Around the old-time California monarch, John Nelson 187, and his owners cluster memories of much of the earliest turf and stock history of the State. Two of his grandsons, through the female line, Albert W. 11333 and Valensin 12049, held court as stud sires at two of California's breeding establishments of national prominence, J. B. Haggin's and Count Valensin's. Of the few California broodmares that passed the test for Governor Stanford's early purchases, there were the Nelson mares Rio Vista Maid (second dam of Costello, p. 2:24½, Sam Lewis, p. 2:25, and Fay 2:25), Aurora (the great broodmare), Nancy (to whom Ariel 2:21 and a number of the registered trace), and possibly Lady Butler. His daughters and granddaughters were to be found on other stock farms of the State. John Nelson occupied rather an unique position in our horse history. With the exception of grand old running-bred Belmont, the good horse but of plebeian and unknown origin, St. Clair, and the costly failure, Werner's Rattler, it is believed John Nelson was the first of our sires to be brought from the East who is represented in the Great Table. When the table of 2:30 horses under their sires (the forerunner of the great table) appeared in the third volume of the Trotting Register of 1879, a year after John Nelson's death, his roll of honor of four was exceeded among California sires only by that of Whipple's Hambletonian with seven. Up to that time, which is not three decades ago, there had been only twenty-five sires with more than four to their credit. John Nelson did not have as many immediate performers either through his sons or daughters as did George M. Patchen, Jr., or Whipple's Hambletonian, but he probably ranked with them as one of the three leading trotting-bred ancestors in California until the arrival of Electioneer, The Moor, and other stallions brought here by the millionaire breeders who started their turf careers in the seventies and were in full swing in the eighties.

John Nelson's Eastern history may be obtained from this clipping of a writer in the Newark, N. J., Call, of several years ago:

"Mr. Alfred A. Snyder, who died two weeks ago in Montclair, once owned, jointly with his father, the trotting sire John Nelson, for whose correct breeding very persistent search has been made by historians of the American trotting horse. John Nelson was foaled in 1851, and his breeding has been accepted as by Imp. Trustee, except that his dam is in doubt. The Snyders came into possession of the horse in 1855. He was at that time in training on Long Island in the hands of John Nelson, from whom he took his name. Mr. Snyder paid \$400 for a half-interest in the horse. The firm owned the horse until the spring of 1858, and then sold him to Horace F. Jones, who kept a stable in Mercer street, near Prince, in New York. While the Snyders owned him he showed a mile in 2:36. Mr. Jones returned the horse to John Nelson for further training and during 1859 sold the horse to California parties. Mr. Alfred Snyder stated to the writer that the dam of John Nelson was not by Abdallah, but by one of the Vermont Morgans. He said that he had frequently challenged any one to prove that John Nelson's dam was the Redmond mare. The horse, he said, was only four years old when he came into his possession and his dam was well known, but in the lapse of years he had forgotten which of the Vermont Morgans was her sire. He was firm, however, in his declaration that John Nelson's dam was a Morgan, and there never was the slightest question about it where the horse was known. Mr. Snyder's claim that the dam of John Nelson was a Vermont Morgan is backed by Mr. Newell of New Brunswick, where the horse was raised. When Mr. Snyder sold the horse he received \$1,800 for him. Mr. Snyder said that John Nelson was a horse of commanding presence, matchless for beauty and conformation. There were few horses, he said, that could compare with him in style and general finish. In 1855 Mr. Halsey Snyder, father of Alfred Snyder, bought a mare that was in foal to John Nelson, and the filly that was foaled was the first of John Nelson's produce. This filly was named Alice, and was long driven on the road in this vicinity. Alice was bred to a son of Volunteer, and the result was a colt which went by the name of Good Templar. He could trot in 2:40, and was a great roadster. He went to a stock farm in Colorado. John Nelson was a success in California."

It is true that in conformation and general finish he was one of the handsomest horses ever in the State. However, he had the "speed indicators"—some of his colts had curbs—and he was marred by a roan spot the size of the palm of the hand upon his flank. The trial of 2:36 shows him to have had about as much speed as the fastest stallions who were his contemporaries, but he was a "paddler." He was essentially one of those noble distance horses and there are those who would tell you he could have beaten General Taylor's world's thirty-mile record. It is recalled that after Dunlap and Boutwell sold him, Tom Glascock, a vaquero who was frequently in the employ of the stockmen of Yolo, drove him from Sacramento to Woodland. He said that after he had arrived a few miles out on the Tule House road, he became so tired holding him, he decided he could ride as rapidly as the horse could trot, and when he came to his destination, Nelson was going faster than he was when he started. John Daniels, a trainer, once exercised him in San Francisco, and after ten miles, fell out of the sulky exhausted. When he was first brought from the States, he was very well-mannered and gentle, the daughter of his first California owner remembering to this day how when she was a little girl she could braid his tail. The incident that when the straw in his stall caught fire one night, Nelson awakened his attendant by pulling at the man's clothes, speaks for the horse's intelligence. But vicious grooms soon made a devil out of him, one of the exhibition tricks

being to make the horse perform record high kicks by the mere placing of a hand upon his back. The reputation he gained for bad manners militated much at one time against good mares being sent to him.

In California, Nelson's dam was always accepted as by Abdallah I, by Mambrino, by Imp. Messenger, as he is registered, until the Morgan discussion came up. The manuscript pedigrees in the possession of his first California owners, the Pitchers and Dunlaps, seem to be entirely lost. There is no question as to his sire, Imp. Trustee, one of the greatest ancestors of both runners and trotters in this country. Trustee was sired by Catton, twice a premier sire of England, and was imported by Commodore R. F. Stockton, U. S. N. Trustee was third in the Derby of 1832, won by St. Giles, but later Trustee beat Margrave, the St. Leger winner of 1832, in a race in which St. Giles was outside the money. Trustee was a brother of Mundig, winner of the Derby in 1835, and half-brother of Cotherstone, winner of the Two Thousand and Derby in 1843. Mowerina, sister to Cotherstone, was the dam of West Australian, first to win "the triple crown," and fourth dam of Donovan, who won the Derby and also the St. Leger in 1889. In America, Trustee got Fashion, the best performing mare of her day; Levity, the greatest ancestress of runners; Revenue, the best stallion of his time; and Reube, the fastest gelding of his day, being a close third to Lecomte and Lexington in the fastest four-mile heat up to the time it was run. Among trotters, Trustee sired "Twenty-mile" Trustee, world's twenty-mile champion, 1845-65, and holders of the four-mile harness race record, 1849-69. The Trustees inherited trotting action from Catton, who had to be whipped from a trot into a run. It is remarkable how many sires of this State and what a large percentage of horses holding world's records which have made California famous, even though it may have been buried in many instances in orthodox trotting lines, carried the blood of Trustee. Among sires there were General Benton 1755, Palo Alto 5353, George M. Patchen Jr. 31, Alexander Button 1997, Anteeo 7863, Charles Derby 4907, Nutwood Wilkes 22116, John Nelson 187 and those which trace to them. To mention nothing of the descendants of John Nelson, there have been those who have held world's records at various times and the Trustee cross from California, such as Sunol, world's champion; Palo Alto, world's champion stallion; Yolo Maid, with the world's pacing record for three-year-old fillies and world's pacing record for mares in a race (as a four-year-old); John A. McKerron, with world's wagon race record for stallions; Who Is It, with world's record for three-year-old geldings; Anaconda, world's champion double-gaited performer; W. Wood, with world's pacing record for four-year-old geldings; Lena N., with world's pacing record for mares; Kinatawah, world's champion three-year-old pacer; Kinney Lou, with world's record for a green stallion; Sonoma Girl, fastest mare for 1907; Ray o' Light, fastest two-year-old pacer for 1907; Mona Wilkes, fastest five-year-old pacing mare for 1907.

The California party referred to above as having bought John Nelson in the East was Captain Ed. M. Pitcher, pioneer of '49, who himself had no short crosses, being a veteran of the Mexican war and a son of Governor Pitcher, the statesman who was chief executive of New York. As charming and handsome as he had been chivalrous, Captain Pitcher was loved as well as any of the pioneers along the Sacramento. His home was the Star ranch, which was upon a section of the original grant of about forty-five thousand acres of the Rancho del Paso. This section had been obtained from his friend, Sam Norris, the pioneer owner of the domain. Another ranch upon the property, just south of where the Central Pacific coming into Sacramento crosses the American river, was bought by the Kentucky blacksmith boy from La Rue county, that State, who was to be known later as the Hon. H. M. La Rue, president of the State Agricultural Society, speaker of the California Assembly, rancher and capitalist. When the Rancho del Paso went from Norris to Haggin and Tevis, the courts decided that Captain Pitcher's and Mr. La Rue's titles were invalid. Captain Pitcher's Star ranch, eight miles out from Sacramento, became so popular that it was turned into a road house for the travelers to the foothill mines. Here the elegant captain received many a merry gentleman from the State capital, and it was here that parties of duellists assembled to go out on the old Oak Grove dueling ground. Among the stories told of the old place with its many remembrances is that General Frank Pixley was once there with his suite intent upon an affair of honor, but before the sun was fully up, all of them repaired to the kitchen in the early morning hours, boiled their high silk hats of the style of the fifties, and happily returned to Sacramento. The kind of Captain Pitcher's hospitality has been well maintained by his daughter, Miss Charlotte Pitcher, merchant and landholder of Roseville, Placer county, and by his son, the late Henry Pitcher, who as head of a Livermore bank was an acquaintance of horsemen in that horse center.

As early as 1854, Captain Pitcher formed a partnership with Sam Norris and went to Missouri to bring back American cattle and horses to displace the Mexican breeds upon the Del Paso; but for some reason not now remembered came back without any stock. It was this same Captain Pitcher who attempted to found what was probably the first trotting horse stock farm in California. It is worthy of comment to connect the ancient and the modern with the fact that this stock farm was upon part of

the Rancho del Paso, afterwards to be the world's greatest breeding establishment of runners, and the sire to head the Pitcher establishment, John Nelson, was the grandsire of Albert W., head of the trotting section of the modern establishment of J. B. Haggin. It is also coincidental that Salvator, fleetest of all gallopers that have lived and head of the Haggin running division, was also a descendant through the Levity family of Trustee, sire of John Nelson.

When Captain Pitcher went East in 1858, he was prepared financially to buy the highest priced stallion that was offered. As befitting his descent, he had the entree to the best sources of information in New York, and the thought he might have hit upon Hambletonian 10 would give rise to the wildest speculation as to its influence upon California horses. But the founder of the great family had no standard performers at that time and his first appeared only in 1867. Imp. Trustee, Nelson's sire, had been the sire of the champion of the fashionable distance horses of the period, and Abdallah I, asserted to have sired the dam of Nelson, had been the most popular sire up to his death in 1854. By that generation, Captain Pitcher's purchase was considered royally bred. The captain returned to California in 1859, not only with John Nelson, but with a stallion "of Rattler blood," Blackleg by name, that even took the eye of horsemen more than John Nelson, but that soon died. These two were not brought across the plains, as has been stated, but came at large expense the more aristocratic way by water. Captain Pitcher's ambitions were not to be realized, his death occurring in 1860.

The widow attempted as best she could to raise some horses, but could not carry out her late husband's plans. One of the mares on the farm was the Lamott mare, to whom through her daughters, Aurora and Sister, trace many superb race horses, including the Kentucky-bred sensation of the year, Kentucky Todd. By one who has seen the Lamott mare, she is described as a bay, bad in the fore legs, and with a noticeably heavy mane, foretop and tail. She was an excellent specimen of the well-defined type of the Spanish mare, as she was called. Here is where the muchly lauded Spanish horse comes into his own as a progenitor of a great line of American trotters. The mare took her name from a Mr. Lamott, a Sacramento hatter. The party who gives information concerning her says by her age she could not have been foaled later than 1852. An examination of the records would seem to indicate that she was the first mare in California, either by residence or native, who has had the honors of being in the great broodmare table. In fact, there are found very few great broodmares foaled before 1852.

In 1860 Nelson was first exhibited at the State fair, where a large number of his family in the standard bred, roadster and even all work classes have for generations been seen, the last one with his name root being Frank Burke's Nelsoner. There was of course no such a thing as a standard bred in those days, and so highly was Nelson and his breeding esteemed that he was entered in the thoroughbred exhibition class along with the runners. The committee of three awarded the premium to a running-bred and wrote: "We also recommend a special premium for stallion John Nelson, exhibited by J. H. Strobridge, Agent." Old Colonel Gift, who knew the pedigrees of horses and men as well as any of the pioneers, was a member of this committee. The "J. H. Strobridge, Agent," is none other than the present Haywards capitalist of that name, who contracted and built the Central Pacific for Huntington, Crocker and the remainder of the railroad magnates. He was the friend of Captain Pitcher and assisted the widow in settling the estate. Before the war it was not considered respectable for a lady to exhibit race horses (tempora mutantur et nos in illis)—hence the agency. Acting for Mrs. Pitcher, E. J. Edwards exhibited Nelson at the State fair again in 1861. It is interesting to note where the pioneer California stock farm on the Rancho del Paso first was mentioned in the books, the Sacramento Union giving an account of the exhibits at the agricultural park which was compiled in the reports of the State Agricultural Society for 1861, as follows, page 141: "Thoroughbred stallion 'John Nelson,' and family. This is one of the most beautiful stallions on the ground. He was sired by imported 'Trustee.' His pedigree is too well known to repeat here. He is a dark sorrel, remarkable for superb size. He is exhibited by E. J. Edwards, with a family of ten colts, as follows: 'Molly Trustee,' a suckling colt, dam a 'Diomed' mare; 'Lady Pitcher,' suckling colt, out of Mary Blane; another suckling colt; a sorrel filly, with dam, a gray mare, large and handsome; 'California Chief,' suckling colt, out of the 'Wells Fargo' mare; 'Lady Douglas,' out of a 'Douglas' mare. This is a neat filly, slightly ailing with distemper, which is the case with two or three of the 'Nelson' colts. Two suckling colts and three dams, bay mares, names and stock not ascertainable. This finishes the 'Nelson' family as far as they are exhibited in this row of stalls."

In 1861 the stallion received probably his first outside mares. Of his foals from them the succeeding year, in 1862, there was one, Mayboy out of the Doctor Thomas' mare. Mayboy was bred and owned by Mike Cassidy of Lincoln, Placer county, (Continued Next Week.)

WANTED.

A good colt trainer to handle colts. Must be sober and reliable and able to furnish best of references. Address M., care of Breeder and Sportsman.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

BIG GAME IN MEXICO.

The account in last week's issue, given by Mr. Virgil Lockett of Pasadena, is supplemented by another Pasadena sportsman, Mr. J. Nelson Nevins, by the following interesting letter in the Pasadena Star:

In regard to the account of wild game near Tampico, Mexico, given by Mr. Lockett, I beg to submit the following notes:

I have lived nine years in the mining camps and cities of Northern Mexico, all the way from Tampico on the east coast to Mazatlan on the west, consequently the following statements cannot be considered as emanating from a tourist's enthusiasm aroused by novel sights and experiences.

In regard to hunting and fishing near Tampico, it is all that your correspondent says it is. The herd of deer that he saw on the flat-lands were the large "black tail" deer, called "burras" by the Mexicans. The small white tail deer, called by the Mexicans "venado," inhabit the foothills and higher valleys and do not congregate in herds.

My first acquaintance with Mexican game was at a mining camp called San Jose, some 100 miles northwest of Tampico, in the State of Tamaulipas, in 1899, where I was employed as chief engineer and geologist by the Nichols Chemical Co. of New York, in opening up their great copper-gold mines in that camp. At that time the camp was a prospect and but few Americans had been in there, consequently game was very tame. My work took me all over the mountains on horseback and into old abandoned mine workings which were frequently occupied by animals, consequently I carried a heavy revolver. In the ordinary routine of work I daily saw many white tailed deer, which made no attempt to run away, but would stand within pistol range and gaze at me.

Once in climbing a trail up a deep ravine two deer sprang suddenly from the brush within ten feet of me, startling the horse from the trail and nearly causing horse and rider to be dashed over the precipice. All through those well watered foothills deer are so plentiful that they cannot be accounted as "game." Next to deer, wildcats and wild pigs, called "javilines," are most plentiful, but mountain lions, jaguars, wolves, foxes, armadillos and sloths are common. Bears are not so numerous. Wild turkeys were the camp mystery! There were plenty of them up on the higher pine-covered mountains, but all attempts by the boys to hunt them failed; they never even saw the birds. Yet there was an old Indian in camp (who, by the way, is entitled to a Roosevelt congratulatory letter, as he is the father of thirty-three children, most of them still above ground), to whom we would give a shotgun and one cartridge in the evening with orders to bring in a turkey. Early the next afternoon he would reappear, and most invariably with a turkey, occasionally with two. He refused all inducements to guide the boys to his hunting grounds, and it was useless to follow him, as it was "nuts" to him to give us the slip in the mountains.

As the native beef supply was poor and irregular, I soon fell into the system of taking a "peon" out with me when meat was needed and shooting a deer or wild pig for him to pack back to camp. Game was so plentiful that this method was entirely dependable, yet I rarely went off of the beaten trails or lost any time in hunting up a prime animal.

Mountain lions and jaguars, called by the natives "loenes" and "tigres," are instinctively retiring and are rarely seen casually, although easily procurable in a few hours' hunt. I have often seen herds of the large black tail deer, numbering up to fifty or sixty head, on the broad plains at the foot of the mountains.

As to water fowls at Tampico, I have seen the mouth of the harbor black with ducks, which rose in clouds as the Ward Line steamer "Santiago" came into port. Mr. Lockett does not exaggerate in his description of the birds there. In fact, I know of only one other locality and that is the practically unexplored mouth of the Colorado River, south of Yuma, where one can see water fowl in such quantity, and variety. This, of course, refers to the winter, when the birds that breed in British Columbia and the United States have congregated in the south.

Hunting ceases to be a sport in such localities, and I, for one, greatly prefer to see the animals in the wilderness, than to kill when they are not required for food.

To bring Mexican hunting nearer home, it is not generally known that Sonora is a hunter's paradise and within two days of Pasadena. Sonora is comprised of a series of flat valleys, from ten to fifty miles wide separated by north and south ranges of rough hills, that are rich in minerals. The land gradually rises from west to east, reaching up into the great "barrancas" of the Sierra Madre range. The valleys are literally alive with two varieties of quail and many species of doves, the mourning dove being most common. These birds are so plentiful that it ceases to be sport to hunt with a shotgun, and the use of a dog for quail hunting would be ridiculous.

Of larger game and animals, black tail deer are

common on the plains, but rarely seen by the traveler as they are timid. The writer has seen a herd of eighteen in the hills only six miles south of Hermosillo, the capital of Sonora. In the Magdalena and Altar districts herds of prong-horned antelopes are to be found. Coyotes, rabbits, foxes and squirrels are very common around the ranches. In the hills there are plenty of white tailed deer and wild pigs, the latter, traveling in small droves. They are good game for a novice to let alone, for if a female is wounded and squeals, there is certain to be a lively time ahead for the hunter—and large trees are scarce! Mountain lions and jaguars are just scarce enough to make hunting interesting on the higher mountains within a day's ride of the capital. At the Sultana mine the writer was shown one of the largest jaguar skins that he has seen—nearly eight feet from tip to tip; the animal weighed 238 pounds. A Mexican had cunningly arranged a pistol, a wire and a bait and the animal shot himself between the eyes.

On the Cerro Carnero, sixty-five miles northwest of Hermosillo, the writer has seen big-horn sheep on two occasions. The mountain is very easy of access, the surrounding valleys are full of deer and small game, yet hunters are almost unknown. A mining friend last year took a day off in passing the mountain and brought in five big horn to Hermosillo. On my first trip through there a Mexican goat herd complained bitterly of the depredations of a "tigre" against which he had no protection. The next morning at daylight we were in hiding at a nearby water-hole where the Mexican's sagacity led him to expect the cougar, and correctly so, and one shot from a 25-35 ended the depredations and won the gratitude of the goat-herd. The hunt (or rather the ambush) had occupied one hour and a half and we were back in time for eggs and tortillas and coffee.

I have killed two animals in Mexico that I have never been able to classify. One was from the mountains of Tamaulipas, a large cat, very similar to the jaguar, but the back was marked with irregular rings of chocolate brown, some two inches in diameter with a white circle one-half of an inch in diameter as a center. The other animal was of the wolf family, the size and build of a medium sized coyote, but was of a solid dark slate blue color, darker on the back than on the stomach. He was shot on the plains of Sonora. I should like to know whether these animals were merely freaks in coloring or represent distinct species.

As all parts of Mexico over 3,000 feet in elevation have a superb climate, it makes a delightful place to camp and hunt, but the party must be prepared to operate its own commissary department in order to be happy.

Except during the hot summer Guaymas, Sonora and La Paz, Lower California, are very attractive fishing grounds and wonderful catches may be expected, but one must be prepared to make the best of poor accommodations, as there are no resorts, as we know them.

As for a camping trip in the heart of the Sierra Madres along the Chihuahua-Sonora line, up among the virgin forests of pine and oak, spending one night in the bottom of a mighty canyon, another on the brink of the great barranca, where the mountain falls off in an impassable declivity some 3,000 feet to the semi-tropic region below; and another in one of the little valleys or flats of more open ground covered with long fine grass and flowers, and always with a trout stream that would be famous if it were known to exist; where there are no roads, no trails, no barbed wire, no game laws, no "Private Property" signs; where the deer do not know the sound of a rifle; where even an occasional bear will sniff around the campfire with no idea of danger; with no human habitation within three days' ride; in just such a spot I have seen a man whom people would call "uncouth" hand his rifle to the mozo and order him to go off a considerable distance to shoot a deer that was needed—he had not the heart to shoot a buck that was grazing well within rifle shot of camp in total oblivion of the fact that four hungry men needed meat for supper.

SPOKANE NOTES.

Five hundred thousand young trout will be placed in the waters of the newly formed Graves Lake, nine miles north of Spokane, and 500,000 more will be turned loose in the Spokane River during the next thirty days, and if the fish thrive, as others before them have, there will be the finest kind of fishing in those waters in three years. The announcement of the stocking of the lake and stream was made a few days ago by L. S. Drew, who has charge of the State Fish Hatchery on the Little Spokane River, to Thomas B. Ware, president of the Spokane Rod and Gun Club, members of which will see that the fish are protected. Mr. Ware said there is no danger of the young trout making their escape or being washed over the dams, adding:

"Trout will not make their way down stream voluntarily and they will not swim into the falls to be carried down. Trout, the same as all other kinds of fish, start out for the headwaters as soon as they

are put in a stream and they always go to the small tributaries to spawn. The trout to be put in the lake and the river will begin to spawn in two years. The Spokane Fish Protection Association and the Spokane Rod and Gun Club began stocking the river with trout three years ago, and last year fishing was better than it had been for ten years before."

J. A. Uhlig, deputy Fish Commissioner, is making efforts to have all dams and obstructions in the Spokane River provided with ladders to protect the fish when the water is at low stage. He has notified the city officials, also officers of the Washington Water Power Company to comply with the requirements of the law, for the violation of which pecuniary punishment is fixed at from \$100 to \$250, in addition to which the dam may be abated as a nuisance.

Oliver Hull, a settler on Mill Creek, Wash., north of Spokane, killed one of the largest mountain lions ever seen in that part of Stevens county. He was awakened by a noise early in the morning a few days ago, and going to the door of his abode, witnessed his two dogs in a fierce fight with the animal. Taking his rifle from the pegs over the fireplace, he fired, the ball striking the lion in the foot. The animal escaped in the thicket, but returned in a short time. While his younger brother held the lamp, Hull drew a bead on the marauder, the bullet taking effect in the left cheek. The second shot struck in the shoulder and the fight was at an end. The lion was gaunt with hunger, but, even then, it weighed 120 pounds, and measured 6 feet 11 inches from its nose to the tip of the tail.

Matt Reall, living near Rainier, Wash., west of Spokane, had an exciting experience with a wildcat that measured 4 feet in length, a few days ago, but managed to slay it. Farmers there sustained losses from the depredations of predatory beasts for several weeks, and Reall, suspecting that it was a wildcat, set a trap near his home. The next morning he heard the cat snarling and growling, and running to the spot he found that the animal had caught its leg in an attempt to get at the bait. Reall had no gun, and fearing the animal would get away if he returned for his firearm, he picked up a heavy stick and made war on the fettered beast. The cat made several attempts to leap on him, but he kept out of its reach, and the trap holding it securely, he finally beat it to death.

Probably the largest coyote scalp yet taken to the Auditor's office in Spokane county for bounty was delivered by W. H. Taulman of Foot Hill. It came from an animal killed by Taulman's nine Missouri Bloodhounds after a chase lasting over twenty-four hours. The hounds, of which seven are pups, first scented the coyote and a pack of associates at noon. They kept on the scent until the following night, when the biggest animal in the pack was cornered. The coyote put up a good fight and held the hounds at bay for more than an hour before finally it was laid low. Once during the fight it appeared as if dead, but when the hounds closed in it got up on its haunches and bit three of the dogs. Taulman appeared on the scene at the last of the struggle, and when the coyote was so weak it could scarcely bite, broke out some of its teeth, so his hound pups might have an opportunity to practice on a coyote's throat without danger. Taulman is training his pack to make a business of killing coyotes.

Deputy Game Warden MacHarbaugh of northern Idaho has been relieved of his commission, and State Warden Stephens has appointed W. A. Hill of Lewiston to succeed him in the Snake River district. Harbaugh some time ago caused the arrest of R. B. Hibbs, a widely known sportsman in the Nez Perce country, on the charge of hounding deer and killing them out of season. The warden failed to prosecute Hibbs, who demanded a trial. Afterward he announced he would file charges against the deputy. Hibbs declared that Harbaugh had killed more than his share of deer, had fished contrary to the laws, sold fish, ate venison out of season and had broken the law in various other ways. A report of the charges was mailed to State Warden Stephens, who ordered Harbaugh's removal before the charges were prepared. Hill is an ardent sportsman.

Chasing deer in an automobile was the sport of a party of three sportsmen in the Yakima Valley, west of Spokane, a short time ago. A handsome big deer was seen near Ernest Fear's ranch and a hunt was started. Fear, accompanied by J. M. Perry and Arthur Van Brundt, jumped into an auto and started after the deer. As long as the animal kept to the road the hunters could follow it closely, but the deer discovered this and darted off across the sagebrush and made away faster than the autoists could follow it.

Reports from the Coulee country, west of Spokane, indicate that geese are pouring into the coulees and various lake regions of that district by the thousands, offering fine sport to lovers of the feathered game. The open season runs until May 1st. Advices also seem to promise an unusually good season for trout fishing. The large number of light snows and rains during the winter has created ideal conditions in all the little mountain streams, the natural spawning places of the speckled beauties. The season for trout will open April 1st.—A. W.

AT THE TRAPS.

The recently organized Port Townsend Rod and Gun Club launched itself formally into the blue rock game on the 7th inst. The trap germ has taken strong hold and frequent shoots are scheduled for the season.

The scores made were: B. F. Owsley shot at 20, broke 10; Dr. H. K. Mills, 30-14; Captain F. L. Buck, 25-14; George L. Ide, 25-15; O. Newsom, 25-12; A. Pearson, 25-12; F. C. Harper, 25-7; Lieut. C. A. Burt, 35-17; Captain F. B. Edwards, 30-19; W. C. Bentley, 15-1; Edward Rogers, 15-2.

James Clark and Shad La Deux, two Reno sportsmen, recently shot a 100 target race for a \$100 purse. La Deux won on a score of 69 to 60.

Before and during an intermission in the main shoot, several 25 target races were shot by some of the boys present, Larry King's 23 out of 25 was the best score.

At the Corvallis Rod and Gun Club grounds at Corvallis, Ore., a blue rock tournament took place on the 24th inst. One of the principal shoots was for a Du Pont trophy.

The officers of the Corvallis Club are: Dick Kiger, president; George Kerr, treasurer, and M. P. Burnett, secretary.

The Sonora Gun Club members participated in the initial club shoot on the 15th inst. The scores in three events were as follows:

Twenty-five targets—Thomas Carne 21, D. Dambacher 13, Harry McCandless 12, F. Ball 9, A. E. Freer 11, C. E. Scott 9.

Twenty targets—Carne 14, Dambacher 10, McCandless 13, Ball 12, A. E. Freer 12, C. E. Scott 16, F. P. Otis 17, N. Pickle 3, M. T. Carkeek 16.

Twenty targets—Dambacher 15, McCandless 18, Ball 13, Carne 16, Scott 18, Otis 13, Carkeek 18, W. Richards 8.

Regular club shoots will take place throughout the coming summer.

The Napa Gun Club was organized this week with a large membership. It will bring off a number of blue rock and live pigeon shoots and will have competitive shoots with shooters from Vallejo and other points. The grounds will be located in East Napa. The following officers were elected: President, Dr. E. Z. Hennessey; vice-president, S. L. Mayfield; secretary, C. B. Shively; treasurer, C. W. Young; captain, Charles Reams; lieutenant, William Chappell.

The Santa Rosa Blue Rock Club held its first shoot last Sunday at Luddy station. The individual silver trophy was won by C. Whitney, under the rules he will be entitled to keep it if he wins it three times in succession. The club challenge trophy was won by Ralph Slusser and he will have to defend it against all comers whenever called upon to do so.

C. Whitney, Paul Fehrman and E. W. Beatty tied for second place in the latter contest, each breaking 19 blue rocks, while Slusser broke 20. The next shoot will occur Sunday, April 5th, after which the shoots will be held every two weeks.

A recent shoot of the Folsom Gun Club was well attended and is promising for a lively blue rock season in that burg this year.

The feature event of the day was a merchandise shoot at 20 targets, the winners were:

First class—George Gerber, Philip Joerger and D. Ruhstaller, 18 each out of possible 20. Second class—M. B. Surbaugh, E. Joerger and G. B. Hoxsie, 17. Third class—L. T. Biggs and J. E. Joerger, 16. Fourth class—F. M. Derby, J. D. Wild and Gene Kipp, 15. Fifth class—O. J. Miller, C. M. Derby and John Gomes, 14. Sixth class—Wm. Dormody, O. E. Ferguson and T. H. McDerby, 13. Seventh class—R. W. Derby, Chas. Darling, C. E. Cole and Peter Donnelly, 12. Eighth class—Charles Taylor and W. L. Smith, 9. Ninth class—W. L. Whitney and W. E. Farmer, 3.

A special 25-bird match between R. Dorian and Julius Jacobs resulted in a tie, each scoring 16.

Referring to the coming Rocky Mountain Handicap at Denver in August, Manager A. E. McKenzie of the Denver Trap Club is quoted as follows:

"The annual Denver trapshoot will be bigger and better this year than ever before. Trapshooters throughout the West are more than active in preparation for this shoot and the facilities for first-class accommodations and shooting will be better than ever before, while the prizes will be decidedly larger, which is the principal inducement.

"The prize money this year will be \$1,500 added money in case of 150 shooters or less, and \$20 a head for each additional entry up to 225.

"The sum of \$10 per capita will be added for every entry over 225.

"Thus it can readily be seen that in the case of 300 shooters or over the prizes will amount to over \$3,750. This is guaranteed and will make the largest purse ever offered in the history of trapshooting in any part of the world.

"The object in adopting this plan is to place part of the responsibility on trapshooters, or in other words, to test their loyalty to the game on a broad basis, which will ultimately resolve itself into the principle of the greater the attendance the greater the prizes.

"I have talked this proposition over with the most prominent trapshooters of the Chicago, the Kansas City, Memphis, St. Joseph and Omaha gun clubs and leading shooters of Colorado. Without a single exception all have pronounced the Denver plan the broadest and fairest that has ever been incorporated in tournament provisions.

"By our previous tournaments Denver trapshooters have established the fact that whatever is promised by Denverites in trapshooting, just as in anything else, is a voluntary contract carried out to the letter.

"That the trapshooting has taken new life in the city of Denver is evidenced by the large membership and enthusiasm shown in the newly organized Denver trap club. There was some discussion over the advisability of adopting the old name, Denver Trap Club, but the advice of the older men who have had wide experience prevailed and it was decided unanimously that a better name could not be found.

"The very name Denver Trap Club stands for loyalty and a square deal."

It is the intention of the club to hold two or three State tourneys at Denver or in other parts of Colorado this year and every year. Many Denver sportsmen are only lukewarm to trapshooting, which is unquestionably one of the grandest outdoor sports extant. Trapshooters who have the welfare of the game at heart are sincerely hoping that the young men at the helm of the new organization will put forth their best efforts to build up and establish permanent club headquarters and maintain a home for the trapshooters.

An effort is being made now to complete arrangements for the building of a neat, commodious clubhouse near Denver and it has been suggested that as the State makes provision for the maintenance of a rifle range near Golden the trapshooters arrange with the commonwealth for the use of the grounds and put up a clubhouse there. Officers of the club say it is not unreasonable to assume that the club will receive recognition from State officials who have the matter of a State range in charge. The present range is on the Lakewood & Golden road, and as this is to be run by electricity in a few months it will make the proposed site a most desirable one because of its accessibility any day in the week and any hour of the day.

The Coronado Country Club tournament started on Thursday and closed yesterday. There was a large attendance of shooters present.

The first day's program called for one 15, eight 20, and two 25 target races, total entrance \$22.50, total added money \$225.

For the second day, one 15, eight 20 and a 50 target shoot for the Coronado championship cup was the card. The entrance and added moneys were the same as on the previous day, save in the cup race. This was for amateurs only, no entrance, but to be eligible for this event all contestants must have participated in all the other events. The highest score to win the trophy outright, second highest \$20, third \$15, fourth \$10, and fifth \$5.

In addition to the entrance money and added moneys the club gave six gold, silver and bronze medals as follows: High average amateur medal, gold; second high average amateur medal, silver; third high average amateur medal, bronze. For the high average professional medal, gold; second, silver; third, bronze.

J. J. Hammond, a quiet appearing young man who arrived by the S. S. Moana from the Colonies, the other day, to remain a few weeks, states the Honolulu Commercial Advertiser, is one of the world's wizards with the breech-loader and in line for the world's blue rock shooting championship. He is a Wellington (N. Z.) man and followed farming till he learned that he could earn more money with his gun. He has shot matches in New Zealand, Australia, London and Monte Carlo, and two years ago at the latter place shot into third place for the Casino prize of 40,000 francs, competing against the best marksmen of Europe.

He is going from here to Los Angeles to take part in a big shoot and will be in Monte Carlo in July to have another crack at the big Casino prize.

Hammond visited the traps of the Hawaiian Gun Club and had a little practice at the clays. He is new at this kind of shooting, however, and this, together with the fact that he has been out of practice for a long time, placed him at a disadvantage as far as good scoring went. He was impressed with the work done by the local shooters and said that they shot to a very high standard of excellence.

"It's all live bird shooting where I come from," said Hammond. "We look on the clays as pretty low sport. Blue rock (live pigeons) shooting is much more difficult. At Monte Carlo one must stop his bird at from 17 to 27½ yards from the trap or else a miss is counted. If your bird drops over the fence, no matter how dead it may be, you miss just the same. It's next to impossible to stop a blue rock under 30 feet."

"In New Zealand and other places where much shooting is done two barrels are allowed. Here one barrel is the rule. I shot two yesterday and some of the boys laughed at me. Down under the line we shoot at unknown angles from unknown traps.

"The record for clays is 400 straight birds. For live birds the best on record is, I think, ninety killed out of a hundred. A. M. Gorrick did this. The best Australian shot to-day is D. G. Mackintosh. In New Zealand the king-pin is Duncan Fraser.

"I expect to be here a month and would like a match at live birds, but I am told that that would not be allowed.

"The shooting game is good in the Colonies and there are about fifty gun clubs over there. I have been shooting professional for eight years and shot as far back as thirty-three yards. This is virtual scratch with twenty-one yards back the limit handicap. We handicap by distance and not by bird."

Hammond is an all round sporting enthusiast and talked interestingly of many other branches of sport.

He says that an attempt is being made in the Colonies to abolish live bird shooting and that the papers are pleased to refer to his favorite sport as "chicken-butcher" and "poultry-murdering."

Hammond is a total abstainer but an inveterate smoker, although he quits the weed cold a month before shooting in a competition.

A baseball game at Aala Park amused him greatly. "Why," said he, "they actually turned handsprings and they beat anything I have ever seen in barracking."

The Richmond Gun Club has been reorganized and is now practically ready for a season's target smashing. The officers elected for this year are: J. Feudner, president; W. Picton, vice-president; R. C. King, treasurer. The club membership counts up 45 shooters.

A team shoot between Sacramento and Folsom shooters is one of the features for the for the blue rock opening shoot at Sacramento to-morrow.

The first of the regular Trap Shooters' League Sunday blue-rock shoots at Ingleside took place on the 22d inst.

Holling was high gun for the day, breaking 213 out of 220. Holling made one run of 109. Prior was next up with 206 out of 220. Between these two cracks all of the trophies and the best purses were divided. Holling scored wins of the Hunter Arms; Peters Cartridge, Dupont and Ballistite trophies and the Sorenson medal. Prior scored for the Grand and Dick Reed trophies.

Varien broke 202, M. O. Feudner 201, W. J. Golcher 200, C. C. Nauman 200, A. J. Webb 199, H. McMurchy 197, Hip Justins 197, P. McRae 194, D. W. King Jr. 194, E. L. Schultz 190, Jack Feudner 186, C. A. Haight 181, E. A. Hoelle 161.

Event No. 2 was for the Grand trophy, event No. 3 Hunter Arms trophy, event No. 4 Peters Cartridge trophy, event No. 5 Dick Reed trophy, event No. 6 Du Pont trophy, event No. 7 Sorenson champion diamond medal, event No. 8 Ballistite trophy.

In the trophy races professionals were barred. Ties were decided by the scores shot in the event following. A perusal of the scores will show the results of tie shoots. The first and last two events were money events.

Event—	1	2	3	4	5	6	7	8	9	10
Targets—	20	20	20	20	25	25	25	25	20	20

WILD TURKEYS AND HUNGARIAN GROUSE.

San Bernardino county has received a consignment of 300 wild turkeys from Mexico which has just been turned loose near Redlands in the mountains and high ground north of Beaumont. They arrived in good shape and the representatives of the California Fish and Game Commission, under whose auspices the work is being done, are quite confident that the birds will be able to take care of themselves and thrive in that locality, which was chosen after a thorough canvass of the country thereabouts for a suitable location for them.

The shipment of four dozen pairs of Hungarian grouse that arrived in San Bernardino a few days ago, were first kept in captivity with the idea that it would be best to keep them so for some weeks to allow them to become acclimated and rest up after their long journey. The birds, however, did not take kindly to captivity and refused to eat, and several of them died. The remainder were taken out in the San Bernardino mountains, near the "Arrowhead," and set free. An occasional one has since been seen and it is hoped that they will survive and become accustomed to their new surroundings so that they will increase.

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 Cents.

DOINGS IN DOGDOM.

Oakland entries closed on Thursday, too late for a notice in this issue. The number received was flattering. The management of the show propose to make this exhibition a model for other clubs to follow.

A pleasing innovation of routine bench show affairs will be stereopticon views of many of the winners at the New York show. This will practically give our fanciers the opportunity of meeting the best in the country face to face. This pleasing arrangement is the suggestion of Mr. Wm. Ellery and will no doubt be vastly appreciated by visitors to the show.

Entries for Fresno will close Saturday, April 4th. Premium lists were mailed March 25th. The list of specials already comprises more than 40 cups. Others will be announced in the catalogue. During the show, it is reported, a rate from San Francisco to Fresno of one fare for the round trip and a rate of a fare and one-third from other valley points will be in vogue.

A committee consisting of President H. C. Katz, Mrs. Leota Zapp, Lusk Paddock and O. F. Lundelius are receiving encouraging support for additional donations of specials. Premium lists and entry blanks can be obtained of W. E. Chute, superintendent, at 469 McAllister street, San Francisco.

The San Francisco Kennel Club is pleased to announce formally that it has engaged Mr. Charles Lyndon of Coleman, Ontario, and Mr. P. H. Bryson of St. Louis, Mo., to judge their eleventh annual dog show.

Mr. Bryson has been an extensive breeder for 30 years, having bred a number of the greatest English Setters that ever lived. There is no name more familiar in the history of field sports in America than that of Mr. P. H. Bryson; and no man has devoted his time and means more than he in improving the English Setter. He was the first man to advocate, through the columns of Turf, Field and Farm the holding of bench shows, and was one of a few to hold one, among the first ever held in the United States, at Memphis, Tenn.

Mr. Bryson has judged at St. Louis, Chicago, Cleveland, Pittsburg, and had the honor of being invited to judge at New York, but, being on the Pacific Coast, could not accept. He was the owner of the great Ch. Gladstone, winner at many field trials and bench shows, and also the celebrated Sue, Dan Gladstone, Cincinnati, Toledo Blade, Sportsman, Gladstone Boy and many others.

Mr. Bryson will judge the following breeds at the San Francisco Kennel Club show, to be held April 22d, 23d, 24th and 25th, at the Auditorium Rink: Bloodhounds, Russian Wolfhounds, Deerhounds, Foxhounds, Pointers, all Setters and Irish Water Spaniels.

Charles Lyndon, who will judge all other breeds of dogs, is also equally well known among lovers of dogs, having judged at many of the most prominent shows, both in the East and Canada. He acted as a judge of several breeds at the Westminster Kennel Club show, held at New York, February last. Mr. Lyndon has also judged at several shows in the West, and is well and favorably known among the fancy in this State.

Mr. Lyndon and Mr. Bryson will pass jointly on the Variety, Brace, and Team classes, and also on the best dog in the show, and on the best dog in the show owned by a lady and exhibited in the ring by its owner.

The San Francisco Kennel Club opened an office on March 25th at No. 469 McAllister street, where intending exhibitors can obtain premium lists and all desired information. Entries will close Saturday, April 11th.

Mr. J. P. Norman has assumed the duties of show secretary and will act also as superintendent of the show. Mr. Norman's executive abilities are too well known and appreciated for extended encomium other than this—his connection with the show in an official capacity means much for its success in every respect.

"A Wrong Impression," as given in Field and Fancy, is of more than passing interest to Eastern fanciers and of some little use to the Coast fancy.

"The Ellerys that have been visiting East are not brothers, as stated once or twice. William Ellery, the Collie importer, is the uncle of George W., the president of the Oakland Kennel Club, etc."—American Stock Keeper.

Now, as a matter of absolute fact, according to Mr. W. Ellery, G. W., the president of the Oakland Kennel Club, is his elder brother, as is Senator Ellery of Rhode Island. Both Mr. G. W. and Mr. W. Ellery were born in Newport, R. I., and moved out West to embark in business, of which they have made a great success. The main object of their journey East was a combination of business and the pleasure of revisiting the scenes of their boyhood days, and, incidentally, taking in the dog shows. While in the East Mr. W. Ellery engaged the services of H. Allman as assistant kennelman. He was for some time with Mr. Blewitt at Cragston and later with the Farmholme Kennels. He has a first rate character for sobriety, honesty and a good general knowledge of his duties. Both the brothers Ellery have left behind them a fine reputation as gentlemen and sportsmen. Mr. W. Ellery also displayed a profound knowledge of the Collie, and it would take more than the average dog man to give him points on type. We may here say one of the best bitches he owns as a producing brood bitch—in fact, Mr. Ellery considers her to be the absolutely best brood bitch in America.

—Gladys May, bred by Dr. Thomas Daws of Hartford, Conn., was bought on the recommendation of Field and Fancy. This bitch has produced the marvelous Ch. Valverde Venus, Valverde Victor (five points toward championship), and five or six other first prize winners, and has recently reared a litter of nine by Ch. Anfield Model, and these are very promising. Mr. Ellery's idea is now to exhibit only those bred by himself, or American bred, at any rate. Mr. George W. Ellery is also an enthusiastic dog man, his breed being Cocker Spaniels.—Field and Fancy.

We might also add that Mr. W. Ellery is not a member of the Oakland Kennel Club.

The statement of our Boston contemporary is on par with other items concerning Coast affairs that have appeared from time to time and were equally unreliable. We call attention to the item referring to the Oakland show in the issue of March 21st as an illustration. Mr. John W. Ellery is the secretary of the show.

Mrs. J. P. Norman, the secretary of the Pacific Bulldog Club, has mailed copies of the following circular to many Bulldog fanciers. To those of our readers who may be interested and desire further information Mrs. Norman will be pleased to answer any communications addressed P. O. Box 283, Berkeley, Cal.:

"The Pacific Bulldog Club has been organized for the purpose of promoting public interest in and understanding of the English Bulldog, to inculcate the principles of careful breeding to the type, as laid down by the standard of the parent specialty club, and to accomplish these ends by offering at the different dog shows cups and other trophies for competition, open to members of the club.

"The annual dues have been fixed at \$5, with an initiation fee of \$5, which, however, has been suspended until the charter roll is closed. The said roll will be closed by order of the Board of Governors immediately prior to the San Francisco show. After that date, payment of the initiation fee will be required.

"The Club and some of its members have already offered a number of special prizes for competition at the Oakland and San Francisco shows, and more are expected."

Good dogs keep on coming to Honolulu, and when the Hawaiian Kennel Club holds its bench show in a few months, there will be a display of canine excellence which will astonish those who have not kept tab on recent arrivals in the dog line.

By a recent steamer the Kalihi Kennels received a fine bull-terrier bitch named Silkwood Mona. She is perhaps the best-bred animal of her class in Hawaii to-day.

Silkwood Mona is by Croydon Czar (79341) out of Silkwood Peggie (79490). Croydon Czar was sired by Woodcote Bersac out of Brassie (47483). Silkwood Peggie was sired by Woodcote Wonder (54840); her dam was Newmarket Jean (74695).

Since arriving there Silkwood Mona whelped six pups, on March 6, to Silkwood Chader Wild.

Silkwood Chader Wild is by the famous Chader Wild (E1657) and out of Charlwood Rosalie (E44687).

Silkwood Mona is pure white and was bred by John I. Sparrow of San Francisco.

"Honest" John Kelly has given up his long mountain traps taken for the purpose of exercising his dogs. He says that he found that he was getting more exercise than the dogs. He has invented an exercise cage in which the dog is placed and induced to keep a wire barrel moving by its efforts to catch a cat placed in another section of the device. Kelly will exhibit his patent at the coming bench show.

Sales and visits are booming with the well-known Nairod Kennels. Mr. Dorian reports a total in February exceeded only by December, which was his record month, but beat February only by a few dollars. "Panic times" and other times seem to all look alike to him, and his importations are on the increase. Among others, he has recently brought in from England the beautiful headed fawn bitch Nairod's Moston Milly, third limit winner at the big New York show in a class of eleven, and the mammoth fallow pied dog pup Nairod's Heywood Cerberus, by the great Carthusian Cerberus noted son Jim Cerberus out of Redvale's Duchess, litter sister to Ch. Silent Duchess. There's breeding for you! This ten months old youngster weighed 49½ pounds the day he landed, light in flesh, and is a magnificent specimen combining a double cross of Carthusian Cerberus with the following names in his immediate pedigree: Champions Prince Albert, Katerfelto (twice), Boomerang, Heywood Duchess, and Rodney Stone, besides such noted ones as Stolid Joe, Bapton Monarch (twice) and Heywood Queen. We are informed that there are one or two almost equally good and well-bred specimens on the way, including a daughter of Champion Heywood Duchess and a cracking good brindle daughter of the noted Hazlemere Prince (sire of St. Vincent and Ch. Leone Hazlewyn), out of Silver Lining, a litter sister to Silver Petal, dam of Silver Snowflake and Ch. Leone Hazlewyn. These Kennels have been devoting the past year to getting together the best blood that money can buy, and several good youngsters are reported to be in pickle for the coming summer circuit.

Drink Jackson's Napa Soda.

LIGHT TACKLE CLUBS.

Nine-thread lines and nine-ounce rods will no longer be the standard of the highest excellence in light tackle fishing in southern waters this summer when the new angling organization, the Catalina Three Six Club, and its allied Coast Club, get fairly to work. Six-ounce rods and six-thread lines are to be the rule.

The movement was started by Thomas McD. Potter of the Catalina Tuna Club, aided by Lafayette P. Streeter, another veteran enthusiast. Six charter members, six-ounce rods and six-thread lines furnish the motif. There will be no buttons, but membership cards, with space for qualification, will be used.

There will be three classes for yellowtail only, divided into eighteen pounds or more, twenty-four pounds or more and thirty pounds or more. It will be noted that the minimum weights are divisible by six, to carry out further the club name scheme.

Mr. Potter will donate a cup to the club member taking the largest fish, and the winner will also be in line for the presidency if the present plan is followed.

There were no six-ounce sea fishing rods sold in Los Angeles, and after trying in vain in the East, Mr. Potter gave Roy Shaver an order for a trial six-ounce split bamboo rod. It proved so satisfactory that Mr. Potter ordered six additional rods, which he will present to the charter members of the Three Six Club. The rods are marvels of strength, despite their lightness.

The Three Six fishermen will be in a class by themselves. The competition is confined to yellowtail, as there are plenty of button competitions for different kinds of fish. Some of the conditions in other clubs are so severe that comparatively few buttons will be worn, but in the six-ounce competition there may be sport for the greater part of the year.

"More fish, less sport," is the motto of the Three Six Club, and those familiar with the needless slaughter of game fish in past seasons will heartily applaud the aims of the new organization. The use of light tackle has greatly lessened the slaughter, and there will be more sport, rather than less, under the new conditions.

Membership in the new club may be won by taking fish of the prescribed weight, with six-ounce tackle, subject to approval.

The charter members of the Three Six Club will be Thomas McD. Potter, Lafayette P. Streeter, Professor Charles F. Holder, Gilmore Sharp, Edwin S. Brewster and Thomas S. Manning.

The club colors will be green and gold. The burgee will have a golden shamrock, in each leaf of which will be set a figure six in green, with the letters C. C. before and after the shamrock design.

President Hedderly and others of the Southern California Rod and Reel Club are working along the same lines and will organize a second Three Six Club with identical rules.

It is expected that light tackle fishing will be greatly stimulated by the new organizations.

G. Parducci, a Santa Clara fish vender, in cleaning a 30-pound sea bass at his home on Fremont and Sherman streets a few days since, was greatly surprised to find a gold locket containing the photograph of a young lady in the stomach of the large fish. He received his consignment of fish from Monterey, as usual, and the fish carrying the treasure in its stomach was part of the consignment. How long it was in the fish's stomach is a mystery. The locket may have been the property of the young lady, who might have been drowned in the waters of picturesque Monterey Bay, or it may have been a keepsake of a lover who met a watery grave, or perhaps some one lost it in the breakers by accident. It is one of those mysterious finds which turn up occasionally, but is unusual in the case of a sea bass.

The sharks of Monterey are noted for the variety of treasure they carry in their cast-iron stomachs. Some time ago a huge 8-foot shovelnose was landed by a fisherman and when opened his stomach was found to contain an assortment of articles that might have stocked a junkshop. Among other things was an old-style Waterbury watch, two steel finger rings, numerous fishhooks and sinkers and a lady's stocking.

Game Warden Welch has been doing some advertising for Santa Cruz county by writing an article that was published in the Fishing Gazette, published in London, England.

This paper is the most widely read, and is the best anglers' magazine published in the world.

Accompanying the one and a half column article is a cut of a catch of salmon from the San Lorenzo. He not only describes the streams of that county as an anglers' paradise, but gives an extended account of the fishing of Monterey bay, and tells of the many species to be found.

A good part of the article is taken up with a description of the fish hatchery at Brookdale.

The sportsmen of Ventura county have undertaken a big proposition in negotiating the purchase of 1,300 acres of land along the Hueneme coast toward Point Magu, for \$30,000. It is the plan to establish a preserve and attract the ducks by planting wild rice and celery in fresh water ponds, and preventing their being disturbed excepting under special conditions. The land will shortly become the property of the Ventura County Game Club.

It pays in dollars and cents to feed lambs grain from birth whether they are to be sold at weaning time, later in the fall or fattened in winter and sold in spring.

After weaning lambs it does not pay to feed more than one-half pound of grain per head per day until the fattening period begins in the fall or winter.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LA WRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

"SAVE-THE-HORSE" SPAVIN CURE

OF VITAL IMPORTANCE.

With the fleeting of time and the urgency of speedy success it means all in all to every owner of an unsound horse to stop expensive experimenting and turn at once to "Save-The-Horse." Humane, Positive and Permanent, and horse can be broken, trained, or worked as usual. The only treatment sold under a binding contract.

Ellyria, O., Feb. 18, 1908.

Troy Chemical Co., Binghamton, N. Y. Gentlemen: I have had elegant success with your "Save-The-Horse," only last year I killed two ringbones on a two-year-old filly that I had. When I commenced using your liniment she was quite lame and I kept on working her and started her five times and she went absolutely sound, and to-day you can't see any trace of the ringbones whatever. I also cured bad tendon with the same and cannot recommend it too highly. Yours very truly,

F. S. MILLER.

Bridgeton, N. J., Jan. 18, 1908.

Troy Chemical Co., Binghamton, N. Y. Gentlemen: Your "Save-The-Horse" Spavin Cure is the greatest remedy ever known for brockdown tendons. I had a horse break down in tendons of left fore leg in May, 1906. I used "Save-The-Horse" on it. I started racing him in September same year, winning three races out of five starts and was second in another. In October he won his race in straight heats, time 2:18 1/4, 2:19 1/2, 2:19 1/4. He then broke down in right fore leg. I used "Save-The-Horse" on that also. I started him five times in 1907, he raced every heat in from 2:17 to 2:20 and never took a lame step in either fore leg. Yours truly,

A. M. WRIGHT.

COSTS LESS

for results than all other known treatments and remedies.

"SAVE-THE-HORSE" permanently cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Windpuff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet, and also letters from bankers, business men and breeders throughout the country. At Druggists and Dealers or Express Paid.

Troy Chemical Co., Binghamton, N. Y.

JOHN MIDDLEING'S

High Grade

Sulkies

and Carts

MIDDLEING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

Several nominations wanted in Pacific Breeders' Futurity Stake No. 7 for foals of 1907. Any one whose entry has made last payment and whose mare failed to have a foal or the foal or mare is dead, can sell his nomination or substitute another colt. The amount paid for entrance will be returned to the nominator whose nomination is sold. Apply to San Francisco, Cal.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and making your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on check rein, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the United States when cash accompanies order.

THE Detroit Driving Club

FOR ITS TWENTY-FOURTH ANNUAL

BLUE RIBBON MEETING

---- July 27, 28, 29, 30, 31, 1908 ----

Announces the Following Stakes:

No. 1—2:24 Class, Trotting, Merchants' and Manufacturers' Stake.....\$10,000
No. 2—2:13 Class, Pacing, Chamber of Commerce Stake..... \$5,000
No. 3—2:11 Class, Trotting..... \$3,000
No. 4—2:07 Class, Pacing\$3,000

CONDITIONS:

Entries Close Tuesday, April 7

When Horses Must Be Named,

except that entries bearing postmark not later than noon of the day following will be accepted.

The Detroit Driving Club is a member of the Grand Circuit, the National Trotting Association and the American Trotting Association. Rules of the American Trotting Association will govern except as otherwise specified. Hopples are allowed.

The above Races will be decided by the best 3-in-5 heats, limited to a maximum of five heats—that is, all races not sooner decided will be declared finished at the end of the fifth heat according to the summary, unless there shall be a tie for first place, when the horses so tied shall race an extra heat to decide the winner.

Money will be divided 50 per cent, 25 per cent, 15 per cent and 10 per cent. Entrance is 5 per cent of purse and 5 per cent additional from winners of each division of same, payable in easy installments as follows:

	April 7.	May 5.	June 9.	July 14.
M. & M.	\$75	\$100	\$150	\$175
C. of C.	50	60	65	75
2:11 Trot and 2:07 Pace.....	30	35	40	45

Liability of nominator ceases when written notice of withdrawal is lodged with the secretary. Entrance must be paid on each horse named as per schedule above.

A HORSE NOT ENTERED APRIL 7 CANNOT START

When the entries close you know exactly what you will have to race with. There is no chance to buy a nomination for the fastest green horse that appears.

Probable Arrangement of Stakes: Tuesday, C. of C.; Wednesday, M. & M.; Thursday, 2:11 Trot; Friday, 2:07 Pace.

Other events will be announced later to complete the racing program with classes to suit campaigning stables, especially those represented in the stakes. The faster classes will be 2 in 3 events.

DETROIT DRIVING CLUB,
919, 920, 921 Majestic Building, Detroit, Mich.

President.

JNO. W. SNOWDEN, Secretary,
526 San Pedro St., Los Angeles, Cal.

DEL CORONADO 2:09³/₄CARLOKIN 2:13¹/₂COPA DE ORO 2:07¹/₄

Del Coronado 2:09³/₄

Reg. No. 45122. By McKinney 2:11¹/₄, dam Johanna Trot by Thos. Ry-Ark 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13¹/₂

Reg. No. 36458. By McKinney 2:11¹/₄, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07¹/₄

By Nutwood Wilkes 2:16³/₄, dam Atherine 2:16³/₄, by Patron 2:16³/₄ (son of Pancoast 2:21³/₄ and Beatrice, dam of Prodigal 2:16³/₄); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3¹/₂ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27¹/₂ by Dawn 2:18³/₄. Winner Pacific Breeders Futurity, 1904, \$4000.

The above horses will make Season of 1908

—AT—

LIMONERO Reg. No. 33389

3-Year-Old Race Rec. 2:15³/₄

Winner of \$5000 Stake at Lexington for 3-y-o

Sired by Piedmont 2:17¹/₂ (sire of 26 in 2:30 list); dam Lula near (great brood mare) by Electioneer 125; second dam Lula 2:15 (winner of 56 heats in better than 2:30) by Norman 25, etc., etc. Bay stallion, 16 hands, weighs 1150 lbs. Perfect trotting action. Splendid individual in every respect.

DIRECHO

Standard Bred.
Public Trial 2:15

Sired by Direct 2:05¹/₂ (sire of Directly 2:03¹/₂, Direct Hal 2:04¹/₂, Bonnie Direct 2:07¹/₂, and 9 others in 2:10 list); dam May N. by the Great McKinney 2:11¹/₄, world's champion sire of speed; second dam Belle by the great brood mare sire Echo 462, etc., etc.

Fee: \$25 for the Season, Either Horse.

Cash or approved note. Usual return privilege.

The above stallions will stand at Agricultural Park, Los Angeles

J. H. WILLAMS, For folders and further particulars address or apply to Agricultural Park, University Station, Los Angeles, Cal.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickson, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

W. B. Eddy & Co., Whitehall, N. Y.

\$7000 Guaranteed Stakes and Added Money \$7000

Fresno County Agricultural Association RACE MEETING

September 28 to October 3, 1908

No. 3—Mt. Diablo Stake, Trotting, 2:14 Class.....	900
No. 4—Pleasanton Stake, Pacing, 2:14 Class.....	900
No. 5—Berkeley Stake, Pacing, 2:08 Class.....	900
No. 6—Athenian Stake, Trotting, 2:25 Class, Three-Year-Olds....	900

Entries Close April 1, 1908

When Horses Must be Named.

The complete Programme will be announced later.

In order to keep the best horses on the Coast, there will be a free-for-all Pace and a fast Trot for tempting Purses and liberal programme for other classes.

CONDITIONS:

In No. 1 and No. 2 any horse not standing to win a portion of the purse at the end of three heats will be ruled out. Both races to be declared finished at the end of the fifth heat; \$2,000 of the money to be divided according to the summaries, as follows: \$1,000 to the first, \$500 to second, \$300 to third and \$200 to the fourth horse; \$500 reserved for a Consolation Purse, open to all horses that start and do not win any part of the purse. Two heats, every heat a race. Money division: \$125 to first, \$75 to second, \$50 to third in each heat. No money deducted from winners in the Consolation Purse.

No. 3, No. 4, No. 5 and No. 6 will be three heats, every heat a race. Money division every heat: \$165 to first, \$80 to second and \$55 to third.

ENTRANCE MONEY.

In No. 1 and No. 2 the entrance fee is four per cent, one per cent of which is due when nomination is made and the balance to be paid on the first day of the meeting. The usual five per cent of the amount of the stake will be deducted from money winners.

The entrance fee in No. 3, No. 4, No. 5 and No. 6 is five per cent, with an additional five per cent from money winners. One per cent due when nomination is made and the balance on the first day of the meeting.

In the event of No. 1 or No. 2 securing twenty or more paid up entries, the entrance fee will be three and one-half per cent instead of four per cent; if more than twenty-five entries, three per cent; if thirty or more entries, no money will be deducted from money winners. All money in excess of the purse will be divided among money winners in accordance with the announced division.

In the event of No. 3, No. 4, No. 5 and No. 6 securing thirteen or more paid up entries, the entrance fee will be four per cent instead of five per cent; if twenty or more entries, no money will be deducted from money winners. All money in excess of the purses will be divided among money winners in accordance with the announced division.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race, and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting at which the race is to take place.

Wm. ROURKE, Star Livery Stables, San Bernardino, Cal.

"SLIPPING FOALS"

Oral action, in times of some forms of distemper among your brood mares can be stopped and other mares prevented from losing colts by "SPOHN'S." It cleanses the whole body from germs of disease, tones up the action of all organs and does not "phy-sic." Give it to mares in foal or out at any time, for it is absolutely safe at all times for all horses, at all ages and under all conditions. It is well to give the cure several weeks before foaling time. Also safe for the baby colt. Give mares a glass a week, every other day and you will have no trouble with mares or foals. Put it in a bottle, 5 and 10 dozen bottles. All druggists, horse goods houses or manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Ind.

MOORMONT 44996

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12 $\frac{1}{4}$

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08 $\frac{1}{4}$ (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 3-year-old record of her day. She is the dam of four and grandam of 12 in the list. Next dam Green Mountain Maid, dam of Electioneer and of nine in the list. Iran Alto is the sire of Dr. Frasse 2:11 $\frac{1}{4}$, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

TERMS: \$30 for the Season. Usual return privilege.

Pasturage \$3 per month.

Will make the Season of 1908 in charge of

H. S. HOGBOOM, Woodland, Cal.

Red McK 43766

Son of the Great McKINNEY 8818; dam by the Great RED WILKES 1478. Dam BONNIE RED by Red Wilkes 1748 (sire of Ralph Wilkes 2:06 $\frac{1}{4}$ and 24 more in 2:15 list); next dam Bonnie Bell (dam of Rebel Medium 2:15 $\frac{1}{4}$ and 3 others in the list) by Almont 83; next dam Alice Drake (dam of 3 in the list) by Norman 25; next dam Viley by Pilot Jr. 12.

RED McK 43766 is a rich mahogany bay in color, 15.3 $\frac{1}{2}$ hands high, weighs 1150 pounds, has size, style and speed. He is a pure gaited trotter. His colts are good colors, bays and browns.

Season of 1908 at

W. R. MURPHY'S STABLES,

752 Santee St., Los Angeles, Cal.

(W. R. Murphy, Owner.)

Terms: 30 the Season. Return privilege

McKINNEY.

DIRECTOR.

NUTWOOD.

CAMPBELL'S

EMOLLIC
ODOFORM

GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

NEW WORLD'S RECORD

15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

WINCHESTER

Cartridges and Rifles Take Leading Honors

Winchester Cartridges and Rifles again demonstrated their exceptional shooting qualities at the Fourth Annual Tournament of the Indoor .22 Caliber Rifle League, held in Rochester, N. Y., January 27-February 1, making new World's records and winning in the majority of the events, as follows:

CONTINUOUS MATCH—R. Gute, First (tie), four perfect scores of 75.

BULLSEYE TARGET—R. Gute, perfect target of O, a World's Record.

SKIDDOO MATCH—R. Gute, First (tie), four perfect scores of 75.

CHAMPIONSHIP MATCH—R. Gute, tied for second place, score 2460.

RAPID FIRE MATCH—Harry Harrison, First, 81 shots in one minute, score 570. This is a World's Record. Mr. Harrison also made a new World's Rapid Fire Record, firing 101 shots in one minute.

Both Mr. Gute and Mr. Harrison used Winchester Cartridges, and the latter also used Winchester Rifles. The increasing popularity of Winchester Cartridges was evident by the fact that more participants used them than any other make. Their phenomenal showing at this important tournament proves the superior qualities of the Red W. Brand.

Race Meeting Sept. 21 to Oct. 3, 1908

COLUMBUS, OHIO

(GRAND CIRCUIT MEETING)

Entries Close Monday, April 20, 1908

All Purses will be for the Amounts Stipulated, no more, no less.

FIRST WEEK, SEPTEMBER 21 TO 26.

No. 1. \$10,000.	The Hoster Cols. Breweries Purse.	2:16 Class Trotting	3 heats.
No. 2. 5,000.	The Hotel Hartman Purse.	2:14 Class Pacing	3 heats.
No. 3. 3,000.	The Columbus Purse.	2:09 Class Trotting	3 heats.
No. 4. 3,000.	The Board of Trade Purse.	2:07 Class Pacing	3 heats.

The Kentucky Stock Farm Futurity Will Be Raced This Week.

SECOND WEEK, SEPTEMBER 28 TO OCTOBER 3.

No. 5. \$10,000.	The B. & B. Purse.	2:12 Class Trotting	3 in 5.
No. 6. 5,000.	The King Purse.	2:06 Class Pacing	3 in 5.
No. 7. 5,000.	The Buckeye Purse.	2:19 Class Trotting	3 in 5.

The Horse Review Futurity Will Be Raced This Week.

CONDITIONS.

Entries close on Monday, April 20th, at 11:45 p. m., when horses must be named. No liability for entrance money beyond the amount paid in, if the Secretary is notified in writing on or before the time the next payment falls due, but no entry will be declared out unless the amount is paid up in full to date of withdrawal.

No. 1, 2, 3, 4 Entrance Fee will be five (5) per cent of the purse, and three (3) per cent, deducted from money winners on the amount of each heat raced for.

No. 5, 6, 7, 5 per cent to enter and 3 per cent from money winners.

More than one horse may be named in a class from the same stable, but two (2) per cent of the purse additional will be charged for each horse so named.

Positions will be drawn by the drivers before the start of the first heat. In the succeeding heats horses will start as they finished in the preceding one.

We reserve the right to reject any entry or declare off.

No. 1. The Hoster Columbus Breweries Purse will be divided as follows: \$2,666.67 to the heat, \$1,500 to the first horse in each heat, \$620 to the second, \$300 to the third, and \$246.67 to the fourth horse. \$2,000 will be set aside for a Consolation Race, open only to horses that start and do not win over \$426.67 net in the Main Race, to be trotted three days from the decision of the first race. To be divided \$800 to the heat, \$250 to the first horse in each heat, \$200 to the second horse, \$150 to the third horse, and \$200 added to the winnings of the horse standing best in the summary at the end of the last heat. In the event of there being less than three horses eligible to the Consolation Race there will be paid to the second horse in each heat in the Main Race the sum of \$180. To the third horse in each heat \$100. To the fourth horse in each heat \$75. To the fifth horse \$200, and the sixth horse \$111.67. Less \$20 each time given any one of these amounts.

No. 2. The Hotel Hartman Purse will be divided as follows: \$1,333.34 to the heat; \$750 to the first horse in each heat, \$310 to the second, \$150 to the third, and \$123.34 to the fourth horse in each heat.

No. 3 and 4. The Board of Trade and Columbus Purse of \$3,000 each, will be divided as follows, \$1,000 to the heat; \$500 to the first horse in each heat, \$250 to the second horse, \$150 to the third horse, and \$100 to the fourth.

No. 1, 2, 3 and 4 will be raced on the Novelty Plan of Three (3) Heats, of one mile each, to the race, with the distance rule of the American Trotting Association applying in each heat. Should two or more horses stand alike in the summary at the conclusion of the third heat, they must race the fourth heat to decide who wins the race and to decide the betting. Should there be a dead heat between two or more horses in any heat, the money will be divided equally between them. The winner of the race will be the horse winning the largest amount of the entire purse.

No. 5, 6 and 7 will be mile heats, best 3 in 5 in harness, unless ended sooner shall end at the conclusion of the fifth heat, the horse standing best in the summary will be declared the winner of the race.

No. 5. The B. & B. The Board of Trade and Bankers Purse, \$10,000, for 2:12 trotters will be divided as follows: \$4,000 to the winner, \$2,000 to second horse, \$1,200 to the third horse, \$1,100 to the fourth horse, \$900 to the fifth horse, and \$800 to the sixth horse in the summary.

No. 6. The King Purse, \$5,000, for 2:06 pacers, and No. 7. The Buckeye Purse, \$5,000, for 2:19 trotters, will be divided as follows: \$2,000 to the winner, \$1,000 to the second horse, \$600 to the third horse, \$550 to the fourth horse, \$450 to the fifth horse, and \$400 to the sixth horse in the summary.

PAYMENTS DUE.

THE Detroit Driving Club

FOR ITS TWENTY-FOURTH ANNUAL

BLUE RIBBON MEETING

---- July 27, 28, 29, 30, 31, 1908 ----

Announces the Following Stakes:

No. 1—2:24 Class, Trotting, Merchants' and Manufacturers' Stake.....	\$10,000
No. 2—2:13 Class, Pacing, Chamber of Commerce Stake.....	\$5,000
No. 3—2:11 Class, Trotting.....	\$3,000
No. 4—2:07 Class, Pacing.....	\$3,000

CONDITIONS:**Entries Close Tuesday, April 7**

When Horses Must Be Named,

except that entries bearing postmark not later than noon of the day following will be accepted.

The Detroit Driving Club is a member of the Grand Circuit, the National Trotting Association and the American Trotting Association. Rules of the American Trotting Association will govern except as otherwise specified. Hopples are allowed.

The above Races will be decided by the best 3-in-5 heats, limited to a maximum of five heats—that is, all races not sooner decided will be declared finished at the end of the fifth heat according to the summary, unless there shall be a tie for first place, when the horses so tied shall race an extra heat to decide the winner.

Money will be divided 50 per cent, 25 per cent, 15 per cent and 10 per cent.

Entrance is 5 per cent of purse and 5 per cent additional from winners of each division of same, payable in easy installments as follows:

	April 7.	May 5.	June 9.	July 14.
M. & M.	\$75	\$100	\$150	\$175
C. of C.	50	60	65	75
2:11 Trot and 2:07 Pace.....	30	35	40	45

Liability of nominator ceases when written notice of withdrawal is lodged with the secretary. Entrance must be paid on each horse named as per schedule above.

A HORSE NOT ENTERED APRIL 7 CANNOT START

When the entries close you know exactly what you will have to race with. There is no chance to buy a nomination for the fastest green horse that appears.

Probable Arrangement of Stakes: Tuesday, C. of C.; Wednesday, M. & M.; Thursday, 2:11 Trot; Friday, 2:07 Pace.

Other events will be announced later to complete the racing program with classes to suit campaigning stables, especially those represented in the stakes. The faster classes will be 2 in 3 events.

DETROIT DRIVING CLUB,

919, 920, 921 Majestic Building, Detroit, Mich.

DURING a five weeks' vacation which the editor of The Breeder and Sportsman greatly enjoyed, and which ended on Saturday last, March 28th, the horse department of this journal was edited by Mr. William G. Layng, for many years editor and at one time owner of the paper. Mr. Layng has hundreds of friends in all parts of the country who greatly enjoyed reading the many interesting articles from his pen which appeared during his five weeks' sojourn in the editorial chair.

GO TO PLEASANTON April 15th and see the speed to be shown that day by the trotters and pacers that are to be sold at auction there on the 17th and 18th. There will be some sensational miles and the trials well worth witnessing. This sale, the first of what is to be made a regular annual event at the "horse center" will be attended by buyers from all parts of the Pacific Coast, and in all probability several Eastern horsemen will be among the bidders. Some of the grandest prospects ever offered at auction in California will be sold and no better opportunity will ever be offered buyers to secure choicely-bred trotting and pacing stallions, mares and geldings. The seven head of Bonnie Directs consigned by Griffith & McConnell are in themselves attraction enough to draw a crowd of eager buyers. These comprise all the get of this grand stallion that his owners have given any training and each and every one shows speed. Their breeding is superb. There is a four-year-old out of Ituna, the dam of the wonderfully fast trotting mare Tuna, 2:08½, whose trainers all say had two minute speed. Another is a filly out of Jenny Mac, 2:09, by McKinney, and another out of Alta Nola, 2:20, by Altamont. A

trotter out of Nettie O has worked a mile in 2:16½ and a pacer out of a Whips mare has shown a mile in 2:15½. The buyer who permits a Bonnie Direct to get by him at a low figure will regret it when they begin to race. Mr. P. W. Hodges has consigned eleven head to this sale, and there are several among them that look like future champions. The Angeles, a five-year-old brown stallion by Zombro, 2:11, out of Hazel Kinney, 2:09½, will trot in 2:10 or better by fall to a moral certainty, barring accidents. He is not only a fine individual and a good gaited fast trotter, but has shown that he has speed enough to be picked as a free-for-all candidate, and, being an inbred McKinney, is certain to be in great demand as a stock horse as soon as he gains a record. The Angeles is beyond all doubt one of the best prospects in California. The sensation of last year, Copa de Oro, 2:07½, has a half brother in this consignment that is worth buying at a good long price. He is a brown stud by Owynex, a grandly bred son of Owyhee, 2:11. Another brown stallion is Volante by Neernut, that is worth buying and entering in the races this year. The mare Manila, by Bob Mason, and in foal to Nutwood Wilkes, should produce something extra good. The youngsters by Owynex are all well bred and most promising. Mr. G. H. Farmer's consignment of five head should sell very readily, and when the pacer Billy B (trial 2:13) and the trotter Auger Baron (trial 2:15) are offered, the bidding should be particularly brisk, and both are fast enough to win races with. Mr. F. J. Kilpatrick sends three Chas. Derbys and a Nutwood Wilkes to this sale, that are everything the catalogue claims for them. Fred Helwig has sent two nice roadsters and a couple of youngsters to the sale, all in good condition and worth more than he expects to get for them. Thos. Ronan consigns four. A filly by Bonnie McK (son of McKinney and Bosilene, 2:14½) out of a mare by Jay Bird, is one of the best bred things in California, while the two-year-old by Stam B, 2:11½, out of Mountain Maiden, dam of Tom Carneal, 2:08½, Kenneth C, 2:13½, etc., is a very likely trotter. Among the real good ones consigned by various owners are the trotter R. W. P., 2:13½, by Lynwood W, that some one of the Park Amateur Driving Club should buy to win the Class A trots with at the Matinees this summer; Byron Lace, 2:14½, is a pacer and would also make a great matinee horse. He can beat his record several seconds, can be driven by anyone and is a royally bred stallion. Dr. Miller is the name of a fine large pacer by Diablo, 2:09½, that is safe for a lady to drive, yet fast enough to race. This fellow has three producing dams and can take a low record. There are many others which we cannot mention in this article for want of space, but we advise every reader of this journal to secure a catalogue from Fred H. Chase & Co., 478 Valencia Street, without further delay, and then arrange to attend this great sale. It will open at Pleasanton on April 16th, on which day over one hundred head of high-class draft stock will be sold, to be followed on the two following days with the offering of 150 head of trotters and pacers, among which are the few we have mentioned in this article. The time to buy horses is now, as every dealer in the country predicts prices will advance this fall and be much higher by next year. If you want a trotting or pacing race prospect, a good reliable roadster, a stallion or a brood mare, or a well-staked colt, be at Pleasanton when this sale begins, and if you want to see them step, be there on the 15th inst., the day before the big sale opens. It will be the greatest gathering of horsemen from all parts of the coast that has been seen for years.

THE AMATEUR RACING SEASON for 1908 will open in San Francisco on Saturday, the 11th inst., with an excellent program of events to be trotted and paced over the splendid track at the Stadium in Golden Gate Park, in which horses owned and driven by members of the Park Amateur Driving Club will be the contestants. Right here we will quote an Eastern gentleman who remarked when visiting the Stadium last week: "This is the largest, the most complete and the most beautiful athletic ground there is in the world, and I hope it is appreciated." There is no doubt but the Park Commissioners, with the aid of the money contributed by the athletic associations, the horsemen and many enterprising and generous individuals, have made for the public a delightful playground in one of the most beautiful public parks in the world. The three-quarter mile track for harness horses which surrounds this pleas-

ure park is an ideal one, and is kept in perfect order for speeding horses over. Within the oval made by this track and nearly twenty feet below its level, are a polo field, football field, baseball ground, bicycle track and a cinder path for foot racing. There is room for all these and all are used. One day last week over a hundred young amateur athletes from the schools and colleges could be seen "working out" for the various contests in which they are expecting to win victory for the institutions at which they are students. On holidays when these contests are held it is no uncommon sight to see from five to ten thousand people seated on the green lawns of the Stadium witnessing with much interest and pleasure the different sports and games, and the amateur harness horse racing is not the least of these attractions by any means. Should the weather be propitious we shall expect to see on Saturday next, the largest crowd yet seen at any of the club's gatherings, as the interest in this sport is increasing every day among San Franciscans. The Park Amateur Club has just completed a fine stable of twenty fine box stalls located on Thirty-seventh avenue, just outside the Park limits, and very convenient to the speed track. These stalls are to be rented to the club's members at \$3 per month each, and already over half of them have been applied for. A grandstand at the track is greatly needed, and the Park Commission will doubtless erect one in the near future. There is some difference of opinion as to just where this stand should be located, but as the Commissioners are all men who desire only to do the greatest good for the greatest number, the horsemen and athletes are pretty well satisfied that the new stand will be erected in the most convenient place for all, and be an ornament to the park. In this connection Mr. Frank J. Kilpatrick, who is a gentleman of wide experience and broad ideas, has suggested that in preparing plans the needs and probable demands of the future should be considered. Twenty years from now the Stadium will be the athletic grounds for a population of more than one and probably three million people, and within five years San Francisco might be the scene of the great Olympian games which the athletes of the world compete in. A grandstand that would seat 100,000 persons would not be too large for such an event, and Mr. Kilpatrick suggests that a general plan for such a stand could be drawn up, and then built in sections as needed and as the finances of the Park funds permit. One section with a seating capacity of four or five thousand could be erected, and this could be added to every few years until the entire plan was complete. Admirers of the gentleman's handsome roadster and the trotting or pacing race horse who have not yet visited the new Stadium and race track in Golden Gate Park, should aim to be there on Saturday next when the Park Amateur Club will hold its first meeting for 1908. They will then have an opportunity to see some splendid speed contests and to look over one of the most complete pleasure parks ever built for the use of all the people. The public generally are requested to attend and view the sport.

"THE RECORD BREAKER" is the title of a story by Stella F. Wynne in the April Sunset that is just about the most humorous thing ever printed, although it was not intended to be anything but serious. It pretends to recount a series of tragedies in the training of a trotting mare called Queen L, to lower Lou Dillon's record. It is impossible in the space of a paragraph to give any idea of the utterly foolish statements and situations which the author has made in trying to describe the training of a record-breaker, but from the time Queen L is worked a mile in 1:99½, with the first quarter in :50, second quarter in :49½, third quarter in :49½, and last quarter in :50½ "without breaking her gait once," until she gets a preparation for her trial by being trained on the bitumen streets of San Francisco, and is finally shot on the homestretch in her great contest with Father Time, the ridiculous situations crowd one another pretty fast. The absurdity of the entire story is enough to make a horse laugh, and the tale is entitled to a place among the season's humorous productions.

There is to be a fine speedway laid out in Laveaga Park, Santa Cruz, and when finished it will afford the owners of fast trotters and pacers a place to speed their horses without fear of running over anyone or being run over by automobiles. Laveaga Park is one of the most beautiful natural parks in California and is to be greatly improved and beautified.

NOTES AND NEWS

The annual sale of the Aptos Stock Farm horses will soon be announced.

Charley T. by Zombro trotted a nice heat in 2:13½ at Pleasanton last Saturday.

Andy McDowell will be up behind that fast pacer The Friend, 2:05¼, if the horse stays sound.

It is said that Leland Onward 2:04½ has been purchased to be used as a stud in Alberta, Canada.

Mr. Rudolph Spreckels has sent Hulda, 2:08¼, and Annie Rooney, 2:17, to be bred to Washington McKinney.

Entries have come in well for all the California purses that closed April 1st. The full lists will be ready to print next week.

Helen Norte, 2:06¼, is to be bred to Silk Weaver, 2:19½, this year. Silk Weaver is by Prodigal, and out of Brown Silk, by Baron Wilkes.

Mr. J. B. Iverson, of Salinas, recently lost his old mare Mambrita by Carr's Mambrino, sire of Sweet Marie's dam. Mambrita died while foaling.

Hulda, 2:08¼, has been sent to the court of Mr. F. J. Kilpatrick's stallion Washington McKinney. The product of this union should be something extra good.

More good news. Salinas will soon announce a meeting and will take the same relative dates as last year, coming in before Pleasanton, Oakland and Santa Rosa.

Among the stallions that made heavy seasons in California last year is Arthur W, 2:11¼, that was bred to 86 mares in Yolo County. Of these no less than 76 are certainly with foal.

The Pacific District Board of Appeals of the National Trotting Association will meet at the office of Secretary Kelley in the Pacific Building, San Francisco, on Tuesday next, April 7th.

Little Joe, a pacer by Diablo, 2:09¼, out of a mare by Wildnut, that Walter Trefry gave some work at Pleasanton two or three years ago, driving him a mile in 2:15, is now at Woodland in Charley Spencer's string and is expected to be good enough to race this year.

It is reported that the California Jockey Club recently made an offer of \$16,000 for the Vallejo race track property, which offer was refused. There is a prospect of Vallejo giving a harness race meeting this year.

It is said Andy McDowell will have the California-bred trotter Charley Belden 2:08¼ by Lynwood W. in his string this year, and if so, races in which this horse starts will have an added interest to all California horsemen.

If you want a pacer that is fast enough to win races with, either in regular or matinee racing, make a bid on Byron Lace, 2:14¼, at the Pleasanton sale and don't stop at any low figure. He is worth a good long price.

The Oroville Driving Association was organized last Tuesday. The directors are John C. Boyle, Henry Goldstein, O. A. Martin, James Wyckoff and S. B. Onyett. The association is constructing a half-mile track near the city and will equip it with stables, grandstand, etc.

The Lynwood W. gelding, R. W. P., 2:13¼, recently trotted a half in 1:02¼ with a quarter in :30¼. He doesn't require much work to keep in shape for racing and should shine as a matinee horse as he is always ready. He goes to the highest bidder at the Pleasanton sale, April 16th, 17th, and 18th.

The first foal by the great colt Aerolite (public trial 2:05¼) that has been reported is the filly which the great old mare Bertha dropped last week and which is her nineteenth foal. Aerolite was not used in the stud as a two-year-old, and was only permitted to serve a very few mares as a three-year-old.

Dr. A. C. Humelbaugh, of Los Angeles, has purchased from Chas. Saddler of the same place, the two-year-old filly Zoe, by Zombro, 2:11, dam of Leah, by Secretary, and has placed her in Fred Ward's hands to train for her stake engagements. She is entered in the Breeder's Futurity and the Stanford Stake.

Mr. McCann of Dixon, owner of the phenomenal little yearling pacer which H. S. Hogoboom created a sensation with at the May Day races there last year, is the owner of another yearling full brother that is a square trotter, and seemingly just as fast as the pacer was at that age. They are by Palo King.

Every horseman in California will be glad to see Walter Maben on the circuit again this year. There is no fairer or better driver in any country than he.

Mr. J. H. Shrewsbury, of Seattle, is the owner of a green trotter by Parole that stepped the track at Lacey, Wash., last week at a rate of speed that attracted attention from all the horsemen. The last half of the mile was in 1:07 and the last quarter in 32 seconds, which is going some for a green one in March as far north as Lacey.

One of the best looking and most promising yearlings in the State is Nuristo, an own brother to the great trotter Aristo, 2:08¼, winner of the Occident and Stanford stakes as a three-year-old. Nuristo is very highly thought of by his owner, Alex Brown, of the Woodland Stock Farm, and is certainly a very classy looking youngster.

Mr. Dan Hoffman is giving his trotter Major Cook work on the stadium track and the big gelding never looked so well since he was a colt. He is high in flesh and his coat is smooth as satin, while his speed is greater than ever. We expect to see Mr. Hoffman ride some very fast miles behind this trotter in some of the matinee races this year.

J. P. Patrey, the well-known horseshoer of Oakland, has returned from a trip East, where he was called by the illness and death of his brother. Mr. Patrey reports that times are quite dull through the Middle West, many factories working their hands only a part of the time, and that California is as lively as any place he saw in his travels.

One of the best two-year-olds so far as conformation, size and good looks are concerned that has been seen in California this year is a stud colt by Limonero 2:15 out of a mare by Zombro 2:11. The colt is owned by Mr. J. H. Williams, the veteran Los Angeles horseman who owns Limonero, and looks like a great prospect for a fast trotter.

Frank Turner, manager of the Santa Rosa Stock Farm, reports the following foals to date on the place where the world's champion trotter was foaled: Bay filly by Guy Dillon, dam Russle Russell, dam of Ruth Dillon; brown filly by California Dillon, dam Aileen Russell by L. W. Russell; bay filly by Guy Dillon dam Guycara, 2:18½, by Guy Wilkes.

There are two geldings in the Pleasanton sale that are out of La Muscovita, the dam of Yolande, 2:14¼. One is a three-year-old and the other a four-year-old and both are natural fast trotters. The three-year-old has trialed in 2:45 and the four-year-old in 2:28. Stam B, 2:11¼, sired the younger and the other's sire is Searchlight, 2:03¼. Both are excellent prospects.

Al McDonald has located at Santa Rosa race track where he will train a public stable. He has a two-year-old trotter by Crescens, 2:02¼, out of Silpan by Silver Bow, 2:16, second dam Kitty Fox by Pancoast, that looks like a very fine prospect and is well staked. This colt belongs to Geo. H. Fox, of Clements, Cal. He also has a three-year-old by Sidney Dillon, and four by Bonnie Direct, 2:05¼, and will have several more soon.

The many friends of Mr. A. B. Rodman, of Woodland, sincerely sympathize with him in the loss of his honored and aged mother who died at Berkeley March 24th, in her eighty-fifth year. Mrs. Rodman was the widow of the late Gen. Thos. J. Rodman, of the United States Army, the inventor of the famous Rodman gun, the principal piece of ordnance used by the army during the late civil war.

Willows, Glenn County, which was once a popular training ground with horsemen residing in that section of the State, is to again have a racetrack. Several enterprising citizens of the town are building a track in the western addition to Willows, and expect to have it finished by next week. There will be about twenty horses trained there.

We have seen no announcement as yet of the annual May Day races at the Dixon half mile track. We hope they will be held as usual, and that two or three events will be advertised for horses owned outside Solano and Yolo counties. These early races at half-mile heats are popular, do not injure the horses in training for the circuit events, and do not penalize the winners with records.

The proposition to form a circuit of driving clubs, comprising organizations at Sacramento, Woodland, Marysville, Willows, and Chico is an excellent one and should be carried to a finish. We know of nothing that would attract larger crowds or arouse more interest than inter-city contests between the trotters and pacers owned by members of the Sacramento Valley clubs.

There is an effort being made in Woodland toward the organization of a driving club. It is thought fifty members can be secured and as many own fine road horses, some excellent matinee racing could be held. Woodland track is the fastest in the State, according to the records of California horses, Sir John S. having set the mark there at 2:04¼, a quarter of a second faster than the famous Santa Rosa track.

Wm. Hashagen, of Woodland, has had his McKinney trotter Kinney Rose sent home to him from Pleasanton, that the horse may be bred to a number of mares. After a limited season Kinney Rose will probably be returned to Chas. DeRyder at Pleasanton and be shipped East in the DeRyder string. Kinney Rose is in the very pink of condition and can trot faster than he did last year when he was timed in 2:12¼ in a race.

It is reported that Lou Mativia, of Dixon, will enter his black stallion Alton liberally on the circuit this year. Alton is by Altamont and has no record, but on the first day of last May paced a half in 1:05 on the Dixon half-mile track, driven by H. S. Hogoboom. Mativia has driven Alton a mile a shade better than 2:10 on the same track, and Alton has already paced an eighth in 15 seconds this year and is making a season in the stud.

Joseph F. McGuire has purchased from George H. Estabrook the pacing stallion Tommy Grattan, 2:12¼, for \$3,000. Mr. McGuire had driven Grattan in all his races up to the time he parted from Mr. Estabrook last summer and since the opening of the training season the driver has been trying to buy the pacer. He intends campaigning through Michigan, Wisconsin and up into Canada and is confident that he can win many of the good stakes offered.

Mr. C. A. Harrison brought his mare Niquee by Joe Patchen, down from Seattle this week by steamer and reports that he had a fine trip down. He shipped her to Pleasanton on Tuesday and she will enter the stables of P. W. Hodges, who will train her for the Pacific Coast Circuit of 1908. Niquee is a beauty and a great pacing prospect, and is owned by one of the most genial and squarest business men that ever loved a harness horse.

California trotting blood gets to the front in all sections. The first foal at the Beau Ideal Farm, Cleveland, is a bay colt by The Beau Ideal 2:15½, a very sprightly youngster out of Sweet Perfume by Nutwood Wilkes 2:16½, sire of John A. McKerron 2:04½ and others, second dam Sweetwater, dam of two, two-year-old record of 2:26, by Stamboul 2:07½, third dam Manzanita 2:16, a great brood mare by Electioneer, fourth dam Mayflower 2:30½, great brood mare by St. Clair.

In Will G. Durfee's string at Los Angeles, is a very handsome large two-year-old trotting filly that all the horsemen in that section are agreed upon as one of the very best trotters of her age ever seen on any track. She is owned by Mr. R. C. McCormack, of Seattle, and is by Del Coronado, 2:09¼, out of a mare by James Madison, second dam by A. W. Richmond. After one look over the colts and fillies by Del Coronado, there can be no question in one's mind but that the son of McKinney is a wonderful sire.

H. S. Hogoboom has traded to M. C. Keefer and Chas. Spencer, of Woodland, for \$200 and an Iran Alto colt, the very handsome black stallion trotter Monicrat, and Spencer will prepare the horse for the circuit races. Monicrat won a matinee race in 2:14¼ on one of the Southern California tracks two years ago, and Hogoboom got him in a deal last season. It will not surprise anyone if Spencer has the fellow trotting miles around 2:12 before the races start. Monicrat is certainly one of the handsomest horses of his size there is in California.

In the Breeder and Sportsman of March 21st the horse Tonopah that trotted a mile in 2:20 over the Red Bluff track recently after very little work, was given as by Sir John S., 2:04¼, when it should have read that he is out of the dam of Sir John S. Tonopah is by Billups, 2:20½, and is said to be the living image of his sire. Tonopah is said to have 2:10 speed. Phillip Byrne, who is the lessee of the stallion Billups, predicted several months ago that Tonopah would get a mark of 2:20 or better this year, and it looks now as if the four-year-old would beat this time away off.

Lou Crellin, owner of the great brood mare Bertha, was greatly pleased on Wednesday of last week when the old matron presented him with a splendid large filly by James Marshall's great young pacer Aerolite. Mr. Crellin says this filly is the largest, strongest foal Bertha has ever had, and within an hour after it saw daylight was up and taking its first meal. This filly will be christened to-morrow at a bull's head feast to be given by Mr. Crellin at his home, Ruby Hill Vineyard, to which event a number of his friends have been invited. Bertha has been bred back to Aerolite this year.

A square going and beautifully gaited trotter at the Los Angeles track is Crescendo, an own brother to the sensational pacer Copa de Oro, 2:07¼, and also owned by Mrs. Bonfilio of that city. Crescendo is two years old and bids fair to be as much a credit to his breeding as is his full brother. Copa de Oro is big and strong, his feet, which bothered him some last season, are now in fine shape and he gives every promise of being able to lower his record materially during the coming season. He is one of the pleasantest drivers any person ever pulled a rein over, and his manners are perfect all the time, whether in his work, on the road or when racing.

GOOD SHOWING FOR OAKLAND.

The six greatest stakes for the circuit meeting to be held in August at the Oakland track have all filled. At four o'clock on Thursday, the 2:20 trot for a purse of \$2,500 had secured 26 entries, while the \$2,500 2:20 purse had 19 nominations. The 2:25 trot for three-year-olds had ten entries, the 2:14 pace nine and the 2:14 trot ten. Many additional entries were expected from southern and northern points, so it looks as if the opening meeting of the California Circuit should be a record breaker. Mr. Benjamin is confident that both the 2:20 trot and 2:20 pace will secure at least half a dozen more nominations.

W. J. Kenney, the busiest man on the Pacific Coast, bar none, has sold a half dozen speed carts this week, which is evidence that the matinee season will soon open. Henry Imhoff bought one for the trotter he purchased from Mr. Siljan, Shorty Roberts took one for his great old pacer Edenvale, E. P. Ayers took another for his Clay S. horse, Thomas Brown got one for Victor Platte; Charley Morgan, who will train at Vallejo, purchased one for Mr. Lopez's fine Kinney Lou colt, and Mr. A. E. Talbory came all the way from Reno, Nevada, to pick out a nice one to work a fast horse to. Kenney sells his carts right and they ride right after they are delivered.

Mose Hart has just commenced training for a San Francisco business man a trotting mare bred at Mr. Spreckels' Aptos Farm, that looks like a coming 2:10 performer. She is called Princess Christine and is by Dexter Prince out of a mare by Chris Smith, second dam by Speculation and third dam by Lodi, thoroughbred. She was sold at Chase's sale of Aptos Farm horses December, 1906, and at the time was in foal to Cupid. Since weaning her foal she has been used in a buggy and passed through different hands until reaching her present owner who found she was fast and turned her over to Hart. Last Sunday Hart drove her the three-quarters on the park speedway in 1:40 with the last half mile in 1:05½ and when he took her to the shed the crowd gathered and wanted to know all about her. As this was the third time he had been up behind her, Mose didn't have much to tell, but says he thinks she will do to work on.

We have a letter from Samuel Gamble under date of March 24th, in which he calls attention to what he terms an error made in the statement of Thos. Bonner in our issue of March 7th, wherein Mr. Bonner gives the breeding of Union, the sire of Nora Marshall, dam of Alfred S., 2:16½. Mr. Gamble states that he well knew the mare Nora Marshall, that he drove her off and on for two seasons, that she was imported to California in the last part of 1874 by the late Geo. Congdon, and was claimed to be by American Star. We think Mr. Gamble is the one who is in error in this matter. Alfred S., 2:16½, is registered in Vol. X of the American Trotting Register as follows: "Alfred S., bay gelding foaled 1873 by Elmo 891, dam Nora Marshall by Union, bred by James Flood, Menlo Park, Cal." If Alfred S. was foaled in 1873 he certainly could not have been out of a mare that did not reach California until 1874. Mr. Gamble probably has confounded the mare Nora Marshall with another of the same or a similar name.

Mr. Fred Shaft, of Spokane, Washington, reached Pleasanton last week with his great pacer Sherlock Holmes, 2:06½, by Zolock, and the horse is now in Henry Helman's string to be made ready for the racing season of 1908 on the Pacific Coast circuit. The editor of the Breeder and Sportsman looked the detective horse over last Friday and is prepared to state that he has never seen a more powerful or better formed pacer than this son of Zolock. Sherlock Holmes has a most beautiful coat, a very dark chestnut, and in form much resembles his sire, but is larger and heavier. He has a grand head, and looks like a champion. From the stories we have heard of his races up north, where he broke the track records at Salem, North Yakima, Lewiston and Walla Walla last season, he is a horse good enough for any kind of company, and when he meets Sir John S., 2:04½, Inferlotta, 2:04½, Bonnie Steinway, 2:06½, and others in the 2:05 pace this summer, there will be something doing in record smashing for the Pacific Coast. Mr. Shaft got into conversation with Chas. De Ryder the day after he arrived at Pleasanton, and much to the surprise of both it came out that they met on a track at Aberdeen, South Dakota, twenty-five or more years ago, and had the hottest kind of a split heat race between their trotters, Brittle Silver, 2:25½, and French Girl, 2:28. Mr. De Ryder finally winning with the gelding. Both gentlemen were a few years younger then than they are now, but they did not enthuse or enjoy the race any more than they did the recalling of its many incidents while seated on chairs at the De Ryder stalls last week. The climax came when Mr. Shaft jumped to his feet suddenly and slapping De Ryder on the back, exclaimed, "Say, you're the fellow that drove Brittle Silver. I knew I would never forget that face."

Mr. E. R. Duna worked his Lecco three-year-old alongside Mr. Kilpatrick's McKinney Belle at Pleasanton last Tuesday, and they finished head and head in 2:27. Mr. Dunn went a long mile as he had the outside. He afterwards worked his three-year-old Searchlight pacer a mile in 2:18 very handily.

Mr. F. J. Kilpatrick has purchased a couple more Washington McKinneys: One is a three-year-old out of a mare by Daly, 2:15, second dam by Ansel, the other a fine sixteen hand trotter called Ray McKinney out of a mare by Digitalis, 2:25½. Both are good gaited trotters and will be given a chance to show their speed.

A two-year-old by Diablo 2:09¼ out of Edna R. 2:11¼ by Sidney, second dam by Director, is the sensational pacer of the Fresno track and Schuyler Walton is of the opinion that the youngster could lower the record for two-year-old pacers held so long by Directly, who turned the Galesburg track in September, 1894, in 2:07¾. A quarter in 30 seconds has already been shown by the Fresno colt.

Down at Los Angeles on Tuesday of last week L. E. Shaw and James Stewart drove a great mile with their two-year-old pacers. Mr. Shaw's colt was just a few inches in front of the Stewart two-year-old and the mile was in 2:18, the fastest we have heard of this year by foals of 1906. Mr. Stewart's colt is by Diablo out of an Athadon mare and is entered in the Breeders' Futurity. The Shaw colt is by Adjutant but is not in this stake.

Directors of the New England Trotting Horse Breeders' Association have announced a \$50,000 handicap stake, open to all trotters. This is the largest stake for harness horses in the world. The slowest horse will go a distance of one mile and a quarter and be allowed 50 feet start by faster horses for each second difference in speed. No horse is to be handicapped slower than up to a mile in 2:15. Handicaps will be announced August 18th.

Mr. Kilpatrick went to Pleasanton last Tuesday and drove five Washington McKinneys better than a 2:20 gait, and all are trotters. Lady McKinney worked a full mile in 2:16, McKinney Belle one in 2:27 with the last quarter in 35 seconds, Fabia McKinney a mile in 2:33, last half in 1:12 and last quarter in 35 seconds, Ray McKinney, a perfectly green horse, a quarter in 35 seconds, and Belle of Washington a mile in 2:39, last half in 1:13 and last quarter in 35 seconds. He then worked his mare Princess W. 2:29¼ by George Washington, three heats hitched to a cart in 2:27, 2:24 and 2:18, after which his trainer, Dick Ables, hooked her to a sulky and drove her a fourth heat in 2:13¾, the first half in 1:05½ and the last half in 1:08¾. This was a remarkable mile from the fact that the first half was so fast.

The Salinas track is not a slow place by any means at the present time, although every trainer there is praying for rain. Charles Whitehead, the man with the futurity winning habit, has fifteen head in his stalls. He has been a mile with Della Derby in 2:22¾ and a quarter in 33 seconds, a mile with Ray O'Light in 2:22½, one with North Star in 2:31½, one with Elaine in 2:27¼, and one with Salva in 2:26¾—all fast enough for this time of the year. W. H. Williams has thirteen head and will take up another soon to remove the thirteen hoodoo. His best miles up to last week were as follows: Sidonis 2:30, Wild Girl 2:18¾, Rome 2:29½, Blondie 2:36¼, Dewey 2:28¾, and Torpedo 2:30. He has ridden quarters better than 32 seconds with a couple of them, however. W. H. Combs is also at Salinas with his horses and worked the four-year-old pacer Albert Direda a mile in 2:24 this week with the final quarter in 32 seconds. "Jack" Fronefield, to whom we are indebted for the above news, says everything looks neat and in order at the track and they are getting ready down there to announce a good program of harness races for late in July or early in August.

The absence of sensational green horses this spring makes the rich Detroit stakes look like easy money. The usual number of green trotters that beat 2:10 the year before is lacking and the classic M. & M. seems at this time an easy race. It is furthermore the only chance of the year for slow record horses to race for \$10,000 or anywhere the size of that amount in their own class. Changing the \$5,000 Chamber of Commerce Stakes to a 2:13 pace spoiled the cinch of the pacers that had beaten 2:05 without technical records and makes this classic stake the greatest race of the year for medium record pacers and fast green ones as well. The 2:11 trot and 2:07 pace for \$3,000 each are two new stakes intended to determine whether horsemen will support faster classes for such rich purses the last week in July. These four stakes are on the three in five plan, limited to five heats and the dates are July 27-31, a week later than last year, affording more time for trainers to get ready. First payments have been made very low—one per cent or less—and entries close Tuesday, April 7th, with Albert H. Moone, secretary, 919-921 Majestic Building, Detroit, Mich.

To-day, at the Denver stock yards, Judge Colburn, who has long been identified with the breeding and racing of trotters, will sell at auction every horse, 35 in number, remaining in his stables. Among them are such horses as Judge C. Jr., Silver Magnet, Magdaline, Baby Wilkes, I-Rex Colorado, granddaughter of Judge Toler whose sire was Ashland Wilkes; Royal C., a grandson of Judge Toler, and High Bail, the fast pacer, matinee 2:12½, one-half mile track.

Mr. D. B. Stewart of Spokane, Wash., who spent two or three months in Southern California this winter, purchased while there a very fine looking two-year-old colt by Hal B. 2:04½, dam a mare by

Silkwood 2:07. Although pacing bred the colt is a square gaited trotter and shows speed enough at that gait to make him an excellent prospect. Mr. Stewart is greatly pleased with his purchase and could not be induced to part with the handsome black fellow for twice the amount paid for him.

ANSWERS TO CORRESPONDENTS.

J. F., CITY—Nanbuc 504, full brother to Thos. Jefferson 2:23, was by Toronto Chief 85 (son of Royal George 9), and was out of Gipsey Queen, said to be by a son of Black Hawk 5.

H. G. PATTERSON, FRESNO—Ada H. would be considered a very well-bred mare in any country. Her sire, Dictatus 2:17, is one of the best bred sons of Red Wilkes, and has sired two 2:10 performers. Her dam is by Eugeneer 2:28½, son of the great Electioneer. Eugeneer has sired several with fast records, and was out of the great brood mare Lady Ellen by Carr's Mambrino, sire of the dam of Sweet Marie 2:02, and others. The second dam of your mare is also by Carr's Mambrino, which gives her two crosses to that good son of Mambrino Patchen. As she also has two crosses to Williamson's Belmont through Lady Ellen, she has one of the most highly prized combinations of blood in her veins, viz.: Wilkse, Electioneer and thoroughbred.

SUBSCRIBER—The breeding of Direct Steinway is given by his breeder, Mr. L. M. Lassell of Martinez, as follows: Sire Direct Flis, he by Direct 2:05½, he by Director 2:17. First dam Belle Caprice by Steinway, second dam Bonnie Caprice by Ethan Allen Jr., third dam Belle Brown by Hambletonian 725, fourth dam Mary Fish by Gen. Taylor, fifth dam a daughter of Belmont. Mr. Lassell adds that Belle Caprice was never trained but was led behind a 2:22 pacer and he could not tighten the rope although she trotted all the way. Every one of her colts were fast, but only the pacer Pilot was trained to amount to anything.

DR. HULLINGER, FRESNO—Waterford (thoroughbred was a bay horse by Stratford out of Water Lily by King Alfonso). He was foaled in Pennsylvania in 1886, and died in 1890. This is all the information about him, except that he was bred by A. J. Cassatt, Chesterbrook Stud, Pa. Bayswater was a son of Lexington, and his dam was Bay Leaf by imported Yorkshire. He was full brother to Preakness, Bayonet and others. We have not the data to give any record of his get. His daughter Fanny Bayswater produced Senator L. 2:23½ and Baywater Wilkes 2:25½.

ENQUIRER—Deviletta 2:10½ is by Diablo 2:09¼, and is owned by W. S. Harkey of Gridley, Cal. Her dam is Clara H. by Hark (son of Brigadier out of Miss Wall by Echo, second dam by Langford thoroughbred). Deviletta's grandam was Miss Mooney by Brigadier 2:21¼, third dam Flaxey by Elmo 2:27, fourth dam Grecian Bend by Signal, fifth dam Liza Findley by Charlie, an old-time pacer, sixth dam Lize Wood a running mare. Deviletta has been bred to Aerolite son of Searchlight, this year.

HORSE NEWS FROM HANFORD.

HANFORD, March 30, 1908.

Breeder and Sportsman: Foaling time is at hand and some of the Kings County mares are already delighting their owners with their produce.

Mr. Alex Anderson, senior proprietor of the Seventh Street Stables, was made happy on March 28th by the good mare Lady Arnett by Sidney Arnett (sire of Joe Wheeler 2:07½) presenting him with a colt by Expressive Mac 41,523, son of McKinney. This young candidate for futurity honors is a large, fine, classy looking lad, in fact an equine beauty that should be in the money when raced in any company.

Mr. E. Gravat's standard and registered mare, Brownstone May, foaled a filly March 12th to the giant trotter Billups 2:20¾, No. 31656, the new arrival being the first of Billups' produce in the fair southland. She is an upheaved little girl, very much like her sire, and suits Mr. G. so well that he has bred Brownstone May back again, desiring a pair from Boydell's son.

M. G. Liggett is putting the race track in shape and also is working three pacing mares that ought to win him some money in 1908, as they can step a merry clip when Moody lets go their heads.

The veteran trainer, S. A. Eddy, is exercising and shaping up the fast pacer Hanford Jim, owned by Tomer Bros.

I. M. Lipson has his Zolock stallion Woodlock looking fine, and is driving a couple of yearlings by his horse that give promise of future speed and usefulness either on the road or on the track.

Philip C. Byrne has Billups and Mountaineer by McNeer, he by McKinney 2:11¼, dam by Venture 2:27, and the promising filly Honiton by Robert Direct, dam Brownstone May. This filly has trotted a 2:24 clip in her three-year-old form, and should with training, easily take in standard record.

Dutch 2:31¼ by Athby 2:22½ was sold to Trainer Snyder of Fresno, out of Byrnes' string the other day at a fair figure. Dutch showed Byrne 2:10 speed.

One of the handsomest mares ever seen in this State is now at Los Angeles being bred to Zombro, 2:11. She is by Bingen, 2:06¾, dam by Axtell, 2:12. As Zombro is noted as a sire of handsome horses, the result from a mating with this beautiful mare should be a prize winner.

GOOD HALF-MILE TRACK AT SUISUN.

The old half-mile race track in the Peyton field, near Suisun, is being put in fine condition by W. B. Connelly who has secured a five-years' leave on the property.

Last fall Mr. Connelly built ten fine large box stalls and also did enough work on the track so that it could be used during the winter months. Mannie Reams, who has charge of the place, has used it for winter quarters for a string of fine horses which he has had there since the completion of the stalls.

About two weeks ago Mr. Connelly put his teams at work grading up the turns and leveling off the low places on the track. He has placed a thin coating of sediment soil over the entire course and raised the turns at each end three feet on the outside. The track is therefore in fine condition for training and racing.

When the work which is now being done is finished Mr. Connelly will build ten more box stalls and will also build a high board fence on the north side of the track. Along the west and south side two rows of gum trees twenty feet apart will be set out. To make the place easy of access from Suisun, a board walk will be constructed from Union Avenue, crossing the railroad along Illinois Street to the grounds. The track is just outside of the corporate limits of Fairfield and is therefore very convenient for the people of that city.

At the present time Mannie Reams has nine head of young horses in training, most of them being Demonios, two and three-year-olds. Upon the completion of the new stalls several more horses will be added to his list. Henry Smith of Cordelia has expressed his intention of bringing six promising colts belonging to himself and Joseph B. Nightingale to the track and also establishing quarters there. Other owners in this neighborhood will keep their horses in their private stables but will work them on the track, and it is believed quite a number of horses from other points in the county will be brought here for training.

Mr. Connelly deserves great credit for his enterprise in building and establishing the race track, which will be not only a source of profit to the owners of horses in this section but will afford much pleasure to those who enjoy driving their own horses.—Suisun Republican.

GOT THE BEST RESULTS.

The following letter from G. S. Ellis & Co., importers and manufacturers of fine harness, saddles, etc., 430 Main Street, Cincinnati, Ohio, who have been advertising the Ellis Improved Hutton Patent Crecking Device in the Breeder and Sportsman since February 22d, is self-explanatory:

Cincinnati, Ohio, March 26, 1908.

The Breeder and Sportsman, San Francisco, Cal.

Gentlemen:—We have been advertising in horse papers for many years, but have never received as good results from any two issues of any horse paper we have advertised in as we received from our ad in your papers of February 22d and March 14th.

When we were considering taking space in your paper, you wrote us that if we had an article of merit to be used on the driving horse, that you were satisfied an ad in your paper would bring us good results. We were under the impression, as you are quite a distance from us, that we would not get as good results as from an advertisement in one of the Eastern papers. We will say, that we are more than pleased with the results, and if the returns continue as they have commenced, we will not only be a regular advertiser with you but will also use considerable more space.

Wishing you success, we remain,

Yours truly,

G. S. ELLIS & SON.

LAST CALL FOR STAKES AT BLUE RIBBON MEETING.

Entries for the Grand Circuit opening at Detroit July 27th-31st, close next Tuesday, April 7th, and horses left out after that date are out forever. There is no substitution.

The program contains four stakes headed by the two classics, the M. & M. 2:24 Trot for \$10,000 and the C. of C. 2:13 Pace for \$5,000. Newer but no less important are the 2:11 Trot and 2:07 Pace for \$3,000 each. The stakes are on the three in five plan, limited to five heats, which has proved so popular with horsemen. Absence of green horses with fast public trials will make the two big stakes much easier races than usual and will afford show record horses the only chance of the year to race for so much money without going out of their class.

The 2:11 Trot and 2:07 Pace should be popular classes and the entry in each will determine whether horsemen want big money for faster classes than have been given before in the Detroit early closing list.

As these classes will not be duplicated in later purses, horses that fit should be entered before April 7th, because there is no substitution and no chance to buy nominations for horses developing their speed later in the spring.

Early payments have been made very light—one per cent or less—to make it worth while to take a chance, and Tuesday, April 7th, is the last chance. Mail entries to Albert H. Moore, Secretary, 919-921 M. Jestic Building, Detroit, Mich.

WILL BOOST AMATEUR RACING.

The Sacramento Driving Club, at its meeting in the parlors of the Capitol Hotel last week, resolved to take a fresh start and arrange for a number of amateur racing events in Sacramento during the season. It also decided to communicate with cities in superior California for the purpose of entering Sacramento horses in amateur racing meets in those cities and of offering reciprocal favors when the races are held here. Isaac Christie was elected president of the club to succeed Albert Elkus, and Dr. Weldon, secretary, to succeed F. H. Metz.

The members of the club present at the meeting were: Dr. A. M. McCollum, Dr. E. J. Weldon, William Sears, F. H. Metz, Robert Christie, Frank Wright, Charles E. Paine, J. Wheeler, Dan Flint, Charles Silva, John Silva, Isaac Christie, and Ray Dittus. The club is anxious to enlarge itself, and several applications for membership were presented. The initiation fee is \$3 and the dues \$1.50 per quarter.

The club is going to arrange a driving exhibition for May 30th, unless that date is decided upon by the Chico Driving Club. In that event, a number of Sacramento horse owners are anxious to make entries in the Chico exhibition. The secretary was instructed to communicate with the driving clubs of Auburn, Chico, Oroville, Marysville, and Woodland. They will be requested to enter a horse in each event at the exhibitions of the local club, and the local club will ask for the extension of the same privilege. The club wants to give a series of exhibitions during the coming season. It was decided to give at least one exhibition for the benefit of some charitable institution. The date for the benefit meet will probably be the 4th of July.

The club held races last year in behalf of the Protestant Orphan Asylum, as it was then known, and such an exhibition is to be made an annual feature.—Bee.

PROGRESS AT THE CHICO TRACK.

The Chico Driving Association is progressing with its work of getting the new track there in fine shape for racing. At a meeting of the board of directors held last week plans were submitted for a large grand stand to be erected immediately. It is proposed to provide this with comfortable seats having "lazy backs," so that all may view the racing and other exhibitions in comfort. An excellent program of racing and a horse show is being arranged for the third of July, as a sort of curtain raiser to the big Fourth of July Celebration which Chico will hold this year. A twenty-mile relay race, during which horses will be changed every mile, is to be one of the main features of the race program, and will start at 10 a. m. on the 3d. At 11 o'clock an exhibition of Butte County horses will be held and at 2 p. m. the regular race program will open. Several good trotting races will be held and some excellent contests are expected. Chico may be in line with a big fair and race meeting this fall.

VALUABLE HORSE POISONED.

The pacer Mephisto, 2:17, by Diablo, owned by A. O. Gott, of Alameda, died Sunday night from rat poison which was placed in his oats in some unaccountable way. On Thursday, when the owner looked into the feed box, he found a part of the oats untouched. He also found the broken pieces of a box or rough on rats, and particles of the poison had sifted through the grain to the bottom of the feed box. Mr. Gott is completely at a loss to understand how the poison got into the grain barrel or feed box, unless it was accidentally sewed up in the sack of oats.

Since the above was in type we have received the following letter from Mr. Gott:

Alameda, Cal., March 31, 1908.

Breeder and Sportsman, San Francisco.

Gentlemen:—You will see by the inclosed clipping that my favorite horse, Mephisto, is no more. To me it is almost incredible that any one would deliberately put a box of Rough on Rats in my horse's manger and it was either this or the box was in the sack of oats when they came from the dealer. Putting the same kind of a box in the barrel of oats, covering it with oats, and try as I may I cannot dish it up without seeing it in the measure. If this was the method of carrying it to the horse why didn't I see it? On the other hand would anybody leave box and all if they were trying to poison the horse? To me it is a mystery. What has happened to my horse might happen to the most valuable horse in the country. He was in perfect condition, never better in his life, and his record of 2:17 was no indication of his speed. I feel sure that 2:10 or better was within his reach, and a more willing, ever ready, faithful horse it was never my lot to know. During his last distressing hours his intelligence and demonstration of affection for me showed me very plainly that no price that I could have sold him for would ever have induced me to part with him and I doubt very much if I ever own another that will please me as well.

Yours truly,

A. O. GOTT.

The pacing mare Citation 2:03½ will be raced again this season by Dick McMahan.

AUSTRIA.

An American trainer now in Austria sends some news to the New York Telegraph from Vienna under date of March 9th. He writes:

"The formal opening of the trotting season only a week away, March 15th being the opening day, the local track presents a scene of activity never before witnessed in European trotting centers. In spite of the fact that the Vienna Association added sixty stalls to the stabling accommodations, stable room is at a great premium. Naturally all interest of the year's harness turf centers on the newly imported American trotters, the first of that contingent to be shown at the track to-day being Siliko, 2:11½. The little son of Moko was greatly admired by local horsemen, who are unanimous in their opinion that he is an ideal trotter in every respect. Icon, 2:10, another noted member of the Pennock string, is high in flesh, due to her let-up in the United States after her long illness. She is, however, getting steady work and will be in shape to race in form before long. Other high-class race prospects in the Pennock stable, owned by Louis Winans, are Alton, 2:09½, and Virginia Jay, all in fine shape, and all headed for the International purses. Dora, the inland bred trotter, which won the Austrian Derby, is also in splendid shape, while Pennock has headed Willy, the four-year-old, to this year's blue ribbon event. All told the former Cleveland trainer has eleven horses, every one of which are in splendid condition and ready for the world.

"Codero, 2:09½, arrived here in a sore condition and can not face the starter before the summer meeting. The black mare Lotta, 2:08½, which was raced last year by McHenry, in the string of Lotta Crabtree, is doing steady work and will be one of the early starters among the new contingent. Local trotting horse experts are not as well impressed by this mare as they are by Icon, as they are inclined to believe that Lotta is not properly gaited for the continental method of racing. This prejudice is perhaps partly due to the fact that there has been a dispute as to her correct age and her short breeding. Some claim that the breeding of her dam is not known, while her second dam is said to have been a shetland pony. Hemp Hurd, a fine looking green trotter by Wiggins, dam Toilet by Idol, is among those which are ready for the opening day, and he is surely looked upon as one of the finest trotters in the green lot. He was purchased by Trainer John Armstrong for Walter Winans from M. T. Boswell, Paris, Ky., and horsemen consider him a coming champion. St. Valient Vincent, 2:11½, which Ed Geers raced last year in the stable of the Memphis horseman, Frank G. Jones, is another new arrival primed for the first starts, and is well thought of as a prospective winner.

"Metallic, 2:11, is another early starter, as he appears to be in fine shape after having served a limited number of mares of his owner, W. Kohner. Glenwood M., 2:07½, will soon be hitched to a training cart, and be prepared for the summer and fall events. At present he is doing stud service at the Vollo Stock Farm. Of those that were here last year Brownie Wilton, Lord Revelstoke, Boreazelle, Alton and Virginia Jay are scheduled among the early starters. When the trotters are shifted to Baden for the big International race the Italian contingent will arrive in strong force, including Grattan Bells, Fanny D., Wainscott, Kirkwood, Jr., Dulce Cor, Onward Silver and Soano, all seasoned performers on the European turf and a combination which seems rather hard to beat.

"There is no doubt that the fields competing for the International Stakes will contain as fast and high class trotters as is ever seen in the United States, the home of the trotter. Directum Kelly, 2:08½, formerly the premier stallion of a big farm near New York (East View Farm of James Butler), is doing stud service at Kagan Stud, and his book is more than full at a fee of \$120. This horse has surely captivated the breeders in this country and will prove a cheap bargain at \$4,550, which he cost at the last Old Glory sale in New York. It is reported that Russians are after this stallion and he may soon cross over the border at a big price."

Rey Belle 2:22½ by Rey Direct 2:16 will be raced again this season and her owner expects her to secure a fast record. She was started a few times last season.

It is reported that Sonoma Girl 2:05½, George G. 2:05½, Wilkes Heart 2:06½ and Axcyeil 2:06½ will meet in a race at Readville, July 4, for a purse of \$5,000.

All of the Geers stable are working satisfactorily at Memphis. Highball looks fine, Mr. Geers having worked him a mile in 2:25 with the last eighth in 15 seconds. He never looked better and has as much, if not more, speed than last season. There are 250 horses in training at the track, all are in good condition for fast work, which they will very soon begin to get.

The Peoria, Illinois, early closing purses, in which several California horses were entered, failed to fill, and Secretary Nathan Cole announces they will be reopened to close May 4th.

Drink Jackson's Napa Soda.

JOHN NELSON 187.

Notes on California's Earliest Horsemen and Stock Breeders.

[By Special Writer for the Breeder and Sportsman]
(Concluded from last week.)

In 1861 the stallion received probably his first outside mares. Of his foals from them the succeeding year, in 1862, there was one, Mayboy out of the Doctor Thomas' mare. Mayboy was bred and owned by Mike Cassidy of Lincoln, Placer County, who was afterwards long one of John Mackey's men at the Del Paso. Another Nelson foal of the same year was April Fool, bred by Frank S. Malone, the stage man and friend of Governor Stanford. These two colts were matched and raced as two-year-olds at Sacramento. Malone traded April Fool for stock in a prospective gold mine near Nevada City, and with the fortune he made out of it was able to breed such as Katie G. (dam of Charles Derby, Klatawah, etc.), founder of a family that for early and extreme speed is more prominent than that of any other brood-mare in the State. Dan Dennison, thirty years before he was Marcus Daly's trainer of runners in Montana, was one of the three or four leading drivers in California in the sixties, and with April Fool won a free-for-all at the Sacramento fair in 1867 against H. H. Haight and John Conness, the best time being the third heat in 2:44. Horsemen of the seventies, when Controller took his world's twenty-mile record (which he still holds), said that he was sired by Mayboy. This is verified by his being so entered in Chester, an authority for the period. G. Gray, Esq., mayor of Lincoln, Placer County, and a respectable citizen, states that Controller was bred on a farm near Sheridan, Placer County, by a man named Greathouse, that he well recalls his dam, and that John Nelson or Mayboy was his sire, for Controller was always called locally "a Nelson." It seems more appropriate that the last holder of the world's twenty-mile record should be a descendant on the top line from Trustee, sire of the first horse to trot twenty miles within an hour. Why the Year Book inserts Controller as by General Taylor is inexplicable, except that it be for the Wallace prejudice against thoroughbred blood.

William Dunlap and Stephen A. Boutwell, friends and neighbors of the Pitchers, had been looking with longing eyes at Nelson for several years after Captain Pitcher's decease, but he could not be bought. The then long price of ten thousand dollars had been refused for him from an Oregon gentleman. Of a sudden he was offered and immediately snapped up by Dunlap and Boutwell, but what the price was, though many thousands less than what the Oregon party bid, can not now be remembered. They took the horse to the home place of Dunlap and Boutwell, the princely tract of about 42,000 acres north of the Rancho del Paso, and extending from Roseville, Placer County, west to the Sacramento river.

Reminded by this, a discursus of heretofore unpublished numerous facts upon a number of the very earliest stockmen in California, it is hoped will be permitted. The new home of Nelson, the rancho owned under various titles and partnerships by Dunlap, Boutwell and J. W. Kaseberg—all three related by marriage—is one of the few great California estates after half a century mainly about 37,000 acres in this instance—in the possession of the heirs. It is also notable as one of the California ranches of magnitude which was not a Mexican grant, but accumulated from a number of small tracts. That division of it known as "the little Spanish ranch" was the pioneer home and financial starting point of the late Joe Cone of Tehama, sheep baron of Northern California. George W. Hancock, long a director and park superintendent of the State Agricultural Society, always a breeder of a few good trotters, and poverty stricken but owner at the time of his death of Easter W. 18457 (sire of Rosie Woodburn 2:16 and of the dam of Friday 2:09¼); Dr. Weber, pioneer rancher and physician after whom Weber Lake takes its name; Tan Woods, pioneer cattleman, politician, quarter-horse man and brother-in-law of General John Carey, all lived upon other parts of the rancho in the earliest days. Among other owners of different sections were B. B. Redding, with whom as the land agent of the Central Pacific pioneer stockmen came much in contact, and father of Joe Redding of the Bohemian Club and New York; Dr. G. L. Simmons, dean of Sacramento physicians; Judge Charles Tuttle, a founder of the University of California and State Supreme Court reporter, and James McClatchy, founder of the Sacramento Bee. Adjoining the Dunlap and Boutwell ranch was "big Spanish ranch," the original home where young Fred Cox made his beginning. Now the cattle firm of Cox & Clark is only outranked in California in the cattle line by such as Miller & Lux, the latter spoken of in the newspapers as the richest cattle corporation in the United States. Senator Cox served for generations as a director of the State Agricultural Society, was the society's president, and up to the time of his death was president of the California National Bank of Sacramento.

Both "Bill" Dunlap and "Steve" Boutwell, who bought John Nelson, were familiar faces upon the California racetracks from the fifties to the eighties. Boutwell was an associate and partner in Missouri, Arkansas and California with Amos Williamson, who was also a partner of Sam Norris of the Rancho del Paso. Williamson was also a first cousin of and

associated with the celebrated Williamson brothers, pioneer California breeders of runners, who owned Belmont, the first thoroughbred stallion brought across the plains to California and descendant of the champion Lou Dillon. The love of live stock breeds on in the families of the pioneers. Boutwell's son-in-law, the late Hon. Frank D. Ryan, was quite as popular as Boutwell himself, and the assemblage at the major's funeral last month was the largest ever seen to mourn in Sacramento. He was not only honored as a founder and past president of the Native Sons, but there never was a better sportsman with the gun, and he was a director in the last ill-fated Capital City Jockey Club. Dunlap's only son, Boutwell Dunlap, is a young lawyer who is a non-professional expert on pedigrees and has already seen much of the racing on the Eastern tracks. Judge Freddy Tyler, well known as law librarian and court commissioner of San Francisco, and the son-in-law of J. W. Kaseberg, the third of the trio of relatives and partners, is never happier than when he is driving a fast one on the speedway.

Dunlap was related to the Clays, more consistently engaged in breeding runners from the beginning than any other family in Kentucky, as one who is familiar with the stud books knows, and also to the Gays, who imported the first well bred cattle into Kentucky, before what are called the "seventeens," and who still are big people in the export shorthorn trade. Naturally mining had little attraction for Dunlap, and he was one of the first breeders of blood stock in the State. Distance horses were then the vogue, and he succeeded with difficulty in collecting mares for broodmare purposes with the idea of breeding such race horses. It was for that reason John Nelson was bought, and no better selection for that end could have been made. Practically every mare at that time was cold-blooded, and every one with trotting action was called a Messenger, whether with four or more outcrosses from the original horse or with none of his blood whatever. One of his best mares was Sallie Beach, who was famous about Sacramento and one of the first good broodmares in the State. Blood-like in appearance and foaled in 1852, about the year the Lamott mare was foaled she was brought across the plains in 1861, in which year Dunlap purchased her. It was claimed she had been raced in Ohio, but Chester does not mention her. There seems to be no question but what she could have gone out any day and lowered the world's twenty-mile record. It was a common thing for her to be driven without injury in a buggy from the Capital hotel in Sacramento to Dunlap's Gouge Eye ranch, a distance of about twenty miles, in world's record time. Any of the old coterie of land and stock barons of the sixties and seventies around the Capital Hotel, as Theodore Winters, Uncle Alf Estell, or the others, would testify to this. Dunlap raised a number of class A products from Sallie Beach, including the John Nelson gelding, Governor Stanford 2:27½, who made Nutwood go six heats to beat him at Sacramento in 1877, and who was one of the very first California bred horses "to be sold East," being taken there for the road by Edward S. Stokes of the Hoffman House, New York city, "the Adonis of the trotting turf and the pet of the sporting fancy" of the metropolis in the early eighties. Sallie Beach was also the dam of E. H. Miller 2:32½ by Captain Hanford 804. Her two best and fastest colts were Rufus T. Leet and Ransom S. Carey, both by Primus 255. So much admired were they by Rufe Leet, the horseman who came over from Nevada to lose his money on the California tracks in the sixties and seventies, and Rans Carey, president of the State Agricultural Society, that these two gentlemen asked that the horses be named for them. Ransome S. Carey was enthusiastically believed by some in 1875 as fast as any in the State, and that was when Occident, once world's champion, was here. Carey was sold for the road at a large price to one of the Comstock nabobs in San Francisco. Sallie Beach had two by David Hill, Jr. 17139 and one by McCracken's Goldust, all of whom attained distinction on the road; but they were coarser than the mare's first happy nick. She died in the possession of J. G. McCracken of the Cosumne district south of Sacramento, pioneer breeder of Morgans, owner of all the maternal lines of champion Kinney Lou, and father-in-law of the late horseman, Johnny McCord. Dunlap was also one of the first to improve the breed of sheep in California. Among other flocks he owned in 1864 the Mott band of imported merino and southdown bucks, which were brought here at the cost of a number of hundred dollars a head. It is believed he was first to introduce sheep dipping in California, that method having been made compulsory by State legislation for the year 1908. Among runners, he owned for a short time, but almost immediately sold back again to James Moore, the historic mare who won the first three-mile race on this Coast, Lola Montez, of whom Captain Tom Merry (the best historian the American thoroughbred ever had) has said: "From her have come a notable lot of winners at all distances, the best being Tom Atchison, whom I always regarded as a better horse than the much vaunted Thad Stevens." The highly extolled Thad Stevens, who was the first California bred horse to attract the attention of Eastern racing men by defeating in 1873 the Kentucky bred, Joe Daniels and John Chamberlain's True Blue, ran the fastest second four-mile heat in 7:30, and has also the record for the fastest third, fourth and fifth mile heats.

All of which by way of preface as to how Lola Montez and Bulwer were brought out, the introduc-

tion of the first American sheep into California, and a correction of the estimable Captain Merry in one of his valued articles in the Breeder and Sportsman of a year or two ago. In writing of "the Howard county, Missouri, brigade," with that wonderful aggregation of short horses in Yolo in the sixties—the Hon. John Boggs, Harry Peyton (en passant a kinsman of the ante-bellum Southern racing celebrity, United States Senator Balie Peyton of Tennessee), and the company of the Missourians—Captain Merry says that "Uncle Jimmy" Moore, as Mr. Moore was affectionately called by his friends and admirers, was "from the rich old county of Howard in Missouri." This is erroneous. He was from the rich old county of Platte in Missouri. He came out in 1849 by the Santa Fe trail from that State with several nephews, G. W. Grayson (the Western cattle king, his brother-in-law) and William Dunlap, with several negro slaves, all from the same county. In 1851 he became possessed of the desire to get Eastern sheep, but more particularly, his friends said, was he obsessed with his old-time love, race-horses. The ownership of many thousands of head of cattle had been his fortune in the golden land. Owing to the rush to the mines, it was with difficulty a competent and reliable man was to be found who could take charge of his tens of thousands of dollars invested in live stock. William Dunlap, in order to gratify Mr. Moore's race horse ambitions, agreed to act as major domo on the Potter ranch (later known as the Dave Reavis' ranch, the home of the Blackbirds, and still later as the James D. Phelan ranch), whither the cattle were driven, although they covered vacant lands and the rodeo was made on the General Bidwell rancho. Sam Norris of the Rancho del Paso and Amos Williamson, of whom before, had a small interest in these cattle, and the three were among the first large owners among the Americans on the Coast after the occupation by the United States. Returning to his Missouri home, Mr. Moore obtained Lola Montez and Bulwer, and crossed the Missouri in 1852 with 12,000 sheep. His losses of the latter being enormous; and fearful of winter storms, he decided to leave the sheep at Salt Lake City, and come over the desert that fall with the horses. In the following year 800 of the original band of 12,000, over 11,000 having perished, were driven into Sacramento, the first American sheep to be taken across the plains into our State. They were probably as large a number as were ever started on foot from the East. Six years later, in 1858, the Hollisters of San Benito and Coopers and Dibbles of Santa Barbara commenced their journey with the same number, collected in Missouri and Illinois, arriving in Los Angeles in January, 1860, with 4,400 (Carman, Heath and Minto's "History and Present Condition of the Sheep Industry of the United States," page 952). Such was the enterprise of the first Californians to build up the stock industry. Another band mentioned as one of the first in that exhaustive work of Carman, Heath and Minto, just referred to, was brought from Missouri in 1857 by Preston Lewis Dunlap (later a Colorado cattleman), Nat. Grayson and the above George W. Grayson, accompanied by Mrs. Grayson, who was as adaptable in a sheep camp as she was later as a society leader in an Oakland drawing-room. They had better luck than the brother-in-law Moore, arriving with 2,000. This flock, purchased by Dunlap, became the foundation stock of the noted flocks of Kaseberg, Dunlap, Boutwell, and others. In 1859, Dunlap sold 1,000 to George Whitney, father of J. Parker Whitney, who is still seated on his 20,000-acre Spring Valley ranch, Rocklin, Placer County, with sheep on a thousand hills, and it is possible that the historic "Spanish merinos of Saxony blood" that Parker Whitney's brother went to Australia in 1855 to bring here, were crossed upon the Grayson-Dunlap band (Carman, Heath and Minto, page 950).

In writing of "Uncle Jimmy" Moore's children, Captain Merry might have added that Senator Wolf-skill, who owns the several million-dollar San Jose Rancho, near Los Angeles and is a near relative of old Billy Wolfskill, first American owner of Lucky Baldwin's Rancho Santa Anita, has as his wife a daughter of "Uncle Jimmy." The colors of no other California lady have been more frequently seen on the runners on our race courses than Mrs. Wolf-skill's. Two daughters not mentioned by "Hidalgo," married gentlemen of sporting proclivities—Colonel Washington of the Washingtons of Virginia, and Major Wall of the Confederate army. G. W. Grayson's daughter, the wife of the Hon. W. C. Ralston (whose father was not only our first captain of industry, but also one of the first to have a large stable of road horses), is a leading breeder in the dog fancy, an officer of a specialty club, and was for a time the only lady here who was an associate member of the American Kennel Club. Verily, the sporting blood of these frontier Kentuckians and Missourians perpetuates itself. "Uncle Jimmy" owned in Yolo his home place and part of the Billy Gordon grant. Billy Gordon was an owner of runners and was the father-in-law of the Hon. Nathan Coombs, pioneer breeder of thoroughbreds, whose son, the Hon. Frank Coombs, late United States Minister to Japan, was once the president of the Pacific Coast Trotting Horse Breeders' Association.

The historical priorities in reference to horses and sheep leads on to the first introduction of American cattle. Although H. H. Bancroft in his "History of California" (Vol. VII., p. 54, footnote), says a man by the name of Cole arrived from Missouri on the Stanislaus in 1850, with 542 out of 800 cows

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

The inaugural annual blue rock tournament of the Coronado Country Club took place last week, Thursday and Friday on the newly fitted up grounds of the club. Wind and rain conditions were such that they proved rather a serious handicap for the shooters. The Leggett traps did not work satisfactorily, which was another drawback.

The first event did not start until one o'clock on Thursday afternoon, the rain had stopped enough by that time to proceed with the fun. On Friday the traps worked poorly and in the afternoon the wind made the shooting most difficult. The Coronado Country Club members and Secretary Pane Schmidt entertained the visiting sportsmen in royal style.

One of the shooters present states: "The club will give another tournament next year, and from all the nice things that were said by the shooters who attended this tournament, I would judge that the attendance next year will reach a figure approaching the hundred mark, for every shooter was pleased with the program, division of money and everything connected with the shoot, except, of course, the wind and the rain, and that's up to somebody else."

High average for the shoot went to Fred B. Mills on 448 out of 500. Mills also won the club's challenge cup, breaking 45 out of 50 birds. This race was open to amateurs that had shot through the whole program and was the concluding race of the tourney. Dick Reed won the gold medal for high professional average, 446 out of 500. J. Ed Vaughan won the second amateur trophy a silver medal. R. M. Arnold won the bronze medal. Hip Justins won the silver medal and D. W. King, Jr., won the bronze medal for second and third professional high averages.

The total scores shot were: F. B. Mills, 448; Dick Reed, 446; J. E. Vaughan, 445; R. M. Arnold, 439; Gus Knight, 437; H. Justins, 429; D. W. King, 426; F. S. Ecker, 421; M. G. Lane, 416; R. Witman, 415; Dr. Tabor, 406; Capt. J. S. Sedam, 393; A. B. Daniels, 381; C. A. Haight, 377; H. T. Hoyt, 371; E. Hoelle, 363; George Sturgis, 317; P. T. Thompson, 306.

The scores in each event for the two days follow. Coronado Country Club, March 26, 1908.

Sacramento shooters opened the blue rock season last Sunday with the first regular club shoot of the Capitol City Blue Rock Club.

The Sacramento members turned out to the number of about fifteen, and with the Folsom visitors kept the traps busy all morning and a good part of the afternoon. No records were broken, for it was the first shoot to be held in months. Ferguson of Folsom was high gun of the day.

In the team shoot the Sacramento trio, consisting of Frank Newbert, H. T. Trumpler and George Young carried away the cup that was offered by knocking forty-eight out of a possible sixty birds. The results of the team shoot was as follows:

Sacramento No. 1—O. Merritt, 13; F. Newbert, 17; Ruhstaller, 13; total, 43.

Sacramento No. 2—M. Newbert, 19; Herold, 18; B. Adams, 9; total, 46.

Sacramento No. 3—F. Newbert, 17; H. Trumpler, 16; George Young, 15; total, 48.

Folsom No. 1—J. Jourger, 14; Ferguson, 17; McDerby, 14; total, 45.

Folsom No. 2—G. Gerber, 15; P. Jourger, 13; McDerby, 13; total, 41.

The results in the 20-bird matches were: H. McDerby, 17, 18, 17, 12, 17; P. Jourger, 15, 14, 10, 14; George Gerber, 15, 16; J. Jourger, 17, 13, 14, 17, 12; H. Davis, 19; Bert Adams, 13, 17, 15; F. Ruhstaller, 16, 15, 17; F. Newbert, 15, 13, 17, 17, 18, 16; C. Jourger, 15, 17, 16; C. De Merritt, 15, 18; O. Ferguson, 17, 20, 18, 17, 16, 19; C. Cotter, 13, 11; Troxel, 12, 14, 15; O. Herold, 11, 14, 15; George Young, 11, 10, 10; M. Newbert, 15, 18; L. Smith, 11; W. Mott, 14; H. Trumpler, 15, 16.

San Jose shooters burned powder at the Santa Clara County Fish and Game Protective Association traps on the 29th inst. Indications point to a revival of inanimate target shooting in the Garden City. The sport has been rather dormant there for several years past.

Among those who shot were Dan Flannery, Barth Lorigan, William McKagney, Jack Shannon, Dr. A. M. Barker, A. C. Holmes, Hart Cadwallader, Frank Munroe, Harry Doble, William Cebell, Ray Schilling, W. W. Jack, Manuel Perry, Frank Perry, Frank Baker, Fred Rugg, and Mr. and Mrs. Carl Schilling.

A feature of the shooting was the work of Mrs. Schilling. She breaks the flying blue rocks most consistently with her little 16-gauge Remington double-barrel, generally stopping an average of eight out of every ten shots.

Everyone who shot on the range was invited to return and bring a friend with him at another shoot which will be held a week from next Sunday.

Sonoma Gun Club scores shot on March 22d were as follows in three 20-target events:

First event—Carne, 20; McCandless, 12; Dambacher, 16; Otis, 16; Richards, 12; Ball, 12; Gibbs, 9; Scott, 12; Elsbree, 19.

Second event—Carne, 19; McCandless, 10; Dambacher, 17; Otis, 12; Ball, 18; Gibbs, 10; Scott, 11; Elsbree, 19; Pickle, 7; Doyle, 9; Livingston, 10.

Third event—Carne, 14; McCandless, 16; Dambacher, 21; Otis, 14; Ball, 16; Scott, 15; Elsbree, 19; Livingston, 14.

Vallejo Gun Club's regular days are the first and third Sundays of each month.

Colton Gun Club members shot on March 21st. In the club race at 25 targets the scores were: H. B. Smith, 18; E. G. Palmer, 18; J. R. Boynton, 16; A. Schuessler, 14; H. Herrick, 10; Dr. Howe, 10; Fred Brownlee, 10; W. Bramhall, 9.

Dr. Lumsden issues a challenge to shoot a match with anybody in Reno at 100 blue rocks.

He will wager as high as \$250 and would give Walter Morton, who is out with a similar deft, the preference. He would be willing to shoot with Morton for \$500 a side and if Morton insists on a wager of \$1,000, the doctor and his friends will accommodate him.

The Crescent Bay Gun Club pulled off a successful shoot at Venice on March 29th. Total scores were: R. H. Bungay shot at 170, broke 148; H. Mitchell, 145—103; C. A. Haight, 175—139; F. Bungay, 120—62; Gus Knight, 145—129; D. Reed, 150—119; E. Heella, 150—119; C. E. Morton, 45—13; D. W. King, 150—130; H. Hoyt, 100—95; H. Justins, 90—82; L. Gowland, 70—40; Mr. Page, 80—53; F. Childs, 100—76; B. Pinney, 100—72; Mr. Vetter, 100—66; J. C. Greenway, 100—67; Bob Gowland, 40—24; C. Groesbeck, 40—30; L. C. Steele, 40—6; Ray Marvin, 40—20; H. Michel, 60—30; Mr. Webster, 25—9; Charles Marvin, 60—22.

There was improvement all along the line at the second shoot of the Sonora Gun Club, held March 29th. Secretary Joe Dambacher was high gun for the day, breaking 21 in the third and final string at 25 singles. Tom Carne was second with a score of 20 in the first, but for steady, consistent work, Lon Elsbree was entitled to the blue ribbon, in each of the three strings shot he broke 19.

Others to try their hand at the traps were Harry McCandless, F. P. Otis, C. H. Livingston, F. F. Ball, C. E. Scott, N. F. Pickle, W. Richards, Ed. Doyle, and Jess. Gibbs. Some showed good form in spots, but are not on edge yet.

The Martinez Gun Club met at the office of C. H.

Hayden recently and perfected a permanent organization. The following officers were elected: President, L. N. Buttner; vice-president, Lee Durham; secretary and treasurer, Frank A. Hodapp.

The club, which now has a membership of 32, will meet next Sunday at the grounds in Bay View Park and arrange their traps and prepare the grounds for regular use. The plans of the club include both blue rock and live pigeon shoots.

The Azusa Gun Club was organized last Saturday night with F. A. Frye as temporary chairman and Arthur Powell secretary. An executive committee consisting of O. Burns, Gus Zamorano, and Ernest Cook, was appointed to select a location for a shooting range, erect bulkheads, shooting booths, etc., for 200-yard target practice. This committee will report at the next meeting of the club, at which time the organization will be made permanent. The object of the club will be to encourage practice in rifle, shotgun and pistol shooting, and a series of friendly contests will be arranged. It is expected the club will have about 26 members to begin with.

The second blue rock shoot of the season under the auspices of the San Luis Boat and Gun Club came off March 22d. There were but five events, and although but few were present the sport was quite exciting and much enthusiasm was manifested. Ernest Taylor and H. A. Martin scored highest, both getting 18 out of 20 blue rocks in the second event. The score in detail was as follows in 10, 20, 20, 20, and 10 target events respectively:

Ernest Taylor, 5, 18, 17, 16, 7; W. C. DeNise, 7, 15, 15, 10, 5; J. C. Hill, 7, 11, 11, 12, 5; J. E. Van Schaick, 6, 14, 14, 15, 7; C. T. Greenfield, 5, 14, 13, 10, 5; Jas. Guthrie, 5, 8, 8; H. A. Martin, 8, 18, 13, 11, 8; W. J. Burke, 6, 13, 13; Fred Soto, 8, 15, 15, 18, 10; Louis Steen, 17, 15; R. Hearne, 11; J. V. Estudillo, 16, 14, 5.

A press dispatch from Ontario, Cal., states: Work is to begin soon on fitting out the large brick block lying just south of the Southern Pacific tracks, known as the A. O. U. W. Hall, as temporary quarters for a cartridge factory to supply the military and sporting ammunition for the Pacific Coast. The new plant will be built for the National Projectile Works of Grand Rapids, Mich. It is capitalized for \$100,000, \$70,000 of which is to be used to purchase the patents and assets of the eastern concern, which will be moved here at once. The factory will be in charge of D. H. Armstrong, who has had twenty years' experience as secretary of the Grand Rapids concern. There will be about 200 people employed.

Not only will the new factory be nearer the source of material, but a better market is assured, as this will be the only factory west of Cincinnati. It is claimed that over 60 per cent of the sporting ammunition made in the United States and Canada is used west of the Mississippi, and experts predict that a cartridge factory in this city would get most of this business.

TUNA IN MONTEREY BAY.

One day last week while a market fisherman named Lindsay was drawing his net near Capitola, he was surprised to find that he had made a catch of over 1,200 pounds of tuna. When the matter was called to the attention of several anglers, among them E. A. Mocker, an investigation was started for the purpose of ascertaining what the fish had been feeding upon, with the purpose in view of giving the tunas a try by trolling for them. There is, in consequence, the prospect ahead of some grand sport.

Several salmon were caught in the bay last week. Sardines are to be seen in immense shoals, the fish are as large as horse smelt. The wharf at Capitola is now available for anglers' boats, the sand bars and shallows were washed away during the last rains and boats can now land without any trouble.

A NEW PRESERVE.

The Ventura County Game Preserve Association has acquired 1,300 acres of the Rancho Colonia from T. R. Bard and will begin the development of its property at once. Sim Myers, who is one of the moving spirits in the enterprise, states that the work of laying out the lakes and fields for wild rice, etc., would begin soon. Saturday last a number of the club officials inspected the land.

It is noticed in the papers filed for record on the preserve that there was a reservation made for a right of way that has been granted the Hueneme-Malibu-Port Los Angeles Railway. This is the line that has caused so much comment in recent years and has often been thought to be but a part of the Gould system for Southern California.

Superintendent Shebley, of the State fish hatchery located at Sisson, shipped three boxes of fish eggs to a German society in Germany last Sunday evening. They will go by express to New York, where they will be taken in charge by some one who will go with them to their far-away destination. The greatest care was taken in packing the eggs, three men were employed a week getting them ready for shipment. The express charges to New York alone will be more than \$100.

Salmon fishing has begun at Tehama. Three camps started but the fish are slow to come up the river this season. Fishermen below Tehama get the first run of salmon.

WHERE OREGON ANGLERS FIND SPORT.

Brewster Valley is traversed by a small stream of water that heads into the Coast Range of mountains about twenty-five miles west of Roseburg, on the "old toll road." The term "valley" as applied to this section of the country is only a name, for there is very little "valley" outside of the road. The fishing ground is reached in one day's travel from Portland over the old Coos Bay wagon road via Sugar Pine and the Mountain Home, better known as the "Nineteen-Mile House."

The Nineteen-Mile House is the last place passed before making the climb and the drop down into the canyon, and if you have overlooked any supplies here is the last chance to stock up. When camp is reached and you are located for the time being in an ideal camping ground, and fully equipped with plenty of hooks and lines you can begin pulling out the speckled beauties. The season for fishing in this creek begins about the first of May and lasts for three months, during which time there are thousands of trout caught. The best fishing is from the 15th of June until the 1st of July.

It is a very swift and rugged stream and there are several falls. Some of these falls are over fifty feet, yet there is just as good fishing above as below. This has always been a mystery, and it is yet to be solved. How do the fish get above these falls? They are caught out each year, and the same generous supply is there the following season. The trout caught in this stream are of five different varieties. There is a trout caught here that has adapted itself to the environment and has become a different species from the same trout when found in other streams.

The different kinds are the Oregon trout, *Salmo maseni* (Suckley); the rainbow trout, *Salmo iridia* (Gibbons); two kinds of steelhead trout, *Salmo rivularis* (Ayers), and the cutthroat trout, *Salmo clarkii* (Richardson). There is the large and small rainbow trout, and the upper part of the stream has so changed this trout that it really becomes a native of Brewster, and many fishermen call it the Brewster trout. It is the gamiest of the brook trout, and while the small specimen attains only a length of about six inches, the larger rainbow trout sometimes reaches a weight of five or six pounds. They take a fly easily and responded equally as well to a grasshopper or a bait of salmon eggs.

Perhaps more than any other trout this specimen varies with its surroundings. In the deep pools of water it is very hard to see, becoming so colored as to resemble the creek bottom. The rainbow trout has larger scales than the others. The Oregon brook trout, which is a dainty and gamy little fish that seldom reaches a pound in weight, is scarcely distinguishable from the rainbow trout. It has a smaller mouth and the dorsal fin is less spotted than the rainbow trout. In the rainbow trout the dorsal fin is high, usually having seven to ten rows of black spots.

A day's catch in this stream when the season is at its best sometimes reaches 250 and 300. It is an ideal camping place, with plenty of wild game, such as deer, elk and bear. Bear tracks are quite frequently seen any place along the road. The road to Sitkum, or Lairds, from the top of the mountain is a rough one, but there is a joy for every jolt when you inhale the balsamic perfumes of the pines and rhododendrons, and feast on huckleberries and fish. Meacham Creek, in Umatilla County, the chief trout stream in Eastern Oregon, promises excellent fishing this season, owing to the mild winter and the possibility of an enormous supply of trout.

For 25 miles this excellent stream offers fine fishing from April 1st to July 15th, and with its tributaries of North Fork Creek, Butcher Creek, Spring Creek, Wilbur Creek and other small streams coming in from the slopes of the Blue Mountains, forms one of the finest trout districts in Oregon. The total length of Meacham Creek and tributaries in which good fishing is enjoyed for four months of the year is almost 50 miles, all of which is in the Blue Mountains of Umatilla County.

The principal points at which fishermen leave the O. R. & N. trains in going to the Meacham Creek fishing district are Bingham Springs, North Fork, Huron, Meacham and Duncan. The stream follows the railroad track and as soon as leaving the car the line may be thrown into an excellent trout pool where brook, rainbow and speckled trout are found.

Meacham Creek and its tributaries are not rugged streams, although flowing down a steep mountain slope and it is possible to take packing horses or even a team to most any point where fishing is good. Camping places abound and the district is supplied with stores and wood camps so that it is possible to secure provisions easily while in the mountains.

The scenery along Meacham Creek and its tributaries is superb and the district forms an ideal place for a few weeks' outing and fishing in the early summer months.

For those whose physique enables them to cover long stretches of ground nothing is nicer nor more fruitful than to alight from the train at Wilbur and travel downstream. The train reaches Wilbur early enough in the morning to enable the fisherman to cover the ten miles down to Bingham Springs station in time to catch the night train for Pendleton or Portland. This is one of the most popular courses to pursue and scores of fishermen go over the route every Sunday during the early season.

Next Wednesday, April 1st, it will be legal to take steelhead trout in tidewater streams with rod and line only.

WILD BIRDS ARE PROTECTED BY THE STATE.

Some seasonable and timely information is here given in the following leaflet issued by the Audubon Society of California regarding amendments to the bird and game laws passed at the legislative session of 1905:

Section 637a of the Penal Code has been so amended as to give protection to all wild birds, excepting only the following: The Cooper's hawk, the sharp-shinned hawk, the duck hawk, the great horned owl, the blue jay, the California linnet and the English sparrow. Any person who, in the State of California, "shall at any time hunt, shoot, shoot at, pursue, take, kill, or destroy, buy, sell, give away, or have in his possession, except upon a written permit from the State Board of Fish Commissioners, for the purpose of propagation, or for education or scientific purposes, any wild bird, living or dead, or any part of any dead wild bird (except those above named as being excluded from protection), or who shall rob the nest, or take, sell or offer for sale, or destroy the eggs of any wild bird, other than those above named, is guilty of a misdemeanor," and is liable to a heavy fine and imprisonment. Game birds are not included under this head but are protected, and their nests and eggs, under other sections of the Penal Code.

All our native sparrows are in the protected list and must not be mistaken for English sparrows.

Bird students wishing to make collections of wild birds for educational or scientific purposes must first procure a permit from the State Board of Fish Commissioners at San Francisco, but only a limited number of such permits will be issued, and these for only a limited number of specimens, and those applying therefor must be properly recommended.

Special attention is called to the fact that the California condor, all the eagles, all the sea birds, the turkey buzzard or vulture, and all the hawks but the three named as being excluded, are now protected.

Under the provisions of this law, keepers of bird stores, or other persons, must not buy, sell or offer for sale mocking-birds or other native wild birds.

Those who have native birds in captivity for study or propagation must procure a permit from the State Fish Commission.

All species of tree squirrels are protected at all times. So are swan, pheasants, bobwhite, and other imported quails or partridges.

The bag limit on doves is reduced to 25 birds and these birds must not be sold or offered for sale.

The open season for hunting deer has been reduced and only two male deer may be taken in one season. A number of counties have still further reduced the open seasons for deer, doves and quail.

The use of any snare or trap, or poisonous substance in catching wild game is a misdemeanor.

Severe penalties are imposed for taking the eggs of quails or other game birds.

The minimum fine for killing does and fawns is now \$50. The killing of an elk is a felony.

Snipe and other shore birds now have a closed season, and are on the no sale list.

In nearly all of the coast counties seals and sea-lions are protected by local ordinances and must not be killed or injured.

Permits for taking game birds for study or propagation are not issued in the closed season.

Special attention is called to the fact that wild birds must not be trapped or the young taken from the nests without a permit from the State Fish Commissioners.

No permits will be issued for the taking of the California condor, or its eggs. As this species is almost extinct the time has come for energetic measures to prevent its total destruction.

Teachers should endeavor to impress the substance of this leaflet upon their pupils, in order that they may fully understand that legal bird killing and egg collecting, as it has been done in the past, is now at an end in California, and that the Audubon Society will prosecute all violations of the bird and game laws that come to its notice.

The interest and co-operation of farmers' organizations, humane societies, women's clubs, game protective associations and individuals toward preventing the further destruction of our wild birds and in protecting the wild game in the closed seasons, is urgently solicited.

Notify your nearest Game Warden regarding violations, or address Audubon Society of California, W. Scott Way, secretary, P. O. Box 223, Pasadena, California.

It is not generally known that the California condor is rapidly becoming extinct. The Santa Monica Board of Trade has an excellent specimen on exhibition in its room, one of a pair shot by J. U. Henry of that city. Concerning the California condor a writer in the Century Magazine for January had the following to say:

"One night in the eighties a heifer from the Murieta Ranch in Southern California was killed by a mountain lion that lived in the fastness back in the San Bernardino range. From our camp the next day we noticed several buzzards on a dead pine up the hillside. One of the rancheros pointed out a lone speck floating in the summer sky. 'King of the buzzards,' he said. An hour later the speck had increased in size and he pointed to another speck just within the scope of vision. The next day the old Mexican took me up the arroyo and I counted seventeen buzzards and two other big birds that seemed twice the size of a buzzard feasting on the carcass of the heifer. I was interested in the

big birds, but the only information I received was a gesture back toward the highest peak of the range.

"Years later, as my interest in birds grew, I could get comparatively little information about this 'king of the buzzards,' or California condor (*Cathartes Californianus*) for not many people had ever seen the bird, and very few had first-hand information as to its nesting habits.

"The report that it was rapidly following the great auk and that the species would soon become extinct was not without some foundation, for the California condor has a range more restricted than any other bird of prey. In the early part of the last century it was reported fairly common as far north as the Columbia River region, but now it seems to have entirely disappeared from that locality. Once it was reported in Utah, and Dr. Elliott reported it in Arizona in 1865. With the exception of a record in Southern Oregon, the habitat of the California condor now seems to be the region from Monterey county, California, south through the mountains of the coast range and the extension of the San Bernardino range into Lower California. There is no record of the bird in Mexico.

"It is not surprising that collectors have searched the mountains and that museums are willing to pay big prices for the eggs, for, after a correspondence of several years, W. Lee Chambers has found that there are now only forty-one California condor eggs (twenty-six first class and fifteen second class), in the various museums and private collections of the world, while there are about seventy eggs of the great auk, which is now extinct. There are only half a dozen of the birds in captivity and that number is not likely to be increased to any extent at present."

SANTA CRUZ TROUT FISHING WILL BE GOOD.

Game Warden Welsh kindly forwards the following information that will be of much interest to anglers who are looking forward to the enjoyment of angling in the famed trout streams of Santa Cruz County:

"As the trout season does not open in this county until May 1st, I thought I would drop you a few lines and call your attention to the fact:

"Section 632½ of the Penal Code permits steelhead trout to be taken in tide water during the month of April. Recognizing the fact that all the trout native to the streams of Santa Cruz County are steelhead trout, and realizing that if it was lawful to take and catch steelhead trout in this county in tide water during the month of April that it would be next to impossible to protect the breeding fish in the streams of this county above tide water, the Board of Supervisors passed an ordinance cutting April and January from the State law (Section 632½) and fixed the open season for steelhead trout fishing in both the streams and tide waters of this county from May 1st to September 17th, and from October 23d to January 1st.

I never saw the streams in such fine condition, the pools are deep and free from debris and the streams are full of fine fish. I saw no less than twenty pair of fish on their spawn beds in the Ziente Creek last Sunday. In all the streams of this county at this time are to be seen many pairs of both large and small steelhead trout on their spawn beds.

I shall make every effort to keep all poachers off the streams, and if I am successful in doing so I predict some fine sport for the streams of this county on May 1st.

During the past week I have made four arrests, as follows: Peter Turner and Robert Turner for gaffing steelhead trout off spawn beds. Defendants were held to answer before the Superior Court, with bail fixed at \$150 each. Frank Perry, shooting a pheasant, \$25.00 fine, and Wm. Smith setting a forest fire, will be tried Tuesday. Since June 1, 1907, I have made twenty-seven arrests and thus far have secured a conviction in each case."

Archers After Big Game.—Armed with bows and arrows instead of guns, several of the most noted archers in the United States are planning to invade the wildest districts of British Columbia next fall in quest of big game. The men who will compose the party have had long experience in the use of the bow and they feel confident of their ability to slay bears and deer with the weapon used by Indian hunters in early days.

The expedition is being organized by Colonel F. S. Barnes of Forest Grove, Or., one of the most prominent archers in the country. Others who will compose the party are Dr. Henry E. Jones of Portland, Assistant Editor Kientz of the Youth's Companion of Boston, Will H. Thompson of Seattle, J. M. Challiss and Z. E. Jackson of Atchison, Kan.

The exact scene of the hunt has not yet been selected. The party will go to one of the numerous British Columbia lakes, where they will take a gasoline launch and invade the wildest sections of the game country.

Nearly 200,000 rainbow trout will be offered up for the benefit of Walla Walla sportsmen within a short time, according to advices given by Horticultural Inspector C. L. Whitney.

In a letter received from R. S. Johnson, superintendent of the Government Hatcheries at Manchester, Ia., he was informed that 90,000 rainbow trout eggs in the eye were on their way to Walla Walla, while 100,000 more would follow later.

GUN STOCK STATISTICS.

A few years ago, with the view of helping the novice, and perchance affording a guiding hand to some who have struggled in vain, attempting to reach conclusions regarding the measurements of their guns, I published a table somewhat similar to the one which now appears, and if any benefit has accrued to my brother sportsmen from its perusal, even though it is ever so slight, I'm sure I feel fully repaid.

Unfortunately the writer is only too well aware that two men of entirely different build may both

shoot one gun equally well, while others, whose proportions are somewhat similar, may use gunstocks of such radical difference in outline that it seems almost useless to attempt to lay down any hard and fast rule in the hope of illustrating so intricate a subject. However, as this title is set forth as a matter of pure statistics rather than a key to any one's guidance, perhaps a perusal of it may be of sufficient interest to warrant its publication.

The most salient feature and one which emphasises the certainty regarding the almost universal adoption of straighter stocks is worthy of notice. Fifteen years ago in such an array of talent as above, com-

prising as it does the finest and most celebrated trap shots in the world, the average drop at heel would have been quite 2½ inches, now it is seldom one sees a trap gun with over 2½ inch drop, in fact 2½ would be nearer the mark. One thing should be borne in mind, a strictly trap gun is not the most suitable game gun, because the former is generally too heavy, too much choked, has barrels and stock of too great length and has not as much drop, so that, excepting for open prairie or wild fowl shooting, it is not best adapted to upland game, when much weight can be saved in gun and ammunition, and a more portable and serviceable arm secured. Another element quite in evidence is that the small bore is gradually coming into its own, and every succeeding year clearly emphasizes that fact, experience having demonstrated that these handy little weapons are quite equal to what they are called upon to perform.

There is no disputing the fact that the 12-bore is the standard gun, and if trap and mixed shooting afield are to be done, then by all means that is by far and away the most useful and suitable gauge.

In conclusion I take this opportunity of publicly thanking all my friends for having so cheerfully and promptly come to my assistance, thereby enabling me to offer this table.

GAUCHO.

A curious fact not generally known in America is the existence in England of a breed of Foxhound to all intents and purposes identical with the so-called American or Southern hound, writes David Gray. They are usually spoken of as the Cumberland hound, but are found in the hills of Yorkshire and other broken and wooded sections of the north countries.

This animal is high on the leg, somewhat flat ribbed, usually light in bone, long footed and with marvelous nose and voice. In other words it is the same animal that was taken to Virginia and the southern colonies in the early part of the eighteenth century at the time when fox hunting was springing into popularity in England. As is generally known this animal is, of course, the ancestor of the modern English Foxhound, but, as few realize, in Cumberland he is still hunted precisely as our Southern fox hunters hunt their hounds. For the most part the Cumberland hounds are trencher fed and are brought to the meet by their respective owners. A cold line having been discovered, the hounds are left alone, and they work it out for themselves, sometimes following a fox for many hours. As the country is impossible to cross on horseback the hunters run or ride on ponies from point to point and follow their respective dogs by their voices.

As they have never been broken to the whip, or have been followed by a mounted field, or have been used to score to cry, it is a question whether they could show sport in the hunting countries, but not a few sportsmen are talking of the possibility of using some of this blood to counteract the effects of breeding for the Peterboro show at the possible loss of nose and hunting keenness.

It would be to Americans extremely interesting to try a well broken pack of American hounds in Leicestershire. It is possible that they would prove a revelation to English sportsmen, and then again the huge fields might cow them and the small coverts and numerous foxes split them up. However interesting the experiment would be, it is one not likely to be tried for some time, for the quarantine against American dogs, as well as the natural prejudice against a ragged, uneven pack of American hounds, create obstacles which would require enormous enthusiasm to overcome as well as time and money.

Drink Jackson's Napa Soda.

with which he departed from the East, there is a delightful old gentleman, Clinton Kirby, Esq., of Elk Grove, Sacramento county, who will tell you that he and his brother-in-law, William Hicks, brought out the first American cattle. They left Missouri May 13, 1852, with 5,000 head, and arrived in California September 25th of the same year, with about 2,500, taking them to Hicks' Chabolla Rancho of 12,000 acres, between Stockton and Sacramento. Hicks and Kerby hailed from a locality near Kansas City, Missouri, a few miles from the Graysons, Moores, etc. J. F. McCauley, also from the same section, got not only Hicks' step-daughter as his wife, but lands. Count Valensin then married McCauley's daughter, and here is where the money came from that bought Sidney, grandsire of the champion, and brought into existence the Valensin Stock Farm. A suit for a half-million dollars of the property by Mrs. Valensin against her brother, who took under the will, has been settled this month out of court.

Then, again, there taught school in the Missouri neighborhood James Faris, partner of old Major Jeff Wilcox, a Missourian, whose California lands were broader than those of British dukes. Mr. Faris married a daughter of Major Marion Biggs, Missourian, director of the State Agricultural Society, ex-Congressman, and the son, James Faris Jr., will be remembered as having a string of trotters, several years ago at Sacramento, and is now a stockman in Alberta. Mr. Faris Sr. owns the 9,000-acre Faris ranch, near Gridley, has interests in the Faris and Crum ranch at Battle Mountain, Nevada, and other large holdings. Also from the same county came R. S. Carey, landholder and president of the State Agricultural Society when the State fair was the biggest social event in the State and all the best people attended, his son-in-law being our present United States judge, W. C. Van Fleet. The list of Missourians in the California history of agriculture—especially on the side of the live stock industry—might be increased into a small book by the addition of such as the Wolfskills of Los Angeles, first American viticulturists and orange-growers, the Murphys of San Jose, of whom was General Patricio (the "Black Prince," first of vaqueros) of the Santa Margarita, Dr. Hugh Glenn, most extensive wheat grower in the United States, U. S. Senator George Hearst of the San Simeon, Major Frank Buckner, Dave Reavis and many others. These men were magnificent in character, physique and industry. Their grammar of Kentucky and Missouri patois might be sneered at, but they would rightly look with contempt upon the cheap college and professional educations of the moderns. None of them were members of the "smart set," a term used by those who do not fully understand its meaning. Their, like their horses', was the best blood of old Virginia, and they, like their horses, could "go the distance." They were people of honor, integrity and capacity. Their minds were as broad as their estates larger than those of European nobles. Let it not be forgotten that they were of the same race as Lewis and Clark, who took the Northwest, as Senator Tom Benton, of Missouri, who sent his son-in-law, Fremont, through the center over the Rockies to the Coast, as the men who went out from Independence, Missouri, the starting point of the Santa Fe trail, to populate the Southwest. Nearly all of the California crowd are dead. George W. Grayson is still able to travel from his cattle ranches in Idaho to New Mexico. Mr. Faris keeps up a wide hospitality in his Sacramento home. William Dunlap, now a gray-haired man of eighty, has led a very retired and inactive life the past twenty years at the Freeman hotel, Auburn, Placer county. If you notice him take his watch from his pocket, you will see the time-piece held officially upon Occident in 1873—when he brought the first world's championship to our shores—Thad Stevens, and others. Dunlap could not act the day Occident trotted, and George Hammond (incorrectly called the "father of the American merino," for he himself was a son of Edwin Hammond) was in the timer's seat with the watch.

To return to John Nelson. In the later sixties, Dunlap and Boutwell sold him to a Mr. Strobridge, a Sacramento merchant. But this brings us down to later than the pioneer period. He did service in Colusa and in Yolo, in which with other stallions he helped build up the serviceable horses of the latter county. A groom by the name of Prentiss fell in love with him when he was at the Pitchers, and followed him about for years. It is said Governor Stanford was one of his owners when he was an old horse, but his age was probably too great to add through good matrons to his standing. The last public record the writer knows of him is when he was exhibited at the State fair of 1872 by the notorious Jim Eoff, who through the fifties and sixties had the most engagements of drivers on the Coast, among whom might be mentioned the Shear boys, Barney Rice and Dan Dennison. In the fifties, Eoff drove also at New Orleans, Columbus, Chicago and the Union course on Long Island. None of John Nelson's sons were used for other than range or farmers' horse-purposes, yet through them and his daughters he left an impress upon the horse stock of the Sacramento valley. Sometimes "son of John Nelson" is even seen in the pedigrees, a most recent case being in that of Charley D., bred and owned by Colonel Kirkpatrick of the Fairmont hotel. Charley D. is the fast green pacer of last year who was a close second to the whirlwind Inferlotta 2:04½, when she took her record. His

second dam is by a son of Jack Nelson, he by John Nelson 187. None of the stallions brought to California before 1870 are perpetuating in the male line, with the exception of George M. Patchen, Jr., with his great grandson, General Logan, and must be viewed as brood-mare sires. John Nelson's immediate produce included—Aurora 2:27, whose record when taken was the fastest for a California bred mare; C. S. Crittenden's Memo 2:30; Governor Stanford 2:27½, of whom before; and Nerea 2:23½. Nerea was one of the first California breds campaigned in the East, being driven by Budd Doble, and without the records at hand, the writer recalls her as the fastest, or one of the fastest, green mares of 1875. He also sired the fast ones for that day without records—W. H. Shear's Governor Irwin, General Colton's San Francisco road mare Crazy Jane (dam of Adolph Spreckels' Hortense), and Lady Nelson (the latter being out of the dam of Maid of Oaks 2:23). He was the sire of the dams of Daisy 2:38½ (Prompter-Bonnie), world's champion yearling pacer in the eighties; Sister V. 2:18½ (Crown Point-Nettie Lambert), first of the Sidneys to go into the 2:20 list; Albert W. 2:20 (Electioneer-Sister); Alexander Button, Jr., 2:26½ (Alexander Button-Kate Kearney); Bonanza 2:29½ (Arthurlton-Sister); Valensin 2:23 (Crown Point-Nettie Lambert); Arol 2:24 (Electioneer-Aurora); Maud Y. 2:20½ (Dexter Prince-Nelly Nelson); Hazel 2:23 (Clay-Aurora); Blanche 2:25½ (Grey McClellan-the Bihler or John Mackey mare); Telegraph 2:32 (Tilton Almont-the Hamilton mare), a good two-mile horse; Lady Hayes (Hiram Tracy-the Wilson mare), a fast mare without record, who was second in a heat won in 2:23½ at Sacramento in 1882, and many others trotted on the California bush tracks. Nelson was accredited in the contemporary summaries as the sire of the dams of Fred Ackerman 2:23, Lookout 2:25 and the fast pacer on the California circuit in 1892, Dr. Swift 2:13. However, American Girl, the dam of the latter, is registered as by Boon's Young America, but the Year Book has given her as by George M. Patchen Jr. Nelson's descendants are widely scattered, Young Wildidle (26,722) 2:22½, being as far East as Vermont, the putative home of Nelson's dam, and as far West as Australia, some being owned by R. O. Duncan and James Pettie of New Zealand and Dugald Taylor of Melbourne. Of great horses of recent date in whose pedigrees the name of John Nelson occurs are the following: Kentucky Todd 2:08½, who for a short time in 1907 held the world's record for three-year-old stallions, winners of two futurities, and who will head the show place and foremost trotting breeding establishment of Canada, Miss K. L. Wilks, Cruickston Park, Galt, Ontario; Icon 2:10, with the best time made by a four-year-old filly in a race in 1907; Athasham 2:09¼, fastest five-year-old stallion of 1907; Bonalet 2:09¼, ex-queen of three-year-old pacers; Waldstein 2:22½, late holder of world's five-mile trotting stallion record; Tags 2:11½, with whom C. B. Bigelow held up California pacing glories in the East a few seasons ago; Lady Search, whose picture appeared recently in the Breeder and Sportsman, and is regarded as being one of the finest individuals of her age in the State, her dam being Winnie Wilks 2:17½, a mare that had two-minute speed; Neereta 2:09½, universally acknowledged in 1900 as the greatest trotting mare on the turf; Paronella, who, as the dam of Kentucky Todd 2:08½, Country Jay 2:10½, who repeatedly beat 2:10 in lost heats, Judge Parker 2:10½, who raced brilliantly last year, and could beat 2:10, and Ormonde, who is known to have trotted in 2:10, leads all broodmares as a producer of 2:10 speed; Little Albert 2:10, whom the late Monroe Salisbury said was the gamest and most consistent trotter with which he ever crossed the Rockies, and who recently held the world's trotting race record for geldings; Nogi (3) 2:17½, winner of the three-year-old division of the Pacific Breeders' Futurity Stakes of 1907, and a good sized 2:15 list. Whether John Nelson is close up in the world's fastest, Lou Dillon 1:58½, through her second dam, the W. C. Ralston mare, is unestablished, but the evidence, and especially that of Sam Gamble, who ought to be as satisfactory a witness as any, makes it unquestionable in the minds of some California authorities that she had the Nelson cross. With such stallions now in the State carrying Nelson blood as Bonny McKinney 41383, Lord Dillon 39587, Billups 2:20½, Neernut 2:12½, Goldennut 2:11½, Robin 2:22½, Athasham 2:09¼, Charley D., the pioneer's name and honor will be carried on in the next half-century as it has been in the past. It means stoutness and gameness.

HORSEMAN'S HANDBOOK JUST OUT.

The new edition of the Horseman's Handbook is just off the press. It contains the revised racing rules of the American Trotting Association, tables showing the champion records of the year, leading progenitors of speed, all the futurity and stake winners since these classics were inaugurated, as well as other tables of interest, and chapters on how to take care of stallions, brood mares, breaking and training of colts, and many other subjects of interest to the horseman that can be seen at a glance. This handy little volume can be had by addressing this office, paper cover 50 cents, leatherette \$1.00, sent postpaid. Every horseman who wants to be thoroughly posted on the rules and records ought to carry one of these books in his pocket.

LAMENESS TRACED TO UNBALANCED FOOT BONE.

Navicular disease is a disease characterized by inflammation, acute or chronic, of the lower portion of the sesamoid sheath of the perforans tendon, that portion of the tendon itself, and of the gliding surface of the navicular bone over which the perforans tendon plays. This disease is almost exclusively confined to the front feet of horses.

Navicular disease is also known as navicular arthritis and coffin joint lameness. The disease may begin in any one or all of the above named structures, and while the location of the lesion may be limited at first, the disease may be extended by inflammation of the neighboring structures.

Navicular disease has existed from the earliest history of veterinary medicine and has at all times been one of the most serious and common forms of lameness to which the horse is subject. The causes are numerous and at times obscure, and for the purpose of study may be divided into predisposing and exciting causes. As to predisposing causes, domestication and work are certainly potent factors in the cause of navicular disease.

In domestication the animal is subject to alternate periods of enforced rest and excessive activity, while in the wild or natural state this is not so. Under natural conditions, the wear of the hoof is commonly such as to maintain the proper balance of the foot.

Heredity has been named as a cause of navicular disease, but there is no positive evidence that the disease itself is ever inherited. However, as vices of conformation are surely transmitted to a greater or less degree, and as conformation is to a degree a factor in the production of navicular disease, therefore the heredity may be only responsible indirectly.

Such conformation as tends to throw undue weight upon the perforans tendon and its sheath, as well as upon the navicular bone, as is the case in abnormally slanting fetlocks, predisposes the animal. Fetlocks that are too straight may be predisposed on account of the jar or concussion. The first symptoms may be an irregular lameness, so slight and fugitive in character that the driver is puzzled to account for it; the horse may be slightly lame at once, and on watching closely it may fade away in a few steps and the animal go as well as ever. This lameness may appear again during the same drive or may not be noticed for a variable future time. Whatever may be the length of the attack, in most cases, the frequency of its return becomes greater until after a period varying greatly, from a few weeks to perhaps several years, the lameness remains, varying only in intensity to the symptoms.

Examination of the foot and the use of the hammer and pincers, in determining the seat of tenderness, as a rule give negative results. The diseased foot may be warmer than its fellow or the animal may stand with its lame foot pointed forward and may elevate the heel; but these symptoms are also seen in other diseases of the feet, as an unbalanced foot bone, a loss of balance from toe to heels, or an unequal balance of the foot in its lateral aspects, all of which tend to bring on the so-called corn or ruptured lamina we find on the heels.

If the pain be of like intensity in both feet at the same time, it will cause the animal to move with a stiff, stubby gait and wear off the shoes at the toes. Stumbling in traveling is a common symptom of these troubles.

Do not make the mistake of declaring the common lameness to be in the shoulders, as is so frequently done. Remember that shoulder lameness is very rare and seldom exists at all except from direct injury to the shoulders, as from some violence, a collision or from rheumatism. Contraction is a common complication of navicular disease, and when it exists, of course, it makes the case difficult to treat. The point which requires emphasis is that contraction is generally the result and not the cause of lameness and disease. A badly contracted heel will never expand if the animal stands with its heel elevated from the ground, or if in walking it throws the greatest possible weight on the toe.

One of the most important points in the science of horseshoeing lies in balancing the foot for the reception of the shoes. If the horse is wearing his shoes level from the toe to heel, the weight is equally distributed to all parts of the feet and legs at each footfall. Seventy-five per cent of lameness in the feet and legs can be traced and located to an unbalanced foot. First find the cause and then remove it. A close observer never finishes learning horseshoeing, and no one man knows it all. The world moves in every department of mechanics and in all professions, and the shoer must keep up with the march of improvements. So keep close to nature, for she makes no mistakes, and in all her work I do not think that she has planned and builded a more beautiful structure than the little piece of mechanism with which we have to deal, namely, the foot of the horse.

D. J. O'KEEFE,
Woodland, Cal.

\$41,000 IN PURSES AT COLUMBUS.

Don't fail to read the half-page announcement of the Columbus, Ohio, Driving Association's meeting to be held from September 21st to October 3d this year. Entries close April 20th. The 2:16 trot is worth \$10,000 and the 2:12 trot \$10,000. There are three purses of \$5,000 each, and two of \$3,000 each. You can find out all about them in the big ad on page 19.

A LITTLE DISCUSSION ON ADVERTISING.

This has been called the age of electricity, the age of steel, the age of progress, and numerous other sorts of age, but while perhaps none of those titles are misnomers they are, nevertheless, only nicknames, for this is, in fact, the age of advertising.

Advertising has come to be a profession, one of the fine arts, and the difference between good advertising and bad spells the difference between success and failure. The old days of the "We beg to announce" advertisement, along with the "I take my pen in hand" style of starting an epistle, together with the stage-coach, the side-delivery reaper, the bob-tail horsecar and the packet ship, belonged to our grandfathers, and even Father Time has swapped his old back-breaking scythe for a McCormick mower and his wasp-waisted hour-glass for a Jules Jorgensen chronometer, and has had the lace curtains under his chin trimmed to a Van Dyke point. More money is used in one year in the United States of America for advertising than would be necessary to cancel the whole of the National debt and pay the expenses of the next Presidential campaign. And most of this vast sum is not wasted but only lent, and is returning to the investors' interest at a greater rate than your uncle at the sign of the three balls would charge on a ten days' loan.

Advertising has long since passed the experimental stage. It has become the Polar Star toward which the needle of successful business points unerringly. Time was when a man could plod along on foot and keep up with the procession, but now the cavalcade moves swiftly to lively music and the man or firm that does not advertise early, late and all the time will soon find that the only procession that he or they can march with is following the hearse corpses of dead concerns and the dirge is the dead march of the busted—stiffs killed in the rush of modern business. When Robert Bonner asked Horace Greeley what he would charge for the front page of the Weekly Tribune (then the paper which the stalwart, old-fashioned farmers from the Penobscot to the Kalamazoo read, digested and believed, religiously every Sunday—after family prayers—from Genesis to Revelations; including the advertisements), the patriarch stroked the fringe of whiskers on his neck and said, "Robert, have you gone mad?" But Robert with his North-of-Ireland shrewdness knew a good thing even before he saw it and when Mr Greeley said, under pressure, "\$4,000," Mr. Bonner wrote his check forthwith, and in one week had it back and over \$5,000 in interest. Good business? What? But then, as now, advertising to pay and keep paying must advertise a good thing. "You can fool all the public some of the time, and some of the public all the time, but you can't fool all the public all the time" was true in Abraham Lincoln's time, and it is trebly true in the year Anno Domini 1908. Why? Because the average person knows more nowadays than the average person did then. There are multitudes of boys, just average, bright, up-to-date boys, who could beat old man Solomon at any old game he might mention, and teach him kinks in other games he never dreamed of. So the modern advertiser has to deal, not with a lot of suckers, nor with a lot of incredulous numbskulls, but with bright people who want good things, but are "from Missouri" and the advertiser must have a good thing, or he is either wasting his money or beating the printer man out of his bill. Of course, there is a sort of knack to good advertising, a knowledge of how to get a kind of jiu jitsu hold on the great public, but that is only a detail; the essence of the matter is to have the goods to deliver, for without that, advertising is like a ship with big sails and no ballast. Satisfied customers are the reserve funds of any business, the more you have the better will your statement look at the end of the year. Of the details of advertising I will say nothing, but as Mike Bowerman says of himself and training trotters, "Being still young and somewhat inexperienced in the business," I will pass.

But I cannot sign this effusion without calling attention to a few instructive points, to wit: Recently, The Harvester, an untired three-year-old trotting bred colt, sold in the Garden for nine thousand of the best. Why? To be sure he was about the best bred colt yet produced, and about the most perfect individual anybody ever saw, sixteen hands but looked fifteen-two, so well proportioned was he, but what would he have brought if he had not been advertised? I heard one man say that "Mr. Uihlein paid \$4,000 for the colt, and \$5,000 for John Span's

story, which had been printed in every horse paper of any note in the universe. Granted. For it is a fact, or I believe it to be a fact, that Mr. Uihlein bought the colt because Mr. Splan wrote him the story in a personal letter and advised him to buy the colt, and he would not have stopped bidding yet if there had been any one game enough to drive him out. So probably Splan's story was true and Mr. Uihlein and many thousands of other people, at home and abroad, have found that Splan's stories, which he has been telling for half a century or less, have been true. But Mr. Uihlein did not pay a dollar more for The Harvester than he was forced to pay by other men of means, who had read the advertisements. All the runners-up, so far as I know, coveted the great colt principally because they had read the advertisements.

"But," some dyspeptic pessimist—all pessimists are dyspeptics—may say, "that sale was only a single instance." True, one pee-wee does not make good hay weather, nor a solitary snowbird bring steady sleighing. So may I refer you to a few things which have been advertised for so long a time that their names are as fixed on the mental vision of the public as the figures on the wall paper are on the eyes of a sick man. I will not describe any of these but trust to your memory to discover the articles alluded to. And each of these I am told sold better and more extensively last year than ever before, and each firm I believe advertises more extensively year after year. Persistent advertising—satisfied customers. Great combination. The very best. Absolutely. The writer was standing, not so long ago, under a dim street lamp in the city of Dublin. Even with his eyes was a sticker on the lamp-post. All that he could see to read was this legend, "It Floats." Query? What did the sticker advertise? Every one knows. Why? Because Proctor & Gamble advertised.

You go into a drug store anywhere in the civilized world to buy a cake of toilet soap. Your eye rests on the words, "Good Morning." If Walter Janvier was not, and had not long been one of the most persistent advertisers in the world, you might have not bought the cake of Pears, but have taken one of the forty other varieties so temptingly displayed.

When you feel bilious and quite out of sorts you drop into the Deutsche Apotheke on the corner to invest in a cathartic. The first thing that meets your eye, for the ten thousandth time, is "Worth a Guinea a Box."

If the people who made those words familiar to every person who can read in any language on earth had not pursued that course, would they be making and selling six million boxes a year? Moral: If you have a good thing, obey the Scriptural injunction not to "hide your light under a bushel," but advertise.—A. T. Stark, in Trotter and Pacer.

WHEN KNOCKING FORTUNATELY FAILED.

It don't pay to "knock." The "knocker" don't make anything by it, and the "knockee" is often severely injured, as is also the "knocked." I want to cite a couple of instances to show what mischief can be accomplished by the practice when the "knockers" succeed in their work. In these cases they were not successful, which proved to be most fortunate:

One Sunday in the early spring of 1904 Ray Mead, then of San Francisco, journeyed to Pleasanton for the purpose of selecting a stallion to mate with his good young mare Carrie B. by Alex. Button, dam Carrie Malone, dam of two by Steinway 2:25½, second dam the great Katy G., dam of Klatawah 2:05½, and six others by Electioneer. I met him and he made known to me his desire to see Searchlight 2:03½, stating that he had a mare he wished to breed to some good horse. When I found that his mare was Carrie B. I was particularly anxious that he should decide upon the great son of Darknight, as I considered Carrie B. a high class young mare and one that by breeding and individuality had a right to produce something better than ordinary, particularly if bred to the greatest stallion in California, and I made up my mind not to let the "knockers" get at him, if it was possible to avoid it.

After showing him Searchlight and Lecco, I took him the rounds and showed him every stallion on the grounds. At noon I took him down to the Rose Hotel for lunch and then we came back to the track, but in spite of my vigilance he got away from me two or three times for a short while, and

I guess he did it for the purpose of getting some outside information, and "he got it." Before he left for home that evening every "knocker" on the track knew he had a mare to breed, and they got their work in good and plenty. It is a well known fact that there never was a stallion in California that received the "knocking" that Searchlight did while he was here. And it is most gratifying to me that now those who were so envious of the "King of race horses" that they would maliciously go out of their way to hit him a lick must take their hats off and own that he is the greatest of them all.

In spite of all the hard and untrue things Mr. Mead heard that day about Searchlight, he sent Carrie B. to him and the result is Ray o'Light (2) 2:13½, the champion two-year-old pacer of 1907. Had the "knockers" succeeded that day, Searchlight would have one less champion to his credit, Carrie B. would not have become the dam of a champion, Ray Mead would not have bred; E. S. Train would not have owned, and Charley Whitehead would not have driven the champion two-year-old pacer of 1907. Mr. Mead told me afterward how many hard things he heard said of the great pacer that day, and asked me why it was that so many had their hammer out for him. I told him that it was because they were envious of the greatest horse in the world, and it made them mad to see him getting all the good mares in California.

In the early part of March, 1903, Mr. J. W. Marshall of Dixon, Cal., brought his mare Trix by Nutwood Wilkes to Pleasanton to breed her to some good sire there. Upon his arrival he had not decided upon what horse to use. Accompanying him was E. D. Dudley with his good broodmare Bee, dam of four, by Sterling. Mr. Dudley's mind was made up to breed to Searchlight, and he did so, the result being a filly that worked a mile in 2:13 as a two-year-old, but met with an injury before her engagement in the Breeders' Futurity of 1906 and was unable to start. Had she started she would more than likely have made Aerolite go better than 2:15½, his two-year-old record. Mr. Dudley tried to persuade his friend Marshall to breed Trix to Searchlight, but the stories he had heard about that horse's no-account colts and his man-eating disposition made him loth to do so, but he finally yielded to his friend's persuasion, and Trix was mated to the "King," the result being the great colt Aerolite, probably the greatest pacing colt ever foaled, the best matured and grandest individual any man ever saw for his age, and undoubtedly a 2:00 pacer in his four-year-old form. Even after Mr. Marshall had bred to Searchlight he was dissatisfied, and up till the time Aerolite began to show phenomenal speed in his two-year-old form would have sold him very cheap. Had the "knockers" triumphed in the Marshall case there would have been no Aerolite, and that gentleman would not to-day own the best 2:00 pacing prospect in the world and a coming world's champion, and my old friend James Sutherland would never have had the pleasure of riding a mile in 2:05½ behind a three-year-old, probably the record mile of his life. C. C. C.

Betting is legalized in England and at the same time pool rooms or their equivalent are suppressed. In France the government licenses racing and accepts a large revenue from the betting of the game, which is conducted on the pari-mutual system. In the last seventeen years the French Government has been able to distribute more than \$18,000,000 received from betting, among charitable organizations and for the improvement of irrigation. In Germany the same arrangement prevails. It was stated recently that a number of bookmakers in Germany were convicted and sentenced to jail, but they were punished for the sole reason that they did business outside of the race courses and paid no revenues to the government.

THE BEST EVIDENCE.

The proof of the popularity and desirability of an article is always to be found in the demand for it. The demand for the No. 15 "Perfected" Racing Sulky, together with the Buckeye Carts and Speed Wagons made by the McMurray Sulky Co., Marion, O., is proof positive that they are popular, becoming more so every day. It is our candid opinion that any man having need for anything in the way of Sulky, Cart, Speed or Road Wagon, should by all means get a catalogue from the above firm. It will pay you. Mailed free upon application. Orders placed at this time can have special attention given to the finishing, etc., which is quite an advantage to the purchaser.

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often. —W. H. RAYMOND, Prop., Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it. —F. C. CRAWER, Training Stables, 990 Jennings Street, New York City.

KELLEY, 363 Pacific Building, San Francisco.**

Ellis' Improved
Hutton Patent
Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

DEL CORONADO 2:09 $\frac{3}{4}$

CARLOKIN 2:13 $\frac{1}{2}$

COPA DE ORO 2:07 $\frac{1}{4}$

Del Coronado 2:09 $\frac{3}{4}$

Reg. No. 45122. By McKinney 2:11 $\frac{1}{4}$, dam Johanna Treat by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carloklin 2:13 $\frac{1}{2}$

Reg. No. 36458. By McKinney 2:11 $\frac{1}{4}$, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carloklin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07 $\frac{1}{4}$

By Nutwood Wilkes 2:16 $\frac{1}{4}$, dam Atherine 2:16 $\frac{1}{4}$, by Patron 2:16 $\frac{1}{4}$ (son of Pancoast 2:21 $\frac{1}{4}$ and Beatrice, dam of Prodigal 2:16 $\frac{1}{4}$); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3 $\frac{1}{2}$ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or bopples. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequaled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27 $\frac{1}{4}$ by Dawn 2:18 $\frac{3}{4}$. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

R. O. NEWMAN, - - - Visalia, Cal.

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12 $\frac{1}{4}$

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08 $\frac{1}{4}$ (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 3-year-old record of her day. She is the dam of four and grandam of 12 in the list. Will make the Season of 1908 in charge of

Next dam Green Mountain Maid, dam of Electioneer and of nine in the list. Iran Alto is the sire of Dr. Frasse 2:11 $\frac{1}{4}$, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.
TERMS: \$30 for the Season. Usual return privilege.
Pasturage \$3 per month.

H. S. HOGBOOM, Woodland, Cal.

Washington McKinney 35751

Black stallion sired by
McKINNEY.....2:11 $\frac{1}{4}$
First Dam
Lady Washington 2:35
by Whipple 8956
Dam of
George W. McKinney 2:14 $\frac{1}{4}$
El Molino 2:20
Idle Gossip (trial) 2:25
Washington McKinney
Sire of
Lady McKinney 2:19 $\frac{1}{4}$
McKinney Belle 2:30
Second Dam
Lady Mayberry
Grandam of
Dubec 2:16
Mista 2:29
by
Chieftain 721
4 in 2:30
Sire of dams of
Mount Vernon 2:15 $\frac{1}{4}$
and 18 more in 2:30

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: \$35. Return privilege Apply to **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for \$3.50 per month at owners' responsibility and risk.

Athasham

Race Rec. 2:09 $\frac{1}{4}$,
Reg. No. 45026.

A Game Race

Horse in the Stud

Bay stallion, stands 15.3, weighs 1,150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 $\frac{1}{4}$, Athasham 2:09 $\frac{1}{4}$, Sue 2:12, Listerine 2:13 $\frac{1}{2}$ and 8 others in 2:30); dam, the great brood mare Cora Wickersham (also dam of Nogi (3) 2:17 $\frac{1}{2}$, winner of 3-year-old trotting division Breeders Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22 $\frac{1}{2}$ (sire of dams of Geo. G. 2:05 $\frac{1}{2}$, etc.). Athasham has a great future before him as a sire. He is bred right and made right, and has every qualification one can expect in a sire. He has been timed in 2:06 $\frac{1}{4}$ in a race, and his courage is unquestioned.

He will make the Season of 1908 at **Orchard Farm, Fresno, Cal., for a Fee of \$50**, with usual return privilege.

For further particulars address this place, care of

CHAS. MIDDLETON, Manager,

Or **D. L. BACHANT, Owner, R. 1, Fresno, Cal.**

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11 $\frac{1}{4}$, the greatest sire of extreme speed living. Dam Helena 2:11 $\frac{1}{4}$, dam of Wild Nutting 2:11 $\frac{1}{4}$, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04 $\frac{1}{2}$; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinneys. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

ALMADEN 2:22 $\frac{1}{4}$ (At 2 years)

By the great **DIRECT 2:05 $\frac{1}{2}$** . Dam by **McKINNEY 2:11 $\frac{1}{4}$**
Sire of 12 in the 2:10 list. Sire of 17 in the 2:10 list.

All money winning race records.

The only combination of these two great producers, and the only trotting stallion of class out of a McKinney mare. Be progressive and breed your grand-daughter of McKinney to Almaden and get in line for grand circuit winners. Almaden has every point of a great sire, no horse can show a more promising lot of foals, age considered. Fee: \$40 for the Season. Usual return privilege.

226 LANSING, Upper Stockton Road—Race Track Cars.

M. L. LUSK, Sacramento.

CHESNUT TOM 88484

Race Record 2:17 $\frac{1}{4}$. Trial 2:14.

Sired by Nutwood Wilkes 2:16 $\frac{1}{4}$ (sire of John A. McKerron 2:04 $\frac{1}{2}$, the fastest trotting stallion of the Wilkes family). Dam Zeta Carter by Director 2:17 (sire of dam of John A. McKerron 2:04 $\frac{1}{2}$); grandam Lida W. 2:18 $\frac{1}{2}$ by Nutwood 600. Chestnut Tom won the 224-trot at Salinas, 1906, in three straight heats.

Season of 1908 at **STOCKTON, Cal.** Terms: \$30
Address, the owner, **GEO. T. ALGEO, 120 So. Center St., Stockton, Cal.**

DO YOU WANT THE BEST?

BREED YOUR MARES TO

ZOMBRO 2:11

Son of McKinney 2:11 $\frac{1}{4}$ and Whisper by Almont Lightning.
SERVICE FEE—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Bellemont 2:09 $\frac{1}{4}$, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08 $\frac{1}{2}$, holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list, ten in the 2:15 list and seventeen in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices. Address.

GEO. T. BECKERS,
3949 South Figueroa Street,
Los Angeles, Cal.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Spavins, Curbs, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

"Mr. H. E. Clark, Fredonia, N. Y., writes: 'The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever.'"
Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

W. B. EDDY & COMPANY, WHITEHALL, N. Y.

Bonny McKinney 41383

Son of
McKinney 2:11 1/4

World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03 1/4
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13 1/4 (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11 1/4, trial 2:05 1/4. Dam Rita B. by Boodle Jr.; 2nd dam Gablian Girl by Gablian; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse. January 1st to July 1st.

Money returned in case mare does not get with foal. Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

Alconda Jay 46831

The Blood That Produced LOU DILLON 1:58 1/2 and SWEET MARIE 2:02

GRECO B. 43129

Trial 2:12 1/4

Black colt, foaled 1900. Sire McKinney 2:11 1/4, sire of Sweet Marie 2:02, 17 in 2:10 list, world's champion sire of speed. Dam Aileen 2:26 1/4 (dam of Mowitza 2:20 1/4, Sister 2:20 and Greco 2:32, trial 2:20) by Anteo 2:16 1/4, sire of dams of Directum Kelly 2:08 1/4, Grey Gem 2:09 1/4, W. Wood 2:07, etc. Grandam Lou Milton (dam of LOU DILLON 1:58 1/2, Redwood 2:21 1/4, etc. Greco B. is a handsome young stallion and a splendid representative of the McKinney family. His oldest colts are 3 years old, only two have been trained and they show 2:20 speed at the trot.

Will make the Season of 1908 at the State Fair Grounds, Sacramento

Fee: \$40. For particulars call or address

JOHN QUINN,

3710 Cypress, Ave., Sacramento, Cal.

NEAREST McKINNEY 40698

Brown horse, 5 years old, stands about 16 hands high, sired by McKinney 2:11 1/4, the greatest living sire of 2:10 speed, sire of Coney 2:02, Sweet Marie 2:02, China Maid 2:05 1/4, Zolock 2:05 1/4, Fou Bet 2:07 and 12 others in 2:10 list. First dam Maud J. C. by Nearest 2:22 1/4, the first eight-year-old horse to get one below 2:10, sire of Alone 2:09 1/4, Just It (3) 2:19 1/4, High Fly (2) 2:24 1/4, and brother to John A. McKerron 2:04 1/4, the fastest trotting stallion of the Wilkes tribe.

Second dam Fanny Menlo, dam of Cladius 2:13 1/4, by Menlo 2:21, by Nutwood 2:18 1/4, greatest broodmare sire in the world.

Third dam Nellie Anteo by Anteo 2:16 1/4, sire of Antezella 2:10 1/4, Angelina 2:11 1/4 and 52 others, dams of Sonoma Girl 2:05 1/4, W. Wood 2:07, Directum Kelley (4) 2:08 1/4, 24 others in the 2:30 list, and grandire of Tuna 2:08 1/4 and Brilliant Girl 2:08 1/4.

Fourth dam Fanny Patchen, dam of California Nutwood 15119, sire of Maud C. 2:15, Annie C. 2:23 1/4 and dams of Georgie B. 2:12 1/4, Irvington Boy 2:17 1/4, Central Girl 2:22 1/4, and L. E. C. 2:29 1/4, by George M. Patchen Jr. 2:27.

This is the only stallion living or dead that carries the five great crosses—Nutwood 2:18 1/4, Guy Wilkes 2:15 1/4, Director 2:17, Electioneer and McKinney 2:11 1/4.

Will Make the Season of 1908 at San Jose.

Nutwood Stock Farm, Irvington, Cal.

A GOOD ELECTIONEER - McKINNEY CROSS

McMyrtle

By **McKINNEY 2:11 $\frac{1}{4}$**

DAM

Myrtledale

by Iran Alto 2:12 $\frac{1}{2}$

Second dam Nettie Nutwood (dam of Hillsdale 2:17 $\frac{1}{4}$ and of the dam of Sterling McKinney 2:09 $\frac{1}{4}$) by Nutwood 600.

He is a beautiful bay and stands 15.3 hands. His trotting action is perfect. It is my intention to have him trained. I believe he will get as low a record as any McKinney. With three months work last year he showed miles in 2:18 $\frac{1}{4}$ at 3 years old.

Season of 1908 at **Race Track,**

SANTA ROSA, Cal.

Mares kept on pasture for \$3 per month.

For further particulars address

JOHN GRIMES, Owner, Petaluma, Cal.

Fee: \$30.

The Standard and Registered Trotting Stallions

On Stanley 3-y.-o. Record 2:17 $\frac{1}{2}$

Reg. No. 31051.

By Direct 2:05 $\frac{1}{2}$ (sire of 11 others in 2:10 list, 32 in 2:30 list), dam Lilly Stanley (dam of Rokeby 2:18 $\frac{1}{4}$, Rect 2:16 $\frac{1}{2}$ and On Stanley 2:17 $\frac{1}{2}$) by Whippleton 1883, etc. On Stanley is a rich seal brown, stands 15.3 hands, weighs 1100 pounds. Pure gaited trotter. Magnificent individual.

Larry Kinney 43322

By **McKINNEY 2:11 $\frac{1}{4}$**

Dam **Baby's Gift**

(dam of Hazel Kinney 2:09 $\frac{1}{4}$ and Nina Bonita 2:27) by Christmas 2233, etc.

TERMS.

Either Horse, \$25 for the Season. Usual return privilege.

Apply to or address

VICTORIOUS AT ROCHESTER

WINCHESTER

Cartridges and Rifles Take Leading Honors

Winchester Cartridges and Rifles again demonstrated their exceptional shooting qualities at the Fourth Annual Tournament of the Indoor .22 Caliber Rifle League, held in Rochester, N. Y., Jan. 27-Feb. 1, making new World's Records and winning in the majority of the events, as follows:

Continuous Match—R. Gute, First (tie) four perfect scores of 75.

Bullseye Target—R. Gute, perfect target of O, a World's Record.

Skiddoo Match—R. Gute, First (tie) four perfect scores of 75.

Championship Match—R. Gute, tied for second place, score 2460.

Rapid Fire Match—Harry Harrison, First, 81 shots in one minute, score 570. This is a World's Record. Mr.

Harrison also made a new World's Rapid Fire Record, firing 101 shots in one minute.

Both Mr. Gute and Mr. Harrison used Winchester Cartridges, and the latter also used Winchester Rifles. The increasing popularity of Winchester Cartridges was evident by the fact that more participants used them than any other make. Their phenomenal showing at this important tournament proves the superior qualities of the Red W. Brand.

All Purses will be for the Amounts Stipulated, no more, no less.

FIRST WEEK, SEPTEMBER 21 TO 26.

No. 1. \$10,000.	The Hoster Cols. Breweries Purse.	2:16 Class Trotting 3 heats.
No. 2. 5,000.	The Hotel Hartman Purse.	2:14 Class Pacing 3 heats.
No. 3. 3,000.	The Columbus Purse.	2:09 Class Trotting 3 heats.
No. 4. 3,000.	The Board of Trade Purse.	2:07 Class Pacing 3 heats.

The Kentucky Stock Farm Futurity Will Be Raced This Week.

SECOND WEEK, SEPTEMBER 28 TO OCTOBER 3.

No. 5. \$10,000.	The B. & B. Purse.	2:12 Class Trotting 3 in 5.
No. 6. 5,000.	The King Purse.	2:06 Class Pacing 3 in 5.
No. 7. 5,000.	The Buckeye Purse.	2:19 Class Trotting 3 in 5.

The Horse Review Futurity Will Be Raced This Week.

CONDITIONS.

Entries close on Monday, April 20th, at 11:45 p. m., when horses must be named. No liability for entrance money beyond the amount paid in, if the Secretary is notified in writing on or before the time the next payment falls due, but no entry will be declared out unless the amount is paid up in full to date of withdrawal.

No. 1, 2, 3, 4 Entrance Fee will be five (5) per cent of the purse, and three (3) per cent, deducted from money winners on the amount of each heat raced for.

No. 5, 6, 7, 5 per cent to enter and 3 per cent from money winners. More than one horse may be named in a class from the same stable, but two (2) per cent of the purse additional will be charged for each horse so named. Positions will be drawn by the drivers before the start of the first heat. In the succeeding heats horses will start as they finished in the preceding one.

We reserve the right to reject any entry or declare off.

No. 1. The Hoster Columbus Breweries Purse will be divided as follows: \$2,666.67 to the heat; \$1,500 to the first horse in each heat, \$620 to the second, \$300 to the third, and \$246.67 to the fourth horse. \$2,000 will be set aside for a Consolation Race, open only to horses that start and do not win over \$426.67 net in the Main Race, to be trotted three days from the decision of the first race. To be divided \$600 to the heat; \$250 to the first horse in each heat, \$200 to the second horse, \$150 to the third horse, and \$200 added to the winnings of the horse standing best in the summary at the end of the last heat. In the event of there being less than three horses eligible to the Consolation Race there will be paid to the second horse in each heat in the Main Race the sum of \$180. To the third horse in each heat \$100. To the fourth horse in each heat \$75. To the fifth horse \$200, and the sixth horse \$111.67. Less \$20 each time given any one of these amounts.

No. 2. The Hotel Hartman Purse will be divided as follows: \$1,333.34 to the heat; \$750 to the first horse in each heat, \$310 to the second, \$150 to the third, and \$123.34 to the fourth horse in each heat.

\$1,000 will be set aside for a Consolation Race, open only to horses that start and do not win over \$213.34 net in the Main Race, to be paced three days from the decision of the first race, and to be divided \$300 to the heat, \$125 to the first horse in each heat, \$100 to the second horse, and \$75 to the third horse, and \$100 added to winnings of the horse standing best in the summary at the end of the last heat. In the event of there being less than 3 horses eligible to the Consolation Race there shall be paid to the second horse in each heat in the main race the sum of \$90, to the third horse in each heat \$50, to the fourth horse \$37.50, to the fifth horse \$100, and to the sixth horse \$55.83, less \$10 each time given any one of these amounts.

Nos. 3 and 4. The Board of Trade and Columbus Purse of \$3,000 each, will be divided as follows. \$1,000 to the heat; \$500 to the first horse in each heat, \$250 to the second horse, \$150 to the third horse, and \$100 to the fourth.

Nos. 1, 2, 3 and 4 will be raced on the Novelty Plan of Three (3) Heats, of one mile each, to the race, with the distance rule of the American Trotting Association applying in each heat. Should two or more horses stand alike in the summary at the conclusion of the third heat they must race the fourth heat to decide who wins the race and to decide the betting. Should there be a dead heat between two or more horses in any heat, the money will be divided equally between them. The winner of the race will be the horse winning the largest amount of the entire purse.

Nos. 5, 6 and 7 will be mile heats, best 3 in 5 in harness, unless ended sooner shall end at the conclusion of the fifth heat, the horse standing best in the summary will be declared the winner of the race.

No. 5. The B. & B., The Board of Trade and Bankers Purse, \$10,000, for 2:12 trotters will be divided as follows: \$4,000 to the winner, \$2,000 to second horse, \$1,200 to the third horse, \$1,100 to the fourth horse, \$900 to the fifth horse, and \$800 to the sixth horse in the summary.

No. 6. The King Purse, \$5,000, for 2:06 pacers, and No. 7. The Buckeye Purse, \$5,000, for 2:19 trotters, will be divided as follows: \$2,000 to the winner, \$1,000 to the second horse, \$600 to the third horse, \$550 to the fourth horse, \$450 to the fifth horse, and \$400 to the sixth horse in the summary.

PAYMENTS DUE.

ONE OF THE PECULIAR PHASES of almost every controversy carried on through the columns of turf papers, is the proneness of controversialists (in their eagerness to score points in favor of their cases, and defend their own theories) to make statements of entirely too extravagant a nature, statements that cannot be proven by the facts or the records pertaining to the case. Whether it be the "developed-dam" theory, or the "thoroughbred-cross-in-the-trotter" question that is up for debate, there is generally a wild fusillade in which many of the shots are poorly aimed and others fired on the Irishman's plan of hitting every head in sight without regard to ownership. In an article which appeared in the Breeder and Sportsman of March 21st under the head "Thoroughbred Sires Not Wanted" there were a few statements of this nature which in our opinion were better left unsaid, as they were not fully justified by the facts, although they may have been made in good faith. As the readers of this journal are fully aware we have, since the first steps were taken to establish "breeding bureaus" in New York and other Eastern States, and more recently in California, strongly advised the farmers and stock breeders who own trotting bred mares and those of the draft type, against sending them to the bureaus' thoroughbred stallions, no matter if they were offered the services free or for a merely nominal figure. Our argument has been that the different types of horses are so well established that it is breeding backward to infuse at this late day strains that are now so foreign, even though they may have been and undoubtedly were of great value at one time in the creation of certain qualities. Thoroughbred blood was used by the pioneers who founded that noble equine family commonly called

the Percheron or Norman, but the breeder who would now send his Percheron mares to a thoroughbred stallion with the idea of improving the breed would be considered anything but intelligent, and we hold the same thing should be true of the owner of trotting bred mares. We have taken this stand because we believe that the breeder of any type of farm animal should aim to go forward instead of backward. At the same time we deem it unwise to condemn the bridges that have carried us safely over or the materials that once served their purpose well, even though they are now out of date. The old Springfield rifle served the United States well, but because we have advanced to the modern repeating rifle is no reason for maligning the gun that helped save the Union. The old flint-lock even is worthy of our esteem and praise as the best of its time, and it might well be called the fifth or sixth dam of the Winchester, Marlin, Krag-Jorgensen, etc. Every person who is at all familiar with the history of the standard bred trotter knows that the very foundation blood of the breed was thoroughbred. Having built up a standard, however, there is no need of new infusions of the hot blood of the desert at this time. It has served its purpose and is out of date. But because it is out of date so far as using it now is concerned, it is not right, nor just, nor reasonable to belittle the work of the early breeders whose time and money and brains were used to build up and perfect the grand and useful breed now known as the standard bred. Some of the statements in the article in question, which we particularly object to, were the following:

"The late Senator Leland Stanford must have expended \$250,000 to get a Palo Alto 2:08¾, a very game trotter, although his legs gave way in training. Yet he never sired a trotter that could come within five seconds of his record."

"He lived to see how uncertain were the results of introducing so much thoroughbred blood into the ranks of his brood mares. If he could have lived twenty years longer and bred some of the pure bred trotting stallions to those mares, he might have accomplished something; but twenty years is a long time, and the probabilities are he would have died firmly convinced that he had been misled and had sunk a fortune to find that he was on a 'barren lead.'"

Now the late Senator Stanford did not spend all that money to get a Palo Alto 2:08¾, but he expended it lavishly to improve the breed of trotters according to his own ideas. He had owned some fine and fast trotters that were not game, and he believed that infusions of thoroughbred blood would aid their descendants in carrying their speed a full mile and to go the route. He realized the fact that in those days, before any standard had been established, there were many short bred stallions and mares, lacking in stamina, that at the same time had the most perfect trotting action, and he decided to use thoroughbred blood to give their progeny the qualities they lacked. He bought a number of thoroughbred mares, selecting them carefully for conformation, disposition and natural trotting action, and mated them with Electioneer, one of the greatest gait-controlling stallions that ever lived. One of these mares was Dame Winnie, and she lived to produce five trotters with records better than 2:24, three of which are producing sons, and one a producing daughter. The fastest of her get was Palo Alto 2:08¾, a horse that held the world's stallion record, and was one of the greatest race trotters ever seen on the Grand circuit. Palo Alto died young and left less than sixty foals, but of these sixteen have standard records (a wonderful proportion), one of them, that grand stallion Iran Alto 2:12¼, whose record is certainly within five seconds of that of his sire. Iran Alto is proving a successful sire, his son Dr. Frasse 2:11¼ being one of the gamest trotters that ever looked through a bridle and was a winner at Lexington only two years ago. Senator Stanford bought Sontag Dixie, a mare whose dam was by Billy Townes, a thoroughbred, and whose grandam was by Sir Charles, another thoroughbred, and mated her with Electioneer. She produced Del Mar 2:20 and several others in the list, and Del Mar sired Major Delmar 1:59¾, one of the only two 2:00 trotters ever produced, and it might be well to say right here that Lou Dillon 1:58½, the world's fastest trotter and the first one to cross the two-minute line, was by a stallion whose dam was by a son of the thoroughbred stallion Williamson's Belmont, whose blood is also prominent in the veins of Sweet Marie 2:02, the third fastest trotter and the greatest race mare the world has ever seen. The statement that Senator Stanford, "if he could have lived twenty years longer and bred some of the pure bred trotting stal-

lions to those mares, he might have accomplished something," is certainly very ridiculous in the light of what Palo Alto Farm did accomplish before it was dispersed after the Senator's death. If this world were filled with men who conceived no ideas but those which can be carried out in one generation, or twenty years, or even an ordinary lifetime, there would be little progress. It is the men who plan and build for posterity to whom the world is indebted, and when we read the list of the world's greatest trotters and stake winners, and see the wonderful proportion that trace within two or three crosses to the stallions and mares which Senator Stanford selected or bred with the idea of improving the breed, we know that it is utter nonsense to say that "had he lived twenty years longer he would have died firmly convinced that he had been misled and had sunk a fortune to find he was on a 'barren lead.'" Such statements are of the extravagant sort, to use no harsher term, that are better left unsaid and unwritten, as they surely are not the result of sound and accurate thinking.

THE DRAFT HORSES to be sold at Pleasanton next week should be eagerly snapped by buyers from all over the country. In spite of everything adverse in the way of money panics and dry weather the markets for all breeds of useful horses are advancing and prices are as certain to go higher as the winter will follow the summer and fall. Reports from Oregon and Washington are that horses are in demand there, and at a sale held last week in the Palouse country prices were higher than ever before known. Farm teams were eagerly picked up at \$500 to \$600 per span, and the supply is not equal to the demand.

PACIFIC DISTRICT BOARD OF APPEALS.

A meeting of the Pacific District Board of Appeals of the National Trotting Association was held in San Francisco on Tuesday of this week, members A. B. Spreckels, J. C. Kirkpatrick, B. F. Rush, and Second Vice-President E. P. Heald being present—a full board.

The first case was that of F. H. Burke against the Pleasanton Driving Club. In the 2:20 class trot won by Carlokin at Pleasanton last year, Mr. Burke's mare Yolanda was a starter, and in the first heat fell just after passing the distance flag. She was unhitched and taken from the track, and the judges ruled that she could not start in the next heat. There were but four starters in the race, and Mr. Burke protested the decision and demanded fourth money, basing his contention that Yolanda had finished "within the distance" as required by the rule. The Board sustained Mr. Burke's protest and directed the Pleasanton Association to pay him fourth money.

In the case of Mr. Burke against the Petaluma association, he asked that first money be awarded his mare Vallejo Girl in the 2:17 trot, alleging that Mr. Durfee's Carlokin, the winner, was ineligible to start as he was substituted too late. Mr. Durfee was on hand with his evidence to prove that Carlokins' entry was regular and the Board decided against Mr. Burke.

In the case of J. H. Jack of Berkeley against H. Stover for suspending him without cause, the evidence showed that Mr. Jack had made every payment on his entry, and he was ordered reinstated, and Mr. Stover was censured for careless bookkeeping.

In the cases of Rudolph Jordan, Jr., S. H. Hoy, Thos. Smith and others protesting against suspension at Petaluma on the ground that the suspensions were irregular, owing to the fact that Mr. Stover failed to file the envelopes containing post marks with his entries when suspending owners, the Board refused to sustain the protests. The main contention of these persons was that the clause of Section 8, Rule 51, which reads as follows, is mandatory:

"When such notices of suspension relate to unpaid entrance dues, the notice shall be accompanied by the original entry and the envelope bearing the postmark, if sent by mail."

Mr. Stover failed to send in these envelopes, and destroyed them. Mr. Jordan and others will appeal to the Board of Review which meets in New York on the 21st inst.

If there is any person in the country who wants a good trotter, one that can win money on the Pacific Coast or any other circuit, he need not go further than Mr. S. K. Trefry's stalls at Pleasanton's race track. He has Kenneth C. 2:13¼ by McKinney 2:11¼ and Ben Hur by Stam B. 2:11¼, both out of the same great brood mare Mountain Maiden, dam of Tom Carneal 2:08¾, Kenneth C. 2:13¼ and Miramonte 2:24¼, by Cresco. Every horseman at Pleasanton will tell you Kenneth C. can trot in 2:10, and that Ben Hur, a green four-year-old can trot in 2:15 or better by June 1st. Mr. Trefry, who is well along in the 70's, is sick and cannot take care of both these horses so wants to sell one. Each is a bargain at the price he asks for it at the present time.

NOTES AND NEWS

Go to Pleasanton next Wednesday.

The speed trials will be on that day.

The draft horses will be sold on Thursday.

The trotters and pacers will go under the hammer on Friday.

It will be the biggest sale held in California in years and some of the best prospects ever on the Pleasanton track will be sold to the highest bidder.

Star Pointer's foals in California are such high-class youngsters that the old hero will do a heavier season this year than last. He is in fine shape.

Baron Bowles (3) 2:25, the good young son of Baron Wilkes, Jr., 2:18½, and Susie May 2:18½ by Dignus, is doing a good business in the stud at Pleasanton.

Mr. Horrigan, owner of the Dixon track, is at work on a program for the annual May Day races, and says they will be the best ever held at this popular half-mile track.

Wednesday next is show day for the Pleasanton sale horses. Put your watch in order and be there to time them for yourself. Some fast ones will do the Missouri act.

Swift B. 2:12¼, the eight-year-old gelding by Stam B. 2:11¼, passed through the Indianapolis sale March 24th, and was purchased by John Elkins of Trenton, New Jersey, for \$430.

Coupon, the dam of Friday 2:11¼, by Easter W., has been bred to Sir John S. 2:04½ this season. The Singleton mare that produced Dr. J. 2:11¼ has also been bred to Sir John S.

The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feet. Call on or address S. O. Fesler, Pleasanton, Cal.

Nogi, the stake-winning three-year-old of last year, will race this year with the aged horses in his class. Mr. Warlow's colt will probably be a hard nut to crack in any company if his speed is any greater than it was last year.

W. J. Kenney, 531 Valencia street, has several second-hand Toomey carts on sale, and a second-hand speed wagon, all good as new. August Lang purchased a dandy speed cart from Kenney this week.

J. O. Gerrety drove the stallion Bon Voyage a mile in 2:12 at Los Angeles last week, and then drove him a heat back in 2:11½ with the last quarter in 31¼ seconds. Bon Voyage should enter the 2:10 list rather easily this year.

Henry Helman worked that good pacer Byron Lace 2:14¼ an easy mile last Saturday to cart in 2:15, the last quarter in 30½ seconds. Byron Lace is a standard and registered stallion, his number is 39533, and he was foaled in 1899.

There is talk that there may be racing in New Hampshire the coming season. Horsemen have all along been of the opinion that just as soon as the flavor of the running game got out of the nostrils of the people of the State the trotters would be welcomed back again.

The two-year-old Kinney Lou colt out of the dam of Lady Mowry, has had an attack of distemper, but is getting along well and will soon be ready to again enter Dick Ables speed class. The colt's owner says it is "the trottingest thing" he ever saw, and he has great expectations for its future.

That Diablo trotter, Diablo Mac, owned by Lewis Pierce of Suisun, and in Charley DeRyder's string, trotted a mile in 2:19 last Wednesday, with the last half in 1:02½ and the last quarter in 30 seconds, and he is as pure gaited and good headed as any trotter working at the trade in this State.

The new stables of the Park Amateur Driving Club, located on 37th avenue, just north of the Park Stadium, are now ready for occupancy and are in charge of Richard Ables. A few stalls are yet unassigned and club members desiring to have their horses stabled there should see Mr. Ables without delay, as the stalls will not be vacant long.

The new Year Book does not support the claim that has been extensively made that Gambetta Wilkes 2:19¼ had placed himself on record as the first sire of 200 standard performers. He is officially credited with 197—95 trotters and 102 pacers. Onward 2:25¼ is placed as the leading sire of the world with 198 performers—154 trotters and 44 pacers.

If you are going across the mountains to race, don't fail to enter your horses at Columbus. Seven rich purses, ranging in value from \$3,000 to \$10,000, will close Monday, April 20th. Columbus holds a two-weeks' meeting from September 21st to October 3d.

If you want an extra nice road horse that your wife or daughter or best girl can drive with safety and that you can win a matinee race with, ask to see the horse, Dr. Miller, at Pleasanton. He is to be sold at the big auction on Friday, the 17th, and the person that gets him will get a good one.

H. Busing reports that his stallion Bonny McKinney 41,383, is doing a good business at the Alameda track, and has already been bred to quite a number of fine mares. As Bonny McKinney is a large and very stylish horse, being a good gaited trotter and exceedingly well bred, owners of mares show good judgment in patronizing him.

In addition to the places in the Great Western circuit, where he will act as presiding judge and which includes the Minnesota State Fair, Magnus Flaws of Chicago will act as starter at the North Dakota State Fair, the South Dakota State Fair and the Oregon State Fair. He will also be presiding judge at the big July meeting at Winnipeg, Canada.

About as good an investment one can make in the horse line is to send a mare to be bred this year to Nutwood Wilkes 2:16¼, sire of the great John A. McKerron 2:04½ and sire of the dam of Aerolite the three-year-old that paced in 2:05½ last year at Woodland. Just remember that in breeding to Nutwood Wilkes you will get something you can sell at a profit.

It looks as if James Marshall's great four-year-old Aerolite will have his limit of 20 mares booked very early. Every person who looks this horse over enthuses over his grand conformation and his beautiful coat and markings. Southerland & Chadbourne have him in the very best of condition at Pleasanton. Aerolite will not be raced this year, but look out for 2:00 next year.

Breeders should not forget when it is recalled that Onward 2:25 leads all living sires of standard speed with 198 to his credit, that Mr. K. O'Grady of San Mateo, Cal., has in the stud there Hart Boswell 13699, son of Onward out of Nancy Lee, the dam of Nancy Hanks 2:04, one of the greatest of brood mares. The low fee of \$25 is all that is asked for Hart Boswell's services.

NEWS AND NOTES
On the 19th of last month, the mare Maud Fowler 2:21¼, owned by Mr. S. B. Wright of Santa Rosa, foaled a chestnut colt, a full brother to Sonoma Girl 2:05¼, Dumont S. (Sonoma Boy) 2:20, Sonoma Queen (3) 2:26, and Sonoma May 2:29¼, trial 2:10¼. This colt, Mr. Wright says, is the "best looker" of all Maud Fowler's twelve foals.

Daedalion 2:08½, son of Diablo 2:09¼ and the great brood mare Grace by Buccaneer, has been consigned to the Pleasanton sale by A. Ottinger. Here is a stallion well enough bred to head a stock farm, and bred to the right sort of mares should be a sire of two-minute pacers. He will show for himself on Wednesday next at Pleasanton what sort of speed he has.

Sherlock Holmes 2:06¼ will not be raced on this Coast this year, his owner, Fred Shaft, desiring to have the son of Zolock make a campaign on the Grand and Great Western circuits, consequently has placed him in Charles DeRyder's hands for that purpose. Sherlock Holmes is in splendid shape, and those who saw him race up North last season think he will be a hard horse to beat this year in any company.

Peter Pan, the gelding by L. W. Russell out of Biscari, dam of seven in the list, by Director, is to be sold at the big Pleasanton sale next week. Last week Al Charvo drove him two heats in 2:25 hitched to a wagon, and the gelding has worked in 2:16¼ to sulky. As Peter Pan is a good looker, and a perfect roadster, gentle for a lady to drive, he should be picked up at the sale by some one wanting a matinee horse or a high-class buggy animal.

Miss Logan 2:06¼ is soon due to foal to Bon Voyage (3) 2:12¼. While Miss Logan is a pacer that was faster than her record, and is the dam of two fast pacers with records, she is trotting bred, and Dr. Boucher, her owner, hopes her foal will trot. From the great showing being made by the first crop of foals by Bon Voyage, now yearlings, something extra good should come from his mating with the dam of Bert Logan 2:16¼ and Harry Logan 2:12¼.

A CORRECTION.

The following three entries were accidentally omitted from the 2:10 trot, Race No. 13, on page 6.

North Star, b. g. by Nutwood Wilkes, dam Ivoneer by Eugeneer; C. Whitehead.

Adam G., b. g. by McKinney, dam Nona Y. by Admiral; J. W. Zibbell.

Fresno Girl, br. m. by Seymour Wilkes, dam by Richard's Elector; J. W. Zibbell.

Helen Dare 2:14 by Zombro, trotted a mile on April 4th at Los Angeles in 2:15, last half in 1:05 and the last quarter in 31½ seconds. The next heat Beckers let her step to the half in 1:10, to the three-quarters in 1:45 and she finished the mile in 2:15 flat. Figure that out and see if the last quarter was not at a two-minute gait. Helen Dare should be a pretty good one for that \$5,000 stake for 2:14 trotters at Salem this year.

Mr. A. E. Talbot, of Reno, Nevada, who recently purchased a new speed cart from W. J. Kenney of 531 Valencia street, this city, wishes to testify that it is all that is claimed for it, and that his mare is doing better work with it than any other cart he ever harnessed her to. The mare is Miss Della by Bay Bird, dam Homelike by Knight and was bred at the Haggis ranch. Fred Krahenberg is training her for Mr. Talbot.

Davis, the busy little town in Yolo County on the Southern Pacific Railroad, adjoining which the State Farm is located, has recently organized a driving club on the same plan as the club at Sacramento. The initiation fee is \$3 and the dues fifty cents per month. Elmo Montgomery has been elected president of the club, Dill Grimes treasurer, and John Rodgers secretary. There are many good roadsters owned in and around Davis and there will be some excellent sport on the half-mile track when the first matinee is given.

Mr. E. D. Dudley came down from Dixon this week and reports that while the farmers are all anxious for rain, that the country from Solano county north is not so badly off as has been reported. The grain crops all look fairly well yet, while the orchards and vineyards are in very good shape for this season. Mr. Dudley states that the season reminds him of 1880; when there was a very long dry spell in the spring, lasting until the middle of April, and everyone expected all the crops would fail. On April 17th, however, the rain began falling and continued nearly every day for the rest of the month.

W. W. Mendenhall visited Pleasanton the other day and drove his trotter Charley T. 2:11¼ a nice mile in 2:13¼, with the last half in 1:04¼. Charles DeRyder, who has this trotter in his string, says "Wally" is a pretty fair reinsman himself, and that he can surely drive Charley T. faster than his record. No nicer trotter was ever at Pleasanton than this horse. He goes without blinds, needs no check, wears scarcely any boots and trots like a machine. As a road horse he is perfect, but he will not be used for that purpose until he has been given a chance to place his record closer to the mark which he is capable of setting. He should trot in 2:07 with ordinary luck.

W. G. Durfee was up from Los Angeles on business this week. He will not race in California this year and is entering his horses on the Grand circuit. He will take Coronado 2:09¼, the green trotter Regalo by Osito 2:13¼, the black pacer known as The Pig, although he has not been officially named, and the pacer Copa de Oro 2:07¼. These four are certain members of his string and he will probably also take along Carlokín 2:12¼, Petigru 2:10¼, Murray M. 2:14, and one or two more. He has named some of his horses in the purses at Detroit, and will probably enter at some of the principal meetings on the Great Western circuit. We hope he may be able to bring home a goodly share of that Eastern money and that his horses will be able to uphold California's reputation as the producer of record-breakers and money-winners.

Quite a number of horses are in training at Vallejo track, lessee Thomas Smith having several, and among them some that are fine prospects. He has a colt that will not be two years old until July that is by his stallion Gen. John Frisbie out of a mare by Dexter Prince. Mr. Smith has bred and raised several stake winners and many fast trotters, but thinks this is the best two-year-old he ever had. He has a colt by Tom Smith 2:13¼ out of a mare by May Boy that is also very promising and can show a 2:20 gait very handily. William Acocok owns three that are in the hands of his trainer at this track, one a black filly by Constructor, that is considered very promising, and one is by Baywood 2:10¼. Mr. Smith is working Gen. Frisbie and the stake winner Prof. Heald 2:24¼ by Nutwood Wilkes, and both are showing up well. The track is in good condition.

Argot Boy 2:03¼, the free-for-all pacer in Chas. DeRyder's string, comes as near filling the eye of critical horsemen as any horse ever seen at the famous Pleasanton track, and there have been many very high-class pacers and trotters stabled there during the past twenty years. He is not a large horse, but look him over from end to end and he will be found about the hardest horse to suggest improvement on that one could find in a long search. From his finely chiseled head to his heels he is a clean horse, and looks as racy as he undoubtedly is. He will pace close to two minutes this year and no one need be surprised if he gets under that mark a trifle. A gentleman who looked him over at Pleasanton last Sunday asked about his breeding, and as there are many more of our readers who have seen

(Continued on Page 11.)

A GREAT DAY AT RUBY HILL.

On Sunday last there gathered at the beautiful country seat of Mr. C. L. Crellin in Livermore Valley, known as Ruby Hill Vineyard, about seventy-five gentlemen who are devoted admirers of the light harness horse, in response to an invitation to attend the christening of the nineteenth foal of old Bertha, Mr. Crellin's famous daughter of Alcantara, whose record of producing five 2:10 performers has never been equaled by any other matron. The day was perfect and the rides from the railroad stations at Pleasanton and Livermore to Ruby Hill were along roads that were lined with vineyards just putting out their shoots, orchards of cherry, peach, and apricot, that were a mass of bloom, and fields green with growing crops of grain and hay.

Arriving at Ruby Hill, the guests were greeted by their host at the entrance to the spacious wine-cellar whose products have made the place famous for its annual output of the purest and best of California light wines.

After all the guests had arrived and greetings were exchanged, Mr. Crellin asked them to the main aisle of the spacious building to partake of a bulls'-head lunch which had been prepared for this occasion. Such a feast has been enjoyed by few outside the guests assembled that day. Four bull

Bertha, the daughter of Alcantara, mother of nineteen colts whose market value at a low estimate would exceed the one hundred thousand dollar mark, and whose breeding days are not yet ended, as she bids fair to be the mother of many more that will add still further to her fame as a speed producing matron.

I shall now endeavor to give you the breeding of the filly that stands by her side: Her sire was Aerolite, bred and owned by Mr. James W. Marshall of Dixon, Solano County. Aerolite holds a three-year-old race record of 2:11½, and guided by the master hand of that master reinsman and trainer Mr. James Sutherland of Pleasanton paced a public trial in less than 2:05½. Aerolite was sired by Searchlight, one of the greatest race horses that ever wore a bridle, with a race record of 2:03¼ and winner of twenty-seven races out of thirty-five. Searchlight was by Darknight, he by Alcyone, he by George Wilkes, he by Hambletonian 10.

Searchlight's dam was Nora Mapes by Furor out of Hattie Mapes by Abdallah Star. Aerolite's dam was Trix by Nutwood Wilkes (Martin Carter's pride) he by Guy Wilkes, he by George Wilkes, he by Hambletonian 10. Nutwood Wilkes was out of Lida W. daughter of that great race horse and brood mare Sire, Nutwood, he by Belmont out of Miss Russell by Pilot Jr. Lida W's dam was by Geo. M.

Mr. Crellin, Bertha and Ruby Light.

heads, cooked by Mexican chefs, by barbecue in a pit of coals, were uncovered, and with Mexican beans, Chili sauce, tortillas and other trimmings that go with them, made a feast that the gods of olden days, could they have partaken of it, would have made the criterion by which all subsequent feasts would have been judged. Washed down with the best vintage of Ruby Hill it was unanimously declared the most perfectly arranged and finest feast the company had ever enjoyed.

After the feast was over Mr. Crellin sent for Bertha and her nineteenth foal, the latter a magnificent strong filly just eleven days old, sired by Aerolite, son of Searchlight.

When the old mare and her baby daughter were led before the assemblage there was a round of applause for both. Bertha appeared in fine shape and, though her back is somewhat swayed after a continuous term of twenty years as a matron, her eye is as bright and her step as light as it was twenty years ago when Sam Gamble bought her as a four-year-old in Massachusetts and brought her to the farm at Danville owned by the late Seth Cook, and now known as Oakwood Park.

Mr. Crellin had owned and raced the great horse Searchlight 2:03¼, and when that horse had ended his racing career and came to Pleasanton to make a season in the stud five years ago, he went to Mr. Boyd, then owner of Oakwood Park Farm, and asked for a price on Bertha, then 19 years old, and dam then of seven in the list, three of which were in 2:10. Mr. Boyd set the price as \$1,250, and Mr. Crellin became her owner. His desire was to get a stud colt by Searchlight, so she was bred to that horse and next spring foaled what many say is now the grandest of all her foals, named by Mr. Crellin "The Limit," as he hardly expected the old mare to produce again. She was bred back, however, and the following year produced a filly which is this year as a three-year-old being mated with Star Pointer 1:59¼. The next year Bertha missed for the first time in her life, and the next year Mr. Crellin bred her to Kenneth C. 2:13¼, a filly foal resulting, which unfortunately died in a few days from blood poisoning received through the umbilical cord. Last year she was bred to James W. Marshall's great three-year-old Aerolite and this, her nineteenth foal, is a big strong filly, as large and strong as any she has ever produced.

After the mare and filly had been looked over, Mr. Crellin called upon Mr. William McDonald, the well-known school teacher and member of the Board of Education of Alameda County, and that gentleman spoke as follows:

"Gentlemen, to me this is the greatest gathering that I have ever known, and it stands alone as the first of its kind, (so far as I can learn) ever given in the United States.

We are here to-day at the invitation of Mr. Crellin, to celebrate the birth of his great brood mare Bertha's nineteenth foal. I wish President Roosevelt could have attended this gathering as I know this mare would find favor in his sight as she is no believer in race suicide. We are now standing in the presence of the equine queen of the world,

Patchen Jr., out of Rebel Daughter by Williamson's Belmont. The second dam of this filly's sire was by Director, or the Black Tornado, a race horse that in his day was the master of them all and the more heats to the race the surer he was of winning. He was by Dictator, he by Hambletonian 10. Bertha's sire was the famed Alcantara, he by Geo. Wilkes, he by Hambletonian 10, and her dam was the great brood mare Barcena by Bayard. This mare first came into prominence by the performance of her son the famous race horse and sire Diablo 2:09¼ by Chas. Derby (son of Steinway out of Katie G by Electioneer) and great as have been all of her family I believe that the greatest of them all now stands in the stables of Sutherland & Chadbourne in Pleasanton, a four-year-old horse called The Limit, son of Bertha and Searchlight. This young horse, a few days ago, piloted by the master hand of my friend James Sutherland, paced a mile over the Pleasanton track in 2:10. I have read that when Lucky Baldwin's pride that great thoroughbred race horse and sire the Emperor of Norfolk was about to die, that he stood in his paddock with his ears cocked as if listening to the hoof beats of the flying thoroughbreds as they raced around the track at Santa Anita and then lay down and yielded up the ghost, and before this grand old mare yields up the ghost I can imagine her standing in her paddock at Ruby Hill and listening to the hum of the telephone wire as it conveys the news that her son The Limit is the champion race horse of the world. Now, gentlemen, I am not an expert on pedigrees but I am like the Missourian, I must be shown, and if there is a better looking or a better bred colt in the United States than the one you now see sucking the milk from the paps of old Bertha I want you to show it to me. I don't know about others but as for me I'd rather own that mare and colt than be president of the United States, and I'd rather drive The Limit a mile in 2:10 than be president of an automobile factory.

When the applause that greeted Mr. McDonald's remarks had died away, Mr. Crellin asked for suggestions for names for the filly, and among a half dozen submitted, that suggested by the editor of the Breeder and Sportsman was chosen by popular vote, and the filly was christened Ruby Light, the name recalling her birthplace, Ruby Hill, and her sire and grand sire, Aerolite and Searchlight.

Prof. D. E. Martin, principal of the Livermore Grammar School, like Mr. McDonald a great lover of horses, then read the following

Toast to Bertha and Her Get.

Here's to old Bertha, the matron of gold;
Here's to Ruby Light, whom you now behold;
She's the last but not least of a noted nineteen,
Whose fame in the West, as well as the East,
On track and at court, all horsemen have seen.
Then up with your glasses! a brimming good jolt!
With a Toast to the mare and a Toast to the colt.
Dame Bertha's a wonder, her get are so game,
And so staunch, and so true, and so fast;
The day will dawn when Bertha's name

Enshrined in our hearts in a way to last,
Will be enrolled in the Temple of Fame.

Here's to Don Derby 2:04½,
His sister, Derbertha, in her far Eastern grave;
Raise up your glasses! And let us all quaff
To the get of Dame Bertha, so game and so brave.
Here's to Owyho, Kawookum, and Elf,
Geo. McA., Bertha Derby, and Lafferty, Ed;
To Stilwell, Beretta, and the one I, myself,
Loved—'twas by Kenneth C., but now 'tis dead.
Here's to Diablo with seven in 2:10,
And Demonio, who's a 2:10 sire;
Arner, Bernice, Jay Eff Bee, and again
To one whose name will surely mount higher.
'Tis "The Limit—The Limit," the king of them all,
A horse with the speed, and the heart, and the head,
Who, though Kingdoms may rise and Kingdoms fall,
Will still wear the Crown when all others are dead.
We know what we've seen from "our perch on the fence."

As we watched this grand son of Dame Bertha work out;

Two-minutes will look like a poor thirty cents
To owner and driver, to Judge, swipe and Tout,
When, on the Grand Circuit, in some future day,
He faces the wire in his fast get-away.

The blood of Mambrino, Alcantara, and all,
With Searchlight was crossed, and so rich was the blend,

That thrones will totter and crowns will fall,
Ere this son of Bertha, reaches the end
Of his career, and retires to his court,
Forever he'll hold his crown and his fort.
With a harem whose blood is the bluest that runs;
And forever he'll reign, in the Kingdom of Sport,
Through the prowess, on track, of his daughters and sons.

Then up with your glasses! Not a drop must you spill!

We thus show our friendship and lasting good will
To Crellin, Dame Bertha, and old Ruby Hill.

Then, after Bertha and Ruby Light, held by their genial owner, had been photographed, Mr. Crellin was recipient of congratulations by everyone on owning such a wondrous matron as Bertha, and such a marvelous pacer as The Limit, and was thanked again and again for the opportunity he had afforded his friends to partake of his generous hospitality and see for themselves the greatest speed producing mare in all the history of standard bred horses.

Mr. C. L. Crellin writes the editor of the Breeder and Sportsman that his mare La Moscovita dam of Yolanda 2:14¼, dropped a fine filly on the 6th inst by his great four-year-old The Limit. Mr. Crellin says: I now have a grand pair—the first get of Aerolite, dam Bertha, and the first get of The Limit, dam La Moscovita, and am only sorry the latter was not here to be shown at the gathering on Sunday.

MATINEE RACING TO-DAY.

With every prospect at this writing of beautiful weather and a fine track, the Park Amateur Driving Club will open the amateur racing season at the Park Stadium this afternoon, starting the first race at 1 o'clock. Those who enjoy seeing fine trotters and pacers in spirited contests for blue ribbons and for the pure love of the sport on the part of their owners can pass a very pleasant afternoon at the Stadium to-day.

There will be three races, two for trotters and one for pacers. The officials appointed for the meet are: Starter, T. J. Crowley; judges, A. J. Molera, A. Joseph and I. B. Dalziel; timers, J. A. McKerron and G. Jermyn; marshal, Dan Hoffman.

The entries in the various events are:

First race, Class C trotting—J. W. Smedley's Red Velvet, F. J. Kilpatrick's McKinney Belle, E. H. Aigeltinger's Dolador, A. P. Clayburgh's Charles II, E. Stock's Director B.

Second race, Class B trotting—S. Christenson's Reina Directum, F. W. Thompson's Lady Washington, M. W. Herzog's Lady Nell, George R. Gay's Laddie G.

Third race, Class A, pace—Thomas H. Browne's Victor Platte, G. E. Erlin's Toppy, T. T. Bannan's Jim Chase, W. C. Hamerton's Colonel C, F. E. Booth's Satinwood, D. E. Hoffman's Mary K.

George Wilkes 2:22 continues to be the head of the largest tribe within the trotting family. Of his sons, 103 are sires of 2,004 trotters and 1,000 pacers, while 109 of his daughters are producers of 142 trotters and 56 pacers. Nutwood's sons, 150, have sired 274 trotters and 494 pacers, while 168 of his daughters have produced 228 trotters and 77 pacers. Electioneer's 104 sons that are producers have to their credit 134 trotters, 324 pacers; 107 daughters have produced 136 trotters and 22 pacers.

The Houghton Sulky Co. of Marion, Ohio, report a very large business on their racing and pleasure vehicles. They have had a very heavy trade, especially on their No. 9 sulky and the No. 70 light training cart. They are offering special quotations for orders placed in April for immediate or later shipment. They further are having a heavy demand for the new style No. 10 Peerless cushion tired cart with 33 inch wheels—a cart that may be used for most every conceivable purpose. Any one interested in two or four wheelers of exceptional value or merit at the right price should by all means get a copy of their new thirty-two-page catalog, which is one of the most complete books ever issued, illustrating and describing all of the details of their carts and sulks. It will be gladly mailed, postpaid, by addressing the Houghton Sulky Company at Marion, Ohio.

HARNESS RACES FILL WELL.

Breeders' Association, Oakland and Sacramento Secure Fine Entry Lists.

Owners of trotters and pacers that desire to race them on this coast this year will be greatly pleased over the fine lists of entries received by the three associations named above for the summer meetings this year. The Alameda Fair Association, of which Ben Benjamin is secretary, has filled every one of the half dozen early closing stakes advertised, and there looks to be a close contest in each and every race. Of the nine advertised by the Pacific Coast Trotting Horse Breeders' Association, seven have filled, only the 2:05 pace and the four-year-old trot failing to secure enough entries to satisfy the board of directors. Three of the five early closing stakes offered by the State Agricultural Society have been declared filled with heavy lists, the free for all trot and the 2:05 pace being the ones that failed to fill. The lists of entries are as follows:

P. C. T. H. B. A. ENTRIES.

No. 1, 2:14 Class Trotting, Purse \$800.

Princess W., bl. m. by Geo. Washington, dam Urania by Ky. Prince; Dick Ables.
Lady McKinney, b. m. by Washington McKinney, dam Danville Maid by Daly; Dick Ables.
Yolanda, b. m. by McKinney, dam La Moscovita by Guy Wilkes; Frank H. Burke.
Vallejo Girl, br. m. by McKinney, dam Daisy S. by McDonald Chief; Frank H. Burke.
Lucretia, br. m. by Nazote, dam Lucyneer by Electioneer; John C. Kirkpatrick.
Queer Knight, b. g. by Knight; Frank A. Williams.
Richie Baron, br. g. by Baron Wilkes, dam Winell by Wilkes Boy; Morris Bros.
Berta Mac, br. m. by McKinney, dam Alberta by Altoona; W. Parsons.
Kinney Al, b. s. by McKinney, dam Mary A. by Altamont; T. H. Ramsey.
Kenneth C., br. s. by McKinney, dam Mountain Maid by Cresco; James Sutherland.
Nogi, b. s. by Athabla, dam Cora Wickersham by Junio; George L. Warlow.

No. 2, 2:20 Class Trotting, California Stakes,

Purse \$2,000.

Princess W., bl. m. by Geo. Washington, dam Urania by Ky. Prince; Dick Ables.
Lady McKinney, b. m. by Washington McKinney, dam Danville Maid by Daly; Dick Ables.
Zella Mac, b. m. by McKinney, dam Minnie Alto by Iran Alto; C. F. Bunch.
Monicrat, bl. s. by Monwood, dam Alticrat by Altamont, Jr.; J. J. Breen.
Ben Russell, b. g. by L. W. Russell, dam Pacita by Lone Pine; F. G. Eastman.
Rey McGregor, b. h. by Rey Direct, dam by R. McGregor; F. Gomet.
Prince H., b. g.; Henry H. Helbush.
San Francisco, b. s. by Zombro, dam Oniska by Nutwood Wilkes; P. W. Hodges.
The Angelus, br. s. by Zombro, dam Hazel Kinney by McKinney; P. W. Hodges.
Irene, b. m. by Florida (Martin's), dam Birdie by Altamont; Robert Prior.
Wenja, bl. m. by Zolock, dam Malocka by Nutsford; G. A. Pounder.
The Statesman, b. s. by Jas. Madison, dam Creona by Algona; Charles F. Silva.
Blanche T., b. m. by Stickle, dam by Col. K. R.; Charles F. Silva.
Wild Girl, br. m. by Wild Nutling; James Smith.
Prof. Heald, ch. s. by Nutwood Wilkes, dam Daisy S. by McDonald Chief; Thomas Smith.
Lady Inez, b. m. by Nutwood Wilkes, dam Cora by Ira; James B. Smith.
Silver Hunter, b. g. by Zombro, dam The Silver Bell by Silver Bow; L. H. Todhunter.

May T., ch. m. by Monterey, dam Melba by Nutwood Wilkes; J. Twohig.
El Tonopah, b. s. by Billups, dam Elisa S. by Alcantara, Jr.; W. L. Vance.
Emily W., b. m. by James Madison, dam Cornelia Rose by Cornelius; Fred E. Ward.
Yosemite, ch. g. by Monterey, dam Leap Year by Tempest; P. J. Williams.
Sidonis, b. s. by St. Nicholas, dam by Nutwood Wilkes; W. H. Williams.
Buddie G., b. g. by Seymour Wilkes, dam Silver Bud by Silver Bow; J. W. Zibbell.

No. 3, 2:08 Class Pacing, Purse \$800.

Magladi, br. m. by Del Norte, dam Laurelia by Caution; Thomas H. Brents.
Miss Georgie, br. m. by McKinney, dam Georgie B. by Nutwood Wilkes; J. O. Gerrety.
Young Hal, b. s. by Hal Dillard, dam Ozora by Smuggler; A. E. Heller.
Welcome Mc, br. g. by McKinney, dam March 4th by Hawthorne; Thomas Hughes.
Diabless, b. m. by Diablo; J. H. Kelly.
John R. Conway, ch. s. by Diablo, dam Lady Kohl by Le Grande; George Meese.
Mov, b. m. by Prodigal, dam Minnie by Clay King; Morris Bros.
Delilah, b. m. by Zolock, dam Gipsy by Gen. Booth; Rutherford & Young.
Queen Pomona, b. m. by Pomona; Fred E. Ward.
Mir's Idaho, s. m. by Nutwood Wilkes, dam by Forest Clay, Jr.; S. C. Walton.

No. 5, 2:14 Class Pacing, Purse \$800.

McFadyen, ch. h. by Diablo, dam Bee Sterling by Egmont; E. D. Dudley.
Memonia, b. m. by Demonio, dam May Norris by Norris; S. H. Hoy.
Radium, bl. h. by Stoneway, dam Carrie by A. W. Richmond; J. A. Kirkman.
Grace McKinney, b. m. by McKinney, dam by Dexter Prince; Offutt & Shadbolt.
Rockaway, r. h. by Stoneway; G. A. Pounder.
Boton De Oro, bl. s. by Zolock, dam Bell Pointer by Sky Pointer; Alfred Solano.
Fred W., b. g. by Robin, dam Lady Lloyd by Sidney; C. H. Widemann.
T. D. W., b. s. by Nutwood Wilkes, dam Abaca Calendine by Wilkesdale; T. D. Witherly.

No. 11, 2:17 Class Trotting, Purse \$800.

Chestnut Tom, ch. s. by Nutwood Wilkes, dam Zeta Carter by Director; George T. Algeo.
Vallejo Girl, br. m. by McKinney, dam Daisy S. by McDonald Chief; Frank H. Burke.
Rey McGregor, b. h. by Rey Direct, dam by R. McGregor; F. Gomet.
San Francisco, b. s. by Zombro, dam Oniska by McKinney; P. W. Hodges.
The Angelus, br. s. by Zombro, dam Hazel Kinney by McKinney; P. W. Hodges.
Prince H., b. g.; Henry H. Helbush.
Judge Dillon, ch. s. by Sidney Dillon, dam Eveline by Nutwood; Mrs. L. J. H. Hastings.
Modicum, b. m. by Geo. Ayres, dam Aggie P.; Morris Bros.
Little Louise, br. m. by Boodle, dam Azrose by Azmoor; Montgomery Stock Farm.
The Statesman, b. s. by James Madison, dam Creona by Algona; Charles F. Silva.
Blanche T., b. m. by Stickle, dam by Col. K. R.; Charles F. Silva.
Nogi, b. s. by Athabla, dam Cora Wickersham by Junio; George L. Warlow.
Della Derby, bl. m. by Chas. Derby, dam Nora D. by Del Sur; C. Whitehead.

2:20 Class Pacing, Pacific Slope Stakes, Purse 2,000.

Little Joe, b. g. by Diablo, dam May by Wildidle; J. J. Breen.
Highfly, b. g. by Nearest, dam Miss Gordon by Bismark; T. W. Barstow.
Sister Bess, bks. m. by Senator L., dam Nugget; P. Donnelly.
Albert Direda, bl. s. by Robert Direct, dam Ida May by Grosvenor; L. Y. Dollenmayer.
Lettie D., b. m. by Boodle, dam Maud by Bertrand; A. M. Davis.
Freely Red, b. m. by Red Medium, dam by Bourbon Wilkes; A. G. Dahl.
Diabull, ch. g. by Diablo; W. Griswold.
Kermit, ch. g. by Henry Nutwood, dam Two Minutes by Wildnut; F. E. George.
Pilot, ch. g. by Abbotsford, Jr., dam Belle Capels by Steinway; J. V. Galindo.
Niquea, b. m. by Joe Patchen, dam Oneone by Woodford Wilkes; C. A. Harrison.
Charlie D., b. h. by McKinney, dam Flewey-Flewey by Memo; John C. Kirkpatrick.
Queen Derby, br. m. by Chas. Derby, dam Addie Ash by Indianapolis; McGowan & Cuicello.
Alton, bl. s. by Altamont, dam Winnie by Alex. Button; Lou Mativia.
Mac O. D., b. h. by Zolock, dam Kentucky Bell; G. A. Pounder.
Silver Dick, gr. g. by Geo. W. McKinney, dam Miss Taylor by A. W. Richmond; L. L. Payton.
Josephine, b. m. by Zolock, dam Lady May; Rutherford & Young.
Boton De Oro, bl. s. by Zolock, dam Bell Pointer by Sky Pointer; Alfred Solano.
Tom Murphy, b. g. by Gossiper, dam by Memo; James Sutherland.
Easter Bells, b. m. by Diablo, dam Elisa S. by Alcantara, Jr.; W. L. Vance.
Salva, b. m. by Dictatus Medium, dam Aunt Sally by Benton Boy; C. Whitehead.
Joe Robin, bl. g. by Robin, dam Lloyd by Sidney; C. H. Widemann.
Explosion, b. m. by Steinway, dam Flash; Fred E. Ward.
Madera Girl, br. m. by Prince Almont, dam by Junio; S. C. Walton.

No. 13, 2:10 Class Trotting, Purse \$1,000.

Athasham, b. s. by Athadon, dam Cora Wickersham by Junio; D. L. Bachant.
Thomas M., b. g. by McKinney, dam by Guy Wilkes; D. J. Healey.
Lucretia, br. m. by Nazote, dam Lucyneer by Electioneer; John C. Kirkpatrick.
Era, br. m. by Zombro, dam Nellie K. by Gen. Grant, Jr.; Frank A. Williams.
Berta Mac, br. m. by McKinney, dam Alberta by Altoona; W. Parsons.
R. Ambush, br. s. by Zolock, dam May McKinney by Silkwood; Rutherford & Young.

ALAMEDA FAIR ASSOCIATION ENTRIES.

No. 1, The Greater Oakland State, Trotting, 2:20 Class.

Lady Inez, b. m. by Nutwood Wilkes, dam Cora by Ira; Jas. B. Smith.
Emily W., b. m. by James Madison, dam Cornelia Rose by Cornelius; Fred E. Ward.
Wenja, bl. m. by Zolock, dam Molocka by Nutsford; G. A. Pounder.

Prince H., b. g.; Henry H. Helbush.
Judge Dillon, ch. s. by Sidney Dillon, dam Eveline by Nutwood; Mrs. L. J. H. Hastings.
Zella Mac, b. m. by McKinney, dam Minnie Alto by Iran Alto; C. F. Bunch.
Buddie G., b. g. by Seymour Wilkes, dam Silver Bud by Silver Bow; J. W. Zibbell.
Yosemite, ch. g. by Monterey, dam Leap Year by Tempest; P. J. Williams.
Silver Hunter, b. g. by Zombro, dam The Silver Bell by Silver Bow; L. H. Todhunter.
Princess W., bl. m. by Geo. Washington, dam Urania by Ky. Prince; Dick Ables.
Lady McKinney, b. m. by Washington McKinney, dam Danville Maid by Daly; Dick Ables.
May T., ch. m. by Monterey, dam Melba by Nutwood Wilkes; J. Twohig.
Sidonis, b. s. by St. Nicholas, dam by Nutwood Wilkes; W. H. Williams.
San Francisco, b. s. by Zombro, dam Oniska by Nutwood Wilkes; P. W. Hodges.
The Angelus, br. s. by Zombro, dam Hazel Kinney by McKinney; P. W. Hodges.
Rey McGregor, b. h. by Rey Direct, dam by R. McGregor; F. Gomet.
Monicrat, bl. s. by Monwood, dam Alticrat by Altamont, Jr.; J. J. Breen.
The Statesman, b. s. by Jas. Madison, dam Greona by Algona; Chas. F. Silva.
Blanche T., b. m. by Stickle, dam by Col. K. R.; Chas. F. Silva.
Irene, b. m. by Florida (Martin's), dam Birdie by Altamont; Robt. Prior.
Herbert Dillon, ch. s. by Sidney Dillon, dam Lizette by Abdallah Wilkes; F. N. Frary.
Bonnetti, gr. g. by Boodle, dam Flora H. by Jim Mulvaney; J. L. Smith.
Hunky Dory, b. g. by Athadon, dam by Electioneer; Geo. W. Butler.
El Tonopah, b. s. by Billups, dam Elisa S. by Alcantara, Jr.; W. L. Vance.
Wm. H., ch. g. by Nutwood Wilkes, dam Nellie H. by Jim Mulvaney; W. B. Humfreville.
Ben Russell, b. g. by L. W. Russell, dam Pacita by Lone Pine; F. G. Eastman.
Prof. Heald, ch. s. by Nutwood Wilkes, dam Daisy S. by McDonald Chief; Thos. Smith.

No. 2, Alameda County Stake, Pacing, 2:20 Class, Purse \$2,500.

Queen Derby, br. m. by Chas. Derby, dam Addie Ash by Indianapolis; McGowan & Cuicello.
Boton De Oro, bl. s. by Zolock, dam Bell Pointer by Sky Pointer; Alfred Solano.
Explosion, b. m. by Steinway, dam Flash; Fred E. Ward.
Mac O. D., b. g. by Zolock, dam Kentucky Bell; G. A. Pounder.
T. B. W., b. s. by Nutwood Wilkes, dam Abaca Calendine by Wilkesdale; T. D. Witherly.
Josephine, b. m. by Zolock, dam Lady May by Newton N.; Rutherford & Young.
Madera Girl, br. m. by Prince Almont, dam by Junio; Mrs. J. Scheeler.
Freely Red, b. m. by Red Medium, dam by Bourbon Wilkes; A. G. Dahl.
Sister Bess, bks. m. by Senator L., dam Nugget; P. Donnelly.
Silver Dick, gr. g. by Geo. W. McKinney, dam Miss Taylor by A. W. Richmond; L. L. Payton.
Joe Robin, bl. g. by Robin, dam Lady Lloyd by Sidney; C. H. Widemann.
Alton, bl. s. by Altamont, dam Winnie by Alex. Button; Lou Mativia.
Kermit, ch. g. by Henry Nutwood, dam Two Minutes by Wildnut; F. E. George.
Charlie D., b. h. by McKinney, dam Flewey Flewey by Memo; John C. Kirkpatrick.
Albert Direda, bl. s. by Robert Direct, dam Ida May by Grosvenor; L. Y. Dollenmayer.
Little Joe, b. g. by Diablo, dam May by Wildidle; J. J. Breen.
Alto, Jr., bl. h. by Alto Genoa; G. Peirano.
Easter Bells, b. m. by Diablo, dam Elisa S. by Alcantara, Jr.; W. L. Vance.
Pilot, ch. g. by Abbotsford, Jr., dam Belle Capels by Steinway; J. V. Galindo.
Tom Murphy, b. g. by Gossiper, dam by Memo; Jas. Sutherland.
Salva, b. m. by Dictatus Medium, dam Aunt Sally by Benton Boy; C. Whitehead.
Highfly, b. g. by Nearest, dam Miss Gordon by Bismark; T. W. Barstow.
Lettie D., b. m. by Boodle, dam Maud by Bertrand; A. M. Davis.

No. 3, Mt. Diablo Stake, Trotting, 2:14 Class, Purse \$900.

Little Louise, br. m. by Boodle, dam Azrose by Azmoor; Montgomery Stock Farm.
Kenneth C., br. s. by McKinney, dam Mountain Maid by Cresco; S. K. Trefry.
Queer Knight, b. g. by Knight; Frank A. Williams.
Nogi, b. s. by Athabla, dam Cora Wickersham by Junio; Geo. L. Warlow.
Yolanda, b. m. by McKinney, dam La Moscovita by Guy Wilkes; Frank H. Burke.
Vallejo Girl, br. m. by McKinney, dam Daisy S. by McDonald Chief; Frank H. Burke.
Kinney Al, b. s. by McKinney, dam Mary A. by Altamont; T. H. Ramsey.
Princess W., bl. m. by Geo. Washington, dam Urania by Ky. Prince; Dick Ables.
Lady McKinney, b. m. by Washington McKinney, dam Danville Maid by Daly; Dick Ables.

Berta Mac, br. m. by McKinney, dam Alberta by Altoona; W. Parsons.
 Richie Baron, br. g. by Baron Wilkes, dam Winell by Wilkes Boy; Morris Bros.
 Dutch, b. g. by Athay, dam by Strathway; W. B. Snyder.
 Lucretia, br. m. by Nazote, dam Lucyneer by Electioneer; John C. Kirkpatrick.
 Della Derby, bl. m. by Chas. Derby, dam Nora D. by Del Sur; C. Whitehead.
 Chestnut Tom, ch. s. by Nutwood Wilkes, dam Zeta Carter by Director; Geo. T. Algeo.

No. 4, Pleasanton Stake, Pacing, 2:14 Class, Purse \$900.

Grace McKinney, b. m. by McKinney, dam by Dexter Prince; Offutt & Shadbolt.
 Ray o'Light, br. c. by Searchlight, dam Carrie B. by Alex. Button; E. S. Train.
 Rockaway, r. g. by Stoneway; G. A. Pounder.
 Wanderer, br. g. by Athby; W. B. Snyder.
 McFadyen, ch. h. by Diablo, dam Bee Sterling by Egmont; E. D. Dudley.
 Radium, bl. h. by Stoneway, dam Carrie by A. W. Richmond; J. A. Kirkman.
 Diabull, ch. g. by Diablo; W. Griswold.
 Fearnot, b. s. by Lynmont, dam Elmorine by Elmo; J. A. Cody.
 Memonia, b. m. by Demonio, dam May Norris by Norris; S. H. Hoy.
 Pilot, ch. g. by Abbotsford, Jr., dam Belle Capels by Steinway; J. V. Galindo.
 Lodi Girl, b. m. by Alto Genoa; G. Peirano.
 Fred W., b. g. by Robin, dam Lady Lloyd by Sidney; C. H. Widemann.
 Botton De Oro, bl. s. by Zolock, dam Bell Pointer by Sky Pointer; Alfred Solano.

No. 5, Berkeley Stake, Pacing, 2:08 Class, Purse \$900.

Queen Pomona, b. m. by Pomona; Fred E. Ward.
 Delilah, b. m. by Zolock, dam Gipsy by Gen. Booth; Rutherford & Young.
 John R. Conway, ch. s. by Diablo, dam Lady Kohl by Le Grande; Geo. Meese.
 Miss Georgie, br. m. by McKinney, dam Georgie B. by Nutwood Wilkes; J. O. Gerrety.
 Miss Idaho, s. m. by Nutwood Wilkes, dam by Forest Clay, Jr.; S. C. Walton.
 Magladi, br. m. by Del Norte, dam Laurelia by Caution; Thos. H. Brents.
 Welcome Mc., br. g. by McKinney, dam March 4th by Hawthorne; Thos. Hughes.
 Young Hal, b. s. by Hal Dillard, dam Ozora by Smuggler; A. E. Heller.
 Moy, b. m. by Prodigal, dam Minnie by Clay King; Morris Bros.
 Diabless, b. m. by Diablo; J. H. Kelly.

No. 6, Athenian Stake, Trotting, 2:25 Class; Three-Year-Olds, Purse \$900.

Debutante, b. f. by Kinney Lou, dam Athene by Dexter Prince; V. K. Dunne.
 Guy Direct, bl. g. by Bonnie Direct, dam Fortuna by Guy Wilkes; T. D. Witherly.
 Miss Dividend, b. f. by Athabio, dam Vivian by Hamb. Wilkes; D. L. Bachant.
 California Boy, br. g. by Del Coronado, dam Lady Gossiper by Gossiper; Mrs. L. J. H. Hastings.
 Nusado, br. s. by Nushagak, dam Addie B. by Dexter Prince; Woodland Stock Farm.
 Anjella, b. f. by Prince Ansel, dam Majella B. by Nushagak; Woodland Stock Farm.
 Stam Bird, b. g. by Stam B., dam Swiftbird by Waldstein; Chas. F. Silva.
 Don Reginaldo, br. h. by On Stanley, dam Belle Raymon by Raymon; F. A. Ramsey.
 Siesta, b. s. by Iran Alto, dam Wanda by Eros; Frank H. Burke.
 Idolway, bl. m. by Stoneway, dam Carrie by A. W. Richmond; J. A. Kirkman.
 Hy You, br. f. by On Stanley, dam Hyto by Happy Prince; Robt. T. Curtis.

CALIFORNIA STATE FAIR ENTRIES.

No. 5, 2:08 Class, Pacing, Purse \$1,000.

Diabless, b. m. by Diablo; J. H. Kelly.
 Delilah, b. m. by Zolock, dam Gipsy by Gen. Booth; Rutherford & Young.
 John R. Conway, ch. s. by Diablo, dam Lady Kohl by Le Grande; Geo. Meese.
 Miss Idaho, s. m. by Nutwood Wilkes, dam by Forest Clay, Jr.; S. C. Walton.

Yosemite, ch. g. by Monterey, dam Leap Year by Tempest; P. J. Williams.

THE BEST EVIDENCE.

The proof of the popularity and desirability of an article is always to be found in the demand for it. The demand for the No. 15 "Perfected" Racing Sulky, together with the Buckeye Carts and Speed Wagons made by the McMurray Sulky Co., Marion, O., is proof positive that they are popular, becoming more so every day. It is our candid opinion that any man having need for anything in the way of Sulky, Cart, Speed or Road Wagon, should by all means get a catalogue from the above firm. It will pay you. Mailed free upon application. Orders placed at this time can have special attention given to the finishing, etc., which is quite an advantage to the purchaser.

HORSEMAN'S HANDBOOK JUST OUT.

The new edition of the Horseman's Handbook is just off the press. It contains the revised racing rules of the American Trotting Association, tables showing the champion records of the year, leading progenitors of speed, all the futurity and stake winners since these classics were inaugurated, as well as other tables of interest, and chapters on how to take care of stallions, brood mares, breaking and training of colts, and many other subjects of interest to the horseman that can be seen at a glance. This handy little volume can be had by addressing this office, paper cover 50 cents, leatherette \$1.00, sent postpaid. Every horseman who wants to be thoroughly posted on the rules and records ought to carry one of these books in his pocket.

THE LOS ANGELES AUCTION SALE.

Following is a summary of the auction sale of trotting bred horses owned by W. A. Clark Jr., and others, sold at Agricultural Park, Los Angeles, March 12th, by Ed. Smith, auctioneer. A few of the horses catalogued were bid in by the owners, but these are not given in the summary:

Liberty Song, b. g., by Liberty Chimes, dam by Pamlico; \$225.

Buck, b. g., by McKinney, dam Tuna 2:12½, by Ethan Allen Jr.; \$190.

Beulah, ch. m., by Nutwood Wilkes, dam Pattie D. 2:12½, by Ultimus; \$525.

Perissa, yearling filly, by Highland C. 2:19¾, dam Pattie D. 2:12½; \$170.

Pattie D. 2:12½, by Ultimus, dam by Drummond; \$70.

Nona Whips, yearling filly, by Zolock, dam Myrtha Whips 2:09; \$175.

Templeman, blk. s., two-year-old, by Highland C., dam Ruth Mary by Directum 2:05¾; \$550.

Reina del Diablo, b. m. foaled 1889, by Diablo 2:09¾, dam Miss Sidney by Sidney; \$350.

Bay Leaf 2:26, br.m., by Telephone, dam by Planet; \$150.

Chequita, ch. m., three years, by Highland C., dam Reina del Diablo; \$180.

Chonita and Midnight, black mares, by Warspite and Zombro; \$575.

Direct Maid, b. m., by Direcho, dam by Director; \$250.

Fussy B., br. m., by Stam B., dam by Directum; \$160.

Lucy May, b. m., by Oakland Baron, dam by Allandorf; \$230.

Centre Eye, b. m., by On Stanley, dam by Abbotsford; \$250.

Zoe, b. m., by Zombro, dam by Secretary; \$310.

Charley Wilkes, b. g., by Nutwood Wilkes, dam by Direct Line; \$260.

Siles King, blk. colt, two years, by Highland C., dam by Telephone; \$150.

Miss Wyman, br. f., by Highland C., dam Pattie D. 2:12½; \$125.

Bay Mare, seven years, by Bay Bird, dam by Cornelius; \$200.

ANSWERS TO CORRESPONDENTS.

W. J. S., SANTA CRUZ—Lady Signal was by Signal 3327. She had a record of 2:35½, and a trial of 2:26¼, the latter to wagon. She is the dam of Anteeo Jr. 2:25½, and also of the mare Lizzie S., that is credited with a race record of 2:36 by the Year Book, but is said to have won a heat in 2:28 in a race not officially reported. In the Year Book of 1892, Lizzie S. is given as by Anteeo 2:16½, but in the Year Book of 1893 her sire is given as Anteevo 2:19½ in the report of the only race in which she started that year. So far as the breeding is concerned it makes little difference, as Anteeo and Anteevo were full brothers. Nothing is known of the breeding of Lady Signal's dam.

F. SUMNER, EMERYVILLE—Imogene, the dam of Del Win 2:25 and Guide 2:16¼, was by Norwood 522 TWO—HACKETT—BREEDER (son of Hambletonian 10 and Lady Fallis). The dam of Imogene was by American Star 14 and her grandam by Harry Clay 45.

O. W. SINCLAIR, EUREKA—We fail to find any mare by the name of Lady Flynn mentioned in any of the Palo Alto catalogues that we have, nor is such a mare registered. Perhaps you have the wrong name. Idaho Patchen was by Henry B. Patchen 163, he by Geo. M. Patchen 30. The dam of Idaho Patchen was Kate Waller by Lusby, a horse of which we have no information. The thoroughbred mare Black Maria was foaled in 1870, and was bred and owned by Charles Underhill of Santa Rosa, Cal. She was by Georgetown (son of imp. Knight of St. George). Her dam was Maria Carson by imp. Lawyer, second dam by Tom Moore, third dam by Ecliptic, fourth dam by John Richards. She died in 1887. Mamie Scott, b. m. foaled 1892, was by Canny Scot-dam Eola.

L. D. MYER, WAILUKA, MAUI—You fail to state whether Parnell is a trotter, pacer or runner. There were three trotters by that name: Parnell 2:23 by Enfield, foaled 1885, Parnell 2:29½ by Almont Eagle, foaled 1888, and Parnell 2:29 by Aberdeen, foaled 1885. We know of no other horse by the name of Parnell that has raced, and all three of these were owned in the Eastern States.

COLT DISTEMPER

Is the wolf of the horse-breeding business. It comes in the most insidious manner, and leaves disaster after it. All horsemen know too well of its terrible destruction of life and the soundness of the young things. It attacks those of all degrees of breeding and condition, often selecting the very best stabled and cared for colts in the community. How many times has this been written after the description of a horse, mare or stallion, "Suffered an attack of distemper when two or three years old, and never fully recovered." It is not true that distemper must run its full course, and that there is no limiting the disease. This has been proven false since the day when Spohn's Liquid Distemper was put on the market. It is proving the fallacy of the statement every day. It is the true salvation of the breeder, owner and handler of horses, and sold by druggists, harness dealers and Spohn Medical Company, Goshen, Ind.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

HOW THE BIRDS SERVE MAN, AND HOW MAN SERVES THE BIRDS.

Value of Birds—Birds are nature's check on insect life. By controlling the increase of certain insects they prevent the destruction of plant life, and without plant life, animal life—including that of man—would be impossible upon the earth.

Each species of birds has its special office. One cares for the leaves and twigs of the trees—another guards the trunk and limbs from attack; still others hunt upon the ground, seeking their prey beneath the fallen leaves and loose soil.

The stomach of one "Bob White" quail has been found to contain more than 100 potato beetles. Another had eaten 500 chinch bugs. Ninety of the destructive cotton-boll weevils were found in the stomach of three meadow larks. A single robin had eaten 175 caterpillars. A chickadee has been known to eat 5,000 eggs of the canker worm in one day. A barn swallow will destroy more than a thousand flies and other winged insects every twenty-four hours. A pair of chipping sparrows were observed to carry to their young more than 200 insects, mostly caterpillars, in less than one day. A night-hawk will consume hundreds of injurious insects, including mosquitoes and moths, in one evening, continuing the beneficial work long after the day-flying birds have ceased their work and gone to sleep. A pair of nesting orioles will destroy thousands of the small, green caterpillars that are so destructive to the foliage of deciduous fruit trees some years in California. The farmer who kills one of these birds takes the life of one of his very best friends. Fifty per cent of the food of the red-shafted flicker consists of ants, 3,000 of these having been taken from the crop of a single bird. The black phoebe destroys vast numbers of flies and gnats that annoy horses and cattle. Food is brought to the young of these birds every two or three minutes.

In California the black-headed grosbeak, the robin and the orioles search out and feed upon the pupae of the codling moth. The valley partridge, when induced to visit grounds infested by the Fuller's rose beetle, will soon exterminate that destructive intruder. The tiny California bushtit is of untold benefit in destroying eggs, grubs and insects injurious to trees. In the crop of one mourning dove were found more than 7,000 seeds of harmful weeds. If birds take some of the farmer's fruits and garden crops it is because they have no other vegetable food provided for them. When we have learned to count them into our families, and to provide something for their sustenance in return for the good they do us, as we provide for our domestic fowls, we shall find the birds do little harm to our gardens. No man has the moral right to sweep the land clean of the natural food of birds and then deny them a bit of his fruit and a few of his scattered grains.

Birds and Insects—Mr. Forbush has a record of a pair of grosbeaks having fed their nestlings with more than eight hundred larvae of caterpillars in eleven hours.

The number of insect species is greater by far than that of the species of all other living creatures combined. Dr. Lintner considered it not improbable that there were a million species.

Professor Harvey found five hundred mosquitoes in a nighthawk's stomach, and Professor Beal found two hundred and seventeen fall web worms in the stomach of a yellow-billed cuckoo.

Mr. A. K. Kirkland has computed that the unrestricted increase of the gipsy moth would be so great that the progeny of one pair would be numerous enough in eight years to devour all the foliage in the United States.

A pair of nesting wrens were noted by an observer to take more than six hundred insects from his garden per day. Dr. Judd make a record of a pair of house wrens carrying one hundred and eleven insects to their young in four hours.

Certain moths deposit hundreds of eggs in a season, and were each egg to hatch and each insect to come to maturity and go on producing young at the same rate, the entire earth in a few years would be carpeted with crawling caterpillars, and the moths in flight would cover the earth like a blanket or fog.—Forbush.

Dr. Marlatt, basing his estimate on the value of farm products given in the reports of the Bureau of Statistics of the United States Department of Agriculture for 1904, gives the loss from insect depredations for that year as seven hundred and ninety-five million dollars; and this is supposed to be a conservative estimate of the tax now imposed by injurious insects on the people of the United States.

Many cases have been recorded where the destruction of birds has been followed by an immediate increase in the number of injurious insects, and an attendant loss of practically all orchard and garden crops. The greatest losses from the ravages of the Rocky Mountain Locust were coincident with or followed soon after, the destruction by the people of blackbirds, prairie chickens, quail, plover, curlew and other birds.

Vast damage is done every year in some sections of California, especially to vineyards and alfalfa fields, by cutworms and army worms, which are the larvae of noctuid moths; and investigation will show that in every locality where this destruction occurs, meadowlarks, robins and other ground-feeding birds, (which search out the worms in the larvae state during the winter or at the time they become active in the spring), have been either shot, poisoned or driven off. Every meadowlark is worth ten dollars a year to a farmer in the control of this worm alone.

Professor Beal, during field work in California, has found that fifty-seven species of birds feed on scale insects, twenty-nine of which destroy the black scale, one of the two most destructive scale insects in the United States and one that causes the orange growers more expense to combat than all other insect combined. Among these are the ruby crowned kinglet, the bush tit, the Audubon warbler and the black-headed grosbeak, four of our more common and widely distributed species. No doubt many foot-hill orchards, where these birds have protection, are kept practically free from the black scale in this way, and the expense of spraying or fumigating thus saved the grower.

Collecting Bird-Eggs is bad and "collecting" birds is worse. Show the boys the folly of the former and the cruelty of the latter. Teach them that the eggs and the young of birds should be sacred. Persuade them to study the living bird in all its varied moods and avocations; to get on friendly relations with it, to note how it builds its nest and what sort of food it brings its young; to catch its call notes and a measure of its song, and to "collect" it with a camera and not with a gun. A few bird skins may be necessary for scientific demonstration, but the collecting fever, when it runs high, may become more destructive to bird life than the millinery trade. The greatest of the ornithologists are catching the living bird with a camera. He who studies birds with a gun is already out of date. Photographing the living bird is the modern and sensible plan. This should be made clear to the boys who are interested in birds. It was Dean Hole who said: "He who would have beautiful roses in his garden must have beautiful roses in his heart." Also, it might be as aptly said, that to know the birds and be able to teach others well and profitably and entertainingly about them, one must have great love in his heart for the birds, and he who has great love for the birds cannot kill them or rob them of their young or eggs.

The Destruction of Birds for the milliners' trade is something appalling. It is estimated that in a single year ten million birds were slaughtered to fill the demands for the ornamentation of the hats of women. During a period of four months 20,000 of these beautiful creatures were supplied to New York dealers from a single village. It has been proved that in Europe 150,000,000 birds are used for the trade annually. From the West Indies one dealer received 400,000 humming birds and 6,000 birds of paradise, besides thousands of miscellaneous birds. A party of Japanese poachers recently killed more than 300,000 birds on an island belonging to the United States, in mid-Pacific. When found by officers who went from Honolulu to stop this wholesale bird destruction, these Japanese had 335 cases of plumage, all intended for the millinery trade of Paris. A great storm had wrecked their boat and caused the drowning of ten of the bird killers.

Free—Farmers, teachers, and others interested in the economic status of birds, should write to the Biological Survey, Department of Agriculture, Washington, D. C. for the following bulletins, which will be sent free: "Hawks and Owls," "Some Common Birds," "Food of Nesting Birds," "How Birds Affect the Orchard," "Birds of a Maryland Farm."

A RECORD YELLOWTAIL.

A yellowtail weighing 43½ pounds was caught off Avalon, Catalina Island, March 30th, by F. A. Fenger of Pittsburg, Pa. Owing to some misunderstanding between him and his boatman the rules of the Light Tackle Club were violated, thereby disqualifying the largest catch of the season. It is understood that E. H. Brewster will have the fish mounted and will present it to the club as the record catch for the last four years. Last year's record was 41½ pounds.

The thirty-six members who are testing their "ideal" paraphernalia there this week, have not reported any exciting adventures. Several days were spent with very little success as only two yellowtail strikes were made by the party.

Among the anglers who have obtained buttons of, and membership in the Light Tackle Club last week are: A. T. Vanbergen of Buffalo, N. Y.; C. B. Candlers of Redlands, P. D. Proctor of Munroe, Colo.; F. A. Fenger of Pittsburg, Pa., and Dr. J. V. Proctor of Denver, Colo.

The open season for catching trout in Washington began on the 1st inst.

SAN FRANCISCO FLY-CASTING CLUB.

The scores of the second contests of the classification series of the San Francisco Fly-Casting Club last week show surprisingly well this early in the season. The results in accuracy and delicacy (net percentage) are rather remarkable, in this, that every individual rodster secured over 95 per cent. This skillful exhibition of the art of angling is the kind of performance that is prolific of the keenest enjoyment on the stream with the added satisfaction of providing well-filled creels. In the long distance casting J. B. Kenniff is apparently starting off with the purpose of being high rod at the end of the season, he is capable of turning the trick, too, unless Harry Golcher or E. A. Mocker should prove successful rivals. From early appearances it looks as if the race in lure casting this season will be an interesting one between Young, Mocker, Kierulff and Kenniff. At all events there is the pleasing promise of a goodly attendance of the members at the lakeside reunions this year, better still, there will be quite an addition of new competitors.

Saturday Contest No. 2, Classification Series, Stow Lake, April 4, 1908. Wind, southwest. Weather, fair. Judges, Messrs. Mocker, Kierulff and Kenniff. Clerk, E. O. Ritter.

Events.	1	2	3	4
J. B. Kenniff	118	98.14	98.8	98
W. J. L. Kierulff	97.2	98.2	92	95.4
L. G. Burpee	80	97.4	97.13	93.10
C. G. Young	98.8	98.10	98	98.20
E. A. Mocker	103	98.1	96.12	97.5
T. C. Kierulff	98	98.5	97.14	95.10
F. A. Webster	96.9	98.9	93	95.48
F. H. Reed	98.4	98.5	96.10	97.30
Re-entry.				
W. J. L. Kierulff	98.3			

Sunday Contest No. 2, Classification Series, Stow Lake, April 5, 1908. Wind, southwest. Weather, fair. Judges, Messrs. Mocker, Kierulff and Reed. Clerk, E. O. Ritter.

Events.	1	2	3	4
C. H. Kewell	97.9	96.7	94.10	95.34
F. M. Haight	97.14	97.14	94.10	96.19
C. G. Young	98.13	99	98	98.30
F. H. Reed	90	98.4	99.3	99.5
G. H. Foulks	92	97.12	97.4	94.5
Dr. W. E. Brooks	98.9	98	97.10	97.60
H. B. Sperry	92	97.6	98.14	99
C. A. Kierulff	93	98.1	97.10	95.5
J. B. Kenniff	115	98.3	98.8	99
A. Sperry	91	95.14	97.13	94.10
T. C. Kierulff	90	97.9	99.2	98.10
E. A. Mocker	101	96.6	97.10	100
Re-entry.				
G. H. Foulks	84	97.2	98.10	92.10
C. H. Kewell				89.4

NOTE: Event 1—Distance casting, feet. Event 2—Accuracy, percentage. Event 3—Delicacy; (a) accuracy, percentage; (b) delicacy, percentage; (c) net percentage. Event 4—Lure casting percentage. Fraction in lure, tenths; fraction in net delivery, sixtieths; fraction in all others, fifteenths.

ANGLERS' OUTING.

The California Anglers' Association will celebrate to-morrow at Point Reyes the "first anglers' field day" open to all anglers. The scene of the festivities will be at the famous "White House" pool where the rod wielders will try their luck and skill with rod and line and enjoy a barbecue.

This outing is happily arranged with the purpose in view of bringing all local anglers together for a day's fishing in the tide waters. For the best catches—of many kinds—twenty-five handsome prizes are offered, and needless to say a large and keen competition will ensue. The barbecue lunch will be served, free, from 1 to 3 p. m.

The Association stands for the promotion of the sport of angling for game fishes, and this occasion being the first field day, a cordial invitation is extended to the fraternity.

The Northwestern Pacific Railroad will provide a special train in order to afford a long fishing day on the stream.

The anglers' train will leave Sausalito on the arrival of the 7:45 a. m. boat from San Francisco, returning the train will leave the Point at 5:45 p. m., allowing the sportsmen and their friends to arrive in San Francisco at 7:35 p. m. Charles F. Breidenstein, H. B. Gosliner and W. J. Street compose the field day committee and that means a grand time for everybody present.

ANGLING IN TIDEWATER OPEN.

On the 1st inst. the season for taking steelhead trout in tidewater opened. The occasion was taken advantage of by a number of Waltonians who tried not only the Paper Mill at Point Reyes but also the river at Duncan's further up the road.

Results at Russian river have been productive of a fair amount of sport up to date. The river is in fine condition and fish are plentiful enough to satisfy any angler.

At the Point there were many large fish seen in the creek but most of them were spent fish. Several large trout were caught early in the morning, from the "rock pool" above the bridge, these fish all had fresh spawn in them. Several other ripe steelhead were taken also. The small ten and twelve-inch fish which are usually in evidence in the Paper Mill creek during April are surprisingly scarce this season. Possibly these fish were early this year, for, it is reported, they were very plentiful in the creek between the railroad bridge and the "White House" pool last month. Possibly the early disappearance of the fish can be attributed to the rather long spell of dry weather, the trout having gone out to salt water as the stream ran lower.

AT THE TRAPS.

The California Wing Club live-bird shoot at Ingle-side on the 5th inst., was the best attended wing shoot held by the club in years. The opening shoot, the first Sunday in March this year, had twenty-six guns on the firing line, the attendance last Sunday numbered thirty shooters, an indication that this branch of trap shooting will be very popular this year. Weather conditions were favorable and the birds supplied were lively ones.

In the forenoon race at twelve birds, four men, Otto Feudner, W. E. Greene of Salinas, Dr. Barker of San Jose, and Ed Schultz scored straight and divided the first four moneys, the shooters in the eleven hole cut up the balance of the purse.

In the afternoon race, owing to the unexpected draft on the supply of birds, shooters dropped out after missing two birds. An interesting feature of the day was the work of Mr. Sinkey who is one-armed. He shoots left handed, holding the gun by the grip, on calling "pull" he brings up his piece to the shoulder and lining his bird fires. His score of 11 out of 12 from the 30-yard mark is a very skillful performance under the circumstances.

Medal shoot, 12 birds, \$50 added, 1 money for every 4 entries, distance handicap, high gun—

The Port Townsend Rod and Gun Club shoots are becoming popular with Washington sportsmen. On March 28th in the regular club shoot at 25 targets the scores were: Mr. Forbes, 23; Captain Edwards, 20; Dr. White, 19; Dr. Mills, 19; Arvid Dearson, 17; Capt. F. L. Buck, 14; B. F. Owsley, 14; G. L. Ide, 14; O. Newsom, 13; F. C. Harper, 9; Roy Barclay, 9; H. H. Small, 8; Al Newman, 3; Will Katz, 1.

A number of practice events were also shot.

The Bellingham (Wash.) Gun Club's regular shoot March 21st in 25-target events, shows the following scores: George Miller, 18, 22, 21, 23, 22, 21, 23, 25, 24, 21, 22; Wagoner, 20, 21, 17, 17, 23, 19, 16, 18; Sprattley, 20, 20, 17, 19, 19, 22, 19, 23; V. Roeder, 13, 12; V. Roth, 14, 13, 14; A. Miller, 14, 15; Lynn, 9, 13, 16, 8, 13, 6; Kienast, 15, 16; Falke, 11; Van Wyke, 15, 20; George Dodson, 15, 16; Moultray, 10; H. E. Johnson, 14, 16, 16; J. Rice, 20; Williams, 12; Cossy, 10; Mulchaney, 12, 19; Most, 15.

Wagoner was high gun in the medal shoot, with 21 out of 25. McDonald broke 14; Kienast, 16; Lynn, 8; G. Haskins, 20; Falke, 7; A. Miller, 17; Sprattley, 20; G. Dodson, 15; V. Roeder, 17; Williams, 17; Moultray, 10.

The Southwestern Washington Gun Club Association will hold the regular blue rock tournament at Centralia early next week.

It is fairly probable that a shooting circuit, taking in Santa Barbara, San Luis Obispo, Monterey, or Santa Cruz, San Francisco, and Sacramento, will be arranged for in the near future.

The newly elected officers of the Auburn Gun Club are, E. S. Birdsall, president; Fred Roumage, vice-president; E. H. Gum, secretary; L. D. Huntley, treasurer, and L. Johnson, captain.

The club will hold weekly shoots through the present season. At the shoot on April 4th, the initial meet for the year, Assemblyman E. S. Birdsall carried off the honors by a score of 23 out of 25.

A special match was shot with Chris Henny, E. S. Birdsall, C. J. Richter, and M. J. Predom on one side, and E. H. Gum, L. Huntley, J. Johnson and J. H. Morris on the other, the latter four winning, the score being 38 to 36 out of a possible 40.

The usual three strings at inanimate targets were shot Sunday afternoon, March 28th, by members of the Sonora Gun Club. The attendance was light, only six entering. Carkeek was high gun of the day, breaking 22 out of 25 singles in the final string. Otis won the first with 19, while Carne took the second by breaking 20.

A fact not generally known to landmen is that trap shooting is indulged in on our battle ships and cruisers to quite an extent. Traps are arranged on the quarterdecks and inanimate target shooting by the officers while at sea is a favorite method of recreation.

Some of the prominent members of the Venice Gun Club are trying to work out a handicap scheme on a percentage basis instead of the distance handicap, so as to encourage the poorer shots and thus create more interest. The idea is to take the known percentage of hits made by each participant and add to it enough to bring it up to an even 100, then figure his score on the same basis when shooting, the percentages to be overhauled every so often so as to equalize matters as much as possible.

At a recent shoot of the Redding Gun Club, W. C. Boggs was high gun. He broke 25 straight in the medal race. Dr. Reed scored 24, M. D. Lack 23, W. A. Wells 23, and Geo. Sparks 20.

At the shoot of the Clovis Gun Club March 22d the scores in three ten-target races were:

Mitchell, 4, 3, 6; Weyant, 4, 3, 4; Rough, 5, 7, 5; Clay, 6, 6, 6; Birge, 3, 8, 6; McKinsey, 2, 1, 3; Nichols, 7, 4, 7; Fraler, 6, 4, 6; C. Atkinson, 2, 4, 3; Glenn, 6, 5, 3; F. Lester, 5, 4, 4; H. Atkinson, 1, 6, 2; McMurty, 4, 6, 4; Carr, 8, 5, 5; Rutledge, 4, 4; Welborn, 3, 2; Parnell, 4; Strain, 1; Ruthnick, 4.

Doubles, four targets: Mitchell, 1; Weyant, 1; Rough, 1; Clay, 1; Birge, 2; McKinsey, 0; Nichols, 2; Glenn, 3; Lester, 3; Atkinson, 0; McMurty, 3; Rutledge, 1; Welborn, 1; Parnell, 2; Fraler, 2; Carr, 3.

The new grounds of the San Mateo Gun Club were used for the first time last Sunday, and some excellent scores made in practice shoots. Several valuable trophies will be awarded for the best average made during the season.

The club will be under the management of the following officers for the year: S. B. Gracier, president; George B. Duffy, vice-president; Hale Warn, secretary-treasurer; C. A. Lawton, referee.

IRISH TERRIERS.

I have been asked frequently to give beginners a few hints on crossing and mating Irish terriers, so have great pleasure in giving my twenty-six years experience breeding "Dare Devils."

The great thing I would ask young breeders is not to try out-crosses to other strains without most careful thought; for instance, Mr. George Mayan, one of the most successful breeders of Irish terriers, and who, at one time, stuck closely to the Breda strain, thought an out-cross would be a good thing, tried it, and out-crossed himself out of the fancy.

Another mistake so often made (I have done it myself) is to breed from a dog just because he is winning prizes everywhere, although he may be a chance-bred one. The temptation is very great to use him; the produce are, as a rule, useless. Keep to a fixed strain, remember "like breeds like," and you do not know how an out-cross may go; you so often get the exaggerated good points of both strains or the exaggerated bad ones. The supporters of the Breda strain have been the late Billy Graham, founder, and whose prenx Breda will live for ever in the Irish terrier fancy, Mrs. Butcher, Miss Paul, Mr. Everill, and myself.

As many know, the tap-root of the breed was the mating of Erin with Paddy II and Killiney Boy. I believe the first Irish terrier to be registered at the Kennel Club was Sport (Celtic), owned by Mr. George Jamison and Dr. Carey. Killiney Boy was the twenty-fourth registered, Erin the thirty-fourth, and Gripper the 126th. I may say that the dam of Killiney Boy was a rough black-and-tan; Erin had no pedigree, although I once put one on my stud cards; Billy Graham assured me she had none. Early in 1880 Erin was mated to Paddy II, a grandson of the first Sport (Celtic); in this litter were two bitches, Glory and Jess. Glory won many prizes; she was a very small bitch—I should say not more than 19 pounds in weight; but I do not remember her breeding anything good. Jess was not shown, and if she was, I have forgotten; but she was mated to Killiney Boy by Mr. Graham, and bred him a dog who won many prizes, Champion Gripper, to the best of my recollection. He took very much after his granddam Erin, and was a light, corky little dog. He then mated Erin to Killiney Boy, and he must have wondered what Kismet had sent him. In that litter were three champions, i. e., Play Boy, Poppy, and Pagan II, with Pretty Lass and Gerald thrown in, and both good winners. Erin also bred others to both Killiney Boy and Paddy II, but they drop out of most pedigrees. Poppy only bred one puppy of any use, i. e., Poppy II, who won many prizes for Mr. Nicholson. Erin was quite a small bitch, not high on the leg, not over-straight, but just a good all-round, real Irish terrier, with any amount of character.

From Ch. Play Boy, a dog with beautiful ears, from this remarkable litter the Breda strain has descended on the male side. Play Boy was two years old when the late Mr. George Krehl mated a bitch called Fury, afterward owned by Mr. E. B. Joachim, the present editor of the Illustrated Kennel News. I believe there were only two puppies, a dog and a bitch. Mr. Joachim had the latter, and the dog I saw at Mr. Krehl's. I had lost my first Irish terriers

owing to a mad dog. The pup in the kennel was a fat little beast, six weeks old, with a black streak down his back, and a black muzzle, wonderful bone and coat, and beautiful ears. I bid \$25, and then \$30, but, no, I had to give six guineas or leave him; for fun we weighed him, and he went six pounds, so he cost me a guinea a pound. I brought him back to Henley and the old mayor of the town seeing him following me, said, "My eye! what a 'Bogie Rattler.'" I at once said, "Good, that's his name," and that pup was the second of the Breda family. I then wanted a bitch to breed from to him. After six months looking about I found, at Mr. Krehl's, a nice bitch with a rough coat and rather heavy ears, but I had made up my mind to keep only drop-eared ones; she had a sister with her, a blue-red grey one; I had to take both or leave them, and at \$40 they were mine; they were by Gripper ex Cora, the latter a granddaughter of Sport (Celtic), and from the rough bitch who was registered as Biddy III, I bred Champion Bachelor and Benedict, both by Bogie Rattler, in following litters. I remember well the day Bachelor was born. I had been shooting, and The Lampkin had won the St. Leger; when I got home my groom said, "I don't know what you will say, but Biddy has eight pups and five are black." I was disgusted, at once killed the blacks—one was grey, and Bachelor a bright red, the other was too big. Benedict, in the next litter, was frog-faced and no coat on his loins. I sold him to my friend Billy Graham for \$50, and a wonderful dog he was at the stud. Bachelor was not a success—he sired one champion for Mr. Weiner, and a dog called Benediction from a bitch I bought at Warwick Show called Bouncing Sally, with a deformed mouth, but a bitch who must have had a strong strain of some sort in her, as her action goes through five or six generations.

Mr. Graham bred into Benedict very strongly. He had a bitch called Breda Vixon, whose sire and dam were both by Benedict—Breda Star and Sauce. Breda Vixon he mated to Mr. Brodie's The Irish Ambassador, by Seaford ex Nettle, also by Benedict. Seaford had a lot of Erin blood through Peter and Garryford, one a son and the other a grandson. From this mating came Champion Breda Mixer, a dog who was most successful in the show ring and also at stud. In the meantime, Mr. Cinnamon, of Cushendal, had sent a bitch to Bachelor called Breda Florence. She was served in my presence by Bachelor, who was ill at the time, and for that reason I am strongly of opinion that my kennelman also used Benedictine without my knowing it, but I have no proof. I give the reasons for my surmise, as I did not suspect it for many years afterward. Anyhow, she bred a bitch called Breda Iris, the most celebrated brood bitch since Erin. Mated to Breda Mixer, she bred Chutney Breda Chaff, Champion Checkmate, Farndon Mixer, and last, but not least, Champion Breda Muddler, without doubt the most successful stud dog that has ever lived, and who has founded a strain of his own or perpetuated the Breda strain for all time.—English Illustrated Kennel News.

DOINGS IN DOGDOM.

Oakland show opened on Wednesday morning with 315 dogs benched. The bench show committee had everything arranged in apple-pie order, the show ran smoothly from the start. The attendance the opening days and nights argued a paying gate. A report of the show and list of awards will appear next week.

Edgewood Biddy, now owned by G. C. Israel of Olympia, will be shown at San Francisco.

Vancouver, B. C., entries closed with 223 dogs for the show which opened on the 1st inst.

Dr. W. A. Bruette of Chicago judged all breeds at the recent Salt Lake show.

Frisco Kennels' Irish water spaniel Frisco Pat (Our Chance ex Ch Rowdy Girl) served recently a bitch owned by George Tibbitts of Colusa.

Frisco Bess adn Frisco Babe, both by Ch. The Gossoon out of Dublin, were bred to Frisco Pat February 9th.

Frisco Dot was served by Our Chance on the same date.

March 30th Ch. Rowdy Girl was bred to Frisco Pat. A bitch owned by Chas. Luhrs is due to whelp to-day to Frisco Pat.

Geo. Cook of Healdsburg is training two young dogs he recently purchased from Frisco Kennels.

The outlook for a few litters of good Irish water spaniels is excellent. This useful breed, we are pleased to see, is coming more in demand here every season.

Entries for the Frisco show closed to-day.

Fresno entries closed on the 4th inst. There was a strong representation from Los Angeles, Pasadena, Oakland, and San Francisco.

The kennel editor will forward the address, to any reader interested, of an intending purchaser who desires two New Foundland puppies, a dog and a bitch.

Drink Jackson's Napa Soda.

SPORT AT PUNTA ARENAS.

Punta Arenas, as the Chilians call it, or Sandy Point, as it is known to the English trade, is regarded by the world at large, and was regarded by a majority of the officers and men of the fleet before arrival, as a desolate spot with a characteristic name. Accordingly, when they found a thriving town of twelve thousand people, and an elaborate program of social entertainment planned by high officials of the Chilean government, the visiting Americans gladly revised their opinion. In a port which was included in the itinerary for coaling purposes only they found a week of hospitality and sports.

At Punta Arenas the thoughts of the officers turned instinctively to the subject of sport. The sailing directions refer to the abundance of game, and a general idea seemed to prevail that because Patagonia was not far distant horses could be had for the asking. The first boat ashore from the flagship carried officers in riding costume, one especially being a conspicuous figure in a collarless jersey of flaming red, buttoning down the front with large flat brass buttons. Their desire for mounts was appeased after some difficulty by the chief of police, who was glad to furnish them with police horses. The subsequent riding by officers was, because of the lack of horses, largely confined to the officers of the ship police who came ashore on duty from day to day.

Inquiries about hunting brought more encouraging information. Ducks and geese abounded along the straits, the officers were informed, and almost any hunting party would be blessed with success. The flagship was first to take advantage of the sport thus offered. Lieutenant Russell Train and Lieutenant "Josh" Weaver, of Rear Admiral Evans' staff; Lieutenant Commander Hasbrouck and Major Dion Williams, the fleet marine officer, joined Lieutenant Gherardi, commanding the auxiliary yacht Yankton, tender of the fleet, and went to Provenir Bay for two days' shooting, returning with upward of one hundred geese, which they pronounced the most edible creature known to South America. They were led to the best shooting ground by residents of Punta Arenas and were much pleased with the success of their adventure.

The next shooting expedition to Provenir Bay, which is across the straits from Punta Arenas, and accordingly in famous Tierra del Fuego, was made under less auspicious circumstances than were enjoyed in the comfortable Yankton. An adventurous party from the battleship Vermont, which maintains a gun club which shoots clay pigeons from the quarter deck at sea, determined to try their shotguns on the game of the region. Having no tender for the purpose and the ship launches not being available for such an expedition they had resort to a sailing launch. Volunteers from the crew were called for and quickly responded. Supplies were taken from the stores and, with a good breeze in the most favorable direction possible, the party set sail from the port gangway of the Vermont one afternoon at three o'clock. At five they were out of sight.

Landing at Provenir they modified their original plan of camping on shore and remained in the boat overnight. Before dark they had a shot at a few ducks, which made the evening meal, and everybody was up at daylight the following morning ready for sport, which did not disappoint them. They pushed well in and by one o'clock when they returned to their boat in the bag was upward of one hundred and twenty-five ducks. No geese fell to their lot, the slaughter inflicted by the Connecticut's party the previous day evidently having frightened the geese out of the neighborhood. The parties covered the same ground, for the Vermonters discovered recently used shells on the ground.

The most exciting part of the outing was yet to come. At one o'clock sail was set for Sandy Point. A sharp lookout was kept for the Vermont, which was expected on this day to run out in the straits for the purpose of "swinging ship" to correct compass deviations. It was discerned at a distance, but beyond the reach of signals. The wind and currents were both adverse to progress in the direction desired and night fell on the party while the sailing cutter was beating first on one tack and then on another in an effort to make its way across the straits. It was a weary task and the Magellan nights are far from warm, as can be attested by those who lay, under insufficient blankets and rubber ponchos until six o'clock the following morning, when the Vermont was reached. Seventeen hours had been spent in the open boat, but the party nevertheless declared they would not have missed it for worlds, while as a sporting proposition the expedition made a great appeal to the rest of the fleet.

In the party were Captain Lyman, U. S. M. C.; Lieutenant Brinser, Ensign Robert A. Dawes, Ensign Bruce Canaga, Surgeon F. M. Furlong and Second Lieutenant A. B. Drum, U. S. M. C.

Another Vermont hunting party made its way into the hills of Magellan back of Sandy Point in search of game it did not find. It was led by Lieutenant L. C. Palmer, and in defiance of the cold winds that sweep over the bleak hills, the huntsmen carried only rubber ponchos. They desired not to be hampered in the pursuit of game. The result was that they spent most of the night walking around in the dark, it being too cold to sleep on the ground. One member of the party, J. B. Connolly, an author of stories of Gloucester fishermen, who is accompanying the fleet in its cruise, had the misfortune to dislocate his finger.

A hunting party from the New Jersey had better luck. Mounts were obtained and two days spent in the country. The bag included foxes and ostriches.

Punta Arenas is a fur trade center. The seal, fox, otter and other skins in the shops were pretty well depleted by the time the fleet left. The idea prevailed among many officers that attractive bargains were to be had, and so it proved in a few cases; but it is said that the best furs are reserved for months ahead by captains of steamers calling regularly there. Many handsome rugs were purchased, those made of fox skins being especially pretty and effective for decorative purposes.

SAILORS SHOOT WELL.

The recent rifle match between a team of the armored cruiser Tennessee and a team of the Southern California Rifles, near Los Angeles, conclusively demonstrated the value of the sub-target machine in rifle practice. The naval men had not fired a gun on shore since the commencement of the cruise on the Atlantic Coast, several months before. Only two or three were then rated as first-class marksmen. Yet, after reaching the California coast, they readily accepted a challenge, and on selecting their team solely on the records made with the sub-target, came ashore with their Krags, and in twenty-four hours nearly won a match against a picked team of western men equipped with rifles and sights of their own choosing. Two more points per man on each string of ten shots would have brought them victory.

This is a showing that does credit to all the officers and men concerned. Capt. Howard did not hesitate to put his men to the test. The team was selected and trained by Lieut. Meyer and his able coadjutor Surgeon Guest, both of whom shot in the team and imparted a part of their strength to the others.

As to the elements of difference which may have affected the result, it is probable that the heavy trigger pull of the Krags, with the safety slack, was the most material factor. None of the Californians would think of using such a pull in target work, most of them preferring a very light, or hair trigger. It is possible, though hardly probable, that in the strong wind which prevailed during the greater part of the match, the advantages of the military wind-gauges to the seamen offset the advantages of the peep sights, without windgauges, used by the local men. Neff, of the Rifles, was the only man who used the new pointed bullets, and this gave a few points advantage, but he used the same sights as the naval men on his 30-40 military Winchester. On the other hand, the ammunition of others on the California team was less regular than the government issues. The late impetus given to shooting had exhausted the local supply in various calibers, and competitors were obliged to accept anything procurable in near-by towns, with some disappointing results.

Wolf used a light 30-30 Winchester which had fired 6,000 shots. This record is far beyond the guarantee of the manufacturers, and it is possible that his score of 122 would have been bettered with a new barrel. Simpson made the fourth best score, 120, with the lightest gun of all—a 25-20 Winchester, and two other local men used 25-25 Winchesters. The 32 special Winchesters were at the foot of the local column.

It is probable that for the distances shot at (200 and 300 yards) all these lighter guns could be replaced to advantage by heavier. On the whole, it will probably be a toss up between the two teams when both are supplied with the new Springfield rifles and ammunition.

DECOYING WILD GEES.

Having come to the conclusion that wild geese are becoming more acquainted with the ways of human beings and are less inclined to be lured within gun shot by the human goose callers, the noted human cacklers of the Maine Prairie plains district have hit upon a new device which seems to have resulted quite successfully states the Suisun Republican.

Early in the season wild geese are trapped or made captive and when not too badly wounded are later used as decoys. The method employed is in this way: An inclosure of, say, 100 feet wide by about 300 feet long, is made with wire netting such as is used on farms for fencing. In this inclosure the live geese, which have had one wing almost entirely taken off, are turned loose. Upon the approach of a flying flock of their own tribe they cackle loudly to attract attention and in a very short time the geese overhead begin circling around and go direct toward the inclosure. It is needless to say that the hunters who are concealed in pits at different points make a killing at the approach of every flock.

Harry Hansen, who resides about six miles south-east of Denver, has the necessary wire netting and other paraphernalia to make an inclosure of the size above mentioned and also has 50 geese which he uses for calling purposes. Last Sunday he entertained a party of five friends from San Francisco with the result that 130 geese were killed. Mr. Hansen took his party of hunters to the Plant ranch for the shoot.

These are a number of goose callers in the district east of Denver and the country about Maine Prairie who have been very successful and have furnished sport for many a hunter who has visited that part of the country, but the new method for calling geese puts the old one completely in the shade.

TRADE NOTES.

Send For One.

The new catalogue, devoted to exploiting the merits of the L. C. Smith gun, which is just off the press and being distributed by the Hunter Arms Company, of Fulton, N. Y., is an artistic triumph in the way of an advertising booklet, and the most experienced sportsman will count it a privilege and a pleasure to peruse it. The literary feature has been most carefully looked after, and combined with the splendid illustrations, the result is that the exact object is brought into the reader's mind, and the most minute detail can be easily understood. The illustrations occupy about twenty pages, and are accompanied by full directions and explanatory matter. There are several pages devoted to explanations that will prove a bonanza to the shooter when he meets with mechanical difficulties, and by the application of the advice given, he will find an easy way out of almost any trouble with his gun.

As a specimen of the printer's art this catalogue would have to be termed perfect, and even the details of mailing have not been overlooked, as it comes to the reader in a special lithographed envelope, that snugly fits the catalogue.

A favorable impression is immediately received on removing the envelope, as the cover is handsomely lithographed in many colors on rough milled paper, and it is bound with an attractive red cord. Even the preface will not be passed over, and after reading that, and viewing a photographic group of the progressive Hunter Brothers, one comes to the portion giving interesting information as to the manufacture of guns. The color scheme has been carefully looked after by using plates of two colors on glazed paper throughout the book. At the bottom of each page is a beautiful scene, showing the health giving pleasure to be had by the man "behind the gun." No sportsman can look through these illustrations without recalling many pleasant incidents that he himself has enjoyed with dog and gun.

One illustration that deserves particular mention is of a hunter with his dogs, which is one of the most "true to life" pictures of its kind to be found, and is worthy of being given a frame.

The Hunter Arms Company's guarantee is shown in fac simile, the lithograph showing all the details, and giving a reproduction of the official seal.

A pleasant half hour can be spent by the sportsman in reviewing this catalogue, which combines so well the practical and the attractive, and can be had on request from the Hunter Arms Company, Fulton, N. Y.

Winchester Goods on Top.

As usual, Winchester products carried off the premier honors at the Second Annual Inanimate Target Tournament of the Coronado Country Club, which took place at Coronado Beach, Cal., March 26th and 27th. The first high amateur average of the tournament was captured by Mr. Fred B. Mills, of Long Beach, with an average of 89.6 per cent shooting Winchester "Leader" shells, the shells Mr. Mills always shoots. The second high amateur average was won by Mr. J. E. Vaughan of Orange, 89 per cent, with Winchester "Repeater" shells, while the third high amateur average was captured by Mr. R. M. Arnold of Santa Ana with 87.4 per cent, using Winchester "Leader" shells. The Coronado Country Club Trophy, 50 singles, was won by Mr. Fred B. Mills, shooting the "Leader" shells, score 45.

Winchester shot gun shells hold all the Pacific Coast records, the latest being the longest straight run, made by Mr. Emil Holling at the Douglas, Arizona, tournament, 166 straight with Winchester "Leaders". If you want to win, shoot the shells the champions shoot, and insist upon being furnished the "Leader" or "Repeater" cases when placing your orders for shot gun ammunition.

Andrew Joplin and Ed Adkinson of Santa Ana, Cal., who killed a bear at the head of Trabuco Canyon about three months ago, have sold the skin to the Biological Survey Museum at Washington, D. C. The hunters made the claim at the time the bear was killed that it was a grizzly. This was doubted by some sportsmen. C. Hart Merriam, chief of the Biological Survey, has written to Joplin that the skin arrived safely in Washington, and Merriam pronounces it the skin of a genuine female grizzly. She was undoubtedly that last of her race in the Santa Ana Mountains, and was shot after she had fought off a pack of dogs.

In his letter Chief Merriam asks Joplin if he knows of any old grizzly skulls and says the government would be glad to buy some for the museum.

The Grass Valley Sportsmen's Club has elected the following officers: Assemblyman G. W. Root, president; Maurice O'Connell, vice-president; Don C. Ray, secretary; W. H. Morgan, treasurer; E. C. Morgan, Dr. I. W. Hays, and A. B. Champion, trustees; J. J. Phillips, steward. The annual camp stew will be held in July. An effort will be made to secure the 1909 convention of the California Fish and Game Protective Association.

The Marysville Fly-Casting Club has elected the following officers: Albert Menz, president; Charles Peel, vice-president; Dr. J. H. Barr, secretary and treasurer.

Drink Jackson's Napa Soda.

the horse at work this winter and spring who are not familiar with his blood lines, a short statement in regard to his pedigree will not be out of place at this time. Argot Boy is a bay gelding foaled in 1901, and was bred by Charley Carpenter of Anderson, Indiana. He is by Argot Wilkes 17559, who was by Tennessee Wilkes 2735, son of Geo. Wilkes. The dam of Tennessee Wilkes was Lizzie Hayden, a producing mare by Peavine 513, a great grandson of Black Hawk 5. The dam of Argot Wilkes was pacing bred, as she was by Bennett Chapman, pacing son of the pacer Pat Malone, and her dam was the famous old mare Sweepstakes, the dam of Star Pointer 1:59¼, Hal Pointer 2:04¼, etc. It will be seen that Argot Wilkes has a combination of Wilkes, Black Hawk, and Tennessee pacing blood in his veins. The dam of Argot Boy is Anna Miller by American Boy 19693, a pacer, that was by Pocahontas Boy 1790 or Blue Bull, the preference being given to the former as the sire. Pocahontas Boy was by Tom Rolfe 306, who was a son of the famous old pacing mare Pocahontas, and grandsire of the Maine champion Nelson 2:09¼. The granddam of Argot Boy was Annie Miller, dam of Sag B. 2:13¼, by Jim Monroe 835, he by Abdallah 15, out of Lizzie Peebles by thoroughbred Wagner. Argot Boy's great granddam was Bruna, dam of Woodford Pilot 2:23¼ by Pilot Jr. 12, and his great-great granddam was by a Canadian horse. This is the pedigree of a horse which some of the horsemen are claiming will be the next pacer to get into the exclusive list of two minute horses.

Twenty-two entries in the \$2,000 purse for 2:20 class trotters, twenty-seven in the \$2,000 purse for 2:20 class pacers, and ten in the \$1,000 purse for 2:08 pacers is a good showing for the California State Agricultural Society. Neither the free for all trot, or the 2:05 pace received sufficient entries to fill. The Pacific Coast is in an unfortunate position so far as securing entries for the fast classes are concerned. When the trotters and pacers take records that put them in the fastest classes, they are compelled to go east to get racing enough to be worth while. In the 2:05 pace this year there are but three horses whose owners have shown the willingness to enter and race here. These are Sir John S. 2:04¼, Bonnie Steinway 2:06¼, and Mona Wilkes 2:06½. The sensational mare of last year, Inferlotta 2:04¼, has not been entered in anything as yet this year, but as Mr. Hewitt has only started her up within the last week, this is not any sign that she will not be raced, and if there are classes offered for her later on she may be entered. A race with the two stallions and two mares mentioned would be the biggest drawing card any association could offer.

That Baron Wilkes blood is one of the most successful strains in all the tribe of Geo. Wilkes in siring futurity and other race winners has long been acknowledged, and the reputation of the family increases every year. Breeders should not overlook the fact that Henry Helman has at Pleasanton one of the most lightly bred young descendants of Baron Wilkes there is in the United States. We refer to the four-year-old Baron Bowles, that took a three-year-old race record of 2:25 last year. This handsome young stallion is by Baron Wilkes, Jr., a young, but already highly successful son of Baron Wilkes. As Baron Wilkes, Jr., is out of a great brood mare, dam of four in the list, by Director 2:17 and his second dam was the dam of three standard performers and by Princeps, while the third dam is by Volunteer and in the great brood mare table besides, the breeding of the sire of Baron Bowles leaves nothing to be desired—it is the choicest of choice goods. The dam of Baron Bowles is by Dignus, a 2:10 sire by Director, brother to Dexter, his grandam a great brood mare by another speed producing son of Dictator, and his third dam a producing mare by J. C. Breckenridge; breeders need not hesitate over booking mares to Baron Bowles if they want Baron Wilkes blood. Mr. Helman will be pleased to send cards containing this fast young trotter's pedigree to owners of mares if they so request.

The registered Percheron stallion Rosier 65630, foaled April 13th, 1905, and imported from France last month by Dunham and Fletcher, was sold last week by that firm's agent, Stanley A. Moore, to a company of Livermore Valley horse breeders. Rosier is one of the best built three-year-olds ever brought to this State and he will doubtless improve the stock of the Livermore Valley and be a profitable investment for the enterprising citizens who purchased him. The members of the company are Messrs. A. Goulart, C. L. Powell, Peter Ossen, Griffith & McConnell, and M. Garcia.

The racing season at Emeryville has been extended five weeks and will close June 6th instead of May 2nd as first announced. With seven months continuous racing, at one track, is it any wonder that a movement has started to prohibit all betting on races in California, and that it is spreading like a prairie fire?

Frank Leiginger of Stockton drove down to Pleasanton last week and took along a couple of nice mares owned by friends of his that are to be bred to Star Pointer 1:59¼. One is Kate H. by Albani, out of a mare by Capt. Webster. She is owned by Mr. L. J. Wagner. The other mare is by Thomas H. out of a mare by Priam, owned by Mr. J. A. Graham.

If you want to sell at the Blue Ribbon Sale at Cleveland, May 18th to 22d, see Charley De Ryder about it. He will prepare your horse to show his best speed, take him across the mountains and show him at the sale. The Blue Ribbon Sale is the place to get the money for a high-class one that can do the Missouri act.

P. W. Hodges has changed the name of his five-year-old stallion by Zombro 2:11 out of a mare by Nutwood Wilkes to San Francisco. The horse has been called Umatilla Chief, but as he has not yet been registered and has never started in a race, Mr. Hodges decided that San Francisco, the most marvelous city in the world, that earthquake and fire could not destroy, should have a namesake in a trotter that gives promise of being second to none. Hodges worked San Francisco such an easy quarter in 31 seconds at Pleasanton last week that he concluded the horse good enough for the ten thousand dollar M. & M. stake at Detroit and has sent his entry on to that event. Horsemen who have seen this son of Zombro at Pleasanton all think him the highest class trotting stallion that has shown up at this track for some time. He is perfectly gaited and a sound, level-headed trotter with a wonderful burst of speed that he can show whenever called upon.

Red Cloud, the equine hero of the National Horse Show of 1899, was sold the other day by J. R. Mago-wan, of Mount Sterling, Ky., to W. A. Dickinson, of Trenton, Ky. The stallion is eighteen years old. When in his prime he was considered to be about the best horse of his size and type ever seen in Madison Square Garden, and it may be doubted whether his equal has ever been seen to this day. William L. Elkins brought him out at the exhibition of 1899, winning both the championship prize and the Waldorf-Astoria Cup. Shortly afterward Thomas W. Lawson commissioned W. D. Grand to buy Red Cloud, and the Boston horse fancier paid \$10,000 for him. After showing him a year or two Mr. Lawson sent him to the stud. At the Lawson dispersal sale in Madison Square Garden about a year ago Mr. Mago-wan bought him. Red Cloud is a grandson of Harrison Chief, a trotting bred stallion, whose descendants are equally noted as trotters, as high steppers and as saddle horses.

If the Oakland trotting meeting is a success this year (and with its splendid list of entries already received for the six stakes which closed April 1st, it surely will be), Secretary Ben Benjamin says the association will arrange some rich colt stakes and futurities for future years. Oakland is so located that an annual trotting meeting can be made the greatest event in harness racing on this coast.

There was a great contest at the Stadium track last Sunday between William O'Kane's mare Babe and William Michael's roadster, which was held to decide a wager of \$100 between the two gentlemen. Babe won in two straight heats of one mile each, the fastest of which was about 2:21.

Sam Gamble came in this week to add a little more to the evidence which he has to offer about Nora Marshall, the dam of Alfred S. 2:16¼. The Year Book and the register gives the year of Alfred S.'s foaling at 1873, which Mr. Gamble sassy must be an error, as he came to California with Elmo, sire of Alfred S., arriving on the last day of December, 1872. On June 30th, 1873, Elmo served his first mare in California, consequently Alfred S. could not have been foaled in 1873 as the Year Book and Register state. In regard to the breeding of Nora Marshall, Mr. Gamble appears to be correct as to her having been brought here from the East as in the old Palo Alto catalogue of 1887 appears the breeding of the mare May Day by Wissahickon, bred by J. C. Flood, Menlo Park. Her first dam is given as Nora Marshall by Union, a son of Young Morrill, and second dam by American Star. As this horse Union was never in California, Mr. Gamble's contention that Nora Marshall was brought to this State by John Congdon is a reasonable one.

Graham E. Babcock of Coronado, Cal., died at Colorado Springs April 6th. Mr. Babcock went to the Colorado resort nearly two years ago for his health, but failed to find relief in the high mountain air, and was confined to his bed for several weeks before his death. Mr. Babcock was a great admirer of the trotting horse, and owned several, his private stables at Coronado being magnificently appointed. Among the horses he used on the road were the famous trotter Toggles 2:08½ and El Moro 2:13¼. He was prominent in the development of several California enterprises. He was vice-president and general manager of the San Diego and Pacific Beach Railroad, while his father owns the famous Coronado Beach Hotel and is president of the San Diego Water Company. Mr. Babcock was 33 years of age, and leaves a widow and small daughter.

Zolock 2:05¼, sire of three 2:10 performers, is doing a good business in the stud at Walla Walla. Mares are being shipped to him from Spokane, Colville, North Yakima, Waitsburg, Pomeroy and many other places. Any resident of Washington that owns a well-bred mare should not overlook this great son of McKinney. Judge Thos. Brents has booked five mares, among them Laurelia, the dam of Helen Norte 2:09½, and Magladi 2:10¼.

HUMBOLDT COUNTY HORSES.

Through the enterprise of several Eureka horsemen the South Park race track, near that city, is being put in fine shape for this summer's racing, according to a correspondent of the Herald. There are several horses being worked at this track and quarters in 35 seconds are getting to be quite common.

Landon Hunt, the pioneer trainer, is at the park with quite a string in his care. He heads his string with the great stallion, Timothy B., a full brother of Wayland W. Timothy B. is a successful horse in the stud, and while not bred to any high-class mares, still he put two in the list last season—Tobasco 2:12½, who won at Pleasanton among the best of them, and Sunrise, owned by Clancy and Van Horn, who with only nine weeks' work took a record of 2:23. Gladys B., owned by Herman Wahl, another one, is credited with a trial mile in 2:20, a good showing for any horse. Among the horses Mr. Hunt has in training are Tobasco, Sunrise, Jim Whitney by Wayland W., a trotter that has been some fast miles, owned by Christenson and Thompson of Scotia; Rey Monte by Monterey Jr., with a two-year-old record of 2:23½, owned by Mr. Heckman; Oak Derby by Charles Derby, a green three-year-old that looks like the goods, owned by Henry Rohner of Uno fame, and several road horses which he is gaiting for different owners.

Dr. Felt has some fine ones in training. Among them is a filly by Greco B. that can step some, but the top-notch is a sorrel filly by Searchlight that will make the best of them step when they score for the word. It will be remembered that that fast two-year-old, Ray O'Light, that took a record of 2:13½, and the fast three-year-old Aerolight, with a record of 2:11¼ and an exhibition mile record on the Woodland track of 2:05½ are by the same horse. The doctor has something to be proud of in this one. He also has a weanling colt by Star Pointer that has the ear marks of a champion. Dr. Felt is the largest breeder of light harness horses in Northern California and his stock is worth going miles to peep at.

William Hall has a promising young stallion by Greco B.—he by the great McKinney, and a gelding by Wayland W. that have never been tracked yet, but very little work would have them both stepping in 2:20 or better, as a three-minute clip on the road is easy for them.

Frank Long has a green mare by Waldstein that will make the best of them step by fair time. Mr. Long is now driving his great mare Nellie R. on the road and she is an ideal road mare. Nellie R. has the considerable distinction of being the first 2:10 performer that Humboldt produced. She was bred to that fast pacer Zolock 2:05¼.

Reports from the new Arcata track and the fast Rohnerville track are promising, and it is said that the Ferndale horsemen are already talking about the fair race meet this summer. From all indications, this will be one of the most successful summers of racing that Humboldt has had in years.

A BERT LOGAN BABY.

The following appeared in the last issue of the Chicago Horse Review:

W. H. Stubblefield, Jr., Oran, Mo., writes: "Della's Beauty foaled a bay colt March 17, by Bert Logan, p. 2:16¼, which was forty inches high. It is well made and all right in every particular. This is the most phenomenal pacer for a colt that I have ever seen. We have already trained him for speed by the side of the mare without anything on, and it can step a 2:40 shot without a bobble or mistake; we do that by riding the mare down the stretch of our track. It is as steady as any horse I have ever seen, and was able to pace this clip at five days old. Others have told me, who have been around the place, that they have never seen its equal.

"With Della's Beauty for a dam and Bert Logan for a sire, we are very much in favor of barring the hobbles forever. I can't say, however, that with some others that I would be in favor of discarding the hobbles for all time to come, as I might have some others on which hobbles would be required; but this one certainly meets the requirements of the board of the American Trotting Association made at its last session. This mare's foal is entered in all the good futurities, including the Review No. 15. With no accidents it will certainly prove a great race horse. I would not care to place a value on this colt at this time."

Mr. L. C. Hellar recently purchased from Mr. Mosher of Los Angeles the Hal Dillard horse Young Hal 2:10¼ and has entered him in his classes on the California circuit. Mr. Hellar purchased from Mr. Mosher at the same time a two-year-old by Hal B. 2:04¼ out of Juliet D. 2:13½ by McKinney 2:11¼, that is a fine prospect.

Mr. D. E. Newell.

Dear Sir: Replying to your letter in regard to Save-the-Horse, will say I have used it with much success. The running horse Col. Roosevelt, that had broken down in training for two or three years past, is now in good shape and will certainly be able to race as well as ever before. Have also used Save-the-Horse on the horse Greyfield with satisfactory results. Will also add that I have seen Save-the-Horse remove a deep-seated ringbone from a Director trotting horse in Monroe Salisbury's stable.

I am pleased to be able to recommend Save-the-Horse from actual experience. Yours truly,
GEO. A. DAVIS.

Bingen 2:06 $\frac{1}{4}$

FOR SALE

BECAUSE WE HAVE TOO MANY STALLIONS

we are offering for sale the best we have, as well as the most fashionably bred 3-year-old stallion in the entire West.

ROBERT BINGEN 29567, sired by BINGEN 2:06 $\frac{1}{4}$, the phenomenal sire of colt trotters and futurity winners.

First dam, EPISODE, trotting race record 2:18, (dam of Norab 2:18), by Ambassador 2:21 $\frac{1}{4}$ (son of Geo. Wilkes and sire of Ambulator 2:09 $\frac{1}{2}$, Susie T. 2:09 $\frac{1}{4}$, and grandsire of Blacklock 2:04 $\frac{1}{2}$, a 2-minute pacer). **Second dam, SANTOS**, great brood mare, (dam of PETER THE GREAT 2:07 $\frac{1}{4}$, winner of the Kentucky Futurity and sire of SADIE MAC 2:06 $\frac{1}{2}$, also winner of the Kentucky Futurity). SANTOS is also dam of three others, all trotters, records 2:16 $\frac{1}{4}$, 2:18 and 2:25 $\frac{1}{4}$, respectively. She was sired by Grand Sentinel 865, son of Sentinel, full brother to Dictator. **Third dam, SHADOW**, great brood mare, (dam of four with standard records) by Octaroon. **Fourth dam** by Joe Hooker 185, etc.

ROBERT BINGEN is perfect in every respect. Will outshow any horse of his age. Sound, clean and a fast trotter with the high action inherited by all the Bingens. The best cross in the world for California bred mares, daughters and granddaughters of MCKINNEY, NUTWOOD WILKES, ELECTIONEER, etc. We believe this is one of the only two sons of Bingen owned west of Chicago, and we own them both. ROBERT BINGEN should earn in the stud in California between Two and Three Thousand Dollars this season, and Five Thousand next, while he is being developed as a race horse. We have gone carefully with him and he is now ready for more strenuous work. BINGEN is only 14 years old, and young sons of his have sired more futurity winners and colt race trotters than any other family that ever lived; such as Kentucky Todd 3, 2:08 $\frac{3}{4}$, Douglass 3, 2:12 $\frac{1}{4}$, Cochato 3, 2:11 $\frac{1}{2}$, Aquin 3, authenticated trial 2:09; Binvolva, world's 2-year-old 3-heat record, 2:15 $\frac{1}{4}$; Bisa 3, second to General Watts, 2:06 $\frac{3}{4}$ —Bisa timed separately in 2:08 $\frac{3}{4}$. Address,

HERBERT STOCK FARM, 1736 Broadway, Denver, Colorado.

To Buyers

Mr. Ottinger, on account of ill health, has decided to return to Europe, and will sell

The Great Stallion Daedalion 2:08 1-2

He will be offered to buyers at the

Pleasanton Sale Without Strings, Without Limit

The man who gets him will have one of the best sons of Diablo. His mark of 2:08 $\frac{1}{2}$ is not a marker, as he has repeatedly shown miles in 2:05 or better. Extended pedigree will be furnished on date of sale—April 17th.

FRED H. CHASE & CO., Auctioneers,

478 Valencia St., San Francisco

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

OF URGENT IMPORTANCE

With the fleeting of time and the urgency of speedy success it means all in all to every owner of an unsound horse to stop all expensive experimenting and turn at once to "Save-the-Horse." Humane, Positive and Permanent, and horse can be broken, trained or worked as usual. The only treatment sold under a binding contract. Allendale Farm, Scottsville, Albemarle Co., Virginia.

I took off a splint and a bog spavin and cured a horse the veterinary said had navicular trouble with Save-the-Horse. Yours truly,

JOHN THACK SNYDAR.
Troy Chemical Co., Binghamton, N. Y. Bridgeton, N. J., Jan. 18, 1908.

Gentlemen: Your "Save-the-Horse" spavin cure is the greatest remedy ever known for broken-down tendons. I had a horse break down in tendons of left fore leg in May, 1906. I used "Save-the-Horse" on it, I started racing him in September, same year, winning three races out of five starts and was second in another. In October he won his race in straight heats, time 2:18 $\frac{1}{4}$, 2:19 $\frac{1}{4}$, 2:19 $\frac{1}{2}$. He then broke down in right fore leg. I used "Save-the-Horse" on that also. I started him five times in 1907, he raced every heat in from 2:17 to 2:20 and never took a lame step in either fore leg.

Yours truly,
A. M. WRIGHT.
Gravesend, L. I., Feb. 8, 1908.

Gentlemen: I bought and gave Save-the-Horse a good trial. I used it on Buttlug for a bowed tendon and Buttlug raced.

I used it on Frank Gill for a bad knee with success. It's what I use for splints there is nothing better. Yours truly,

JNO. I. SMITH, Trainer for J. L. McGinnis.
Kingston, N. Y., Feb. 24, 1908.

I had in my stable a very fast mare which had a capped hock and it bothered her when speeding very much and it seemed impossible for her to race. I tried everything until I was told to try Save-the-Horse, I did and will say it is the greatest thing I ever used. It took it off after using one bottle. I then used it on a mare for ring bone and it cured her. I started her fifteen times over half-mile track and was second in 2:15. She would not have gone a race but for your Save-the-Horse.

Yours truly,
T. C. ACKERMAN.
"Save-the-Horse" Permanently Cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

per bottle, with a written guarantee, as binding to protect you as the best legal talent could make it. Send for copy and booklet.

At all druggists and dealers, or express paid.

TROY CHEMICAL COMPANY, Binghamton, N. Y.

\$5 Due on May 1, '08

SECOND PAYMENT

Pacific Breeders Futurity Stakes No. 8--- \$7,250 Guaranteed

Mares Served 1907. Foals 1908. Stake Closed December 2, 1907.

\$4,250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions. \$250 Prizes to Stallion Owners.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.	\$1000 for Three-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Trot.	200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.
1250 for Two-Year-Old Trotters.	750 for Two-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Trot.	200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.	100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings February 2, 1909; \$10 on Two-Year-Olds February 1, 1910; \$10 on Three-Year-Olds February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

REMEMBER THE SUBSTITUTION CLAUSE—If the mare proves barren or slips or has a dead foal or twins, or if either the mare or foal died before February 2d, 1909, her nominator may sell or transfer his nomination or substitute another mare and foal, regardless of ownership. In Futurity Stake No. 7 the demand for substitutions far exceeded the supply.

Be sure and make payment in time.

E. P. HEALD,
President.

F. W. KELLEY, Secretary,
Pacific Bldg., San Francisco, Cal.

A Snap for Breeders

For this month only

\$3.00

is the amount you can save by cutting this ad out and sending it to us with an order during the month of April for a set of our

Ellis' Latest Improved Breeding Hobbles

Absolutely the safest and best in the world. Endorsed and used by nearly all prominent breeders. No stock farm complete without one.

Ellis' Improved Breeding Hobble

to prevent mare injuring stallion while she is being served.

HOME OF GRATTON 2:13.

G. S. ELLIS & SON—

Gentlemen: I consider the Ellis Improved Breeding Hobbles the best in use.

F. E. MARSH.

The Ellis Improved Breeding Hobbles are made of the best quality especially selected, extra heavy, pure oak tanned, hand stuffed harness leather, all parts where there is wear are double and stitched. The pulley is solid bronze, and the workmanship throughout is the very best. Our regular price on these Hobbles is \$10.00, but for this month only we will furnish them to Breeders at \$7.00 net—provided cash accompanies order.

Order a set to-day before you forget it. If they are not satisfactory and better than any other make you can return them to us and we will refund your money.

We have no agencies or branch houses and do not sell our goods to harness dealers or department stores to sell again, but sell our entire product direct to horsemen only, saving them the middleman's profit which is from 20 to 33 1-3 per cent.

G. S. ELLIS & SON, Harness and Turf Goods Manufacturers Cincinnati, Ohio.

N. B.—Free: Our 448-Page Catalogue showing illustrations, giving complete descriptions and quoting prices that are beyond competition on everything used on or about the horse (many new goods) will be sent free, all charges prepaid, to any address upon application. Every horseman should have one, as it is not only instructive but will save many a dollar for him during the season. Write for one to-day, addressing Department S.

The Annual Sale of

APTOS

Three-Year-Olds

Sired by DEXTER PRINCE, Cupid and Aptos Wilkes at

Chase's Pavilion

Monday Evening, May 4, 1908

It is the policy of this farm to sell without reservation, and this lot includes several ready-made race horses. The two fillies by Dexter Prince, out of Dione 2:07 1/4 and Hulda 2:08 1/4, are in themselves attraction enough to top any sale. The carriage horses listed along with the trotters, include single drivers, and two pairs closely matched. They are a sound lot, fearless, good mannered and fit for immediate use. These horses will be at our sale stables ready for inspection Saturday, May 2nd.

Write for catalogues. **FRED H. CHASE & CO., Auctioneers,** 478 Valencia St. San Francisco

Awarded Gold Medal at California State Fair, 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition. Ask your grocers or dealers for it. Positively cures Colic, Scouring and Indigestion. Manhattan Food Co., C. P. Kertel, Pres., 1001-1003 E. 14th St., Oakland, Cal.

FOR SALE.

Three-year-old trotting stallion that stepped a quarter in his two-year-old form without training in 36 seconds. Sired by McRoberts; dams by Simmons, Smuggler and Mambrino Chief. All three dams producers; also two fillies that are bred in the purple. Speak quick if you want the best on the Coast.

EDWARD UHL, Rosalia, Wash.

TWO PACING STALLION COLTS WANTED.

A yearling or two-year-old by Star Pointer and one by Zombro. Must be good color, natural pacers, standard bred and registered, or eligible to registration. Bay or brown, little or no white, of good size, neat heads, not too high on leg, standing and traveling square on their feet. Must have plenty of knee and hock action. Must be absolutely sound and out of good mares. Address giving price, pedigree and full particulars as to speed, if worked, etc., F. W. KELLEY, Breeder and Sportsman, 368 Pacific Building, F. W. KELLEY, 363 Pacific Building, San Francisco.

Lice on cattle indicate lack of attention and poor feed. Grease of any kind will destroy on cattle, but grease should not be used if it can be avoided. First wash the animal with kerosene emulsion and follow with clear water. When the skin is dry dust every portion of the body with a mixture of a peck of carbonate of lime and a bushel of clean, dry dirt. If a single animal is infested with lice, the others will soon be in the same condition unless remedies are used as preventives.

It is easier to keep the animal well on the farm than it is to make them well after they have once become sick. This may be done by having a sufficient amount of the right kind of feed fed in moderation when the system is in a right condition to receive it; plenty of pure water given when the animals are not too hot; and then under no circumstances should the animals be overworked.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's
Caustic Balsam

IT HAS NO EQUAL

For the Human Body

JOHN MIDDLEING'S

High Grade
Sulkies
and Carts

MIDDLEING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

141 Valencia St. San Francisco.

DEL CORONADO 2:09¾

Del Coronado 2:09¾

Reg. No. 45122. By McKinney 2:11¼, dam Johanna Treat by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles, Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13½

Reg. No. 36458. By McKinney 2:11¼, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07¼

By Nutwood Wilkes 2:16¼, dam Atherine 2:16¼ by Patron 2:18¼ (son of Pancoast 2:21¼ and Beatrice, dam of Prodigal 2:16¼); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3½ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without ice or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27¼ by Dawn 2:18¼. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

—AT—

Agricultural Park, Los Angeles, Cal.

Box 96, University Sta., Los Angeles, Cal.

CARLOKIN 2:13½

COPA DE ORO 2:07¼

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12¼

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08¼ (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 3-year-old record of her day. She is the dam of four and granddam of 12 in the list. Iran Alto is the sire of Dr. Frasse 2:11¼, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

TERMS: \$30 for the Season. Usual return privilege.
Pasturage \$3 per month.

Will make the Season of 1908 in charge of
H. S. HOGBOOM, Woodland, Cal.

ROBERT DIRECT 0883

Black stallion, sired by Direct 2:05¼, dam Daisy Basler (sister to Ethel Basler, dam of two in 2:15¼) by Robert Basler 2:20, son of Antevolo 2:19¼; second dam Richmond by Fasha by Sultan 2:24; third dam Miss Rowland by A. W. Richmond, etc. The largest, handsomest, best bred and best gaited Direct in California.

Terms: \$30, or \$50 to Insure.

BEST POLICY 42378

Bay stallion, sired by Allerton 2:09¼ (sire of Locanda 2:02, Redne 2:07¼, etc.), dam Exine 2:18¼ by Expedition 2:15¼ (sire of Bon Voyage 2:12¼, etc.); second dam Euxine (dam of 4 in 2:30) by Axtell 2:12 (sire of 7 in 2:10 and dams of 6 in 2:10); third dam Russia 2:28 (sister to Maud S. 2:08¼) by Harold; fourth dam Miss Russell (dam of Nutwood 2:18¼) by Pilot Jr. 12. The choicest and most fashionable bred trotting stallion on the Pacific Coast!

Terms: \$50 for the Season.

These choice stallions will stand at

THE PALMS, ½ mile east of Visalia

Isn't He Worth Saving?

ABSOLUTELY CURE
QUINN'S OINTMENT
REMOVES
SPLINTS
SPAVINS
WIND PUFFS
BURNS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Splints, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind. writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and my without hesitancy I fit in the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars and testimonials etc.

Athasham

Race Rec. 2:09¼.
Reg. No. 45026.

A Game Race
Horse in the Stud

Bay stallion, stands 15.3, weighs 1,150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07¼, Athasham 2:09¼, Sue 2:12, Listerine 2:13½ and 8 others in 2:30); dam, the great brood mare Cora Wickersham (also dam of Nogi (3) 2:17¼, winner of 3-year-old trotting division Breeders Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22¼ (sire of dams of Geo. G. 2:05¼, etc.). Athasham has a great future before him as a sire. He is bred right and Made right, and has every qualification one can expect in a sire. He has been timed in 2:06¼ in a race, and his courage is unquestioned.

He will make the Season of 1908 at **Orchard Farm, Fresno, Cal., for a Fee of \$50**, with usual return privilege.

For further particulars address this place, care of

CHAS. MIDDLETON, Manager,

Or **D. L. BACHANT, Owner, R. R. 1, Fresno, Cal.**

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11¼, the greatest sire of extreme speed living. Dam Helena 2:11¼, dam of Wild Nuthing 2:11¼, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04¼; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinneys. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

CHESNUT TOM 43488

Race Record 2:17¼. Trial 2:14.

Sired by Nutwood Wilkes 2:16¼ (sire of John A. McKerron 2:04¼, the fastest trotting stallion of the Wilkes family). Dam Zeta Carter by Director 2:17 (sire of dam of John A. McKerron 2:04¼); granddam Lida W. 2:18¼ by Nutwood 600. Chestnut Tom won the 224-trot at Salinas, 1906, in three straight heats.

Season of 1908 at

STOCKTON, Cal.

Terms: \$30

Address, the owner,

GEO. T. ALGEO, 120 So. Center St., Stockton, Cal.

DO YOU WANT THE BEST?

BREED YOUR MARES TO

ZOMBRO 2:11

Son of McKinney 2:11¼ and Whisper by Almont Lightning.

SERVICE FEE—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Bellemont 2:09¼, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08½, holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list, ten in the 2:15 list and seventeen in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices. Address,

GEO. T. BECKERS,

3949 South Figueroa Street,
Los Angeles, Cal.

Bonny McKinney 41383

Son of
McKinney 2:11 1/4
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03 1/4
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13 1/4 (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11 1/4, trial 2:06 1/4. Dam Rita B. by Boodle Jr.; 2nd dam Gablian Girl by Gablian; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal.

Campbell's EMOLLIC IODOFORM **Gall Remedy**

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.

PRICE—25c, 50c and \$1.00.

SECOND PAYMENT

Pacific Breeders Futurity Stakes No. 8--- \$7,250 Guaranteed

Mares Served 1907. Foals 1908. Stake Closed December 2, 1907.

\$4,250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions. \$250 Prizes to Stallion Owners.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.
200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings February 2, 1909; \$10 on Two-Year-Olds February 1, 1910; \$10 on Three-Year-Olds February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

REMEMBER THE SUBSTITUTION CLAUSE—If the mare proves barren or slips or has a dead foal or twins, or if either the mare or foal died before February 2d, 1909, her nominator may sell or transfer his nomination or substitute another mare and foal, regardless of ownership. In Futurity Stake No. 7 the demand for substitutions far exceeded the supply.

Be sure and make payment in time.

E. P. HEALD,
President.

F. W. KELLEY, Secretary,
Pacific Bldg., San Francisco, Cal.

It is the policy of this farm to sell without reservation, and this lot includes several ready-made race horses. The two fillies by Dexter Prince, out of Dione 2:07½ and Hulda 2:08½, are in themselves attraction enough to top any sale. The carriage horses listed along with the trotters, include single drivers, and two pairs closely matched. They are a sound lot, fearless, good mannered and fit for immediate use. These horses will be at our sale stables ready for inspection **Saturday, May 2nd.** Write for catalogues.

THE BIGGEST THING IN PURSES for harness horses is announced by the New England Trotting Horse Breeders' Association for its meeting this fall. This is a purse of \$50,000 for trotters, and is open to all, the horses to be handicapped by their records. First horse to the wire is receive \$30,000, enough for an ordinary horseman to retire on, second horse will receive \$10,000, third \$5,000, fourth \$2,500, fifth \$1,500, and sixth \$1,000. The entrance fee is only one per cent of the purse, \$500 all told, and nothing is to be deducted from winners. The race is a handicap, the distance which scratch horses are to trot being one mile and a quarter, and the race a single dash. Horses with speed of 2:15 or slower are to start at the three-quarter mile pole. For every second faster than this rate of speed horses will be placed fifty feet back of the scratch line. The handicap or speed allowances are to be announced August 18th, and horses will be placed according to the knowledge of their ability possessed by the handicappers on that date. If this race does not attract a big list of entries, the largest ever received for a purse race, then it will be because horse owners and trainers fail to understand it. It is without any doubt the fairest plan ever devised in America for all classes of trotters, and gives the slow horse a chance to win from the champion. If a horse with a trotting record of 2:15, and with the ability to trot that fast but no faster, should start in this race, and trot the full mile and a quarter at his best gait, and if Sweet Marie 2:02 should also start at her handicap distance of 650 feet back of the three-quarter pole, and trot the race out at the rate of 2:02 to the mile, the two trotters would finish head and head. Figuring this way, the slow horse has as good a chance to win as the fast one, and this bringing them together should make

one of the greatest contests ever seen. The horses will receive a standing start, and those trained to stand quietly, start promptly and get into stride quickly will have the best chance to get some of the money. Looked at from every point of view imaginable the race seems one of the fairest ever devised, and gives every trotting horse in training a chance to be the winner of a fortune for its owner. Furthermore more than one horse from the same stable will be allowed to start, thus giving an owner the opportunity to be represented by a Major Delmar 1:59¾ (who will have to trot 762 feet more than a mile and a quarter) and a green trotter with 2:15 speed that will only trot five-quarters of a mile. The meeting at which this great trotting derby is expected to take place is to be held at Readville during the latter part of August this year. Entries will close May 15th, at which time \$100 will be due. A second payment of \$100 is due June 15th, a third payment of \$100 July 15th, and then the handicap will be announced August 18th. Those who do not like the handicap given their horses can then drop out, but otherwise \$200 final payment will be due August 22nd. The handicap system of racing has been in use on European and Australasian trotting tracks for many years with great success, and through it horses with the fastest records are not barred from racing as with us. It works well there and why not here? We hope that the New England Trotting Horse Breeders will receive such an entry list that the stake will not cost them anything and that when the race is held it will meet with such approval that other associations will follow the New England lead and trotting derbies will be held in all parts of the country. Such purses as this cannot help but add to the value of trotting horses. All know that big values are caused by the probable earning capacities of race horses, and this event if carried out and successful will put many buyers in the field next winter and spring for well mannered trotters that can show a 2:15 gait for a mile and a quarter, and certainly such horses represent the very highest ideal of the American trotter.

THE GRAND CIRCUIT gives every promise of being greater than ever this year, and from the present outlook California bred horses will be as prominent as ever. The four fastest trotting horses in training at the present time are Major Delmar 1:59¾, Sweet Marie 2:02, George G. 2:05¼ and Sonoma Girl 2:05¼. Of these the three last named were bred and raised in this State, and the other is by a California bred and raised sire. There will be two stables of California horses raced on the Grand Circuit this season, those of Charles DeRyder of Pleasanton and W. G. Durfee of Los Angeles. Each of these well-known trainers will have from five to eight horses in his string, and while we do not claim there is a prospective world's champion among them, we think the probability is that they will stand up close to the top when the list of money winners is made out at the close of the season. The Pacific Coast has a circuit this year, where the purses for trotters and pacers range from \$1,000 to \$5,000, and but for this there would be many more of our California trainers making arrangements for an eastern campaign. Last year, besides such trotters as Sonoma Girl 2:05¼, Wild Bell 2:08¼, Charlie Belden 2:08½, Athasham 2:09¼, Bellemont 2:09¼ and others sent east from California to earn records and rich purses on eastern tracks, where Sonoma Girl proved to be the greatest money winner ever seen on the Grand Circuit, we developed a good long string of money winners here at home, and when the lists were made up there was a goodly array of money winners that had only started here on the Coast. Among the trotters that raced at home were Nogi winner of \$5,750, Bertha Mac \$4,200, Carlokin \$4,000, Dredge \$3,500, Era \$3,500, R. Ambush \$3,000, North Star \$2,900, and many others that had over \$1,500 to their credit. The pacers furnished another good list, Sir John S., winner of \$6,225, Copa de Oro \$5,000, Inferlotta \$4,900, Delilah \$2,675, Miss Georgie \$2,500, Queen Pomona \$2,000, and others earning more than enough to pay for winter oats without leaving the Coast. The good purses offered this year have attracted large entry lists thus far, and everything points to another good year for harness horses, with good racing, fast records and a very profitable year for those who own the winners. To the man who is not a confirmed pessimist, (that sort of creature who has been described as the one who sees only the hole in the doughnut) the outlook for California horses, California trainers and California owners is bright at the present time.

A GREAT SALE is the Blue Ribbon Sale of the West which the Portland Horse Sale Company advertises in this issue to be held at Portland, Oregon, April 28th, 29th, 30th and May 1st. There are over 250 horses consigned to this sale and several herds of fine cattle. The horses are to be sold during the first three days, the cattle on the last day. Among the horses consigned are Mary Mims, a handsome three-year-old filly by The Bondsman out of a mare by Allerton; Henry Gray 2:18¼, a great trotter by Zombro; Minwal 2:22¾, a 2:10 pacer; Lee Pointer, a grand young stallion of the Hal family, and many great prospects of tip-top breeding. The great Brook Nook Rancho in Montana consigns six carloads of splendid horses to this sale, and every horseman on the Coast knows that the Brook Nook horses are full value for the money paid for them in the auction ring. The catalogue issued for this sale has over two hundred horses described and pedigreed, and there have been thirty or forty horses consigned to the sale since the catalogue was printed. This catalogue, by the way, is about the handsomest and best printed book of the kind that has been gotten out by any auction firm on this Coast for a long time, and shows the enterprise of the Portland Horse Sale Company. We would suggest to the many readers of this journal, that a trip to Portland, Oregon, at this time of year is as pleasant as any that can be made on the Coast by steamer or rail, and the opportunity to attend a great horse and cattle sale is one that should not be missed. Look over the big advertisement in this paper and send for a catalogue immediately.

BREEDERS who own standard bred horses eligible to registration should have them registered at once, and if they own horses not eligible but having one or more standard crosses they should register them non-standard. Every day or two we hear of sales falling through because the animals were not registered or because the present owner is unable to give a certificate of pedigree not being the breeder of the animal. Breeders should register every mare on the farm, in one class or the other, and then follow up by registering every foal. The time will come within a few years when there will be no qualifications for registration except Rule 1, which requires each animal for which application is made to have a registered sire and dam. The time to attend to this matter, therefore, is right now.

THE STOCK FARM, published in the blue grass, issued a nicely illustrated stallion number April 9th, which contains a vast amount of information in regard to the trotting bred stallions standing for service in Kentucky and adjacent territory this season.

THREE-YEAR-OLDS FROM APTOS FARM.
The announcement is made that on Monday evening, May 4th, just a few days before the arrival of the great fleet of United States battleships in San Francisco harbor, Fred H. Chase & Co., will sell at auction, at their Valencia street pavilion, the entire crop of three-year-olds from Mr. Spreckel's Aptos Stock Farm. These three-year-olds are the get of Dexter Prince, Cupid, Aptos Wilkes and Cronje, the last named a son of Cupid 2:18 out of Hulda 2:08½. This sale includes the entire crop of Aptos Stock Farm three-year-olds, together with a few choice carriage horses of seasoned age, well broken and fit for immediate use. Dione 2:07¼, Hulda 8:08½, Venus II 2:11¼, Zarina 2:13¾, Psyche 2:16¼ represent the class of matrons at this farm, and this lot of three-year-olds will probably outlook any other consignment sent to the sales ring. They have had no track work, but have been carefully handled and driven regularly on the road until they are now pleasant drivers, accustomed to automobiles, steam cars and other unusual sights. They are all in perfect health and a sound lot, and by sale time will be in the best possible condition, ready for regular training the following day. A handsomer lot of sound prospects were never offered to buyers, and Mr. John Williams the farm's colt handler, may well be proud of them. He has handled them from the first and guarantees they will do all that is claimed for them. He is sure that too much cannot be said about the Hulda filly, also the one out of Dione 2:07¼. He predicts they will learn to trot fast with little training. The Point Lace filly is another that shows wonderful trotting action, as does her mate, a slashing gelding out of Galata, a Stamboul mare. He is clean gaited and a high-headed, handsome fellow. Another that one cannot help mentioning is a large rangy bay gelding by Dexter Prince out of Psyche 2:16¼, a mare by Cupid 2:18. He is a gentlemanly fellow with a good head and the actions of a fast trotter. In fact, each and every one deserves mention, but they will show for themselves and will be at the stables for inspection Saturday, May 2.

NOTES AND NEWS

The Sacramento Driving Club will give an afternoon of racing at Agricultural Park on May 30th, which falls on Saturday this year.

Harry Davis of Pleasanton, has sent the two good brood mares Sidlette 2:17½ by Sidney, and Missie Medium by Rampart, to Santa Clara to be bred to Kinney Lou 2:07¾.

Wayland W.'s son Bolivar 2:00¾, the fastest pacer bred on the Pacific Coast, is being shaped up for the races again this year. He is now owned by John McGuire of New York.

The Kentucky Futurity has 1177 mares nominated. This is not the largest list ever received on this stake, but it is a big one nevertheless, and testifies to its continued popularity.

It is time Salinas, Pleasanton and Woodland were announcing their programs if they intend being members of the California Circuit this year.

In Henry Titer's stable at Readville there is a four-year-old by Direct 2:05½, dam Mendolita 2:07¾ by Mendocino, that is a very promising pacer and is owned by Horace Chenery of Belfast, Maine.

The Larabee Brook-Nook stock farm in Montana now has on hand nearly 1,000 head of horses of different classes and ages. Twenty-five men are given constant employment in caring for these animals.

Limonero 2:15¾, record made when a three-year-old, is growing in popularity as a sire in Southern California where his get are coming into prominence for their great natural speed and fine individuality.

Dr. Fred D. Ashworth of 2497 Mission street, this city, has bred his mare Allie S. by Altamont, dam Revel by Roy Wilkes 2:06¾, to the Palo Alto bred stallion Nazou (son of Nazote 33,527, and Aria 2:16¾ by Bernal).

The first matinee of the Davis Driving Club will take place to-morrow afternoon at the East Davisville half-mile track. The races will be for blue ribbons only, no money prizes being permitted by the laws of the club.

Budd Doble has at Santa Clara a two-year-old colt by Kinney Lou, dam Redirect by Direct 2:05½ bred by R. deB. Lopez of San Francisco, that is not only a fine looker but an unusually promising colt, a real trotter that takes to the game like a duck to water.

Expressive Mac 41523, one of the best bred of all the McKinney's, will be a great sire judging from his weanlings now to be seen in Kings County. Expressive Mac's dam, Expressive 2:12½, was one of the greatest three-year-olds that California has produced.

They say Highball 2:06¼ is a better horse than he was last year. Perhaps the "fizz" in him has quieted down and he won't boil over as often as he did. Something like 2:03 should be opposite his name whenever he gets off just right and is in condition for a supreme effort.

Of course you will be in San Francisco when the fleet arrives. Better come a few days before so as to attend the sale of Aptos Farm trotters and pacers that will be held at Fred H. Chase's big pavilion on May 4th. The entire crop of three-year-olds will be disposed of at this sale.

Bena Brack, full sister to Zombro 2:11, foaled on April 9th a filly by Prince Ansel 2:20½. It is a fine large filly and is Bena Brack's first foal, the dam being four years old when bred. The filly is in the Breeders' Futurity and will be named in the Oregon Futurity and other stakes.

President J. Christie, of the Sacramento Driving Club, has been visiting Marysville and Chico recently talking up the proposition of forming a regular matinee racing circuit to cover the three cities and to hold races at stated intervals. He is meeting with much encouragement.

Salem, Orebon, had a horse show last week and Homer Rutherford showed R. Ambush 2:11¼, winner of the \$5,000 stake for trotters at the Oregon State Fair last year. The son of Zolock walked off with first prize for standard bred stallion any age, Mike Duff, a son of Zombro winning second, and Lord Lester 2:16 by Zombro, third prize.

S. F. Lewis has taken five head of horses to Pleasanton where he will train them for their owner, Mr. G. U. Hinds. The string is headed by Nazou, a seven-year-old stallion by Nazote, that has made the trip to Hawaii and return, and has developed into a fine large horse. Nazou has shown a mile in 2:28. Lewis has also a six-year-old gelding by Boodle Jr., a bay gelding by Almont Patchen, and a couple of youngsters. The Almont Patchen gelding is ten years old, has no record, but has trotted a half in 1:08.

Zomalta, the Zombro mare which W. A. Clark, Jr. has under lease this year, and that has trotted a half-mile in her work in 1:02½ is out of the mare Kate Hamilton by Gen. Hamilton, a son of Tilton Almont, second dam Flora B. by Jim Brown, second dam by Norfolk. The thoroughbred blood is close up in Zomalta.

William Hogoboom of Walla Walla, has in training at Walla Walla, a trotter 17 hands and 1 inch high, weighing 1310 pounds, that is being prepared for the Greater Salem Stake of \$5,000 to be trotted at the Oregon State Fair this year. The horse is by Gustavus a grandson of Hambletonian 10. He is owned by Mr. J. H. Fletcher a newspaper man.

Mr. S. Christenson of this city has sent his three mares Simone by Simmons, Perza by Allie Wilkes and Lady Estell by Athadon, to Santa Rosa to be bred to Lynwood W., sire of Sonoma Girl 2:05¼, etc. All are expected to foal soon to Bon Voyage. Mr. Christenson's pacing mare Marguerite K. by Don Pedro is also due to foal to Bon Voyage, and will be bred to Star Pointer 1:59¼ this year.

Thomas Ronan, proprietor of the Pleasanton Training Track, has been quite ill lately and had two very severe attacks of heart and stomach trouble last week. He was reported better this week, and it is hoped that he will soon recover his usual robust health. Mr. Ronan has been a very active man all his life, and finds it rather annoying to be housed up, especially at this time of the year.

The \$5,000 free-for-all trot advertised to take place at Readville July 4th received six entries, as follows: Sweet Marie 2:02, Wentworth 2:04½, Sonoma Girl 2:05¼, George G. 2:05¼, Axcyell 2:06¼ and Wilkes Heart 2:06¼. This is the fastest field of six ever entered in a race and it is to be sincerely hoped that each and every one will start. Three of the six are California bred.

Mr. W. R. Murphy's stallion Red McK. is having a very good season at Los Angeles and is being mated with some very fine mares. His colts are coming on now and they are hard to beat, all large, good headed, with good bone, and like their sire, having two good ends. His five two-year-olds are all nice gaited trotters and the only one handled can trot fast. Red McK. is bound to prove a great sire, as he is grandly bred.

William Manske of Huntington Beach writes us that his trotting mare Lucy M. is getting in fine condition and he expects to campaign her next year in the green classes, and has great hopes of starting her in the M. & M. of 1909. Last summer she was worked thirty days and then taken to Corona where she defeated Monocrat and Durfee's Regalo easily. A little later she started at Santa Ana and beat Clara and Goldennut in a matinee race.

Mr. H. K. Devereux writes us as follows from Cleveland: "At the annual meeting of the stockholders of the Cleveland Driving Park Company it was voted not to sell the property at present. This means that the track will be available for training purposes and matinees for some time. To anybody desiring to train over the Cleveland track, I wish to say that it is and will be kept in as good condition as always, and stalls may be rented as usual."

The Polo Alto bred mare Athena 2:22 by Dexter Prince, dam Athena 2:15 by Electioneer II, next dam Ashby, great brood mare by General Benton foaled a fine strong bay colt on the 11th inst by Bon Voyage 2:12¾, and will be bred to Kinney Lou 2:07¾. This mare is the dam of the three-year-old filly Debutant by Kinney Lou that Jack Phippen worked an easy mile at Pleasanton last Saturday in 2:25. Jack thinks she will be able to step in 2:15 this year. She is in all the California stakes.

Mr. F. J. Kilpatrick of this city, has just completed the models of a new toe weight which is his own invention, and looks like the best thing yet made in that line. It can be fastened or unfastened in a second or two and is as firm as the shoe on the hoof when in place. The weights are made of lead or solder, fit snugly and are held in place at the base by a wire clamp screwed to the hoof, and at the top by the strap of the quarter boot. Mr. Kilpatrick has given his invention a trial and finds it fills the bill in every particular.

At the Los Angeles track, Mr. C. T. Hewitt & Son who are expert saddle horse trainers, as well as experienced harness horse trainers, have been working a few weeks on Mr. Geo. W. Ford's trotter Goldennut 2:11¼, making a saddle horse out of this fast trotting son of Neernut 2:12¾. Goldennut is undoubtedly the fastest combination horse on this coast, and Mr. Hewitt says he is the greatest natural saddler he ever had in his stable. He goes all gaits and does it in a show horse style. Mr. Ford goes over to Los Angeles from Santa Ana twice a week and drives Goldennut to cart, and he is one of the best trotters on the track. He shows two minute speed, and Mr. Ford thinks the saddle work does him good. Should Mr. Ford sell his breeding farm together with Neernut, the broodmares and colts, (negotiations for which are now under way) he will retain Goldennut for his fun horse, and use him to saddle as well as matinee him.

Thomas Wilson, Pleasant Plains, Ill., has sold to T. J. Green, Pomona, Cal., an elegant four-in-hand team of sorrels, perfect matches, that took many honors in the rings at State fairs, horse shows and the world's fair at St. Louis. Mr. Wilson also sold to W. S. Newton of Pomona a five-year-old stallion by Don McGregor 2:25.

The Clansman (4) 2:15, the trotter by The Bondsman, which Gus Macey raced in 1907 as a four-year-old without meeting defeat or the loss of a heat, and which he is reported to have said was the best trotter he ever drove and certain to beat 2:07, will be campaigned by Ed Benyon this season.

The May Day races at Dixon this year will be, in the language of Manager Horigan, "the greatest time ever." There will be something doing all day, and an effort will be made to lower the track record of 1:05 made by Alton last year. During the forenoon there will be several automobile races, and in the afternoon the horses will have the track. In the race for named horses, Smiley, Montezuma Maid, Mono Rose, Little Dick, Seymour M. and Patrose have been entered. There will be three or four races on the card.

Mr. John Hogan of Soquel, is the owner of the first of the get of Ray O'Light (2) 2:13½ to make its appearance. The colt has for a dam a mare by Rinaldo son of The King an own brother to Gambetta Wilkes. Mr. Hogan has named it Morning Light and the name is particularly appropriate not only on account of the suggestion to Ray O'Light, Searchlight and Darknight, its paternal sire, grand sire and great grand sire, but because it was foaled just at the break of day, January 21st. The dam was the first and only mare bred to Ray O'Light last year when he was a two-year-old. The mare is to be bred to Kinney Lou 2:07¾ this year.

Mary Mims, a standard and registered three-year-old filly, with a two-year-old record of 2:30 and a trial of 2:20, sired by that great young horse The Bondsman, son of Baron Wilkes, and out of a great brood mare by Allerton, is the star of the Blue Ribbon Sale of the West which is to be held at Portland, Oregon, April 28th, 29th, 30th and May 1st. Mary Mims is not only one of the greatest bred fillies that ever came to the Coast but she is a fine individual, seal brown, 15.3, and a show mare in every sense of the word. She is entered and paid up on in the Kentucky Futurity \$25,000, to be raced this fall at Lexington.

Henry Helman's Jay Bird colt Alconda Jay, served five mares last year as a two-year-old and five colts are expected this year. Two of them have already arrived. The first was Fred Helwig's, and was from his fine mare Lovely Dell by Prince Lovelace. The second is reported by M. C. Keefer, the popular hotel man of Woodland. His mare Annie McKinney by McKinney dropped a great big filly by Alconda Jay on Tuesday morning, April 7th. The filly stood 41 inches when it got up, is a dark bay, and Mr. Keefer had it halter broke the next day. While he did want a stud colt very much, figuring that it would be as well bred as any man's stallion, he is already in love with the filly and thinks she will be among the money winners in the Breeders' Futurity in which she is entered.

Ben Benjamin is trying to arrange a race for Wild Bell 2:08¼, Athasham 2:09¼, Bellemont 2:09¼ and any other trotters eligible to the 2:09 class whose owners desire to start against these horses at the Oakland meeting. Secretary Benjamin will offer a generous purse for this race, and will be willing to close it if the three horses named are entered even should there be no further entries. In all probability there are several horses with slower records that will be named in such a race however, and the race would be a big drawing card at any rate. A purse will also be offered by Secretary Benjamin for the 2:05 class pacers if he can be assured of three or four starters. Sir John S. 2:04½, Inferlotta 2:04¾, Mona Wilkes 2:06½, Queen Pomona 2:07¾, Moy :07¾, Miss Georgie 2:08¾ and Delilah 2:08 would put up a race that would not be any cinch for the favorite.

Moy 2:07¾, the fast pacing mare by Prodigal, that Morris Bros. are entering through the Pacific Coast circuit this year is a well bred one. She was bred at Marcus Daly's Bitter Root Farm, and is by Prodigal and out of Minnie by Clay King, he by King Clay, and he by Harry Clay 45. The dam of Clay King was by Volunteer 55, and his granddam was Belle Brandon, the dam of Gov. Sprague, sire of McKinney's dam. The granddam of Moy was Minnie Merrill by Young Jim, son of Geo. Wilkes, and her g. g. dam Minnie West was by Allie West out of old Heel-and-Toe Fanny, the dam of Jewett 2:14 and Catherine 2:28¾. Moy has a great deal of the old fashioned blood in her veins that was considered top-notch years ago. That she is a mare of great speed was shown by her race at Lexington last year, where she was a starter in the 2:10 pace. Eight horses started in this race, among them the sensational mare Lady Maud C., full sister to Hedgewood Boy. Moy won the first heat in 2:07¾, her present record, and was a good second the next heat which was won by Lady Maud C. in 2:04½. Lady Maud took the next two heats and the race, and Moy won second money.

AMATEUR RACING SEASON OPENS.

Park Amateur Driving Club Begins It With an Excellent Program.

The April weather in Golden Gate Park, San Francisco, was not all that could be desired on Saturday last, there being a high fog which obscured the sun and lowered the temperature a little, although the air was not cold enough for overcoats.

The stadium track was in fine condition, and the slight wind which blew from the west did not retard the speed of the horses to any appreciable extent. As it was the first matinee of the season fast heats were not expected, but the horses made excellent time nevertheless.

Messrs. Al. Joseph, A. J. Molera and J. B. Dalziel occupied seats in the judges' stand, while John A. McKerron and Frank Jermyn held the official watches. Mr. T. J. Crowley acted as starter and did good work, getting the fields away perfectly lined up in several instances. Dan Hoffman and Howard Ladd were the marshals, the latter being occupied most of the time in keeping the good-natured crowd from encroaching too far on the track in its anxiety to see the finishes. When the new grand stand is built this will all be avoided.

The first race on the program was the Class C trot, in which there were five starters. Mr. Ed. Aigeltinger had brought from a two or three years retirement his favorite Dolador 2:20 by Advertiser, for this event and nicely driven by Secretary Fred Thompson the old gelding won in straight heats, trotting the three-quarters the first heat in 1:48, a 2:24 gait, and the second heat in 1:49½. Mr. F. J. Kilpatrick's McKinney Belle by Washington McKinney was second in both heats, Mr. J. W. Smedley's beautiful mare Red Velvet by Zombro was third, Mr. A. P. Clayburgh's big chestnut trotter Charles II. by Dynamo was fourth and Mr. E. Stock's Director B. by Stam B. was fifth. With Dolador out it would have been a great race and the spectators are waiting for the next occasion when McKinney Belle and Red Velvet will meet. It will be a contest between two mares that are not only well matched in speed, but are as beautiful specimens of the trotting breed as are owned in this city.

The Class B trotters were four in number when this race was called. They made the same sort of a race as the first event, inasmuch as they finished in the same positions in the two heats which made the race. The winner was Mr. M. W. Herzog, whose mare Lady Nell by Pasha, won a splendid victory over the handsome black gelding Laddie G. by Zombro, owned and driven by Mr. Geo. R. Gay. Lady Nell had her trotting clothes with her in this race and in both heats went to the front when the word was given, stuck her nose straight out, and looking the very picture of one of the old time trotters so often seen in the lithographs of forty years ago, was not headed in either heat, the first of which was in 1:44½ and the second in 1:43½, the latter a 2:18 clip. In the second heat of this race Mr. Gay made a good drive with Laddie in the last eighth, and closing fast on Lady Nell was only beaten a neck at the finish. Had he begun his drive a little sooner he would probably have won. Mr. Herzog was warmly congratulated on his win and his old mare was "looked over" by many admirers after the race was over. Mr. Kilpatrick drove Secretary Thompson's Lady Washington in this race, and not being acquainted with some of her peculiarities was at a disadvantage when it came to the finish. In both heats Mr. K. knowing the mare had a great brush of speed, fell in behind the leader until the stretch was reached, but on attempting to pull the mare out, she went to a break in both heats and finished third. Mr. Thompson afterwards told Mr. Kilpatrick that the Lady usually makes a break if she is taken to the outside when entering the stretch, and the latter thinks he can do better with her next time. Reina Directum, Mr. S. Christensen's black mare, had been newly shod that morning and did not trot up to her usual speed.

The third race for Class A pacers, had six entries, but owing to the classification it was decided to divide it into two events. In the first division Mr. Thos. Browne's Victor Platte, Mr. Geo. Erlin's Topy and Mr. Dan Hoffman's Mary K. were the starters. This furnished the only split heat event of the afternoon. Mr. Hoffman's entry is a green seven-year-old mare by Zombro out of Klickitat Maid 2:19, and while one of the anxious kind has a great burst of speed and should pace some very fast miles when thoroughly schooled. In the first heat she was off several lengths behind but won handily in 1:43 with Victor Platte second. In the next heat Mr. Hoffman nodded for the word when his mare was nearly 100 feet in the rear of the other two horses and Mr. Crowley rather reluctantly gave them the word. The handicap was too great however, and Victor Platte took the heat in 1:41¼, a 2:15 clip. The third heat Mary K. was up in line at the start and she won handily in 1:45¼. She is a smooth going pacer, wears nothing but a harness and while she, like last year's sensation, Inferlotta 2:04½, does not like to be taken back when there is a recall, will doubtless, also like that mare, improve with training, and learn to conserve her strength.

The second division of this race was won in straight heats by Mr. T. F. Bannon's brown gelding Jim Chase, with Mr. Hamerton's Colonel C. second and Mr. Booth's Satinwood third both times.

All the races were finished soon after 4 o'clock, and the club's officials deserve much credit for the prompt and efficient manner in which the pro-

gram was handled. The races were all best two heats in three, ¼-mile heats. The summaries follow:

First Race—Class C Trotters—

E. H. Aigeltinger's Dolador (F. W. Thompson)	1	1
F. J. Kilpatrick's McKinney Belle (Kilpatrick)	2	2
J. W. Smedley's Red Velvet (Smedley)	3	3
A. P. Clayburgh's Charles II (Clayburgh)	4	4
E. Stock's Director B (Stock)	5	5

Time—1:48, 1:49½.

Second Race—Class B Trotters—

M. W. Herzog's Lady Nell (Herzog)	1	1
George Gay's Laddie G. (Gay)	2	2
F. W. Thompson's Lady Washington (Kilpatrick)	3	3
S. Christensen's Reina Directum (Christensen)	4	4

Time—1:44½, 1:43½.

Third Race—Class A, Pacers, First Division—

D. E. Hoffman's Mary K. (Hoffman)	1	2	1
Thomas H. Browne's Victor Platte (Browne)	2	1	2
George E. Erlin's Topy (Erlin)	3	3	3

Time—1:43, 1:41¼, 1:45¼.

Second Division—

T. F. Bannon's Jim Chase (Bannon)	1	1
W. C. Hamerton's Colonel C. (Kilpatrick)	2	2
F. E. Booth's Satinwood (Booth)	3	3

Time—1:45½, 1:46¼.

FAST TIME AT LOS ANGELES.

There was sensational trotting and pacing at Los Angeles on Saturday last, the Driving Club giving one of the best racing cards ever seen at Agricultural Park track. The weather was fine and a large crowd attended. The track was not in its usual good shape being a little slow, but the time was fast in nearly every race, and some exciting finishes were seen.

In the free-for-all pace, Moy, Siegfried and Cleopatra finished noses apart in the second heat in 2:11, and only the judges and those directly at the wire could place them. The race finally went to the Zolock mare Cleopatra, after Siegfried had taken the third heat in 2:11.

One of the best trotting races ever seen on the Los Angeles track was the free-for-all trot, in which a beautiful silver cup is to be awarded the driver who wins three races. Four races have now been held, of which Beckers has won two. Robt. Smith won one with Bellemont, and J. H. Reynolds one with Hazel Kinney. In the race Saturday there were three starters, Becker's Helen Dare by Zombro, Reynold's Hazel Kinney by McKinney and Garland's Romeo by Jas. Madison. In the first heat Hazel Kinney drew the pole, with Romeo second and Helen Dare on the outside. The three went to the half in 1:04½ very close together. Romeo broke at the half and at the three-quarters in 1:38 Hazel Kinney left her feet, Helen Dare going to the front and finishing the mile in 2:12 in a jog. In the second heat Romeo broke soon after the word was given, and the two mares trotted together to the half in 1:04. Going round the upper turn Helen Dare broke and lost several lengths, but before the seven-eighths pole was reached she had caught and passed Hazel and again finished in a jog in 2:12. Helen Dare trotted from the three quarters to the seven-eighths in this heat in 15½ seconds, and when she won got a grand send off from the grand stand.

The 2:20 trot was won by Mr. William Garland with his handsome brown mare by Coronado 2:09½. He took this race in straight heats beating such good ones as Goldenhut 2:11½, and Phyllis C. Mr. Garland calls his mare Sadie McKinney, and that she will be a 2:10 performer within another year is confidently believed by many horsemen. She is certainly a credit to her sire Coronado. Mr. Garland's driving of Sadie McKinney in this race and of Cleopatra in the pace, showed that the former owner of Sweet Marie is one of the best amateur reinsmen on the Coast as he handled both mares in a masterly manner.

President W. A. Clark, Jr., acted as starter during the afternoon, and while he was favored with small fields, his work was so good as to call forth many compliments from spectators and drivers alike.

The summaries of the races follow:

The 2:40 class mixed—

Rex, gr. g. by Rex Gifford (Connolly)	1	1
Gray Bess, gr. m. (Ramroth)	2	2

Time—2:26, 2:23½.

Free for all pace—

Cleopatra, b. m. by Zolock (Garland)	1	3	1
Siegfried, b. g. by Silver Coin (Long)	2	2	2
Moy, b. m. by Pedigal (Morris)	2	1	2

Time—2:11½, 2:11, 2:11, 2:14.

Free for all trot—

Helen Rare, br. m. by Zombro (Beckers)	1	1
Hazel Kinney, br. m. by McKinney (Reynolds)	2	2
Romeo, b. g. by Jas. Madison (Garland)	3	3

Time—2:12, 2:12.

The 2:20 trot—

Sadie McKinney, br. m. by Del Coronado (Garland)	1	1
Goldenhut, ch. g. by Neerhut (Ford)	2	3
Charles M., br. m. (Springer)	3	2
Phyllis C., br. m. (Delorey)	4	4

Time—2:21, 2:20.

The 2:20 pace—

Shecam, b. g. by Durfee (Levy)	1	1
Wild Rose, ch. m. by Zombro (Silverthorn)	3	2
Zomwoolsey, b. h. by Zombro (Sherwood)	2	3

Time—2:27, 2:21.

The 2:25 pace—

Josh S., b. g. (Watkins)	1	1
Isabella, s. m. (Lowe)	3	2
Marlie Duryea, b. m. (Humebaugh)	2	3
Miss Theima, b. m. (Messmore)	4	4

Time—2:18, 2:20.

The 2:25 trot—

Glenetta, b. m. by Rex Gifford (Keller)	2	1	1
Clavate, b. g. by Conifer (Moore)	1	2	2

Time—2:19, 2:19, 2:19.

Every campaigning horseman is familiar with the fact that there is no better sulky or cart made than the Toomey. Their sulkies and carts are built upon the most practical lines, first-class in every way and give best results. The increasing demand for them each succeeding season is in itself sufficient evidence of their popularity and superiority over all others. Send to S. Toomey & Co., Canal Dover, Ohio for free catalogue showing their full line for 1908.

THE 2:08 PACE THIS YEAR.

When the 2:08 pacers entered on the California circuit score down for the word at the Oakland meeting this year, where they will probably make their first start, there will be a race worth going to see, and one in which the talent will indeed be wise if it succeeds in picking the winner. There are no less than ten good pacers entered and in all probability eight or nine of them will be ready whenever this class is called anywhere on the circuit.

By the records the mares Queen Pomona 2:07½ and Moy 2:07¼ are the fastest of the ten. Queen Pomona who is a half sister to The Donna 2:07½, took her record at Phoenix last year where she defeated Mandolin 2:10, Ginger 2:11¼ and Looking Out 2:24 in straight heats in 2:09¼, 2:07½ and 2:10¼. A few days later she was a close second to Argot Boy in 2:08¼. Moy made her record last year at Lexington in the first heat of a race in which the next three were won by Lady Maud C. in 2:04½, 2:06½ and 2:08. She was bred at Bitter Root Farm and is by Prodigal out of a mare by Clay King.

Deilah 2:08, six-year-old mare by Zolock is the next fastest by record. She also got her fastest mark at Phoenix, where she won a four heat race. By-stander, also by Zolock, had taken the first heat in 2:07½, when Deilah won the next three, in 2:08, 2:08½ and 2:12½. In the great race won by Sir John S. at Woodland in which he paced the three heats in 2:04½, 2:04½ and 2:05¼, Deilah was 3-2-2 in the summary and beat 2:07 every heat.

Miss Georgie 2:08½, although fourth in order so far as records are concerned, has doubtless paced the fastest mile of any of the ten named in this race. She it was that drove Sir John S. out in his fastest heats at Pleasanton, Santa Rosa, Woodland, Sacramento, and Salem, and when he paced in 2:04½ at Woodland she certainly equalled 2:05 as she was close to him. Take last years summaries and eliminate Sir John S. from the races in which Miss Georgie started and she would have been the sensational pacer of the circuit. "Old Granny" as her driver, J. O. Gerrety, calls her, is again in fine shape and looks as if she would not only be able to win several first moneys this season, but to reduce her record if necessary. Miss Georgie is by McKinney out of a mare by Nutwood Wilkes.

John R. Conway 2:09, a son of Diablo is next in line by the record test. He took his record in 1906 at North Yakima where he beat a field of ten good pacers. He was not right last season, but looks to be much improved this year, and if there are any split heats he will be among the money winners at the wind-up as he can beat 2:10 four or five times in one afternoon.

Miss Idaho 2:09¼ by Nutwood Wilkes, Magladi 2:10½ (three-year-old record) by Del Norte, Young Hal 2:10¼ by Hal Dillard, Welcome Mac 2:10½ by McKinney, and Diabloss 2:11 by Diablo, make up the balance of the entries in the 2:08 class pace this year, and two or three of them are very likely to knock several seconds from their present marks, and must therefore be reckoned with in any race in which they start. The race should be a split heat affair with the hottest sort of a contest in every heat, and that's what pleases the public.

GREEN ZOMBROS STEPPING SOME.

Geo. Beckers writes from Los Angeles that the green Zombros in training at that track are showing up well, and gives their trials as follows:

Zomalta, trial 2:12½ trotting, last half in 1:03½, last quarter in 31½ seconds; five years old.

Mr. Caulfield's Zombro gelding, trial in 2:13 trotting, last half in 1:03½, last quarter in 30½ seconds; five years old.

Zomwoolsey, pacing, trial in 2:12; four years old.

Zombretta, trotting, won matinee in 2:13½.

Phyllis C., trotting, trial 2:17; five years old.

Zella Z., pacing, trial 2:16½; four years old.

Wild Rose, pacing, trial 2:18; four years old.

Ramona S., trotting, trial 2:17¼; six years old.

U. R. Welcome, the pacer by Welcome 2:10½ that Henry Dunlap took East and sold last year, and that finished the season with a mark of 2:19½ made on one of the Pennsylvania half-mile tracks, is expected to be a good money winner this year, as a trial mile in 2:08 late last fall showed that he had plenty of speed.

The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feet. Call on or address S. O. Fesler, Pleasanton, Cal. *

SOMETHING NEW.

The very latest thing in the way of a cart that can be used for road, street and track purposes, is a new style cart made by the Houghton Sulky Company of Marion, Ohio, called their No. 10 Peerless cushion tired cart, similar to their style No. 3 which has been on the market for the last four years, only that it is furnished with a thirty-eight inch wheel with solid cushion tire, on a light steel axle with friction bearing. They report that the demand for this cart has been greatly in excess of their ability to build them. The Company reports a very large business, especially on their No. 9 Sulky and No. 70 Training Cart. The growth of this Company in the last four years is certainly demonstrative of the merit of their work. Anyone desiring anything in the line of a down-to-date racing vehicle should by all means get a copy of their new thirty-two page catalog by addressing the Houghton Sulky Company of Marion, Ohio.

FOUR RACES INSTEAD OF ONE.

A Suggestion That Will Be Endorsed by California Trotting Horse Breeders.

In the New York "Trotter and Pacer" of January 16th appeared the following:

To the Editor:—"We believe that no movement of recent years will have as much bearing upon the future of the trotting horse as the organization of the new "American Trotting Horse Breeders' Association." That it should include in its membership every breeder of trotting horses in the United States must be apparent to any intelligent mind. The apprehension of some that it may in time encroach upon the prerogatives of or swallow up entirely the two associations now alleged to control the racing of trotters in this country need alarm no one, and, indeed, if it should we believe it a consummation to be devoutly hoped for. The character and reputation of the men at present at the head of the new organization is a sufficient guarantee to any one familiar with trotting horse history that its affairs will be honorably and ably handled, and for the best interests of all concerned. And we believe its success is assured and that every one who is a lover of the American trotting horse should become a member and should join at once. However, it is in regard to the great Matron Stake to be trotted for in 1910 by the 1907 produce of mares belonging to members of the association that I wish to write. The United States covers a very large area of country and there is not a section of this great area that does not annually produce trotting bred colts; that each section should be put upon an equal basis is surely fair and logical. That the terms of the stake do not do this is certain, and I will only speak of California's, Oregon's and Washington's disadvantages under the terms (or rather my construction of the terms) of said stake. There is no State in the Union that has turned out more champions year after year than has California. There is no State wherein there are so many "small breeders" of high class trotting bred horses in proportion to its population as in California, and there is no State where they are more liberal in entering their youngsters in stakes. For example, the Futurity of the P. C. T. H. B. A. for foals of 1907 closed with over 400 entries, nearly all of which would have been entered in the Matron Stake under reasonable conditions, and every one from California, Oregon and Washington. No Californian can afford to enter his mares in the A. A. of T. H. B. stake, knowing that the race is almost certain to be trotted on some track east of the Mississippi River and that his expenses are certain to be at least \$300 more to start than will those of parties living within short distance of or east of the Mississippi River, to say nothing of climatic disadvantages and risk of long shipment. Yet it is desirable, most desirable that breeders west of the Sierras should become members of and workers for the A. A. of T. H. B. What we would suggest is this: That for the purposes of these stakes the United States be divided into three or four sections, and that all entries received to these stakes be credited to the section from which they come and that the total amount of money coming from each section be trotted for on some track in that section. This would not perhaps produce one race for an enormous sum, but it would produce four races aggregating a much larger sum than the one, and distributing the money much more equitable and would, I believe, do much more good than the one race. It it could be so arranged as to have all four races trotted on the same day—one on a centrally located track in the Northeast, one on a track in the Middle West, one on a track in the Southwest, and one on a track "on the Coast"—it would be the most interesting series of colt races ever trotted in America, and the winner of the fastest heat in the four races would be a real champion—16 colts would have a chance to win glory and expenses as against four. This suggestion is "in the raw" and I have no doubt you "experts" can evolve a much better "detail" than I. What I am certain of is that the new association would add to its membership 400 or 500 from the Coast in short order if some such plan was carried out.

Yours very truly,

F. J. K."

The editor of the "Trotter and Pacer" made the following comments on the above communication in the same issue:

"There is a lot of suggestiveness of practical merit in the communication of F. J. K., which we print on another page of this issue, and it is apparent to the writer that the Breeders' Association can further its own interests in a substantial and material way by putting the idea advanced into execution. In spite of the vigorous efforts of its officers, aided by the cordial support of the trotting press, the membership in the Breeders' Association has not yet attained to anything like the proportions which the importance of the movement warrants. It is evident that the Association has not made the right sort of appeal to the breeders of the country, or that the latter are singularly inappreciative of the great benefit which such an organization is capable of rendering to their interests, for in spite of the most vigorous efforts on the part of the promoters of the movement, not one-fifth of those whose interests are directly affected are represented on the membership roll.

One of the means adopted to stimulate the interest of the breeders and horsemen of the country was the institution of two futurity stakes, one to be known as

the Stallion stake and the other the Matron stake. The entries to these events closed December 31st, and though the result has not yet been authoritatively announced, it is said that the returns justify the anticipation that the former will be worth about \$20,000, and the latter \$14,000 or \$15,000. At the inception of these events the opinion was expressed that they might approximate \$50,000 in value, and basing the expectation upon the belief that the purpose of the association would enlist the interest and support of every breeder in the country, the prediction did not seem at all extravagant. But the co-operation accorded by the horsemen has fallen far short of the anticipations, and the stakes have correspondingly suffered. It will be interesting to know to what degree the association is national in its representation of membership, but it would not be at all surprising to find that it is to a considerable extent sectional, and that the section embraces the eastern portion of the continent. Because of the fact that the movement had its inception in the East and that its headquarters have been established here, there has been a general apprehension that the contest for the Futurity stakes would be decided on an Eastern track, and these events have accordingly not appealed to the support of breeders in the outlying regions of the north, west and south. The correspondent who writes on this subject elsewhere in this issue is a Californian breeder and he very clearly and logically expresses the reasons why the breeders of that State do not feel a very deep interest in those events. His suggestion for an apportionment of the stake into three or four divisions, to be competed for in as many sections of the country, the sum apportioned to each race to represent the support contributed from that section, is a highly practicable one, and it is entirely probable that such a method would enlist a deeper and far more general interest in the stakes and incidentally in the association which is promoting them. The Breeders' Association could still control the races, provide the conditions and terms, receive all the money, appoint a board of governors to exercise supervision over each race, and be the sole beneficiary of the prestige derived from the successful execution of the whole scheme. Our correspondent expresses the opinion that the plan would add 400 or 500 members to the association from California alone, which it otherwise will not receive, and it certainly would seem entitled to the consideration of the Breeders' Association."

The 2:10 class trot will furnish a fine contest at the Breeders' meeting this year if the horses all keep right. There are nine entries and every horse named is capable of a mile in 2:10 when right. Athasham 2:09½ is the only one that has entered the charmed circle, but there will be others before the season ends. Thomas M., the McKinney horse owned by D. J. Healey of Petaluma, was only beaten a head in a heat in 2:08½ in 1906 when Joe Cuicello had him East. Mr. Kirkpatrick's Lucretia has trotted right around 2:10 in races she lost in faster time, while Era 2:11½, Berta Mac 2:13½, R. Ambush 2:11½, North Star 2:11½, Adam G. 2:11½ and Fresno Girl 2:10½ can make it so interesting for any 2:10 trotter that he will have to lower his record to beat them.

Alberta, the dam of Berta Mac 2:13½, has been shipped to Los Angeles to be bred to Zambro. Among the mares bred to this horse this year are Nellie W. 2:15½ owned by C. R. Walters, Judith 2:25, own sister to Janice 2:08½, owned by A. G. Dahl of San Diego, Sister McKinney, dam of Sally Pointer 2:06½, owned by Daniel O'Dell of New York, and a fast road mare by Coeur de Alene, owned by Judge Appell, the most prominent criminal lawyer in Southern California.

On last year's form the horses Charley D. and Pilot look to be the class of the 2:20 pacing events this year, but there is a black stallion from Dixon called Alton that will keep them all hustling to beat him if he is ready when the time comes to start. Alton paced a mile in 2:11½ last year on the Dixon half-mile track, and won a half-mile race there in 1:05 as early in the year as last May Day. Later in the year he paced a half mile over the same track in 1:02½.

Ben Russell, one of the best-looking and best-gaited green trotters in California, is being entered in the big stakes for 2:20 class horses on the California circuit. He is by L. W. Russell and is owned by Mr. F. G. Eastman of Palo Alto.

At present there is a poor prospect of Pleasanton giving a meeting this year. It is indeed unfortunate that conditions are such that "the horse center" is not to have a prominent place in the California circuit of 1908.

Easter Bell, the full sister to Sir John S. 2:04½, has been entered through the circuit in the 2:20 class pacing events.

SALE DISTEMPER.

Are you consigning horses to any sale or buying at sales? Either way, you can look for trouble with "sale-stable distemper." Your stallions, mares, colts and all others will be well protected against attacks of these diseases if you will give Spohn's Liquid Distemper Compound. This remedy will take them through any sale without an attack of any form of distemper, and it will cure any case you may have among your horses. "Spohn's" is the very best blood purifier and conditioner. All druggists or harness dealers can supply you, or the manufacturers.

A \$50,000 HANDICAP.

Readville, Mass., April 10, 1908.

Editor of the Breeder and Sportsman,

Dear Sir:—In sending you our announcement of the American Trotting Derby, the name chosen for our \$50,000 handicap, I desire to call attention to the causes and conditions which led up to its adoption and seem to make it a necessity for the continuation of the sport of harness racing.

It is admitted on all sides that the large purses for class races, or stakes so called, and the futurities are the life of the harness racing sport. It is only the stimulus furnished by an occasional winning, or rosy prospects of one, that keeps up the interest in the sport. Without these stakes and futurities the value of trotters would rapidly depreciate.

The greater part of all the money in both the class purses and the futurities are furnished by the horsemen themselves. In the case of the futurities the entrance fee is trifling at first, but grows like a mushroom as race day draws near. In the class purses, the entrance fee is higher at the start and perhaps all the way through; but with the entries in futurities running into the thousands the chance of any one colt winning is thousands to one against him. In the class race the odds against any one particular horse are from twenty to fifty, at the outside, against any one horse so that relatively the entrance fee is not so high in the class stake as in the futurities.

This purse money being practically all contributed by the owners all should have an equal chance in the distribution of it. But they don't. Practically nothing but colts of world beating ability have a look-in for the futurity money, and in all the other big stakes from Detroit to Lexington, be the class as slow as 2:24 as in the M. & M. or as fast as 2:09 like the Charter Oak, we find one little group of horses dividing the money in all of them. Had Sonoma Girl and Highball kept their form all last season, first and second money in every one of the big stakes was at their mercy.

Closing races in April, May and June, to be raced in July, August, September and October, and handicapping the horses by the records they held when the entries closed, is illogical, unfair and working havoc with the sport. If some way of fair handicapping is not discovered, I can see the end of the period when the association can afford to give these big stakes; when they fail to become self-supporting their values will be reduced or the tracks stop giving them.

With a desire to win an M. & M., a Massachusetts, a Charter Oak or a Transylvania event, owners hunt the country over for a horse that looks good, cheerfully giving up from \$10,000 to \$30,000 for it, incur a liability for entrance fees oftentimes running into the thousands and then wake up some morning, as they did on the fifth day of July last, to find that they have got in wrong and have no chance.

At Readville one day last July ten three-year-olds worked miles in 2:16½ to 2:12½. All of these colts were engaged more or less in all the futurities. One of them got money out of some of them. One other was started, but got no money. The others were not deemed good enough to go on with. Now, all of these colts and scores of others all over the country could have been started in a race like our Handicap, each with as likely a chance of winning as any horse named and for a purse of the approximate value of all the futurities combined.

Our Handicap affords an opportunity for horses with records too fast for the big stake (who now have no opportunity to start for large purses), for three-year-olds not good enough for the futurities, for the horses whose records bar them from starting in their class with any chance of success, for the small army of good and useful trotters whose ability to trot in from 2:15 to 2:10 offers no prospect of success in the big stakes of the mile track.

The purpose of our race is to take all these horses and, so far as the fallibility of human knowledge and ability will admit, bring them all to the wire on terms of equality for the race.

Now, a word as to the speed allowance of fifty feet for each second's difference in speed. A horse trotting a mile in 2:15 moves at the rate of 39.11 feet per second. Assuming that this horse trots his fifth quarter at the same rate of speed, he will use 168¾ seconds in doing the mile and a quarter. A 2:05 trotter moves at the rate of 42.24 feet per second, and if he maintains that clip for 168¾ seconds, the period of time it takes the 2:15 horse to go a mile and a quarter, he will trot 7,128 feet, or 528 feet farther than the 2:15 horse, and he will do this with no greater expenditure of physical energy than the 2:15 horse uses in the same period of time. In other words, it is just as easy for a 2:05 horse to trot 7,128 feet in 168¾ seconds as for a 2:15 horse to trot 6,600 feet in the same time, or so it seems to me.

We have made the purse for this handicap the princely sum of \$50,000, with an entrance fee of one per cent. to start in the race in order to attract to it the attention, consideration and support we believe its merits as a system of racing harness horses deserves. If the handicap can be made a practical method of racing harness horses then a new era of prosperity is opened up to the sport and its allied interests at the very period when the outlook was darkest.

Very truly yours,

C. M. JEWETT,
Secretary.

168 YEARLINGS PAID UP ON.

Breeders Futurity No. 7 Has Long List of Fourth Payments.

The \$7,000 Breeders' Futurity for foals of 1907 had \$1,680 placed to its credit on April 1st, when fourth payment of \$10 each was made on 168 different colts and fillies that are now reckoned as yearlings: The list is as follows:

A. Allen's b. f. by Diablo, dam Lady Allen by Echo Chief, Jr.

T. W. Brodnax's ch. m. Bon Way by Strathway, dam Bonnie B by Tom Hal, Jr.; ch. f. Angelina by Strathway, dam Gertrude.

Chas. H. Burlock's ch. f. Brightway by Strathway, dam Tia Juana by Kewanna.

J. N. Blair Jr.'s foal by Demonio, dam Butcher Girl by McKinney.

Thos. H. Brents' b. f. Princessa Del Norte by Del Norte, dam Laurelia by Caution.

I. L. Borden's s. f. Alta Wilkes by Cresco Wilkes, dam La Belle Altamont by Altamont.

T. W. Barstow's by. f. Eva B. by Nearest McKinney, dam Trueheart by Nearest; b. f. Lizette B. by Nearest, dam Little Sally by Nearest McKinney.

Mrs. S. V. Barstow's b. c. Lucky Strike by Star Pointer, dam Maud J. by Nearest.

Robt. S. Brown's ch. c. by Zolock, dam Arios by Mendocino.

G. L. Blosser's b. f. Pointer's Daughter by Star Pointer, dam Banker's Daughter by Arthur Wilkes.

H. F. Bliss' br. f. Irisway by Stoneway, dam Iris B. by Iris.

E. F. Binder's b. f. Lady Worth While by Worth While, dam Emma Z. by Zolock; b. c. General Worth While by Worth While, dam Silklock by Zolock; br. f. Meine Kleine by Mein Kleiner, dam Eugenia B. by Zombro.

D. L. Bachant's b. f. Athget by Athadon, dam Nugget.

Henry Busing's bl. c. Bonny McKinney, Jr. by Bonny McKinney, dam Amazonian by Jas. Madison.

Alex Brown's b. f. Nukina by Nushagak, dam Kinocha by McKinney; br. f. by Prince Ansel, dam Majella B. by Nushagak; b. f. by Prince Ansel, dam Daisy B. by Waldstein; br. c. Rey Lot by El Rio Rey, dam Lottie by San Diego; b. f. by El Rio Rey, dam Josie D. by Nutwood Wilkes.

W. V. Bennett's br. f. Miss Celia by Arner, dam Martha Blaine by Arthur Wilkes.

W. O. Bowers' b. c. Bon Jour by Bon Voyage, dam Silvia B. by Silver Bee; b. f. Ferdena by Ferd Madison, dam Sadie Benton by Tom Benton.

W. L. Bolton's gr. c. Sir Lewis W. by Gen. J. B. Frisbie, dam Dolly K. by Fallis.

N. P. Batchelder's foal by Star Pointer, dam Luella by Nutwood.

I. E. Bular's br. f. Zoalpha by Zolock, dam Alba by Albion.

Martin Carter's b. c. by Nutwood Wilkes, dam Mora Mac by McKinney; b. f. by Nutwood Wilkes, dam Excella by Monbells.

J. F. Chiles' b. f. Myrtle Pointer by Star Pointer, dam Myrtle Kinney by McKinney.

S. Christenson's br. f. Sweet Marguerite by Zolock, dam Marguerite K. by Don Pedro.

L. J. Caplatzi's br. c. Rockwood by Welcome, dam Hagar Wilkes by Nutwood Wilkes.

Robt. T. Curtis' br. f. Molly McGinn by Adjutant, dam Bonnie by Lottio.

E. M. Conroy's b. f. Frances Pointer by Star Pointer, dam Frances C. by Wasutch.

W. A. Clark, Jr.'s br. c. Jean Val Jean by Bon Voyage, dam She by Abbotsford; b. c. Bon Voyage, dam She of Abbotsford; b. c. Bon Vivant by Bon Voyage, dam She by Abbotsford; b. c. Bon Vivant by Bon Voyage, dam Reina del Diablo by Diablo; b. c. Voyageur by Bon Voyage, dam Lucie May by Oakland Baron.

S. H. Cowell's ch. c. Dexter by Cupid, dam Dione by Eros; b. f. Dione II by Henry Nutwood, dam Two Minutes by Wildnut; b. h. Bill Logwood by Henry Nutwood, dam Sultana.

Lewis Charlton's ch. f. by Dumont S., dam Nellie J. by St. Patrick.

Jos. Cunningham's ch. c. by Dumont S., dam Catharine by Wayland W.

Sam Castro's s. f. Golden Bliss by Zolock, dam Bird d'Alene by Coeur d'Alene.

Mrs. M. F. Case's b. s. Arthur B. by Arner, dam Black Gipsy by Kentucky Baron.

I. D. Chappell's s. f. Lynwood Girl by Lynwood W., dam Lenmetta by Norcatur.

W. G. Durfee's b. c. by Coronado, dam Pineapple by Albion.

E. D. Dudley's foal by Palite, dam Lorna Doone by Bayswater Wilkes.

Estate of Ben Davies' bl. c. Rubalco by Izalco, dam Ruby H.; b. c. Athamont by Izalco, dam Queen by Raymon; bl. f. Atola by Worth While, dam Dixie S. by Zolock.

Chas. De Ryder's b. c. by Star Pointer, dam Maggie Mc by Abbotsford, Jr.; b. f. by Star Pointer, dam Cleo G. by Yosemite; br. c. by Star Pointer, dam Honor H. by Direct.

A. M. Elston's b. f. Belle Pointer by Star Pointer, dam Belle W. by Harry Wilkes.

A. Edstrom's rn. c. Athabio Hal by Athabio, dam Carmon by News Boy.

A. R. Fraser's br. f. Lady Ezelda by Del Coronado, dam Belle Pointer by Sky Pointer.

Rae Felt's b. c. by Star Pointer, dam Edith by Dexter Prince.

J. L. Field's b. f. Rapid Ann by Nearest McKinney, dam Cammineer by Nearest.

Geo. Gray's br. f. by Cassian, dam Winona by Welcome.

Aug. Gandrau's ch. c. by Diablo, dam Bridget Moriarity by Junio.

H. S. Hogboom's br. c. by Bon Voyage, dam Carrie Malone by Steinway; b. c. by Iran Alto, dam Beautiful Bird by Nutwood Wilkes; ch. c. Judge Gaddis by Palo King, dam Diawalda by Diablo.

Ted Hayes' br. c. Viaticum by Bon Voyage, dam Ruth Mary by Directum.

I. N. Harlan's b. c. Prince Alto by Iran Alto, dam Rita R. by Diawood.

S. C. Henderson's br. f. by Zombro, dam Arabella by Black Pilot.

Wm. Hashagen's ch. c. Kinney by Kinney Rose, dam Chittwee by Chas. Derby; b. c. Kinney H. by Kinney Rose, dam Leta H. by Nutwood Wilkes.

W. J. Hackett's ch. f. Lucille Wood Way by Prince Nutwood, dam Fly Way by Glenway.

C. A. Harrison's b. c. North Star Pointer by Star Pointer, dam Maid of Del Norte by Del Norte.

J. W. Halle & Co.'s foal by Demonio, dam Minerva by Guy Wilkes; foal by Demonio, dam Mamie Airlie by Prince Airlie; foal by Demonio, dam Hanora by Oro Wilkes; foal by Demonio, dam Olita by Bradmore.

Mrs. L. J. H. Hastings' b. c. Robin Parole by Parole, dam Sappho by Robt. McGregor.

W. A. Hunter's br. f. Martha Dean by Money Mc, dam Lady B. by Stephen A.

E. P. Heald's b. f. by Count Hannibal, dam Nona Washington by Washington.

S. H. Hoy's br. c. La Verne by Jules Verne, dam Miss Davis by Zolock.

I. W. Hazelett's b. f. Birdie Zombro by Zombro, dam Lady Bird by Pope Leo.

F. P. Hellwig's br. f. Zoe Dell by Zolock, dam Lovely Dell by Lovelace.

J. B. Iverson's s. f. by Nutwood Wilkes, dam Ivoneer by Eugeneer; s. f. by Eugeneer, dam Roseat by Guy Wilkes; b. f. by Bonnie McK., dam Amy I. by Diablo.

M. C. Keefer's by. c. Nuvosta by Nushagak, dam Advosta by Advertiser.

J. A. Kirkman's s. c. Exeter Boy by Stoneway, dam Viva by Antevolo.

Geo. W. Kirkman's bl. f. Bell Stone by Stoneway, dam Belle Basler by Robt. Basler.

Jos. H. Kelly's foal by R. Ambush, dam Hyto by Happy Prince; foal by Bolock, dam Violet by Conn.

Frederick W. Kline's ch. c. Ebenezer Cutter by Zolock, dam Miss Hascom by Dictatus Wilkes.

La Siesta Ranch's foal by Bonnie Direct, dam Wanda II by McKinney; foal by Zolock, dam Wanda by Eros.

I. M. Lipson's ch. f. Olive H. by Hamb. Wilkes, dam Sally B. by General McClellan.

Wm. K. Lindsay's bl. f. Dolly Maden by Almaden, dam Queen by Nushagak.

M. L. Lusk's gr. f. Alma Belle by Almaden, dam May Belle by Don Marvin.

O. Frank Leppo's b. f. by Wayland W., dam Robizola by Robin.

Ray Mead's b. f. Naomi M. by Zolock, dam Carrie B. by Alex. Button.

W. C. McCully's br. c. Sylmar by Cedric Mac, dam Concha by A. W. Richmond.

Mabry McMahan's foal by I. Direct, dam Lady Ada by McKinney.

P. H. McEvoy's br. f. by Milbrae, dam Debarcher by Geo. W. Archer.

J. C. Mowry's f. by Kinney Lou, dam Electress Wilkes by Nutwood Wilkes.

Abe Marks' b. f. Ethel Marks by Wayland W., dam Cecille M. by Robin.

McLees Bros.' f. Lady M. by Robert Direct, dam Kate.

H. W. Meek's b. c. by Stam B., dam Izobel by McKinney; b. f. by Star Pointer, dam Crispiana by Nutwood Wilkes.

J. W. Marshall's b. c. by Star Pointer, dam Trix by Nutwood Wilkes; bl. c. Zoblack by Zolock, dam Madeline by Demonio; b. f. Arrah Wanna by Demonio, dam Louanna by Dictatus.

Carey Montgomery's b. f. Star Logan by Star Pointer, dam Effie Logan by Durfee.

W. S. Maben's foal by Walter Barker, dam Mamie Elizabeth by Red Regent; foal by Walter Barker, dam Cleo by Conifer; foal by Walter Barker, dam Sue by Athadon; foal by Walter Barker, dam Dixie W. by Zolock.

M. B. Mosher's br. c. Heinie Snider by Zolock, dam Athalene by Coeur d'Alene.

D. B. Moshier's b. c. D. Pointer by Star Pointer, dam Roda Fay by General Logan.

Edmund Miller's b. f. Stambonita by Stam Boy, dam Straightness by Chas. Derby.

C. F. Millar's bl. c. by Zolock, dam Maud by Diablo.

Lou Mativia's s. c. Alba by Alton, dam Babe by Jas. Madison.

J. H. Nelson's b. c. McNut by Expressive Mac, dam Hazelnut by Petigru.

J. B. Nightingale's bl. f. Allie Dillon by Lee Dillon, dam Brown Bell by Prince Almont.

Chas. A. Ofutt's br. c. by Wayland W., dam Grace McKinney by McKinney.

John W. Ofutt's br. f. by Wayland W., dam Vesper Bell by Dawn.

E. S. Parker's bl. f. Bonnie Lette by Bon Voyage, dam Sidlette by Sidney; b. c. Bonnie Medium by Bon Voyage, dam Missie Medium by Rampart.

C. C. Price's b. f. by Zombro, dam Miss Williams by Williams.

Chas. R. Potter's b. f. Shellville Girl by Wayland W., dam Briar Bud by Briar Hill.

Francisco Pico's br. c. Pico Boy by Zombro, dam Pico's Fleet by Hancock Jay.

Henry Peters' br. c. Babe Verne by Jules Verne, dam Little Babe by Bradmore.

Geo. A. Pounder's s. f. Lottie Lynwood by Lynwood W., dam Maud Fowler by Anteeo.

L. Richardson's b. c. by Bon Voyage, dam La Moscovita by Guy Wilkes.

Thos. Ryan's br. f. Miss May Belle by Jimmy S., dam Kitty.

Mrs. A. C. Severance's foal by Zombro, dam Puckachee by Dexter Royal; foal by Zombro, dam La Belle by Sidney; foal by Amado, dam Glendoveer by Jas. Madison.

T. D. Sexton's b. f. by Chestnut Tom, dam Squaw by Antevolo.

N. M. Strong's b. c. by Exchange, dam May Kinney by Silkwood; br. f. Yu Tu by R. Ambush, dam A. Zeta by Dick.

E. T. Stockdale's foal by California Guide, dam Mabel by Glenway.

L. C. Shell's br. c. Kid O. by Bonnie McK., dam Cayuse Mollie s. t. b. by Alexis.

E. E. Sherwood's bl. c. Nado by Del Coronado, dam Queen Woolsey by Woolsey.

J. J. Summerfield's s. c. by Cupid, dam Zarina by Dexter Prince.

E. S. Train's ch. f. Brewery Belle by Steam Beer, dam Belle Fredericks.

L. H. Todhunter's foal by Bon Voyage, dam The Silver Bell by Silver Bow; foal by Bon Voyage, dam Loma B. by Stam B.; foal by Zombro, dam Floretta by Prince of Norfolk.

J. H. Torrey's b. f. Jella by Zombro, dam Manila by Shadeland Hero.

F. W. Vowinckle's b. f. by Monterey, dam Cora by Boydell; s. f. by Monterey, dam Bessie.

Wm. Van Keuren's b. c. Prince Van by Ed. McKinney, dam Mattie B. by Alex. Button.

D. T. Van Lue's ch. c. Berlock by Zolock, dam Alberta by Altoona.

C. H. Williams' b. f. by Unimak, dam Twenty-third by Director.

J. Walker's b. c. The Little Corsican by Zombro, dam Lady S. by Neernut.

C. H. Widemann's foal by Prince Henry, dam Miss Valensin; foal by Robin, dam Lady Lloyd by Sidney.

Jas. C. Wallace's bl. c. Domingo by Strathway, dam Hallie Hayes by Kewanna; bl. c. Darkestway by Strathway, dam Johanna Treat by Thos. Rysdyk.

Geo. L. Warlow's br. f. Shamtrine by Athasham, dam Lustrine by Onward; b. f. Aiteka by Athasham, dam Bessie by a Son of Yosemite; b. c. Sexsham by Athasham, dam Sextette by Athabio; bl. c. Strathboule by Stamboulette, dam Strathalie by Strathway; b. c. Donasham by Athadon, dam Cora Wickersham by Junio.

S. E. Williamson's bl. c. McCola by Stanford McKinney, dam Narcola by Athadon.

W. O. White's b. c. Little Chief by Athabio, dam Minnehaha by Strathway.

Fred E. Ward's b. f. Bess J. by Direcho, dam Lady Madison by Jas. Madison.

S. B. Wright's b. f. by Wayland W., dam Hattie Fowler by Robin.

H. Lee West's b. c. Sir John W. by Diablo, dam Alto by Prince Altamont.

W. W. Yandell's b. c. Jim Johnson by Osito, dam Black by Senator Nye.

MAY DAY AT FRESNO.

The Fresno mile track will be the scene of an old fashioned May Day gathering on the first day of next month, and the horse owners of Fresno are arranging a program that will certainly draw a very large attendance. Several races are to be held, entries to which will close on Monday next, and while they are nearly all for local horses it looks as if the fields will be quite large, as many as six starters being expected in one or two of the events.

A program of special exhibitions will be one of the principal attractions. Among those to be driven fast miles are Mr. Zibbells' fast green pacer Buddie G. by Seymour Wilkes, and his unbeaten filly Katalina by Tom Smith that won all the two-year-old trots last year. He will also speed Mr. George Estabrook's mare, Lady Seymour by Seymour Wilkes, and two fillies by Tom Smith 2:13½, that are very promising. Fresno Girl 2:10½ will be asked to step a fast half, and with a good track she can cover the distance at a 2:05 gait or better.

Schuyler Walton will show speed with those two fast trotters owned by Mr. Geo. Warlow, Athasham 2:09½ and Nogi (3) 2:17. Either has two-minute speed and will be worth going to see, as they are in fine shape, and are to be raced this summer. Walton will also show Miss Idaho 2:09½ one of the star pacers of the Coast.

Among the novel features will be a guideless mile by Newport, one of the Fresno favorites. This horse will be hitched to a sulky, and is expected to start at the word go and to stop when the bell is rung, and go a mile in about 2:20.

In addition to the above there will be half-mile running races, a mule race, pony races, and a ladies' and gentlemen's driving event. Those who are in Fresno on May Day will certainly have an opportunity to enjoy an afternoon of excellent sport.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

The card for Ingleside to-morrow is the second regular monthly shoot of the Trap Shooters' League. Several trophies to be contested for will bring out a large attendance of shooters.

The Union Gun Club's regular shoot last Sunday took place at San Leandro instead of Ingleside.

A live bird match at 50 pigeons a side was shot at Ingleside on the 12th inst. between C. C. Nauman and P. J. Walsh of Black Point. This is the third time the two shooters have come together in match races, the previous contests were at 100 pigeons each, Nauman winning both matches. Nauman used a 20 gauge Parker with 34-inch barrels, Walsh shot with a 12 gauge Greener. The birds supplied were not an extra strenuous lot. Nauman killed straight, from 28 yards, until his nineteenth bird which he missed clean. He followed with another lost bird. Then grassed clean until his forty-sixth bird which he missed, closing with 46 out of 50. Walsh shot from the 32 yard mark. He lost his third, twentieth, thirty-second, forty-sixth and last birds. He failed to stop his last bird, a very easy one for a veteran shooter like Walsh. A return match is talked of. John K. Orr refereed the match. The scores were as follows:

Walsh	1	2	0	1	1	2	2	2	1	2—9
	1	2	2	1	1	1	2	2	1	0—9
	1	1	2	1	1	1	2	1	1	2—10
	1	0	2	1	1	2	2	1	1	2—9
	2	1	1	2	1	0	1	2	2	0—8
Total	2	2	1	2	1	2	1	1	1	1—10
Nauman	2	2	2	1	1	2	1	1	2	0—9
	0	2	1	2	0	2	1	1	1	2—8
	1	1	1	2	2	1	2	2	1	1—10
	2	1	2	1	2	0	2	2	2	2—9
Total	2	2	1	2	1	2	1	1	1	1—10
Total	2	2	1	2	1	2	1	1	1	1—10

A very enjoyable shoot took place at the Alum Rock trap grounds last Sunday under the auspices of the Santa Clara Fish and Game Protective Association. The sportsmen present had a pleasant time and were regaled with a most appetizing lunch.

There was a time, a few years back when the Garden City teams were to be reckoned with at every blue rock tournament on the Coast, it is to be hoped that the San Jose shooters will take up the sport again with their old time vim and success.

The scores of all those participating last Sunday were not kept, but the results, in 25 target races, so far as recorded were the following:

William H. Varien, 23, 24, 23, 23, 22, 21, 24—182 out of 200; Dr. Barker, 22, 21, 24, 22, 23, 25, 21, 25—183; W. E. Green, 23, 21, 22, 24, 17, 23, 22, 22—174; W. D. King Jr., 24, 19, 21, 24, 23, 19, 22, 17—169; C. A. Haight, 24, 23, 23, 22, 19, 24, 21—180; Dick Reed, 19, 24, 24, 23, 22, 23, 23, 24—182; Hoelle, 22, 22, 17, 21; De Bruce, 14, 16, 12, 11; McKagney, 14, 16; Cadwallader, 21, 23, 22, 16, 22, 22; Schilling, 21; Kline, 17, 17; Shilue, 15, 13, 18, 17; Schroeder, 23, 14, 17, 19, 21, 19; Whelan, 23, 17, 18; Holmes, 16, 7, 14, 16; D. Lorigan, 17, 18; F. Monroe, 19; Pryor, 23, 24, 23, 18; Kennedy, 18; Sanders, 18, 19; Fuannery, 14.

The initial shoot of the San Mateo Gun Club shows the following scores in two 25 target events:

Event No. 1—Gracier 16, Levy 3, Couter 18, Morrison 9, Carroll 4, Gordon 9, Stranahan 10, Reynolds 8, Hoag 11, Duffy 15, Stainbach 4, Bellma 7.

Event No. 2—Gracier 16, Levy 9, Morrison 7, Carroll 4, Stranahan 9, Reynolds 9, Hoag 10, Duffy 16, Stainbach 8.

Cash Epperson and Bert Ellery engineered a blue rock shoot at Sutter City. There was a good attendance of Yuba and Sutter county sportsmen. Regular shoots in that section are talked of now.

May 3rd is the date selected for Woodland shooters to start trap shooting. Shooters from Davis, Dunnigan, Knight's Landing and Western Yolo will line up.

Napa Gun Club members broke the ice on the 5th inst. and dedicated the club grounds with a blue rock shoot. In ten bird races the scores were: Chappell, 10, 5, 9, 7, 9, 8, 10, 6, 9—73; Mayfield, 8, 4, 9, 8, 5, 8, 7, 9—58; Shively, 10, 8, 8, 10, 8, 7, 9, 10, 9—79; Treadway, 5, 2, 2—9; Raney, 6, 7, 7, 6, 5, 8—39; D. Fitch, 6, 4, 5, 5, 4, 2, 4, 3—33; C. Carbone, 6, 3, 3, 4, 7, 6, 7, 4—46; C. Reams, 6, 10, 9, 7, 10—42; Powers, 3, 7, 5, 8—23; Rutherford, 6, 4, 4, 3, 4—21; Burnell, 6, 6, 6, 7—25; Bianchi, 3, 6—9; Arata, 1, 4—5; Strohl, 6, 5—11.

Ten targets, pairs—Chappell 7, Mayfield 5, Shively 6, Bu neil 10, C. Reams 4.

I ink Jackson's Napa Soda.

ANGLERS' FIELD DAY.

The California Anglers' Association and their friends were present at Point Reyes last Sunday to the number of about 300. The banks of the Paper Mill in the vicinity of the "White House" pool was lined with many anglers. Despite the commotion along the stream a number of trout were landed. The best results were obtained by a number of anglers who were on the stream at daybreak. These early birds caught baskets of nice fish, although rather small.

Whilst nearly everybody indulged in fishing, angling was not the main pastime. The day was an ideal one for an outing, neither too warm nor too cold, good fellowship prevailed and an excellent time was enjoyed by everybody present.

The inner man's (and his girl's) wants were looked after by Chef Breidenstein and Harry Gosliner, under whose supervision beef was cooked to a turn and appetizing coffee was boiled for the appreciatively hungry gathering of Waltonians.

In the afternoon twenty-five prizes were awarded to anglers who submitted their catches for the inspection of the judges.

DOINGS IN DOGDOM.

Fresno Kennel Club bench show opened yesterday with over 200 dogs benched, it is reported.

Valverde Kennels' entries at the Oakland show were sent into the ring in most pleasing condition.

Lady Dorrie M., the winning English Setter bitch at Oakland, was bred by Thomas J. Blight.

Two English Setter puppies recently advertised for sale by Mr. Blight were both sold for good prices.

Dr. J. Auburn Wiborn has purchased from M. O. Fendner the Pointer dog Raffles who is a son of Ch. Senator P. Raffles is thoroughly broken and will be used for a field dog.

Entries for Frisco closed on the 11th inst. with the satisfactory entry of 495 dogs, counting for a five point show. Bull Terriers have the largest representation with Cocker and Bostons next. The entry of English Bulldogs is a very strong one. Something unusual here is an entry of Chesapeake Bay dogs. This breed has a strong following up north, but in recent years has not been paid attention to here. English and Irish Setters are strong, showing that the interest taken in these breeds by the newly organized specialty club has some influence. Pointers rather fall short this year. Taking it all in all the entries by breeds as given below shows a pleasing growth of interest in dogs and bench shows: The entries by breeds are:

Mastiffs 1, St. Bernards 4, Great Danes 12, Russian Wolfhounds 2, Greyhounds 16, Esquimaux 4, Foxhounds 8, Pointers 17, English Setters 36, Gordon Setters 13, Irish Setters 29, Chesapeake Bay Dogs 7, Irish Water Spaniels 11, Field Spaniels 1, Cocker Spaniels 48, Dachshunds 16, Collies 31, Curly Poodles 9, Corded Poodles 2, Dalmatians 2, English Bulldogs 38, Airedale Terriers 21, Bull Terriers 56, French Bulldogs 4, Boston Terriers 44, Smooth Fox Terriers 18, Wire Fox Terriers 10, Irish Terriers 16, Pomeranians 10, Toy Poodles 1, Maltese Terriers 2, Chihuahua 2, Italian Greyhounds 4, total 495.

ABOUT TROUT AND TROUT LAWS.

After a conversation with Mr. Shebley, Superintendent of the Brookdale hatchery, we requested him to express, in writing, states the Santa Cruz Surf, the substance of what had been said, which he kindly consented to do, as appears in following:

A good many persons are under the impression that the Supervisors have closed the month of April by county ordinance. Such is not the case, as you know it is a state law. What they did do was to close the tide water fishing in April to open the same time as the state law, May 1st, above tide water. It is a good ordinance, one that should be upheld by all persons interested in the protection of fish and to discourage violations, for this reason. The state law opens April 1st for steelhead in tide water, and opens May 1st above tide water. In this county on all the streams about one mile (or less) would cover all the tide water fishing where you could lawfully fish in April as per state law, and every person in the county could legally have them in their possession. At the same time you could not legally fish in any of the streams above tide water. It no doubt has a bad influence to encourage law violation on all our streams, for it would be almost impossible for the Warden to prevent illegal fishing during the month of April without the county ordinance, and persons who respect the laws suffer from it, when they can legally fish on the streams.

Persons who are opposed to the act are either ignorant of the situation, or from a selfish standpoint. The committee in the California Anglers' Association,

in one of their recent reports to the association, recommended at the next session of the Legislature to try and get a law passed allowing them to fish the year round in tide water. If such a recommendation should become a law it would mean that you could have steelhead in your possession the year round, making a fine opportunity to encourage law violations during all the close seasons, and making it practically impossible for a conviction. So many such bad recommendations are made at each Legislature, through ignorance or selfishness, that it is a wonder we have as good laws as we have. The checking of law violators will not come until heavier fines are made on deliberate violators. In most all cases there has not been any discrimination between a man who, through ignorance or accident, violates the law, and one who deliberately and knowingly goes out to violate the law, and takes the chances of being caught. Both, as a rule, are given the minimum fine. There is as much difference in the caliber of the two persons as one who accidentally shoots a man and one who does not do it accidentally, and until judges deal with them accordingly, we will not discourage violations.

Safe to say that most all of those deliberate violators that are caught have destroyed great quantities of game and hundreds of thousands of eggs, by spearing the large spawning trout off of their spawning beds, during the breeding season and are not deserving of any leniency.

UNCLE ABEL ON FISHING.

[By A. J. W.]

"W'en you fish," said Uncle Abel, "Es I s'pose you sometimes do, You may have a fishin' costume 'At is reely quite too-too, An' may have a line an' tackle Of a style 'at's reckoned great, But they all ain't wurth tarnation Ef you haven't got the bait."

"An' another thing," says Uncle, "You may have a bait supply 'Nough to ketch a thousand fishes, An' the critters still be shy; Fer, while you are settin' fishin', You are middlin' sure to find 'At the bait ain't wurth tarnation 'Less it is the fishes' kind."

"Life's a pond," said Uncle Abel, "Where we folks have fishin' came. Most of us are fishin' money, 'W'ile a few are fishin' fame; Some of longin' hearts are fishin' Fer the love fer which they wait, But we'll never ketch the fishes Ef we haven't got the bait."

"Ef you're fishin' hard for money Don't use bait with too much soul, An' ef fame's the fish you're after Hook men's praises to your pole; But if love is what you're wantin', Only fish fer which you wish, Bait your hook with deeds of kindness, An' I guess you'll ketch the fish."

Steelhead fishing in Russian River at Duncan's Mill last week was better than for many seasons past. W. J. Street and W. H. Hillegass one day caught 11 fish weighing from 2 to 15 pounds. The fish are in splendid condition and the water low and clear. This good fishing will last until rains start a freshet and raise and muddy the river.

All indications point to the largest turnout in the history of angling in the United States when the international tournament of fly and bait casting opens at Chicago next August. The competition will be held under the auspices of the National Association of Scientific Angling Clubs, which comprises a membership of more than 2,000 fly and bait casters scattered throughout the country. The plan of giving degree buttons, which was instituted by the Illinois Bait Casting Club of Chicago last year, will likely be adopted by a number of clubs this year. The gold buttons are for proficiency at target contests during the season, and are awarded for averages of all the scores made in twelve events of bait casting and eight events of fly casting by each contestant, no button being awarded unless all scores planned were completed.

The Red "W" Brand Ammunition Still Supreme.—At the annual open tournament of the Zettler Rifle Club, New York City, March 14th to 21st, Winchester ammunition, the Red "W" brand, carried off the premier honors. The 100 shot Championship Match was won again by Mr. Rudolph Gute with Winchester cartridges, making 2468 out of a possible 2500, the highest score of the year. Besides winning the Gallery Championship Match of the Zettler Rifle Club, shooters using Winchester cartridges were tied for first in the Continuous Match—Mr. H. M. Thomas, five perfect scores of seventy-five. Second in the Bullseye Match—Mr. A. F. Laudensack, target of 68. Second in the Zimmerman Match—Mr. R. Gute, five scores of 39 and sixteen scores of 38. Mr. Gute's average for the 100 Shot Matches that he has competed in is over 2465—the highest of any shooter. His perfect score of 0 made on the Bullseye Target at Rochester remains unequalled. If you want to win, shoot the goods the Champions shoot, the Red "W" kind.

OAKLAND SHOW.

The second annual bench show of the Oakland Kennel Club, four days last week at Idora Park, Oakland, will go down in the annals of Coast dogdom as a successful and model show from start to finish. From the opening of the doors Wednesday morning until the distribution of the cups and trophies—and there were nearly 100 splendid prizes awarded, the show ran smoothly and without a hitch. Light and ventilation, arrangement of the newly painted benches, cleanliness and intelligent application of all the details that make exhibitors and visitors pleased and the dogs comfortably looked after were marked features of the exhibit. T. P. McConnell of Victoria, B. C., judged Pointers and Setters. E. M. Oldham of New York, judged all other breeds and also the unclassified specials. With, but few exceptions, the awards met with approval of the fancy.

The general class of the breeds was excellent, in many individual exhibits there was a high standard of quality. There were 315 dogs benched, making the show a four pointer; last year the show at Piedmont skating rink was for three points. The show last week was also held in a skating rink.

The officers of the Club are: G. W. Ellery, president; J. Maxwell Taft, vice-president; John W. Ellery, secretary; E. P. Pixley, treasurer. Bench Show Committee: G. W. Ellery, H. H. Carlton, J. Maxwell Taft, George B. M. Gray, E. M. Tidd, Dr. L. W. Spriggs and Frank R. Sherman. Louis H. Haff, superintendent; Charles Gilbert, ring steward. The consistent efforts of these gentlemen were appreciated by exhibitors and spectators. Thomas Banks, Spratts' representative, is entitled to a word of praise for feeding and benching in the masterful way that he is an adept in.

The large breeds were lacking in numbers. St. Bernards had two benched both good ones, the puppy King, when matured, should be able to do some winning. Great Danes, 3 benched, were ordinary and easily placed. Wolfhounds, 2 shown, were poor, awards being withheld.

Two Greyhounds, Black Tralee and Richard Anton are probably as good specimens as can be found in the United States. Tralee was awarded the special for best of opposite sex to the winner of special for best in the show (Valverde Faultless). Richard Anton has frequently won at prior shows.

American Foxhounds were excellent throughout, several old benchers and two new ones Bill Ping and Rex, both workmanlike specimens.

Pointers, five shown, were just ordinary in dogs, winners were withheld. Santa Rosa, winners bitches, is not only a clean built one but has shown her quality in field trial work.

English Setters made a nice showing with 33 benched. The lot were of good averaging quality. Tiverton was properly placed for winners. Reserve winners and first puppies went to Sven C. (Tiverton-Danstones Queen) a well turned, clean finished youngster with a pleasing head. Tiverton first and Fleet's Sergeant second open, Arbutus Dash third, a Victoria entry, left several good ones without a letter in the class, among them Mallwyd Beau who was placed over Tiverton at Del Monte. Arbutus Dash was third in limit and first in open, Pacific Coast bred, over Mallwyd Beau, Lady Dorrie M. (litter sister of M. Beau) was placed first winners over Bell's Beauty (Mallwyd Bob—Victoria BeBlle II) a Victoria entry, Royal Beauty, another Victoria entry was given first puppies and the special for best puppy shown. Tiverton and Lady Dorrie M. were awarded the class specials for best English Setters, both sexes. The unclassified special for best Setter in the show was awarded to the Victoria entry Rockline Flirt (Mallwyd Bob—Albert's Rosalind). Flirt is a handsome bitch and was afterwards purchased by George B. M. Gray we were informed.

Gordon Setters was the largest Coast entry of the breed in years, 16 entries testifies to a renewal of interest in a very useful breed. General quality was a shade better than usual.

Irish Setters also turned out a far larger entry than usual, 23 were benched. St. Lambert's Sport who romped through his classes for first winners and four specials caught the judges' eye favorably. Prince, a Victoria entry was awarded first limit, second open and reserve winners, St. Lambert's Norah, first winners, won the special for best over the Stockton entry Halvern Jerry who had beaten Norah at Oakland and San Francisco last year for special and best under James Mortimer and George Roper. Jerry was put down in fine condition. We could not follow the judge in Irish Setters, he seems to like a very long-legged type. His awards in this breed did not meet with general acceptance.

Irish Water Spaniels had five entries of the desirable kind.

Field Spaniels showed up two fair specimens.

Cockers were a pleasing showing all round. The judge favored the type that is built for work and put down several favorites at past shows, that he claimed were put up on toy lines. Brownland Babbie's win of special for best was a bumper for the local fancy. Where Lassie Kathleen with her short and snipey muzzle came in for reserve winners is probably owing to the absence of bitches entered that were better.

Collies were the best lot ever shown on the Coast, or at many eastern shows for that matter. Valverde Faultless and Ch. Southport Student were the two particular stars that were in the limelight, and justly so, for they are all that they have been given credit for. Principal honors in the different classes

were won by Valverde Verona, Valverde Vortex, Valverde Valor and Valverde Watch, all Coast bred ones and typical Collies in every respect. Forty-four Collies were shown in the different classes.

Arroyo Conspirator was far and away the best of two Dalmatians benched. Didone was alone in curly Poodles. Two Chows, one, Buster, a very fair type.

In Bulldogs, the 26 benched, were ahead of anything shown on the Coast for many years past. Moston Bar None had no difficulty in going over Ivel Damon for the tri-color. In bitches St. Queenie and Freedom were placed as they were at Del Monte. Senator, Diamond and Ace of Diamonds, two white dogs, both show class and type qualities. Nairod's Duchess Salano has improved materially since her advent here nearly a year ago. Magnolia Buzz, first bitch puppies and Magnolia Fawn, first novice bitches are the kind that is sought for.

Airedale Terriers turned out well and were an evidence that the breed has taken a strong hold with Coast fanciers. Motor Dace was shown in good fettle for premier honors. Sierra Rock Prince reserve winners, a Coast bred dog, is a fell furnished up-standing dog with a clean terrier head. Bellew's Bloom, first puppies and reserve winners bitches is a pleasing young bitch. There were 12 Airedales on the benches, Sierra Kennels' entries were absent.

Bull Terriers mustered 31 and were a taking lot throughout with but very few exceptions. The main contention was between Brooklyn Patsy and Ch. Silkwood Ben Ali and between Iris and Ch. Edgewood Biddy. Patsy won over Ali, who was in poor condition. Iris is cleaner finished than Biddy, who was a bit too heavy. The latter is a handsome, stylish bitch, with a clean chiselled head, she has an eye a trifle too full however, withal a grand bitch. Silkwood Tatoosh, first puppy bitches also annexed the special for best California bred puppy, quite a win considering the competition. Wonderland Jim Woods, first novice and puppies is put up on the right lines and is a most businesslike looking young dog.

In French Bulldogs, 3 entered, Ch. General De La Mare again had the going all to himself.

Boston Terriers turned out 15 strong with several absentees. Ch. Dick Dazzler and Ch. Endcliffe Tortora with two kennel mates Frisco Cinders and Clancy III had a walkover. Wonderland Kennels' entries were in grand condition. Revilo Tech and Brownhurst Barbary Belle, firsts in puppies and novice are the kind that breeders like to show. Baby Rose, first limit, is a stylish little bitch.

Fox Terriers, both smooth and wire haired, made up in quality what was lacking numbers. Sabine Ringer made his debut with the Tallac entries. The reputation that preceded him was not overdrawn. In head and jaws he has quality, in body and bone, legs, feet and front he is all terrier. Where he beats Wande Knight, which he did at Los Angeles, is a hard question to answer. Tallac Marlin was reserve winner to Ringer. Tallac Orchid winners bitches, gave the smooth honors mainly to Mr. Stethheimer's entries.

In wires Ch. Endcliffe Precise readily won out. Precise holds her age and form remarkably, she also won out in special for best rough coated Terrier, any variety. Humberstone Record, in proper fettle would have won out in stronger company. Humberstone Kennels prevailed in the wire haired entries.

Humberstone Masher, a black toy Pomeranian, is the best specimen of the breed ever shown here. Two Italian Greyhounds were good ones.

Awards.

St. Bernards. (Rough coated.) Puppy dogs and bitches—1 F. M. Smith's King, absent F. M. Smith's Queen. Novice dogs—1 King. Limit dogs—1 Mrs. Jack W. Matthews' Prince Lion, 2 King. Open dogs—1 Prince Lion. Winners dogs—1 Prince Lion, res King.

Specials—Cup for best, Prince Lion. Cup for best puppy, King.

Great Danes. Novice dogs—1 T. Geldson's Bismarck. Limit dogs—1 J. Snook's Dick, 2 Bismarck. Open dogs—1 Dick, 2 Bismarck. Winners dogs—1 Dick, res Bismarck. Novice limit and winners bitches—1 W. A. Burghard's Jessie Jefferson.

Special—Trophy for best, Dick.

Wolfhounds. Limit, open and winners dogs and bitches—Withheld G. Givernaud's Neva. Miss R. O'Connor's Jack O.

Greyhounds. Open and winners dogs—1 T. J. Cronin's Black Tralee, 2 J. Sweeney's Richard Anton.

Foxhounds. (American.) Puppy dogs and bitches—1 Hon. Carroll Cook's Prince Louis. Junior dogs and bitches—1 Hon. Carroll Cook's Bill Ping. Novice and limit dogs—1 Mrs. W. Roslington's Rex. Open dogs—1 Hon. Carroll Cook's Judge. Winners dogs—1 Judge, res Rex. Open and winners bitches—1 Hon. Carroll Cook's Queenie.

Specials—Cup for best, Judge. Cup for best of opposite sex, Queenie. Cup for best Coast bred, Judge. Best team, Hon. Carroll Cook's Prince Louis, Judge, Ch. Ned and Queenie.

Pointers. Novice dogs—1 M. D. Owen's Prince. Limit dogs—1 J. W. Gibb's Mike Geary, 2 M. O. Feudner's Raffles. Open dogs (under 55 lbs.)—1 Mike Geary. Open dogs (55 lbs. or over)—1 Raffles. Winners—Withheld. Novice bitches—1 W. H. Estabrook's Santa Rosa, 2 L. Baldwin's May. Limit and open bitches (under 50 lbs.)—1 May. Open bitches, Pacific Coast bred—1 May. Open and winners bitches—1 Santa Rosa, 2 May.

Cup for best rough coated Terrier, any variety, J. C. Ackerman's Ch. Endcliffe Precise (Wire haired Fox Terrier).

EVOLUTION OF THE BIKE.

Comparatively few persons who marvel at the records made by modern trotters appreciate the importance of the part played by the sulky builder in the development of extreme speed in the light harness horse, and even among present day turfmen there is not a full realization of the improvements brought about in sulky construction since the epoch making pneumatics were introduced in 1892. All horsemen know that the "bike" sulky, as it is sometimes called, revolutionized the speed of the trotter in a day, but to most of them a "bike" is a "bike," no better to-day than it was fifteen years ago, apart from being lighter in weight. Expert sulky builders and trainers who have given thought to the subject say, however, that the sulky of 1908 is as much an improvement on the original pneumatic as the high wheel sulky of 1891 was over the crude track vehicle of fifty years ago.

When Flora Temple was the queen of trotters, back in 1858, all sulkies had straight axles, and those not strictly up to date were still built with springs. Straight axles made long shafts necessary to keep the horse well forward where he could not hit the axle with his hocks when going at speed. Wheels in those days were fifty-four inches high, and the vibration of the vehicle was terrific with the driver up on a high seat so far behind the horse.

It was in Flora Temple's day that Dan Hetfield or Charles S. Caffrey, or both of them, conceived the plan of getting the axle out of the way of the horse's hocks by bending it upward in the middle, and by the time Dexter came out all track sulkies were built in that way. Then came Toomey's truss axle, making possible a much higher arch in the axle and admitting of a hitch so close that a trotter's hocks were playing right under the driver's seat. Besides affording a closer hitch the truss axle reduced the weight, and high wheel sulkies no heavier than forty-two pounds were built in the last few years before the advent of the bike.

When Sterling Elliott, in 1892, put a pair of wooden spoked bicycle wheels only twenty-eight inches high on a sulky frame by means of a crude iron attachment he increased the weight of the track vehicle instead of reducing it, but he enabled Nancy Hanks to lower the world's record more than four seconds in one season after having tried and always failed when hooked to a high wheel sulky.

There was very soon an improvement in the form of attaching the pneumatic wheels to the old sulky frame and within a year or two an entirely new form of sulky appeared with the axle elongated to carry twenty-eight inch wheels without any special attachment such as Elliott used. In these sulkies wire was substituted for wood in the spokes and weight was otherwise cut down from an average of about fifty pounds for the original bike to forty or thirty-five pounds. This weight was afterward reduced to twenty-five pounds. Lou Dillon pulled one no heavier when she made her record.

The aim of the sulky builders at this period seemed to be to raise the arch of the axle about as high as possible in order to afford ample room for any amount of hock action underneath. Seats were raised even higher, and in many of the sulkies of the late nineties, or even later, the distance from the ground to the seat was fully fifty inches.

The next form of sulky had a somewhat lower seat, close down on the axle, but it was not until a tardy appreciation of the principle involved in the wind shield had been drummed into the trainers and the sulky builders that they began to consider the importance of avoiding all possible resistance of the atmosphere and act accordingly.

Captain Martin Payne was perhaps the first to apply this principle to the construction of sulkies. As early as 1900 he patented a long shaft sulky, which was really a pneumatic training cart, with the seat so far behind the horse that all the trotter's action came in front of the axle. This enabled him to drop the seat to within about thirty inches of the ground, thus putting the driver down behind his horse where he offered practically no resistance to the atmosphere as the trotter sped along.

Whether Captain Payne had this principle and this purpose in mind when he designed his long shaft cart is not known, but it is certain that after experience had shown it to be as fast as the high arch sulky, despite the distance of the axle from the horse, other builders began to lengthen the shafts of their track sulkies sufficiently to allow the horse's action to come in front of the axle, and drivers began to tilt them up to an extreme angle, which threw the seat closer to the ground.

At present practically all track sulkies are built on this principle. Shafts have been lengthened from eight to ten inches, and seats lowered until some of them are not more than twenty-nine inches from the ground. So low is his seat that the driver of to-day in a trotting race cannot look over the back of his horse, but to see ahead must lean out to one side and look past him. This has materially increased the dangers of harness racing.

In its present form the track sulky is generally conceded by all builders and trainers to be about as near perfection as it is possible to make it, and while different builders vary the details of construction, the principles and proportions are substantially alike. Weights now range between twenty-eight and thirty-five pounds.—New York Herald.

SPLAN'S START.

As an entertaining conversationalist John Splan has no superior. His story of how he graduated from the position of "rubber" to that of driver is worth repeating. "I was rubbing horses for Dan Mace," said Splan, "and one day an old gentleman who had taken a great deal of interest in me came along. 'Why don't you get a horse, Johnny,' he said, 'and be a driver yourself?' I explained to him that it was almost impossible for a boy who had no influential friends to obtain possession of a trotter. 'I have got two,' he said, 'my favorite team, Twang and Sting, and, if you like, I will let you train them.' Of course, I accepted his proposition eagerly, and lay awake half that night thinking over my good luck. The next morning the horses were sent to the track, and, boy like, I wanted to begin operations on them at once. So I harnessed Sting up to a sulky that I borrowed for the occasion from one of the trainers, and while this was being done took Twang out in the field inside the track, and turned him out to grass, tying him by a long rope to a strong stake which I drove into the ground. Then I went back and began driving Sting.

"I warmed the old horse up pretty well, and started to drive him a full mile. We got along very nicely until we came to the place where Twang was nibbling grass. The old horse saw his mate coming at a very unusual rate of speed, and as we neared him he gave a loud whinny and started in hot pursuit. When he had galloped the length of the rope that held him there was a sudden stop. The stake to which the rope was tied held its own, and the result was that Twang was turned a double somersault and broke his neck. Unconscious of the destruction that was going on behind me, I drove Sting down the homestretch at his best rate of speed. After completing the mile and stopping the horse, I found that the unusual exercise had made him dead lame, and from the way in which he limped it seemed highly probable to me that he would never recover. While bemoaning this fact a small boy who had witnessed the catastrophe to Twang came up and informed me of it. The next morning the old gentleman who took so much interest in me as a bright and promising boy came out to the track. He buried Twang, led Sting limping home behind his buggy, and my career as driver began and ended in one day."

HOW TO FEED STALLIONS.

In a bulletin issued by the University of Wisconsin the writer, F. C. Warren, the well known breeder, says about the care and management of stallions: A few things that I consider of great importance are, first, before using the stallion let him get some age. No colt will breed as well as an old horse, from eight to sixteen years old, provided the horse has been properly taken care of. Next, avoid all pampering, both as to care and feed. Feed and work him as you would any horse, not overheating or overexerting him.

If not situated so you can work or drive him, have a good, roomy yard where he can run and exercise at his own free will. There are three things that should be remembered that are not conducive to fertility in the stallion or to soundness, strength or longevity in his progeny—viz., idleness, pampering with unhealthful food and putting him to service when too young. If these matters are observed and you will limit your horse to the proper number of mares, you will get good results.

As to feed, we should give him a liberal quantity of oats and bran, two parts oats and one of bran, twice a day, and once daily through the mare season a good feed of boiled barley with a little flax-seed cooked with it. Mix with bran and feed hot at night. This, with good hay and sufficient grass, should constitute his daily feed, with perhaps a few ears of corn occasionally. Remember this one important matter, keep your horse healthy and as near a natural condition as possible. To do this you must feed and exercise him properly. This must be continued all through the year. The man who keeps his horse right just through the mare season and then confines and keeps him in an unhealthy state all the rest of the year will find himself with an unprofitable stallion in a short time.

When the steamer Lonsdale left Victoria, British Columbia, last week on her return trip to Mexico, she carried away two small donkeys which were passengers from Mexico on the voyage north. The burros were tethered on the deck, patiently munching hay, and meanwhile the ship's officers were deciding upon their execution. They are to be drowned at sea. The donkeys were brought for two Victorians who wished to present the little animals to children, but cruel customs laws, which are not swayed by sentiment, were in the way. It seems that in order to bring live stock to British Columbia from Mexican ports it is necessary to secure a permit from the Commissioner of Customs at Ottawa. The prospective owners eagerly offered any duty the officials might levy. The animals were not valuable—they cost less than \$5 each in Mexico. The officials were adamant. The law was that no live stock could be imported from Mexico without a permit from the Commissioner of Customs at Ottawa, and that permit was not forthcoming. They were ordered deported. Rather than carry the donkeys back to Mexico it was decided to drop them overboard.

COOLING OUT.

After the youngster has been worked, jog briskly to the stable, unharness him, after putting on his halter and before crosstying him, sponge out his mouth and give him a sup of water; throw a light cooler over him, then take off the boots, sponge off his legs and roll on the bandages if you are using bandages on the colt; they generally need them after they have advanced to the point where they can step a 2:40 gait or faster, says the Horse News. Be sure not to have your cooling-out place where the colt will have to stand in a draft. Turn back the cooler and if you have brought out a light scrape go over the youngster with the scrapers, then rub out all the water, straighten the hair the right way and cover him up well and take him out for a walk. Watch his cooling out carefully so that he will not freeze up and dry out too quickly; after he has been walked about ten or fifteen minutes take him in and give him another light rub-out; if you find that he is not clothed warm enough make the change to a medium weight cooler instead of the light one. It is often a good thing to throw a light woolen hood over the loins, in addition to the cooler, as this is the place that a great many horses go wrong and get sore. Give him a few more swallows of water before you take him out for another drill.

When his temperature becomes normal, and a good groom does not need a thermometer to tell when this period is reached, by simply placing his hand underneath the blankets at the flank he can tell in a twinkling whether he is cooled out or not. Give him a few bites of grass, if situated so that you can, before taking him to do him up. After brushing him out well, change the bandages, pick out his feet and wash them well. If the work has been unusually stiff or hard, it may be necessary to use a good body wash of some kind, and as there are so many different ones it will be a hard matter to give advice that will be satisfactory to all parties, but one of the best combinations for this purpose that we have ever used is composed of camphor, arnica and pure witch-hazel.

Take a couple of ounces of camphor gum and cut it with alcohol; add three ounces of tincture of arnica and put this into a gallon of witch-hazel. This lotion or liniment may be rubbed over the shoulders, forearms, loins, stifles and gaskins thoroughly. Put on the woolen steamers and pin them up securely, blanket him well and turn him loose in his box-stall to a good bunch of bright hay. The above liniment is a good leg wash as well as a good body wash. Don't let the feet get hard and dry, pack them with clay after his work before putting him away for the night.

PUBLIC ROADS OF CALIFORNIA.

The report of the United States Department of Agriculture shows that there were 46,653 miles of public road in the State of California. Of this mileage, 5,843½ miles were surfaced with gravel, 418½ miles with stone and 2,544½ miles with oil, making in all 8,803½ miles of improved road. It will be seen from these figures that 18.8 per cent of the roads has been improved. By comparing the total road mileage with the area of the State, it appears that there was 0.29 of a mile of public road per square mile of area. A comparison of mileage with population shows that there was one mile of road to every thirty-one inhabitants and one mile of improved road to every 168 inhabitants.

The Board of Supervisors of the various counties are authorized to fix and levy a tax annually for road purposes of not to exceed 40 cents upon each \$100 worth of assessed property. A special tax for damages caused by floods and storms of 50 cents on each \$100 worth of taxable property may also be levied.

They are further authorized to require every male person over 21 and under 55 years of age to pay an annual road poll tax of \$3. Reports from some of the counties indicate that this tax is worked out at the rate of \$1.50 per day, but the State Commissioner of Public Roads says that owing to a prejudice against it, this tax is levied in but few instances.

Thirty-five per cent of all the funds received from the regular property and poll taxes may be set aside by the Supervisors as a general county road fund and used in impoverished districts or on improvements in which all districts are interested, while the balance is expended on roads in the districts in which the money is collected. The construction, maintenance and repair of bridges and tunnels and the purchase of toll roads may be paid for partially out of the general fund of the county.

Appropriations are made from time to time by the Legislature to build state roads in the mountain regions. The State pays the whole cost of this work.

Convicts are employed at the State prison at Folsom in preparing the rock which is sold to the various counties for roads and construction at from 30 to 40 cents per ton f. o. b. Folsom. The cost of operating the crushing plant at Folsom for the year of 1904 was \$15,654.95, and the amount of material produced was 54,522 tons.

Expenditures from the regular property and poll taxes were \$2,146,145.36 in 1904. The expenditure by the State for the building of mountain roads amounted to \$11,251, making a total expenditure of \$1,157,396.36. By comparing the total expenditure with the total mileage of public roads and with the population of the State, it is found that the funds collected and expended for road purposes amounted to \$46.24 per mile of public road, or \$1.45 per inhabitant.

OVERFEEDING CAUSES INDIGESTION.

One of the most insidious foes to good health in hogs is constipation. It is the beginning point of a great many other serious ailments that affect hogs. It is easier to prevent disease than it is to cure it. By preventing disease the hog can gain continuously, but after disease attacks the hog it loses and the profit in hog raising is lost with it. It is not the feed which is eaten, but it is that which is digested properly and assimilated by the animal that brings about good results. The hog that is clogged up soon becomes surfeited with feed and loses his appetite or desire for eating. To make a success of feeding, hogs must have appetites and anxiety to eat. Therefore, it is vital that they be kept in a condition for demanding feed. But do not overfeed; it is better that they should be a little underfed than over-supplied with feed. Each meal given should always be eaten up clean, and the trough should be thoroughly cleansed after feeding. Never throw fresh feed into the trough if it contains any of the old or sour feed in it. In this way you will keep the appetite toned up and a good appetite causes a good flow of saliva and naturally assists good digestion. A voracious appetite which is unnatural accompanies indigestion. The hog remains hungry after he has filled up on all that he can eat, and is worse off than if he had not eaten at all, as he has only added to the burden of organs which are overworked already.

The cows that are soon to calve should be fed on succulent feed, such as silage or roots, bran, linseed meal with a little oats. Keep the bowels open and do not feed very heavy on grains just before or after calving. After calving give bran mash and warm the drinking water for a few days. Allow the calf to suck for about two days and then feed his mother's milk from a pail for about two weeks, about three quarts twice a day; after that reduce it with skim milk or warm water, so that at the end of the fourth week the calf will be getting all skim milk or half whole milk and half warm water with some reliable stock tonic to aid digestion. Keep a supply of good clover or alfalfa hay within reach and also some ground oats with a little linseed meal mixed with it. After the calf eats the ground feed, gradually get him used to eating whole oats, as this is the best feed for him up to six months old. The heifers should not be bred until about 15 or 18 months old.

DEHORNING THE CALVES.

There can be no question that dehorning is a good thing, though it does seem barbarous to saw or clip the horns after they are well developed. Why not begin with this year's crop of calves and try preventing the growth of horns. It can be done all right if performed before the calf is a week old. Just follow these directions:

The little animal is caught and gently laid over on its side, in which position it is easily held by one assistant while the operator clips the hair off the trifling prominence on the frontal bone which marks the spot on the uppermost side of the head where the horn would be developed if not interfered with. He then takes his stick of potash, dips it in cold water, and carefully rubs it over the part just clipped for the space of, say, ten seconds. The calf is now turned over, the corresponding portion of the frontal on the other side clipped and thoroughly rubbed with the moistened potash the same way as the first. By this time the side first treated is dry and ready for a second application of the caustic, which should conform exactly to the first. Follow the same procedure on the remaining side, where the matrix of the embryo horn has

been properly applied, no horns will ever make their appearance.

For fattening lambs, careful experiments have demonstrated that an even mixture of peas and oats give the best results. Next to this, and with but a small difference in favor of the former, corn and peas were found best. The fact that peas and oats may be easily and cheaply grown together, adds to the advantage of this ration.

Clover and alfalfa make the best pasture for hogs. Every farmer who raises hogs should provide them with a good pasture. Rape is one of the excellent crops for this purpose, as it furnishes an abundance of succulent feed, but it is of a carbonaceous nature and should be fed with nitrogenous concentrate. Red clover and alfalfa are the better crops to use.

BEAUTIFUL BELVEDERE! —THE— Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect
Most Charming Spot on the
BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

In feeding the herd boar it is important to give him food that will build up muscles and lean meat and give vigor. The kind of feed is not the only thing in caring for the herd boar; he should have a good yard to exercise in, or, better yet, a small pasture with green forage.

The health and strength of the farm team should be guarded at all times. It will never pay to wear out a good horse just to get a certain amount of work done.

The Blue Ribbon Sale of the West

250

High-Class Horses Consigned.

SALE WILL BE HELD AT THE

Lewis & Clark Fair Grounds, Portland, Oregon
APRIL 28-29-30, 1908.

Among the good ones to be sold are

Mary Mims, two-year-old record 2:30, sired by the great The Bondsman, sire of Grace Bond 2:09¼. Mary Mims is entered in the great Kentucky Futurity and is beyond all doubt a 2:10 trotter.

Henry Gray 2:18¼ by Zombro, sire of four in 2:10 list. This is a great trotter and sure race horse.

Minwal 2:22¾, full sister to Bill Frazier 2:14, is a 2:10 pacer and a show mare.

The Brook-Nook Stock Ranch of Montana has consigned 120 head, mostly four and five year olds, and if anyone is wanting drivers or match pairs, well-bred young brood mares or young stallions, they will find them among the horses catalogued in this sale.

No strings to any of the horses consigned. The high dollar takes the horse every time.

SEND FOR CATALOGUE.

Following the horse sale there will be **THE GREAT CATTLE SALE**, commencing May 1st at the Union Stock Yards.

Dispersion Sale of the Gilbert & Patterson Herd of Hereford Cattle. Headed by the great herd Bull TOPSMAN.

The Willamette Valley Stock & Land Company consign the Hereford bull OWHL, grand champion Salem '06 and the young bull Lewis, son of Topsmen. Shorthorns from the Minor Breeding Farm, including STAR WANO, a winner everywhere shown, and females in calf to GOLDEN GOODS, the great \$500.00 show bull and sire.

New England Trotting Horse Breeders Association

BOSTON, MASS.

ANNOUNCE THE

AMERICAN TROTTING DERBY

Purse \$50,000

To be Trotted at Readville Trotting Park, Aug. 25, 1908

GRAND CIRCUIT MEETING

A Handicap, dash race open to all trotters, in which the slowest horse will go a distance of one mile and one-quarter and be allowed 50 feet start by faster horses for each second's difference in speed, but no horse will be handicapped slower than up to a mile in 2:15.

THE PURSE WILL BE DIVIDED:

First Horse Will Receive	-	-	\$30,000	Fourth Horse Will Receive	-	-	\$2500
Second Horse Will Receive	-	-	10,000	Fifth Horse Will Receive	-	-	1500
Third Horse Will Receive	-	-	5000	Sixth Horse Will Receive	-	-	1000

The Entrance Fee Will be \$500

payable in installments as follows: \$100, May 11, when entries close and horses must be named; \$100, June 15; \$100, July 15; and \$200, August 22. These fees are for each horse named. The Association reserves the right to reduce this entrance fee by cancelling the second and third forfeits, either or both, or reducing their amount. Nominators will not be held for forfeits falling due after they have declared an entry out in writing. More than one horse from the same stable may start.

The total entry fee is but one per cent of the purse and nothing will be deducted from winners.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all trotters from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on August 18.

THE HANDICAPPING

will be done by three experts who will be selected for their knowledge and ability in this line. They will meet at Readville on August 18, when the horses will be classified according to the knowledge of their ability on that date in possession of the handicappers.

RECORDS WILL NOT NECESSARILY GOVERN

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

If more horses should appear for the race than can safely, or in fairness to all competitors be started, the Association will divide them into divisions, by lot, bringing the first eight in each division together to race for the purse, it being agreed that the directors of the Association shall be sole judges of this condition.

The start will be a standing one, but it is understood that a horse may be

moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

CONSIDER THESE STARTLING FACTS

While the winner of this race will receive more money than was ever won in an entire year by any trotter, the second horse gets as much as the winner of the Kentucky Futurity, the third horse gets 25 per cent more than the winner of the M. and M., the fourth horse as much as the winner of the Transylvania, and even the sixth horse gets his entrance money back and first money in a thousand dollar purse besides.

AND THEN REFLECT

you trainers of Grand and Great Western Circuit stables that you can engage and start every 2:15 or better trotter in your stable in this race, with each one of them having an equal chance of winning, so far as the conditions of the race are concerned, and then start them over again in our regular events later in the week. And you trainers of half-mile track horses, those of you who have 2:15 or better trotters, remember that so long as your horse is a good trotter in his class that his chances of winning will be just as good as would Lou Dillon's were she in condition and ready to start, and it costs only one-fifth of one per cent of the purse to make a start in it.

ENTRIES CLOSE ON SATURDAY, MAY 16

The management believes thoroughly in the success of this race and that it will be enthusiastically supported by the horse world. It will do all in its power to make it a success and is ready to risk and sacrifice much to that end. We do not assume that any one would desire to see the Association bankrupted by giving this race if the support received is not worthy of the purse, hence the right is reserved to declare it off if it fails to fill to the satisfaction of the directors.

JOHN M. JOHNSON,
President.

C. M. JEWETT,
Secretary, Readville, Mass.

Ellis' Improved
Hutton Patent
Checking Device

Absolutely
the Greatest
Controller on
Earth for Road
or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

DEL CORONADO 2:09 3/4

CARLOKIN 2:13 1/2

COPA DE ORO 2:07 1/4

Iran Alto

Next dam Green Mountain Maid, dam of Electioneer and of nine in the list. Iran Alto is the sire of Dr. Frasse 2:11 1/4, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

TERMS: \$30 for the Season. Usual return privilege. Pasturage \$3 per month.

R. O. NEWMAN, - - - Visalia, Cal.

Del Coronado 2:09 3/4

Reg. No. 45122. By McKinney 2:11 1/4, dam Johanna Treat by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles, Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1180 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13 1/2

Reg. No. 36458. By McKinney 2:11 1/4, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07 1/4

By Nutwood Wilkes 2:16 1/4, dam Atherine 2:16 1/4 by Patron 2:16 1/4 (son of Pancoast 2:21 1/4 and Beatrice, dam of Prodigal 2:16 1/4); second dam Athens, etc. He is a beautiful light bay stallion, stands 15.3 1/2 hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27 1/4 by Dawn 2:18 1/4. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

—AT—

Athasham

Race Rec. 2:09 1/4,
Reg. No. 45026.

A Game Race
Horse in the Stud

Bay stallion, stands 15.3, weighs 1,150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 1/4, Athasham 2:09 1/4, Sue 2:12, Listerine 2:13 1/2 and 8 others in 2:30); dam, the great brood mare Cora Wickersham (also dam of Nogi (3) 2:17 1/2, winner of 3-year-old trotting division Breeders Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22 1/2 (sire of dams of Geo. C. 2:05 1/2, etc.). Athasham has a great future before him as a sire. He is bred right and made right, and has every qualification one can expect in a sire. He has been timed in 2:06 1/4 in a race, and his courage is unquestioned.

He will make the Season of 1908 at **Orchard Farm, Fresno, Cal.**, for a Fee of \$50, with usual return privilege.

For further particulars address this place, care of

CHAS. MIDDLETON, Manager,

Or **D. L. BACHANT, Owner, R. R. 1, Fresno, Cal.**

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11 1/4, the greatest sire of extreme speed living. Dam Helena 2:11 1/4, dam of Wild Nutling 2:11 1/4, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04 1/4; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinnys. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

CHESNUT TOM 43488

Race Record 2:17 1/4. Trial 2:14.

Sired by Nutwood Wilkes 2:16 1/4 (sire of John A. McKerron 2:09 1/4, the fastest trotting stallion of the Wilkes family). Dam Zeta Carter by Director 2:17 (sire of dam of John A. McKerron 2:09 1/4); granddam Lida W. 2:18 1/4 by Nutwood 600. Chestnut Tom won the 224-trot at Salinas, 1906, in three straight heats.

Season of 1908 at

STOCKTON, Cal.

Terms: \$30

Address, the owner,

GEO. T. ALGEO, 120 So. Center St., Stockton, Cal.

DO YOU WANT THE BEST?

BREED YOUR MARES TO

ZOMBRO 2:11

Son of McKinney 2:11 1/4 and Whisper by Almont Lightning.

SERVICE FEE—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Bellemont 2:09 1/4, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08 1/2, holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list, ten in the 2:15 list and seventeen in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices.. Address.

GEO. T. BECKERS,

3949 South Figueroa Street,
Los Angeles, Cal.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

W. B. Eddy & Co., Whitehall, N. Y.

Bonny McKinney 41383

Son of
McKinney 2:11¼

World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03¼
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13¼ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11¼, trial 2:05½. Dam Rita B. by Boodle Jr.; 2nd dam Gablian Girl by Gablian; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal.

Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

100-Shot Championship Match

Won Again by Rudolph Gute with

Winchester Cartridges

Making

2468

Highest Score of the Year

2468

Besides winning the Gallery Championship Match of the Zettler Rifle Club shoot, held in New York City, March 14-21, Winchester Cartridges were tied for first in the CONTINUOUS MATCH—H. M. Thomas, 5 perfect scores of 75; 2nd in the BULLSEYE MATCH—A. F. Laudensack, target of 6"; 2nd in the ZIMMERMAN MATCH—R. Gute, 5 scores of 39, 16 scores of 38. Mr. Gute's average for the 100-Shot Matches that he has competed in is over 2465—the highest of any shooter. His perfect score of 0" made on the Bullseye Target at Rochester remains unequalled. This shows that Winchester Cartridges—

SECOND PAYMENT

Pacific Breeders Futurity Stakes No. 8---

\$7,250 Guaranteed

Mares Served 1907. Foals 1908. Stake Closed December 2, 1907.

\$4,250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions. \$250 Prizes to Stallion Owners.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.
200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Trot.
1250 for Two-Year-Old Trotters.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Trot.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

\$1000 for Three-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.
750 for Two-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings February 2, 1909; \$10 on Two-Year-Olds February 1, 1910; \$10 on Three-Year-Olds February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

REMEMBER THE SUBSTITUTION CLAUSE—If the mare proves barren or slips or has a dead foal or twins, or if either the mare or foal died before February 24, 1909, her nominator may sell or transfer his nomination or substitute another mare and foal, regardless of ownership. In Futurity Stake No. 7 the demand for substitutions far exceeded the supply.

Be sure and make payment in time.

E. P. HEALD,

President.

The Annual Sale of

APTOS

Three-Year-Olds

Sired by DEXTER PRINCE, Cupid and Aptos Wilkes at

Chase's Pavilion

Monday Evening, May 4, 1908

It is the policy of this farm to sell without reservation, and this lot includes several ready-made race horses. The two fillies by Dexter Prince, out of Diane 2:07 1/2, and Hulda 2:08 1/2, are in themselves attraction enough to top any sale. The carriage horses listed along with the trotters, include single drivers, and two pairs closely matched. They are a sound lot, fearless, good mannered and fit for immediate use. These horses will be at our sale stables ready for inspection **Saturday, May 2nd.** Write for catalogues.

Zolock 2:05½ N. S. Young, Walla Walla, Wash.
Zombro 2:11 Geo. T. Beckers, Los Angeles, Cal.

THE CALIFORNIA STAKE, which has been made for trotters of the 2:20 class this year, was inaugurated by the Pacific Coast Trotting Horse Breeders' Association in 1902, had a value of \$2,000, and was for 2:24 class trotters. The first winner of this stake was W. G. Durfee's stallion Petigru by Kingward, who won the race in straight heats, beating Forest W., Verona and Vi Direct in 2:17, 2:16 and 2:17½. The following year the Breeders' meeting was held at Petaluma, and the winner of the \$2,000 California Stake was George G., who won the first, third and fourth heats in 2:14½, 2:12½ and 2:12½, the chestnut gelding Deputy taking the second heat in 2:13½. In that race Deputy won second money, Doctor Hammond third and Rosie Woodburn (sold at Pleasanton for \$185 last week) fourth money. There were eleven starters that year. In 1904 the Breeders' meeting was held at San Jose, and the California Stake had nine starters. Morosco the brown gelding by Wayland W. won the race which was again a split heat affair, Una K. by McKinney getting first to the wire in the initial heat in 2:14½, Morosco winning the second in the same time, H. D. B. by Arthur Holt leading at the finish the third heat in 2:14½, and Morosco winning the next two in 2:15½ and 2:17½. The fast and favorite Santa Rosa track was the scene of the battle of 1905 for the \$2,000 hung up for the starters in the California. But four of the 2:24 class trotters came to the post, Charley T. by Zombro, Oro Belmont by Oro Wilkes, Billy Dooley by Bay Bird and Homeway by Strathway, and they finished the race in that order at the end of four heats, Charley T. being the winner, and Oro Belmont getting second money by finishing in front the second heat in 2:16. Charley T's heats were in 2:17, 2:21 and 2:16½. In

1906, the year of the earthquake, the Breeders went to Woodland, and owing to the conditions existing then, the stake was reduced to \$1,500. Will Durfee won it over seven other starters, with the Boodle mare Little Louise. The fast trotter R. W. P. by Lynwood W. won the first two heats in 2:13½ and 2:15, and Little Louise took the next three in 2:17, 2:17½ and 2:17. As R. W. P. was distanced, Easter Bell, full sister to the pacer Sir John S. took second money, and Chestnut Tom was awarded third money. The other five starters were all distanced before the race was ended. Last year the Breeders again selected Santa Rosa for their meeting place, and when the California Stake was called seven trotters scored down for the word. Eva by Zombro, Berta Mac by McKinney, Dredge by James Madison, Kinney Rose by McKinney, Fresno Girl by Seymour Wilkes, Ollie B. by Nutwood Wilkes and Yosemite by Monterey were the starters and when the five heats required to decide the winner were finished, the order of the horses was as here given. Bertha Mac took the first two heats in 2:14½ and 2:13½ and then Era, driven by Frank Williams, captured the next three and first money in 2:12½, 2:15 and 2:17½. This year the time and place where the Breeders will hold their meeting have not yet been named, although entries for all their races have closed. The California Stake is for 2:20 class trotters this year, but this reduction of four seconds in the class of the race has not effected the entries as no less than 23 trotters have been named in it. Any attempt to pick a likely winner of the race at this early date would be purely guess work as while there are several of the horses that have raced and earned records, none of them have shown sufficient superiority to be made a favorite even in an early editorial book. Lady McKinney by Washington McKinney has probably the fastest public mile to her credit, her matinee heat in 2:12½ at Pleasanton, March 17th, showing that she has speed enough to win if the race does not outclass all previous contests for the stake. Monicrat, the black stallion by Monwood won a matinee heat in Southern California a year or two ago in 2:14½, and is now working nicely for Charles Spencer at Woodland. San Francisco and The Angeles, both stallions owned by P. W. Hodges are credited with trials around 2:15 at the Brace half-mile track last year. Sidonis by St. Nicholas is another one that has shown very fast in trials, as has the stallion El Tonopah by Billups out of the dam of Sir John S. 2:04½. The handsome gelding Yosemite, owned by P. J. Williams has been a mile in 2:16 and can go faster. Ben Russell by L. W. Russell, Buddie G. by Seymour Wilkes, Emily W. by James Madison, and Wenji by Zolock are all trotting nicely this spring and may be expected to trot miles close to the stake record of 2:12½ before the meeting opens. The mare May T. by Monterey showed a great flight of speed last year, but was a little unsteady. Charles Silva of Sacramento has two entries in the race. The Statesman by James Madison and Blanche T. by Stickle, and the one he starts will not be far behind the winner if reports from the Capital city are to be relied on. The horses whose work has not been reported so far this spring are Rey McGregor by Rey Direct, Irene by Florida and Wild Girl by Wild Nutling. Farmer Bunch's entry, Zella Mac by McKinney was raced in the far east and through the southern states last season, getting a record of 2:26½. She has been trotting miles around 2:16 during the past month. Prof. Heald by Nutwood Wilkes, won the Stanford stake of 1906, taking a record of 2:24½, and as he is now a fine looking five-year-old and one of the improving kind, his owner, Tom Smith of Vallejo, thinks he will have a chance in the California Stake this year. When Prof. Heald won the Stanford he had to beat the colt Silver Hunter by Zombro, who is nominated in the California this year, and took one heat from him and was close up in the others. Silver Hunter has a record of 2:21½ made in the first heat of the Occident Stake that year, in which race he won two heats and second money, Della Derby finally beating him. The mare Lady Inez by Nutwood Wilkes, owned by James B. Smith of this city and trained by Joseph Cuicello at Pleasanton is a rapid going, busy little trotter that will have to be reckoned with whenever she starts. She won a matinee race in 2:16½ and 2:17 at Pleasanton last month. The "unknown" of the entire list of 23 entries is the gelding Prince H. owned by Henry Helbush of this city. Mr. Helbush bought this horse some time ago for less than a hundred dollars, and although he has traced him back through three or four owners, he has not been able to find anything of his breeding. The

horse is a fast trotter however, and whether he has a show to win any part of the \$2,000 this year remains to be seen. This completes the list of trotters entered in the California Stake to be trotted in August, and those who think they can pick a winner from among the horses mentioned will have the opportunity when the meeting opens to "pay their money and take their choice."

THE OPPORTUNITIES for a good circuit of fairs and race meetings in the San Joaquin Valley are such, that one of the best and most successful circuits of the entire coast can be made a regular and permanent thing if the proper parties get hold of the organization and management. Fresno, Hanford, Tulare and Bakersfield are all thriving towns located in most prosperous sections of the State. Each is capable of holding a fair that will draw a very large attendance, assisted by a program of harness racing in which all the leading breeders and owners will be interested. In arranging these programs of harness racing, due consideration must be made of the fact that the fairs will be held in the fall after the State Fair is ended, and while many of the fastest California horses will be racing in Oregon and Washington for the big purses hung up on the Nirth Pacific circuit. While a number of the fast horses will go north, many will remain at home, and very large entry lists followed by big fields in the races can be secured for the San Joaquin Valley or Central California circuit if the speed committees will use due diligence in ascertaining what horses are in training whose owners will be willing to race them from Fresno to Bakersfield. Associations whose directors are not posted on harness racing are liable to make one of two mistakes—either the purses advertised are too small to attract good horses, or are larger than the association can afford to pay. In the majority of the smaller towns in California purses of \$500 are as large as can be afforded, but every association that can be certain of four days liberal gate receipts should be able to give three or four stakes of greater value. By finding out what horses are in training, and what classes will be most popular, any well posted Secretary can arrange a program that will fill so that the races will cost his association but little. We hope the San Joaquin Valley associations will make a success of their fairs and race meetings this year, as good fairs are a great benefit to the counties where they are held, and good race programs are big aids to the horse breeding business.

THE DAM OF DIABLESS 2:11.

Newman, April 16, 1908.

Breeder and Sportsman:—I saw your inquiry for the breeding of the dam of Diablass 2:11, and I suppose I am the only person that knows what has been done toward tracing it up. Diablass was bred by Anson Christy of Concord, Cal., now dead. I went with him from Concord to Pleasanton when he bred the mare to Diablo. I also gaited and named Diablass. Anson Christy got the mare from John Martin, then of Bay Point, now of Vallejo or Mare Island, and he got her from a doctor in San Francisco who purchased her from Mr. Dougherty of Spanishtown. Mr. Christy went to Spanishtown, but the only information he got from one of the Dougherty family was that the breeding of this mare was a gift from Governor Stanford to Mr. Dougherty, but from what horse they did not know.

Yours respectfully,

W. S. CLARK.

BEN HUR SOLD FOR \$1,300.

On Thursday of last week, Mr. S. K. Trefry of Pleasanton, sold his good four-year-old trotter Ben Hur by Stam B. 2:11½, dam Mountain Maiden by Cresco, to Mr. E. Smith, now a resident of Alameda, Cal., but an owner of property in Marsaline, Missouri. The price paid for the horse was \$1,300, and Ben Hur is worth every cent of the money. That he will beat 2:20 in a month and 2:15 by August is as certain as the sun shines and the horse meets with no accident. After selling Ben Hur Mr. Trefry attended the big sale at Pleasanton on Friday, and bid \$150 on a fine looking two-year-old full brother to him. The colt was knocked down to him, and "Dad" has another youngster that will surely develop into a fast trotter. Mountain Maiden, the dam of these colts is the dam of the pacers Tom Carneal 2:08½, Miramonte 2:24½, and the trotter Kenneth C. 2:13½, the last named still the property of Mr. Trefry.

Secretary J. A. Stewart of the Los Angeles Driving Club, recently purchased from Mr. George W. Ford of Santa Ana, a beautiful chestnut filly by Neerut 2:12½, that gives promise of being very speedy. The price at which this filly changed hands was \$300.

Subscribe for The Breeder and Sportsman.

NOTES AND NEWS

The date of Chase's next big sale is May 3rd.

He will sell all the three-year-olds from Mr. Spreckels' Aptos Farm.

Billy Andrews, according to reports, will train and race Sonoma Girl 2:05½.

Sherlock Holmes 2:06½ is entered in the \$3,000 pace for horses of the 2:07 class at Detroit.

I Direct 2:12½ is doing well in the stud at Ogden, Utah, and his colts there are showing up well.

Highball is trotting eighths in 15 seconds at Memphis and Geers thinks him a better horse than he was last year.

Miss Liberty is the pretty and apt name which Harry Lewis of Sacramento, has chosen for his yearling filly by Zolock 2:05½ out of Columbia by Clipper.

Robert Mann of Watsonville, has sold to Dr. E. E. Porter of the same place, his fine roadster Midnight, considered one of the handsomest horses in Santa Cruz county.

Mr. George A. Pounder of Los Angeles, has his fine filly Lottie Lynwood, own sister to Sonoma Girl 2:05½ in the Kentucky Futurity for foals of 1907. This stake is worth \$21,000.

Sonoma May 2:29¼, own sister to Sonoma Girl 2:05½, has been named in the M. & M. for this year, which Sonoma Girl won last year. Sonoma May is now owned by George Watts.

The Ferndale race track is now in fine condition and horses are being worked over it daily, and there will be more trotters and pacers in training there for the September fair than ever before.

There is a filly by Dexter Prince out of Dione 2:07½ to be sold with the Aptos Farm horses at Chase's, May 4th. There is a full sister to this mare at the Woodland track that is a great prospect for a fast trotter.

Dr. Boucher is very pleased over the arrival of a fine filly by Bon Voyage (3) 2:12¾ out of Miss Logan 2:06¾. It made its appearance at Pleasanton one day last week, and has been much admired by all who have seen it.

Joseph D. Mansfield of Chico, has recently leased the old Glenbrook Park track, between Nevada City and Grass Valley, and will spend considerable money restoring the buildings and putting the track in first-class condition for racing.

There is to be matinee racing at Newman May 16th. Work on the new grandstand has already commenced and the track will soon be well appointed in every way. The soil is excellent for training, and when put in shape for racing over, is fast.

D. F. Herspring, D. V. S., of Woodland, has recently purchased the three-year-old Edna Richmond by Richmond Chief 2:11¼, dam Edna R. 2:11¾ by Sidney, second dam Stella C. 2:26 by Director, third dam by Speculation. She looks like the real thing and will be given a chance.

E. B. Eblin of Kentucky, a dealer in market horses, visited Riley, Crook County, Oregon, recently and purchased a thousand head of range horses which he will ship east and sell at auction. Mr. Eblin was ready to buy a thousand or two more, but the prices asked after he secured the first thousand stopped further sales.

A very handsome and fast stepping pair of trotters, four and five years old, are owned by Mr. E. E. Littlefield of Monterey, Cal., who purchased them from a Salinas breeder. The geldings are own brothers and by Barondale 2:11¼, the Baron Wilkes horse that Tom James of Des Moines, Iowa, stood at San Jose for two seasons.

It is said that horses taken from California to the Nevada mining camps often die showing symptoms of poisoning. Veterinarians say that the Nevada alfalfa often contains alkuloids which are poisonous to horses, and that this condition is especially prevalent in immature alfalfa hay or that which is poorly cured.

L. E. Brown, Delevan, Ill., who recently purchased the sensational two-year-old colt of 1907, Trampast 2:12¾, has leased for the season The Bondsman, sire of Grace Bond, one of the only two double Kentucky Futurity winners. J. H. Thayer, owner of The Bondsman, is in very bad health and has decided to take a year's rest, and will this season have nothing whatever to do with horses, he having last fall sold all his possessions in this line, save The Bondsman.

Reports from Alta McDonald's stable at Albany, N. Y., say that the California bred gelding George G. 2:05¾, has wintered nicely and never looked so good as he does right at the present. He is being driven ten and seven miles, respectively, on alternate days and will no doubt reach Readville for the big free-for-all trot on July 4th, trained to the hour.

The pacing stallion Twis G. B. 2:12¼, owned by J. P. Taylor, Sully, Ia., has been leased to Dick McMahon for the 1908 campaign. In eight races last season Twis G. B. was beaten in but one, Citation 2:03¼ defeating him in 2:09½, 2:10¾ over the Des Moines, Ia., half-mile track. McMahon will race him on the Great Western Circuit and tackle the big ring in the fall.

L. V. Harkness has nominated an even one hundred trotting brood mares in the Kentucky Futurity for foals of 1908 to race in 1911. W. E. D. Stokes is not far behind with ninety-two nominations. The total number of entries for the big stake is 1,177, and though not the largest on record, the list probably embraces a larger number of noted mares than ever were entered in a futurity for trotters.

Mr. J. H. Nelson, owner of that elegantly bred stallion Expressive Mac, has recently purchased a three-year-old filly by that horse, which he has put in training at the Hanford half-mile track. The filly is said to be very fast for one that has had little or no training. She is one of Expressive Mac's first crop of foals.

Hi Hogoboom of Woodland, has an Iran Alto colt that was twelve months old Wednesday, April 15th, and that morning drove it a quarter of a mile on the trot in 29 seconds. Hi is ready to match this youngster against any colt or filly of the same age for a race in July. The Iran Altos are showing sensational speed and all are trotters.

Charles M. Floyd, Governor of New Hampshire, paid \$2,200 for a pair of trotters at the recent auction sale in Indianapolis. They were Mystic Gift, by Mystic Tie 2:17¼, and Mistlewood by Highwood 2:12¾, the sire of Nathan Straus' Speedway champion, 'da Highwood 2:09¼. Governor Floyd purchased at the same sale the bay gelding Raisuli, paying \$1,300 for him. He bought the horses to drive on the road.

Joseph Stadtfeld, who is training a few horses at Vacaville, Solano County, has recently laid out a nice half-mile track close to town, and will have it ready to make speed on very soon. Among others that Stadtfeld is training is the pacer Solano Boy, owned by Mr. C. J. Uhl of that town. Solano Boy is entered in the \$2,000 purse for 2:20 class pacers at the California State Fair this year.

Mr. S. C. Kimball of Hanford, owner of that good pacing mare Miss Idaho 2:09¼ by Nutwood Wilkes, while at Pleasanton last week purchased through Patsy Davey, the chestnut pacer Friday 2:11¼, owned by Mr. Frank H. Burke of San Francisco. Mr. Kimball will use Friday as a road horse, and may start him in some of the matinee races this summer. Friday can pace miles right around his record most any old time.

The famous four-cornered track at Terre Haute, Ind., will surely be a prominent place on the racing map this year, judging from the program that Secretary C. J. Fleming makes public. The early-closing purses for the Great Western Circuit meeting at Terre Haute, July 14-17, are as follows: 2:20 trotters, \$5,000; 2:15 pacers, \$3,000; 2:16 trotters, \$2,000; 2:25 pacers, \$2,000; three-year-old trotters, \$500; three-year-old pacers, \$500. In addition to these events the program will contain ten purses of \$1,000 each for the following classes: 2:09, 2:13, 2:18, 2:24 and 2:30 trotters; 2:06, 2:10, 2:13, 2:17 and 2:21 pacers.

The Italian trotting season for 1908 opened at Verona, March 27th, the feature of the day being the Premio Veronnetta, in which the four ex-American trotters, Grattan Bells 2:10¼, Onward Silver 2:05¼, Oak Blossom 2:12¼ and Kirkwood, Jr., 2:10 started. Kirkwood, Jr., took the first heat from Grattan Bells in a close finish in 2:14. Onward Silver third and Oak Blossom fourth. In the second heat Grattan Bells won in 2:18 2-5, Kirkwood, Jr., second, but disqualified and then withdrawn. Grattan Bells then took the third heat and the race in 2:15 1-5, Onward Silver being very close up.

Francis I. Hodgkins was given judgment last week by Judge W. B. Nutter of Stockton, against Dunham, Coleman & Fletcher, the well known stock raisers and importers of high bred stallions, for \$4,125. Hodgkins alleged that he purchased Joubert, a full bred Percheron stallion, alleged to have been imported from France, from the defendants, for breeding purposes. The animal, so the plaintiff claimed, was misrepresented to him, being impotent and as a consequence he lost the increase that should have resulted had Joubert been a first-class stallion. Hodgkins established the fact during the trial, which was had several weeks ago, that he maintained stables at Oakwood stock farm and was the owner of a large number of valuable and high bred mares. He sued for damages for the loss of the natural increase in stock.

When a fellow is lucky enough to own a real champion he don't have to worry any over classes in which to race him. M. W. Savage says that since he purchased Dan Patch, in the fall of 1902, he has earned in exhibitions over \$100,000, which is an average of over \$20,000 per year for five years. He paid \$60,000 for Dan Patch, when the great pacer's record was 1:59¾, a quarter of a second slower than Star Pointer's. It is now 1:55¾, four seconds faster.

The first foal we have heard of in this State by that well bred trotter King Entertainer 2:10¼, that made a brief season at Pleasanton during the spring of 1907, is owned by Mr. W. H. Graham of Fresno. His mare Tenahika by Athadon foaled a nice filly by King Entertainer on the 17th of April. Mr. Graham owns a full sister to Directly 2:03¼ that is being bred to Star Pointer 1:59¼ this year. The produce should be worth making a bet on to win the pacing futurities it will be entered in.

The only races of those advertised by the Fresno County Agricultural Association that filled were the two-year-old trot, two-year-old pace and three-year-old pace. All the others were declared off on account of not receiving sufficient entries. Secretary Powell is now on a trip to Bakersfield, Tulare and Hanford, and hopes to arrange with the associations at those places to join with Fresno in giving a Central California Circuit of fairs, and announcing a program of races to close later. If good judgment is used in arranging purses for classes of horses that will remain in California after the State Fair at Sacramento, the purses should fill with good lists of entries. There was some good racing on this circuit last year and there is no reason why it cannot be made one of the most popular circuits on the coast.

The mare Peaches by Searchlight that Mr. J. D. Kalar of Salinas sent to Pleasanton a few weeks ago on a conditional sale to W. T. McBride of Aberdeen, Washington, has made good and the sale has been closed. Peaches, who is in Henry Helman's care, paced a mile in 2:20 one day last week, the last half being in 1:08½, and Mr. McBride said the rate of speed was fast enough for the work she has had, and closed the deal. Peaches will be trained some this year, but Mr. McBride will not race her until she is fully matured and the probability is that he will then have a race mare with great speed and the ability to carry it through a split heat race. Henry Helman will have change of her education in the meantime.

The record of the fast pacer Sherlock Holmes by Zolock is to be officially determined by the Board of Appeals of the American Trotting Association at its meeting in Chicago, May 5th. The protest against the record of 2:06¼ standing is made by Volney Taft and Sidney Noble, timers, and A. F. Campbell, Judge at the meeting at North Yakima last fall. The claim is made that the slowest time caught by any of the timers in the first heat of the 2:12 pace, won by Sherlock Holmes, was 2:06 and that was the time announced by the judges and hung out by the timers. The claim is made that some one afterwards added the fraction on the books, thus keeping the horse in the 2:07 class. The North Yakima papers the morning after the race, claimed the mile of 2:06 made by Sherlock Holmes lowered the North Pacific record and still claim that the record should be 2:06 instead of 2:06¼. The decision of the Board of Appeals will be anxiously awaited by all owners who have entries in the 2:07 class pace at Detroit, as should the protest be sustained Sherlock Holmes will not be permitted to start in that race, nor any others of that or slower classes this year.

William Higginbottom, the popular auctioneer who cries all the horse sales for Chase & Co., Stewart & Co., and other sales firms, purchased the pacing stallion Daedalion 2:08½ by Diablo 2:09¼, which A. Ottinger consigned to the Pleasanton sale. Charles DeRyder was a bidder on the horse up to \$450, thinking he could take him east, show him at Cleveland and put him through the Blue Ribbon sale where there are many buyers for good matinee horses, and Daedalion should be a top notcher at this game, as he can pace miles in 2:10 or better any time he is in shape. After Mr. DeRyder stopped bidding Lou Crellin got in and ran the price to \$505 where he stopped, and Mr. Higginbottom's next bid of \$510 got the horse. Daedalion is hog fat now, but never looked better in his life. For the past few months the stallion has been at the Pleasanton Stock Farm, where he has had the run of a big paddock and plenty of green feed, as well as being looked after daily by the proprietor Mr. S. O. Fessler, who makes a specialty of caring for stallions at this farm. Daedalion's condition when led before the auction block was certainly a fine advertisement for the farm.

GRAND CIRCUIT DATES.

Detroit—July 27 to 31.
Kalamazoo—August 3 to 7.
Buffalo—August 10 to 14.
Poughkeepsie—August 17 to 21.
Readville—August 24 to 28.
Providence—August 31 to September 4.
Hartford—September 7 to 11.
Syracuse—September 14 to 18.
Columbus—September 21 to October 3.
Lexington—October 6 to 17.

Dr. Perkins, the Petaluma veterinarian, recently purchased from W. H. Helman of Santa Rosa, the three-year-old trotting stallion Oresto W. by Wayland W. 2:12¼, sire of Bolivar 2:00¼.

Among those who purchased new speed carts from the Kenney Manufacturing Company, 531 Valencia street, last week, was Mr. T. D. Sexton of Oakland, who got one of the latest 1908 models.

Phoenix is the name which has been selected by Mr. Lee Maybury for his little black pacer by Titus that Will Durfee will race through the Grand Circuit this year and which has heretofore been known by his stable name The Pig.

Rosie Woodburn 2:16 by Easter W., sold at Pleasanton sale, April 17th, for \$185, foaled two days later a fine filly by Sir John, son of McKinney. She was purchased by Mr. C. L. Crellin, who is making a fine collection of filly foals this spring, having three thus far from three foalings.

There will be a good program of racing on May 2nd and 3rd at Los Banos track in Merced County. Several good purses will be offered for both trotters and runners. Mr. Henry Miller, of the great cattle firm of Miller & Lux will give a barbecue and there will be a general good time.

Byron Lace 2:14¼, the handsome and well mannered pacer is now driven on the roads and through the park by Mr. G. C. Nutting of this city, who was the highest bidder on him at the Pleasanton sale. \$675 was the price paid for the son of Prince Lovelace and he is worth more money.

Jack Fronefield, who has been down to Aptos Farm to look over the three-year-olds which are to be sold at Chase's big pavilion in this city on the evening of May 4th, says they are about the nicest bunch of youngsters he has seen in California—all in good flesh, smooth and sound, and while never tracked are broke to harness.

Belle, the six-year-old mare by Bonnie Direct out of Petrina by Piedmont, that went through the Pleasanton sale last week was purchased by Mr. F. P. Norton, of Coos Bay, Oregon. This mare worked a mile at the trot in 2:26¼ as a two-year-old, and one in 2:22¼ as a three-year-old. She is a particularly nice road mare and should make a fine brood mare.

Mr. E. A. Swaby of Dixon, Cal., has one of the best looking daughters of Zombro in the State in Ramona S., a mare that has trotted a mile in 2:17¼ very handily this spring. Ramona S. is out of a mare by Anteeo and is as nicely turned as any of the Zombros, which is pretty high praise. Mr. Swaby has been importuned by his friends to race Ramona S. this year, but says he would rather sell to some one, as he is not in the business.

S. H. Crane, the well known farmer and live stock dealer of Turlock, who has made Berkeley his residence for the past two years, bid \$350 for the Lynwood W. gelding R. W. P. 2:13¼ at the Pleasanton sale and got him. It is said Mr. Crane bought the horse on an order from a gentleman who wanted a roadster that could keep in front on a dusty road. R. W. P. should fill the bill as he can snatch a road buggy at a 2:10 clip almost any time.

Mr. M. Fitzpatrick of Vancouver, British Columbia, bid the high dollar for the sorrel pacing gelding Dr. Miller, that E. D. Dudley of Dixon, consigned to the Pleasanton sale. This bid was \$340, and Mr. Fitzpatrick got a bargain. Dr. Miller is a big fellow and can pull a surrey full of people at a 2:30 shot on the road, and when hooked to a sulky is able to show a 2:20 gait. As he is absolutely fearless of all sights, and can be driven by anyone, he is worth more than was paid for him.

W. J. Kenney received two of the new No. 90 model McMurray speed carts this week, and before an hour passed after they were uncrated, both were sold. James Finch took the red one, and John Dreschler the black one. Kenney induced both gentlemen to leave the carts at his place of business, 531 Valencia street for a couple of days, that some of the other road drivers could look them over. They are beyond any question the very best thing in the speed cart line yet seen on this coast. Kinney has eighteen of them ordered and hopes to get them within a month.

One of the very few Onward mares in California, is now owned by Thomas Coulter of Sacramento, who purchased Lou Onward at the Pleasanton sale last week. This mare is large and sound, and has a great flight of speed, having been a mile in 2:12 at that gait. She is only nine years old and was bred to Star Pointer last month and is believed to be with foal. Mr. Coulter, therefore, has a fine prospect to own a stake winner. Mr. Coulter was also the purchaser of The Judge, a six-year-old gelding by Bonnie Direct out of a mare by Whips, second dam by Whipple's Hambletonian. This fellow is a nice high headed pacer that as a three-year-old worked a mile in 2:15¼, but has not been regularly worked since. He should win matinee races at Sacramento, and has speed enough to win on the California circuit.

The black roan mare by Bonnie Direct 2:05¼ out of Nettie O. by Lakeland Pilot, that stepped through the stretch so fast on Friday last at Pleasanton, and was then bid in at \$900 by Mr. H. J. Knowles of this city, will probably go to the Blue Ribbon sale at Cleveland. If Mr. DeRyder takes her over and lets her step a half on show day, there should be lively competition for her by those who want a green trotter that looks and acts like a 2:10 class race winner. No one knows just how fast she is as she has never been put to the test. A mile in 2:16¼ with the last half in 1:04 was play for her last summer, and as she came the last quarter of this mile in 30¼ without being driven hard, she looks like something extra good.

Mr. W. T. McBride of Aberdeen, Washington, who has recently been a buyer of several good prospects in the trotting and pacing line, made the high bid (\$400) on the bay gelding Guy Light that was sold at Pleasanton last Friday. Guy Light is by Searchlight out of La Moscovita by Guy Wilkes and that mare is destined to be one of the great brood mares of California. She has one of her produce on the list, Yolanda 2:14¼, and a full sister to Yolanda has beaten 2:25 in her work. Guy Light, like those two mares, is a trotter and he looks like a fine prospect as he has worked a mile in 2:28 with little work and is handsome and sound. Mr. Detels of Pleasanton owns a beautiful yearling by Bon Voyage out of La Moscovite that will be given a chance, and Mr. C. L. Crellin of Ruby Hill vineyard, who now owns La Moscovita, is the proud owner of a filly from her, foaled on the 6th of the present month that was sired by his great colt The Limit, son of Searchlight and the great brood mare Bertha.

The brown stallion Volant by Neernut 2:12¼, dam Malvina by McKinney 2:11¼, second dam Alein 2:26½, dam of Sister 2:20, Mowitza 2:20½, and grandam of Sally Pointer 2:06¼, by Anteeo 2:16¼, third dam Lou Milton, the dam of Lou Dillon 1:58½ and three others, will be sent to Salem, Oregon, by his new owner Mr. W. T. McBride of Aberdeen, Washington, who got him at the bargain price of \$400 at the Pleasanton sale. Volant was bred by Mr. P. W. Hodges, and was bred for a stock horse. He is a solid seal brown, stands 16 hands, and will fill out into a grand looking stallion. Had he not been rather low in flesh at the time of the sale he would have brought three times the price paid for him, as he certainly is the making of a grand looking stallion. He showed fine trotting action the day of the sale, and no one need be surprised if Mr. McBride has a great find in this four-year-old stallion. There are no horses standing for public service on this coast whose pedigrees tabulate any better than Volant.

ANSWERS TO CORRESPONDENTS.

F. A. R., Riverside—Ketchum 2:16¼ is by Gossiper 2:14¼, dam Zulu by Echo. He was bred by W. K. Robinson of Santa Ana, Cal. He is not registered.

D. F. Herspring, D. V. S., Woodland—Richmond Chief 2:11¼ was by Monroe Chief, dam by A. W. Richmond. We have not space to give all his races. He made his record at Woodland, September 2, 1902, in the 2:14 trot which he won after five heats had been trotted. He took the first heat in 2:11¼ and the fourth and fifth in 2:14 and 2:13. Alta Vela won the second and third heats in 2:12¼ and 2:13. Four days later he again defeated Vic Schiller and Alta Vela. Edna R. 2:11¼ is by Sidney, dam Stella C. 2:26 by Director, grandam by Speculation. She made her record at San Jose October 12, 1900, where she defeated Wild Nutling 2:11¼, Dictatress 2:08¾, John A. 2:12¾ and Queen R. 2:12¼. Edna R. won the last three heats in 2:11¼, 2:13 and 2:13¼. Dictatress took the first heat in 2:13¼, and Wild Nutling the second in 2:11¼.

J. W. P., Oakland—Electioneer still leads all stallions as a sire of standard trotters. He has, according to the Year Book, 158 trotters in the list, while Onward, his nearest competitor, has 154.

Enquirer, Pleasanton—The race in which Stam B. beat Toggles at San Francisco was the 2:15 class trot held June 27, 1896. Toggles took the first two heats in 2:20¼ and 2:20¼, and Stam B. the next three in 2:18¾, 2:19 and 2:21½. Stam B. was a four-year-old at the time. The meeting was held at the Ingleside track, and was given by the Pacific Coast Trotting Horse Breeders' Association.

A. J. H., Fresno—Waterford is standard and registered. His register number is 10165. He was foaled in 1882, and was by Abbottsford 707, dam Lady Softly by Speculation 928, grandam Softly, said to be by Woodpecker. Waterford's record is 2:27 made at Fresno in 1888.

Zomalta, trial 2:12¼ trotting, last half in 1:03¼. The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feed. Call on or address S. O. Fesler, Pleasanton, Cal.

MATINEE SEASON OPENS AT DAVIS.

Breeder and Sportsman:—The new Driving Club at Davis held its first matinee on Easter Sunday which was a lovely day and just dry enough to allow the ladies to come out in their new Easter bonnets. While the attendance was good there wasn't quite as many as there will be when the boys get the accommodations better arranged.

The track is a three-quarter oval, and is not in the best of shape, being a little soft as yet, so there was no fast time made, but the finishes were close and exciting.

Mr. Smith, Mr. Depew and Mr. Stone acted as judges and timers. Mr. Smith officiated as starter and was very satisfactory in this trying position.

The first race was between Elmo Montgomery's Seymour M. by Diawood, and Ora Wright's Rosie Wilkes by Fairrose. The latter is a very handsome mare, and with a little work will be fast. The race was won in straight heats by Seymour M.

The second race was a trotting event between Pumpkin Rodger's, State Farm, George Cecil's Lady Cecil and Skeechie Grieves' Lent A. Punk's horse was a little unsteady although ably driven by him. I think he will make a better showing after his education has been cultivated a little more on the State Farm. Skeechie made a desperate drive to win with his young mare Lena A. but Mr. Cecil's Lady Cecil was a little better mannered and driven by the masterly hand of Ora Wright won the race in straight heats.

The last race was between a pair of baby pacers belonging to Mr. Ora Wright and Deputy Sheriff Frank Murphy. Mr. Wright drove his own colt which is by John A. Mr. Carey Montgomery was up behind Mr. Murphy's colt (which he recently purchased at the H. Brace sale) sired by Mission, dam Belle W., dam of Bolivar 2:00¼. These babies have only been broken a short time and the way that they can tramp makes one wish that he owned one like them. If nothing happens to Belle W's colt, you will all have a chance to read something nice about him someday.

Summaries.

The 2:20 Pace—Three-quarter mile heats—
Seymour M. b. g. by Diawood (E. Montgomery).....1 1
Rosie Wilkes, b. m. by Fairrose (Ora Wright).....2 1
Time—2:02½, 2:02.

The 3:00 Trot—Three-quarter mile heats—
Lady Cecil, b. m. by son of Don Marvin (Ora Wright)1 1
Lena A. b. m. (Grieves)2 2
State Farm b. g. (Rodgers)3 3
Time—2:22½, 2:30.

Colt Race—Three-quarter mile heats—
Little King (2 years) b. c. by Mission (Carey Montgomery)1 1
Davis Boy (3 years) b. g. by John A. (Ora Wright)2 2
Time—2:47, 2:33½.

VISITOR.

MAMBRINO PATCHEN'S LAST.

Corona, Cal., April 9, 1908.

Breeder and Sportsman: I read with much interest the article in your journal of March 28th, "Scarcity of Mambrino Patchen Blood," in which was shown the marvelous success achieved by numerous stallions when bred to mares carrying the blood of Mambrino Patchen. It may be interesting to some of your readers to know that the last foal the old horse got before he died is now in California. It is my old mare "Last Chance," foaled on Dr. Herr's breeding farm in Kentucky, September 5, 1885. The old mare is hale and hearty, and nearly every one takes her to be eight or ten years old. Very few who know her care to run up against her when I am driving her on the road. I bred her to three different horses and got speed every time. Her colts are as follows:

- 1st. Nola by Alto Rex, trial, 3 months work, 2:23.
- 2nd. Belle Patchen by Alto Rex, trial 2:12, record 2:16.
- 3rd. Zoe Patchen by Zombro, now east, trial, 2:16.
- 4th. McPatchen by McKinney, trial, 3 months work, half-mile track, 2:28.
- 5th. Leg hurt in pasture, not driven for speed.

This, I think is a good showing for the old horse's last foal, and I expect Zoe Patchen and McPatchen to take records this season that will make the old mare's record as a brood mare look a great deal better than the figures given above.

S. W. LOCKETT.

Nora D. 2:22¼ by Del Sur, owned by Mr. J. N. Anderson of Salinas, Cal., foaled a large black colt April 16th by Bon Voyage 2:12¾, that we hope will be as fast a trotter as his half sister Della Derby 2:17, winner of the Breeders' Futurity and Occidental Stake of 1906. Mr. Anderson writes us that Mr. Train's Ray O'Light 2:13½, winner of last year's two-year-old pacing division of the Breeders' Futurity, is in great shape and stepped a full mile April 18th for Charles Whitehead at the Salinas track in 2:15¼, last half in 1:04, last quarter in 30¼ seconds. The boys at the track say it was only play for the son of Searchlight, and it looks as if he will be as good a three-year-old as Aerolite. Mr. Anderson adds that he hopes he will, as Salinas must keep in front in the futurities. Several of the two and three-year-old trotters in training at Salinas are looking and acting like they "will do" this year.

THE PLEASANTON SALE.

Several hundred people from all parts of the coast were at Pleasanton last week to take in the big sale of horses advertised by the Pleasanton Chamber of Commerce and managed by Fred H. Chase & Co. of San Francisco. On Wednesday, the horses were shown on the track, those having speed being sent miles, halves or quarters according to their condition.

Thursday was devoted to selling draft and farm horses. They sold well. Three-year-olds weighing from 1250 to 1500 pounds brought from \$165 to \$200. Broke draft horses sold readily at \$200 to \$250. A few of these came to the city but the majority went to the country for farm work, some going as far as Nevada.

On Friday the trotting bred horses were begun on, and during the afternoon about thirty-five head were sold at fair prices, the sale being then continued until Saturday afternoon. While the prices were not large, many of the horses were well sold, although some were knocked down for less than their actual value. Had it not been that the long continued drought has made pasturage very scarce, and feed high, the demand would have been better.

Mr. Chase, with the able assistance of Jack Fronefield handled the sale well, and the auctioneers William McDonald of Livermore and Wm. Higginbottom of San Francisco, worked hard and earned their money. The trotters were sold by Mr. Higginbottom, who is one of the best auctioneers that has ever sold harness horses on the coast. He is a very hard worker, prompt at accepting bids, and alert at finding out the location of buyers, and being a practical horseman, his remarks are always to the point, brief though they be.

The list of horses sold is as follows:

Brown gelding, 1901, pacer by Educator, dam by Pancoast, \$170.

Auger Baron, blk. g. 1899, trotter by Baron Wilkes, dam by Wilton, \$185.

Billy B., b. g. 1901, pacer by Alex Button, dam untraced, \$200.

Brown gelding 1904, pacer by Searchlight, dam by Director, \$360.

Billy Taft, b. g. 1905, trotter by Stam B., dam La Muscovita by Guy Wilkes, \$300.

Guy Light, b. g. 1904, trotter by Searchlight, dam La Muscovita by Guy Wilkes, \$400.

Lou Onward, ch. m. 1899, trotter by Onward, dam Cognac by Hambrino, \$250.

Rosetta F., b. m. 1902, trotter by Antrim, dam by Meredith, \$95.

Jolly Boy, b. g. 1902, trotter by Arronax, dam by Alexis, \$135.

Bay gelding, 1906, trotter by Stam B., dam Mountain Maiden by Cresco, \$150.

Sam Fullen, b. s. 1897, thor. stallion by imported Cavalier, Lena Oliver, \$150.

Buzz Saw 43455, blk. s. 1904, trotter by Strathway, dam by Gen. Logan, \$160.

Belle, foaled 1902, trotter by Bonnie Direct, dam by Piedmont, \$380.

The Judge, b. g. 1902, pacer by Bonnie Direct, dam by Whips, \$600.

Black gelding, 1902, trotter by Bonnie Direct, dam Alta Nola by Altamont, \$300.

Bonnie Echo, b. g. 1904, trotter by Bonnie Direct, dam Ituna by Steinway, \$200.

Black roan mare, 1903, trotter by Bonnie Direct, dam by Lakeland Pilot, \$900.

Byron Lace 2:14½, blk. s., pacer by Prince Love-lace, dam by Altao, \$675.

Zaleone, gr. m., trotter by Freckles, dam by Redondo, \$105.

Flora Freckles, gr. m., trotter by Freckles, dam by Mambrino Patchen, \$50.

Gray colt, gr. c. 1906, trotter by Owynex, dam by Freckles, \$50.

Jasmine, br. s. 1905, by Owynex, dam by McKinney, \$50.

Bay gelding, 1905, trotter by Owynex, dam by McKinney, \$80.

Gray filly, 1905, trotter by Owynex, dam by Freckles, \$190.

Queenly, b. f. 1905, pacer by Owynex, dam Queen R. 2:12½, \$155.

Bay stallion, 1905, trotter by Owynex, dam Atheline by Patron, \$200.

Volant, br. s. 1904, trotter by Neernut, dam Malvina by McKinney, \$400.

W. B., ch. g. 1904, troter by Iran Alto, dam by Jim Mulvanna, \$180.

Dr. Miller, ch. g. 1904, pacer by Diablo, dam Babe by Dawnlight, \$340.

Maxian, b. m. 1903, trotter by Welcome, dam thoroughbred, \$155.

Lillian, b. m. 1902, trotter by William Harold, dam by Director, \$150.

Rosie Woodburn 2:16, b. m. 1894, trotter by Easter W., dam by Goldnut, \$185.

Bay filly, 1906, trotter by Sir John, dam Rosie Woodburn, \$100.

Bay gelding, 1905, pacer by Cassian, dam by Guy Wilkes, \$75.

Phil Derby, br. g. 1903, trotter by Charles Derby, dam by Red Wilkes, \$190.

Buck Derby, b. g. 1904, pacer by Charles Derby, dam by Buccaneer, \$135.

Bill Derby 1904, trotter by Charles Derby, dam by Red Wilkes, \$170.

Allen Pollock 2:23½, b. g. 1903, trotter by Nutwood Wilkes, dam by Direct Line, \$190.

Martinez Boy 2:24½, b. g. 1900, pacer by Sldmore, dam by Cresco, \$300.

Black gelding, 1902, pacer by McKinney, dam Katrinka by Abbottsford, \$215.

Peter Pan, b. g. 1899, trotter by L. W. Russell, dam Biscari by Director, \$175.

Lady Montesol, b. m. 1903, trotter by Montesol, dam by Winward, \$135.

R. W. P. 2:13½, b. g. 1901, by Lynwood W., dam by Rosewood, \$305.

Daedalion 2:08½, b. s. 1895, pacer by Diablo, dam Grace by Buccaneer, \$510.

Yearling colt by Star Pointer, dam by Abbottsford Jr., \$480.

Pair cob ponies, \$240.

Grade Hackney stallion by Velocity III, \$155.

Grade Hackney stallion by Velocity III, \$210.

A DENVER SALE.

Judge Colburn of Denver, Colorado, disposed of all his trotting bred stock at auction a couple of weeks ago. The principal sales made were:

Silver Magnet, trotter, by Silver Sign; J. M. Dunlevy, Denver, \$159.90. Royal C., pacer, by Judge C., E. L. Montgomery, Longmont, \$275. Belljora, pacer, by Bellorado, B. F. Hall, Grand Junction, \$330. Bellorado Jr., trotter, by Bellorado, William Lennox, Colorado Springs, \$255. Johnnie Dillon, trotter, by Col. Mason, William Lennox, Colorado Springs, \$310. Kate Sibley, pacer, by Congressman Sibley, out of Kate Medium; R. N. Harvey, Denver, \$320. Judge C., Jr., trotter, by Judge C., J. H. Harbeck, Boulder, \$310. Rex Colorado, trotter, by Judge C., out of Baby Wilkes, E. J. Carter, Telluride, \$500. Thought, pacer, 2:21¼, Charles Irwin, Cheyenne, \$525. Lady in Gray, trotter, by Judge Toler, J. M. Dunlevy, Denver, \$130. Baby Wilkes, trotter, by Caneland Wilkes, William Lennox, Colorado Springs, \$300. Calamity Jane, pacer, by Firmont, Tom Lynch, Louisville, \$70. Magdaline, trotter, by Magnet, W. A. Garner, Denver, \$172.50. Janie T., pacer, by Judge Toler, G. W. Coffin, Denver, \$165. Ladv Jane, pacer, by Judge Toler, J. C. McDonald, \$195. Little Pinney, trotter, by Firmont, D. J. McKay, Denver, \$92.50. I-Rex Colorado, trotter, by Judge C., J. M. Herbert, Denver, \$152.50. Lady Esmond, by Silver Sign, William Lennox, Colorado Springs, \$300. Bay filly, by Silver Sign, out of Calamity Jane, Charles Irwin, Cheyenne, \$275. Sorrel filly, by Silver Sign, out of Lady Jane, George Goulding, Denver, \$295. Bay filly, by Silver Sign out of Lady Jane, William Lennox, Colorado Springs, \$300. Bay filly, by Silver Sign, out of Baby Wilkes, William Lennox, Colorado Springs, \$260. Bay colt, by Silver Sign, out of Magdaline, Charles Irwin, Cheyenne, \$235. Bay filly, 2, by Bellorado, out of Little Pinney, F. W. Swanson, \$100. Sorrel filly, yearling, by Judge C., out of Magdaline, J. H. Hunter, Denver, \$75. Black filly, yearling, by Bellorado, out of Lady Jane, Duffy Storage Company, Denver, \$115. Bay colt, yearling, by Congressman Sibley, out of Calamity Jane, J. L. Gray, Fort Collins, \$95.

CAPT. THOMAS'S FILLY BY SEARCHLIGHT.

There is now in Charles DeRyder's string at Pleasanton a black four-year-old filly by Searchlight 2:03¼ out of Roseda by McKinney 2:11¼. For some unaccountable reason there has been a story going the rounds at Pleasanton that this filly is not by Searchlight but by Lecco 2:03¼, and to settle at once and forever the truth of the matter, Mr. C. C. Crippen, who had charge of Searchlight and Lecco in 1903 and 1904, has signed the following certificate, and asks that it be printed, a request which we cheerfully comply with. About the meanest thing a person can do is to spread a false report about the breeding of a horse, as it helps no one and harms many, and we are very pleased to see that this one has been nipped in the bud. Mr. Crippen's certificate is as follows:

Santa Clara, Cal., April 18, 1908.

This is to certify that the four-year-old black filly, owned by Captain W. Ford Thomas of San Francisco, and out of the mare Roseda by McKinney 2:11¼ was sired by Searchlight 2:03¼ and not by Lecco 2:03¼, as is being maliciously reported by certain parties.

Roseda was bred in 1903 to Searchlight and produced in 1904 a black filly. When said filly was nine days old the dam was again bred to Searchlight, but did not prove in foal. Roseda was never bred to Lecco.

While I have not the service books of Searchlight for the years 1903 and 1904, I cannot give the dates of the services, but as I had the management of both Searchlight and Lecco during those two seasons, and bred the mare myself on both occasions, I positively know that the above mentioned filly was sired by Searchlight and not by Lecco.

(Signed) C. C. CRIPPEN.

The returns made to the agents of the French Government for the first day of racing this season at Longchamps, in the Sunday opening, showed that the total amount of money that passed through the mutual pool for the day was \$460,000, of which 7 per cent was deducted to be divided among the race fund, the Government Breeding Bureau, and charities. The amount of money handled in the pools, large as it was, showed a decrease of about \$50,000 from the sum which went through the pools on the opening day of the year before.

Drink Jackson's Napa Soda.

SANTA ROSA NEWS.

The most important piece of news from here is the election of Mr. James H. Gray as Mayor this month. Mr. Gray is not only a good citizen, having the confidence of the entire community, but is also a good horseman and has owned several fast trotters, among them the Lynwood W. gelding R. W. P. 2:13¼ and the good winner of last year Carlokkin 2:13¼, the property of Mr. C. L. Jones of Fresno, who purchased him from Mr. Gray in 1903. Mayor Gray was elected by a good majority and can be depended upon to extend the "hoss"-pitality of this city whenever occasion requires.

The veteran Mart Rollins, who once had Lou Dillon's dam in his charge, and who has owned several good ones, among them the trotting sensation of 1906, Charley Belden 2:08¼, has been in better health this spring, and recently purchased a mare by Lynwood W., dam by Montana Wilkes, second dam Calamine by Dalgamo, son of Dictator, third dam Ada Troutman by Sumpter Denmark, fourth dam by Prince Albert. Mart swears she is another Sonoma Girl, if not another Lou Dillon, and as she has a sister that showed a mile in 2:20 with very little work, there is good reason for his enthusiasm over her. Here's hoping she will trot in two minutes and bring her new owner a fortune.

The first-born of Dr. J. J. Summerfield's royally bred trotting stallion Lord Dillon, came to hand the 15th inst., and is owned by Dr. Folsom of Forestville. It is a colt and is out of a fine mare by Diawood, second dam by Joe Hooker, thoroughbred, and a perfect picture of its sire. Dr. Summerfield is breeding some good mares to Lord Dillon, among them Zarina 2:13¼ and Alix B. 2:24½.

Al. McDonald has eight head at the track, and there is some good material in the string. They will undoubtedly learn to go fast in his hands. He has a black gelding by Bonnie Direct 2:05½ out of Annie Rooney 2:17, owned by Mr. Rudolph Spreckels, that not only looks, but acts like a good one.

Frank Turner is busy handling a lot of colts and has as nice a bunch of them as one can find in a long journey.

The track is good and we expect to see several more trainers here by the 1st of May.

AEROLITE'S PRICE NOT REFUSED.

An item which started in a Chicago paper and has been going the round is the following:

"When Col. W. H. McDoel of Chicago, was in California in March, he endeavored to get a price on the sensational pacing colt Aerolite (3) 2:11¼, public trial 2:05½, but without success."

That Col. McDoel was in California during March, is certain, but it is not true that he tried to get a price on Aerolite, unless he applied to some one who had no authority to speak for the colt's owner, James W. Marshall of Dixon. The editor of this journal did hear a representative of Col. McDoel's say that the Colonel made the trip to Pleasanton to look at Aerolite, and that he would have asked for a price on the colt if Aerolite had no record. Mr. Marshall has never refused to price Aerolite to anyone since the marvelous showing made by the colt as a three-year-old last year and the price he asks is not more than Aerolite is worth, as good judges believe he will pace in two minutes as a five-year-old and that he will be as high class a horse as his great sire. As Mr. Marshall says, his address is Dixon, Cal., and Dixon is on the map, and there is nothing to prevent anyone asking his price for Aerolite at any time.

TROTTERS AND PACERS RETURN HOME.

Riley Kent of Logan, Montana, who has been training a string of eight horses at Pleasanton for the past three or four months, left last Tuesday for home, and as the snow is off the ground there now, will continue his training work on his home track and be ready for the races which will begin up there in July. Among the horses in his string are the following:

Word of Honor, green trotter by Parole, owned by Peter Weber of Haley, Idaho.

Lady Thorn, pacer, by Dunraven, sire of Ryland T. 2:07½, owned by William Wilton of Idaho Falls.

Robert R., a pacer sired by the ex-California pacer Robert I. 2:08½, owned by C. E. France of Centreville, Montana.

Polly Garr, 2:18½, pacing mare by Wasatch, son of Woodnut, and out of Bessie Wilkes by Arthur Wilkes, owned by C. M. Conroy of Ogden.

Belle D., pacer by Forest Belmont, owned by George Dunbar of Logan.

Roan pacer by Forest Belmont, owned by George G. Smith of Logan.

Gen. Sherwood, brown horse by Bob Evans, dam by Combination. This horse made a three-year-old record of 2:28¾ trotting at the Blackfoot, Idaho, half-mile track in 1906. He was bred in Iowa, and named for the popular editor and proprietor of the American Sportsman at Cleveland, who is now a member of congress from Ohio.

Mr. Kent left with all his horses in good shape and they have all improved in speed during their sojourn at Pleasanton, where Mr. Kent made many friends during his short stay.

Billy Andrews will have in training this year at Poughkeepsie, the filly by John A. McKerron 2:04½ out of Nancy Hanks 2:04, owned by John E. Madden's sons.

THE DETROIT ENTRIES.

Detroit, Mich., April 15.—The following is an unofficial list of the entries in the Detroit early closing events. The entries from California and other distant points have not arrived up to this time:

2:24 Class, Trotting, Merchants' and Manufacturers' Stake \$10,000.

Charles McDermott, Washington, D. C., Florence C., br. m., by The Director General—Grace by General Wilkes.

Ben Renick, Selma, Ala., Ward, b. h. by The Baron—Brown Kate by Brown Mark.

Ed. Benyon, Lexington, Ky., Elmford, b. h. by Red Chute—Laurine by Stamboul.

L. W. Weissinger & Bros., Mt. Carmel, Pa., May Worthy, b. m. by Axworthy—Altivosa by Altivo. Greenbrier Farm, Lewisburg, W. Va., Sonoma May, br. m. by Lynwood W.—Maud Fowler by Anteeo.

THE HARTFORD STAKES.

Entries for the early closing events at Charter Oak Park for the Grand Circuit races in September were announced Monday by the management. Fifty-five horses are named for the Charter Oak Stake of \$10,000 for trotters eligible to the 2:09 trot, which will consist of three races. The winner of each will get \$1,500, with \$500 to second, \$300 to third and \$200 to fourth. There will be \$2,500 for the horse winning the greatest number of races and this horse will be declared the winner of the Charter Oak. In case of a tie between two or more horses they shall race off the tie until the winner is decided. The entries are as follows:

E. S. Burke, Jr., Cleveland, Ohio, b. g., De Witt.

James Farley, New York City, gr. g., Locust Jack.

Clark Whitbeck, Schenectady, N. Y., b. c., General Electric.

Empire Farm, Copake, N. Y., ch. m., Hilda B.

Ed. F. Geers, Memphis, Tenn., b. s., Shaughran; blk s., Empire Hal; blk. g., Dr. Bonney and b. s., Prince Arundel.

C. W. Moore, Detroit, Mich., ch. g., Auto.

L. H. Maybury, Los Angeles, Cal., blk. s., Phoenix.

Hillsboro Farm, Lake Mahopac, N. Y., ch. s., Lake-side Hal.

W. G. Durfee, Los Angeles, Cal., b. s., Copa de Oro.

C. L. Ryder, Pleasanton, Cal., ch. s., Sherlock Holmes.

Although for years Mambrino Patchen was looked upon as the greatest brood mare sire, George Wilkes, the greatest speed sire of his day, has already surpassed the son of Mambrino Chief as a brood mare sire and will eventually lead him in that respect by a wide margin. It is a curious coincidence that these two sires are credited with 109 producing daughters each. Mambrino Patchen's daughters have produced 141 trotters and 20 pacers, a total of 161 in the standard list. George Wilkes' daughters have produced 142 trotters and 56 pacers, a total of 198 in the standard list, thus leading the Mambrino Patchen mares.

HAS TRUE MERIT—CURED FISTULA.

Feeling that true merit should be recognized I want to give my experience with Gombault's Caustic Balsam. A month ago one of my horses gave every indication of having a fistula. I was told that his case was incurable, but sent for a bottle of Gombault's Caustic Balsam and applied it per directions. The case yielded to the treatment from the first, and the horse is now entirely cured.

C. T. GREATHEAD,

Tancred, Cal.

IT SAVED THE HORSE.

San Francisco Novelty Leather Company, 412 Market Street.

Troy Chemical Company, Dear Sir,—Have used your medicine known as "Save-the-Horse" on two Splints, on inside of front legs, interfering with the cords of the leg and causing lameness so badly that a very short drive would make the horse act the "part of a cripple." After using two bottles the splints were "dead," lameness gone and the splints are now disappearing entirely.

Yours truly,

WILLIAM LARSEN.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

FRESNO SHOW.

Awards.

Bloodhounds. Open dogs—Withheld J. P. Gregory's Bright. Open bitches—Withheld J. P. Gregory's Roxie.

St. Bernards. (Rough coated.) Novice dogs—1 T. Lynch's McKinley. Limit dogs—1 R. Dailey's Colonel. Open dogs—1 McKinley. Winners dogs—1 Colonel. Special—Trophy for best, Colonel.

Cup for best owned in Fresno or adjoining counties—Bloomsbury Beauty (Bull Terrier).

Cup for best started in a field trial, Rex Rodfield (English Setter).

Cup for best Toy, any breed, Baby (Chihuahua).

ARANSAS PASS TARPON CLUB.

On June 26, 1907, there was organized at Tarpon, Texas, an anglers' association, known as the Aransas Pass Tarpon Club. The object of the organization is for the purpose of encouraging the use of light tackle in taking tarpon and for the general advancement of scientific angling and protection of not only the tarpon, but all other fresh and salt water fish.

Since the organization the club has enjoyed a very healthy and substantial growth, already boasting amongst its members many of the most prominent salt water anglers in the country. It is the aim to only include in the members such men as are gentlemen and true sportsmen; men who enjoy the art of angling more than the record of large scores.

Mr. J. E. Pflueger, the corresponding secretary, has forwarded copies of the following circular to many anglers and has, so far, received a most enthusiastic support:

"We believe that either yourself or your friends are interested in such a movement, and that we can expect your support and encouragement in this direction, hence we have enclosed herewith several of our rule cards for the season of 1908, together with circulars showing the prizes awarded and to whom for the past season 1907. The prizes for the season 1908, will be even more tempting and numerous than those for the past season, and any angler can have a just pride who is fortunate enough in securing one of them.

We will appreciate anything which you can do which will spread the fame of our club amongst your friends and will induce them to come to Tarpon, Texas, and have a try. The accommodations are most excellent and very reasonable. I am personally in a position to know this, as I spent over three weeks at Tarpon Inn under the management of our secretary, Mr. J. E. Cotter, last season, and never in all of my experience did I receive better treatment. The guides and fishing equipment is good and in fishing, there is "something doing" all the time.

I shall be very glad at any time to advance any information which might assist in making plans for a trip to Tarpon, and with many best wishes.

The prizes to be awarded are gold and silver buttons. Gold buttons for the angler who lands under club rules a tarpon, the length of which shall not be less than 5 feet 6 inches. Silver button for a tarpon not less than 4 feet 6 inches in length.

The club rules are as follows:

The line used must be a standard nine-thread linen line.

Rod to be of wood, consisting of a butt and tip, and to be not shorter than 6 feet over all. Butt to be not over 18 inches in length. Tip not less than 5 feet in length, and to weigh not more than 6 ounces.

There must not be more than 12 inches of line doubled back at the tie, and length of leader shall not exceed 5 feet.

Anglers competing for membership or prizes must submit their tackle for inspection to one of the measuring committee when catch is measured.

Every angler must bring his fish to gaff unaided, and the fish must be reeled in. A broken rod either before or after gaffing disqualifies the angler.

Fish must be measured at the wharf by a member of the measuring committee, and recorded.

Membership is open to amateurs only.

Only one button issued to each member. A gold button will be exchanged for the silver one when won.

By tip is meant that portion of rod, from the outer end of rod to point where same is assembled at butt, with tip fully seated.

Initiation fee \$5.00. No dues. J. E. Pflueger, Corresponding Secretary, Akron, Ohio; J. E. Cotter, Secretary, Tarpon, Texas.

George Neale, the county game warden, who is always looking out for good things for those who love to shoot and angle, is in good spirits just now. Some months ago Neale made arrangements, through the State Fish Commission, for the importation to that section of a lot of Hungarian pheasants, which sportsmen who have hunted in Hungary state is one of the gamiest birds that flies.

The birds allotted to Neale have arrived from Bohemia. There are three dozen in the lot. Neale intends to keep the old birds in captivity for a year or more, only turning loose the young birds, as they gain size and strength enough to take care of themselves.

Neale says the birds arrived in fine shape. They are beautiful specimens, somewhat larger than the mountain quail of California.

THE NEW ZEALAND KEAS.

Having for four years tried to get some photographs of keas, and also some live birds and eggs, I readily accepted an invitation from Mr. K. Murchison to visit Glenthorn, the last station back up the Wilberforce, where from past experience, I knew that I should receive every kindness and assistance. There are, moreover, at Glenthorn several keas, more or less tame, kept as call birds, and these would be invaluable. From behind the homestead, a steep broken range runs away up in Wilberforce, broken every mile or so by deep gullies, partly bush clad, and partly bare rock and shingle. In one of these ravines, appropriately named the Jagged Spur Gully, I had years ago seen several keas, and it was there that I decided to go on my latest trip.

Saturday morning, January 11th, therefore, found me in the train for Glentunnel, whence I was driven to Mr. Phillips's station, The Point. There I met a friend, H., of Wanganui, and, in company with him left The Point on Tuesday for Lake Coleridge, Mr. Phillips kindly lending us a buggy and a nice tame horse for the journey up the Glenthorn and back.

At Lake Coleridge we were hospitably received by Mrs. Murchison, and, staying there over Wednesday, we left on Thursday afternoon for Glenthorn, eighteen miles further on. Reaching the Harper river we found the crossing extremely rough, all the ford having been washed away, so we decided to leave the buggy on this side and pack our swag the remaining three miles. Arriving at Glenthorn we learned that Mr. K. Murchison was away mustering. On Friday we were very busy making traps and cages to carry our call birds. About midday the musters came in, our host among them, and we learned that they were going up the Wilberforce on Sunday to camp at a gully about two miles past the Jagged Spur, so we made arrangements to have our swag dropped en route. On Saturday afternoon H. and I started off up a spur behind the homestead with a call bird and three traps, which we set in a shingle slip. Our traps were cages of wire netting shaped like a pudding-bowl, and we simply propped them up with a "figure four," which we baited with a piece of meat. The call bird we placed near the traps, so as to attract the wild keas from a distance.

Before breakfast on Sunday we climbed to our traps, but no keas had been there, so we gathered things together and went back to the house. The call bird, which had never been in a small cage before, and was very wild when we first put her in the evening before, had got quite used to her surroundings, and had learned how to hang on with her feet and beak, so that she was not knocked about when being carried. It is marvellous how quickly a kea will adapt itself to circumstances. This particular bird, after I had carried her on my back for five or six hours, got so accustomed to the motion that she would call softly to herself, or eat snowberries out of my hand as we went along. If the climbing was rough, and the cage temporarily upside down, she would brace herself with feet and beak, and quietly wait until she was righted. So quiet indeed did she become, and so docile, that we called her Angela.

On Sunday afternoon, having got all our goods and chattels together—camera, gun, traps, cages, tent, provisions, etc.—we started off up the Wilberforce on our eight mile walk to the Jagged Spur Gully. We had put a partition in Angela's cage, and another bird in, and I carried them, as the day was scorching hot and the pack-horse would have jolted them too much. On arrival at our destination, Mr. Murchison helped us pitch our tent on a frame that was fortunately already there, and then, while he went on up the river to the musters' camp, we climbed up the hillside above our camp to set our traps.

The Jagged Spur Gully is a deep-forked ravine, with steep rocky sides. The western side of the main gully is quite inaccessible, being almost sheer rock, with birch and totara growing in the crevices. The eastern side is covered with bush to a height of about 500 feet, and is then broken rock all up to the top. The side gully is bare, inaccessible rock, towering to the ridge, 7,000 feet up. We chose a rocky promontory with a stunted birch on the end of it for our traps, as it commanded a fine view of the gully, and could be seen from camp. Here we set our traps, and, it being already dusk, returned camp for the night. One of the call birds kept in a wire-netting run near the tent, and also in sight of the bird up by the traps. The advantage of this was that, if our distant bird say any others early in the morning, and began calling, the bird at camp would answer, and wake us up.

At about half-past four next morning our ornithological alarm went off, and I got up, and hurried up the mountain side. When half-way up to the traps I heard a wild kea screaming behind me, and, looking round, saw him sailing over to me from across the gully. Almost immediately two others further up answered, and all three presently arrived at the traps. They were a pair and an odd male bird, and I sat quietly among the tussock a few yards away, waiting for them to rush joyfully into the traps after the meat. But not a bit of it! After thoroughly inspecting Angela and her cage, and bestowing a casual glance at the traps they came over and subjected me to a searching scrutiny. Finding that I was an object of interest to them, I moved nearer to the traps, and tried in vain to call their attention to the dainty viands displayed therein. It was no use. If I sat quite still they went over and had a chat with Angela, sitting on the roof of her cage the

while; if I moved they hopped blithely around me, learning everything they could about me and my ways. The place they didn't hop on was the space covered by the traps. As they came, quite fearlessly, to within a few feet of me, I decided to try to snare them, so I went into a little clump of bush near by to get a rod and a piece of fine creeper for a noose. The keas accompanied me, hopping round in the trees above my head while I cut the stick and prepared my snare. Having got everything ready, I returned to the promontory, and squatted quietly down under a big boulder. Almost instantly a head appeared over the edge above me, and the owner of it gave a quiet little call. Another head appeared, and another, and then, within three feet of me, the birds sat and watched me, a whole world of curiosity in their bright little eyes. Gently I raised the snare and brought it towards the middle one. He took no notice until it was almost over his head, and then he quietly took it in his beak and began chewing it. Realizing that I could not snare them, I went half-way down the hill and called to H. to bring up a coil of wire netting that we had. This we used to make a little run, at the entrance of which we placed Angela in her cage, hoping that we could drive the wild birds into it, but half an hour's vain endeavor convinced us of the futility of this scheme. Then I decided that I would return to camp for a camera, so that I could photograph the birds, even though unable to trap them. I descended via a shingle slide, and the noise of the stones rattling down with me attracted the birds, which accompanied me down to camp, and when I got back with the camera, only one had returned. The sun by this time risen over the mountain behind us, and the day was bright and hot. Everything was propitious for good pictures, but before I had the camera ready the bird flew, screaming, up the gully. Very disappointed and hot we returned to camp.

That evening at four o'clock we again climbed to the traps. Shortly after our arrival we saw a bird, and I called it down, when it proved to be the unattached male of the morning, readily distinguished by the state of his moult. We set a trap out on a ledge of rock, evening up the surface with small stones. The bird came down, and, taking the stones one by one, dropped them over the edge. Next, standing well outside the trap, he began chewing one of the sticks, with the result that the cage fell down. It was very laughable, but it scared the kea, and he flew away, nor did we see him again.

Next morning, at five, I was again at the traps, and the pair of birds returned. They hopped round as before, and presently, taking no notice of me, they began billing and cooing on a rock, very much after the style of tame pigeons. Then the female flew on to the top of a dead totara stump, and the male settled just below her, and held up his head while she scratched it with her bill. If she stopped, he bit her foot, whereupon she would go on again. At last the male bird, quite unable to resist the temptation of a large piece of bread with some raspberry stains on it, went into the trap. While I was taking him out, his mate sat on top of a neighboring birch tree, and screamed with extraordinary vehemence. Within ten minutes she also went into the trap. I rushed up and grabbed her, though in the light of after events, it appeared to be quite a needless proceeding, as she did all the grabbing that was necessary—she worked overtime on the job, too, it seemed to me.

Later on H. came up, and we decided to shift our traps to a point further up the gully, so we returned to camp, had a breakfast and lunch in one, and started off up the creek. We found that the point we wished to reach was quite inaccessible so we went on climbing, until, at 8 p. m., we got on to a ridge several thousand feet above our camp, having caught a young male kea on the way up. We reached camp at about a quarter to ten, and, too tired to cook any food, ate bread and sugar, and turned in, only to turn out again in order to prop and stay our tent up in a howling nor-west gale until four next morning. That day, the musters came in, and we returned with them to Glenthorn. Two days later we came back to Lake Coleridge, and there turned our birds out into a cage with four birds they have there. The row those birds made all night attracted two wild ones down, and I shot them in the morning. That evening I decided to go on to a mountain, about three miles from the house, and try for some birds there. Mr. D. Murchison went with me, and almost immediately on our arrival caught two birds, an old and particularly vicious male, and a young female. As it was coming up a misty sou'-wester—good for birds—we decided to stay out all night, and set about cutting some manuka and tussock for a bed, which we placed alongside a big rock.

Before dawn I was awakened by more calling, and went up to our traps. A bird came over and began calling, but would not come near the traps, staying down by the male bird we had caught the night before. I went back and saw her, with tail spread and wings drooping, run to the edge of a bluff and fly off into the ravine without a sound. I guessed immediately that she had a nest, and as soon as there was enough light we started looking for it. When we were just giving up hope of finding it, and were going to turn the male bird loose and follow him, we heard the female call away down in the bottom of a big rock slip, and I caught a glimpse of her as she moved. Hurrying to the spot, we found a lot of loose feathers and droppings, which indicated the presence of a nest. We soon located it, in a long hole, the entrance of which was formed by two enor-

mous boulders, which leaned against one another, forming a triangular space, partly blocked by a third stone. This latter we removed by using a thick vine as a rope, and after much scratching and scraping I reached in, and striking a match, saw the bird on her nest. More scraping and digging among the small stones and earth, and then I reached in, but quickly withdrew my hand, minus a small piece of the middle finger. I then wrapped a handkerchief round my hand, and very soon had the bird out. I handed her to Mr. Murchison to hold, and she immediately took a piece out of his coat and clawed him pretty thoroughly, but my attention was on the nest, and, to my joy, I found four pure white eggs. They were laid on the ground among a few chips of rotten wood and bark, about five feet from the entrance of the hole.

More than satisfied with our night's work, we returned to the Lake, and that afternoon H. and myself, with many thanks for the hospitality and assistance we had received, left for the Point, en route for home.—Edgar F. Stead in the New Zealand Weekly Press.

HONOLULU FANCIERS LUCKY.

"The reason why dogs don't have hydrophobia in Hawaii is because of the climate. It never gets hot enough to drive a dog mad. I have never, in the course of many years' handling of dogs here, known of a single case of rabies. There is no sunstroke here either. Where a man gets sunstroke a dog goes mad. I have been bitten several times in Honolulu and have known lots of other people who have been bitten, but I never knew of any serious consequences to follow."

So said Paddy Ryan who with "Honest" John Kelly owns the Kalihi Kennels and who is perhaps the best posted man on conditions applying to local dog-dom in the Territory.

"I don't know of any dog diseases peculiar to Hawaii," he went on, "with the exception of heartworm. The cause of heartworm isn't known nor has a cure been discovered for it as yet. The disease usually attacks wellbred animals and the symptoms are a wheezy cough as if due to a cold, followed by efforts to bring something up from the throat, which, however, is never done. The dog finally declines and dies. If examined the heart will be found to have been eaten completely through by a worm. Personally I have been lucky. I have seen lots of cases but have never yet lost a dog of mine."

"I am often asked as to the temper of a bulldog and if they are any more dangerous to handle than other breeds. They are higherbred than other dogs, as a rule, and like all highbred animals, are more sensitive and highstrung than the other kind. I don't find them uncertain or treacherous. The only time when they are liable to snap at a person is when they are overheated and some one worries or teases them. I consider a bulldog the best watchdog that can be got if only for the reason that he has only one master."

"The bull terrier I believe to be the most intelligent of dogs. There is hardly anything that a bull terrier can't be taught, from diving for stones, retrieving to a gun, or herding sheep or cattle."

THE GOLDEN TROUT.

With the coming of the spring season the faithful nimrod of the northern states takes perhaps the greatest pleasure anticipating the plying of his skill in a small stream for trout. In the west this little fish, so pretty, so palatable, so game, is sought with renewed efforts. The golden trout is one discovered comparatively recently and lives in Volcano creek, a tributary of the Kern River, in the heart of the Sierras at Lone Pine, Cal. It was discovered by Barton W. Evermann, assistant in charge of division of scientific inquiry, bureau of fisheries. This trout he named in honor of the president, the Roosevelt trout. Volcano creek is composed of one series of lofty falls, caused by the lava flow, and is an ideal spot for the development of trout.

The color of the tufa is a light lemon yellow. The tufa seems to dissolve or break down readily in the water, the result being that the water is more or less milky. The similarity in the color of this tufa and the character of the bottom and water itself and the colors found in the trout, possibly account for the trout's rich coloration.

The golden trout is a beautiful fish—well built and very rich in coloration. The body of the trout is stout, head rather long, mouth large, scales exceedingly small, smaller than in any other known species of trout. The top of the head and upper part of the side is very light yellowish olive; middle of the side is a bright rosy band; side below lateral line bright golden yellow, fading below into yellowish white; belly has a deep red orange.

This is the most beautiful of all the trouts; the brilliancy and richness of its coloration is not equalled in any other known species, the delicate golden olive of the head, back and upper part of the side, the clear golden yellow along and below the lateral line, and the marvelously rich belly fully entitle this trout to be known above all others as the Golden trout.

It is a small fish and probably never attains a greater length than 14 inches, or in weight over a pound. It is a native of Volcano creek and is a creek fish and never ventures out into Kern River. As a game fish the golden trout is one of the best and will rise to any kind of lure, including the artificial fly, and at any time of day. It is a fish that does not give up soon, but continues the fight.

KALIKI THE NEW ROD WOOD.

Last month there was a brief description in these columns of a rod constructed of Oregon "arrow-root" wood. The rod was a neat specimen of rod making skill and was put together by George Barnes, a well-known local angler, for Mr. Frank M. Haight. This rod has so far given great satisfaction. The material used has been the subject of some discussion among local anglers who have but scant knowledge of its claimed good qualities. On these lines we take the liberty of giving below a story by P. E. Bucke published in the current number of Canadian Rod and Gun which, possibly, may be of passing interest to our angling readers:

When enjoying a summer outing in Vancouver in 1904 I had the misfortune to break the tip of my Chubb combination greenheart fly rod, which I had been using for several years. The rod was a favorite and had done much execution amongst the finny tribe.

Being a long way from home and in a country where scarcely any hard wood is to be found I felt very down-hearted over my bad luck. Making great complaints to a friend over my misfortune he advised me to apply to a Mr. Cooper in my trouble, informing me that he was not only a worker in wood, having a factory for making cabinet ware and other furnishings, but that he was a fisherman of no mean sort. Mr. Cooper was immediately interviewed and at once, to my surprise and great satisfaction, produced a partly finished rod made of wood called Kaliki, but which he said the Siwash Indians called "Scucum" which word I afterwards found out was a generic name for strength or toughness as a strong man, etc. Mr. Cooper told me some specimens were growing in Stanley Park.

I immediately became interested, but I could find nothing about Vancouver long enough or straight enough for my purpose. Mr. Cooper was unable to supply my requirements, but I fortunately came across another individual from whom I obtained sufficient to repair my disabled rod. From that time forth wherever I went my eye was constantly scanning all likely places for this valuable plant.

After a time I took a run down the coast to Seattle, Washington, U. S., making a stay there for a few weeks. I found this shrub growing there in abundance, on vacant lots all over the town, in the ravines and woods around, on the islands of Lake Washington, which lies back of the city, and was specially cultivated in the parks for its beautiful plume-like blossoms.

In its wild state it was of small size, cultivated in the parks it made a heavier growth, but of course the stems could not be had for love or money. In one of the parks, which I frequently visited I became acquainted with the Superintendent and the head gardener. I found they secured the assistance of an American botanist to classify and name the various plants and trees. The tag on this specimen was *Schizonothus discolor*.

On my return to Ottawa I asked my friend the Dominion botanist, Professor John Macoun, what name it went by in Canada. He said *Spirea discolor*, so that Kaliki, Indian arrow wood, scucum and other names are merely local terms.

On one of my many excursions from Vancouver I came across a Siwash Indian sitting on a log near his house very busily arranging his spear for his autumn hunt. In Ontario a spear is supposed to be a pole or handle of eight or ten feet long with two or more prongs attached to the end of it. A salmon would laugh in your face if you attempted to land him with such a rigging. With one twist of his tail he would smash your pole and clear out.

The Siwash spear is quite another breed of cats so to speak. It consists of a large sized fish hook about two and a half inches from point to shank. The hook is securely whipped to a piece of Kaliki eighteen inches long nicely fined down for that purpose. In the other end a taper hole is drilled with a jack-knife or other implement. The pith which is about an eighth of an inch in diameter is first taken out to the required depth, the hole is enlarged to one and a half inches tapering down to nothing, say three inches deep. Another piece of Kaliki two feet long is pared down so that it will fit tight in the hole. This last piece is spliced to cedar or fir pole sixteen or eighteen feet long, a piece of small sash cord or large sized cod twine is securely whipped to the short piece to which the hook is attached, and again at or near the splice to the spear handle, leaving the cord quite slack. When all is ready the pole is shoved home in the socket, the Indian takes his stand at a suitable place, Mr. Salmon comes along, Siwash passes his hook under him, gives a jerk that drives the hook firmly home, the short end with the impact comes off the handle and the salmon hangs as if it were on the end of a short piece of rope. Here he has full play till the Indian pulls him ashore or into his boat.

I sat on the log and had quite a chat with the Siwash.

"Where you go fish?"
 "Up the Squamish."
 "What you catch?"
 "Hump-back and dog salmon."
 "How many you take a day?"
 "Suppose ninety, sometime one hundred and twenty."

"How much you get?"
 "Twenty cents for one fish."
 "What do they do with fish?"

"Can and send to Japan, Japs love dog salmon."

Whilst on Vancouver Island I found a good deal of Kaliki in various places. I procured a few sticks of it and brought it east with me. I gave enough to your esteemed contributor, Mr. Walter Greaves, to make a couple of rods, and certainly he has made up one, a three jointed eleven foot fly rod, with nickel trimmings, which is a real beauty. It is the most resilient and best balanced rod I ever saw.

This wood is so elastic that if you could tie it in a knot it would on being released fly back as straight as ever. At the same time when thoroughly seasoned it is hard as a piece of bone. Lance wood and greenheart are not in it with Kaliki for strength, elasticity, or durability.

It would well repay anyone to make a specialty of growing this wood by the acre and selling it to the rod-makers of the world.

On my next trip to British Columbia I hope to get some one interested in its cultivation there. In the meantime I am much pleased at the growth the plant is making which I presented to the Niagara Park Commission last spring, and am in hopes when it is sufficiently far advanced Mr. Roderick Cameron, Chief Park Ranger at Niagara will be able to propagate it for useful and ornamental purposes. I feel sure it would stand the mild climate of Essex and Kent.

The plants brought to Ottawa soon succumbed to the crispness of the climate at the Experimental Farm.

A PET CALIFORNIA QUAIL.

[By Kathryn B. Chambers.]

A short time after we made the foothill ranch our home, it became a daily occurrence to feed the quail which came about the place in numerous flocks. This ranch, situated far from the haunts of man and close to those of beasts, afforded the only supply of water for birds for miles around, and as many birds came there to drink, it was an ideal place to study and become acquainted with, as we eventually did, many feathered friends.

Early in the morning, often during the day, and late in the afternoon we would see the quail peering out of the wild underbrush at the edge of the canon on which the house was situated. After the leaders had announced it safe the whole flock gradually come out, hesitating and chattering.

We scattered grain around in hopes to entice them near the house, and we soon found that they began to expect meals regularly, after the feeding process began.

The early morning flock was fed from the kitchen door, it being one of the delights of life to rise in time to serve these beautiful, alert creatures. Incidentally one often saw wonderful sunrise effects. Another flock came regularly every afternoon at about 3 o'clock out of the wild sagebrush growth near the front porch when they ate their evening meal before going farther up the hill to drink at the reservoir. Then we would see them go down into the groves where they slept in the branches of the orange and lemon trees—many hundreds of them.

Often when wandering over the ranch we found nests full of quail eggs, sometimes surprising the mother quail into flight upon our approach.

One day we came upon a bird and her nest which we decided to watch especially. The nest was quite near the road, under some wild bushes in a wash, or gulch, which ran through the groves. We were searching for something else and came so close to the nest that the mother flew up and away while we counted twenty tiny, speckled eggs. We went there very often, and could see the place from the house, which was farther up the hill. Sometimes when on the porch we could hear scolding and fluttering about the nest from the parent birds. Upon investigating, we saw no cause for disturbance until one day during the commotion we noticed a squirrel run out of the bushes with an egg in its mouth. The mother quail flew off when we approached the nest, and we found only five eggs left. Traps were set for catching the robber. A shot from a gun would have dispatched him, but might have proved fatal to our hopes. Our deeply-laid plan was to wait until the quail were hatched and then capture and tame them. As the squirrels were so numerous, other means must be devised to save the remaining eggs in the nest.

This is what we did, with results which were somewhat remarkable.

We made a V-shaped box with base placed up so that a squirrel could not climb up into it. This was carefully placed over the mother quail on her nest, and as she did not fly off, from our frequent visits, she must have become somewhat acquainted with us.

Over the top of the box was spread a piece of canvas, leaving space for the mother quail to go out to get food and drink. We visited her now oftener than usual. One day in our desire to know if the experiment were successful, "the master" put his hand in the box, the bird leaving the nest, running in a corner of the box, but not flying away. The five eggs were there. Gently repeating this for several days, the quail at last allowed the hand to raise her as a brooding hen will do, but without the accompanying scolding.

One morning we found five bright-eyed little striped quail. We placed food and water in the box, and covered it with canvas until the next day. With no more confusion than when moving a domestic hen, we moved the mother quail and her babies to a cage which we had built near by in the shade of an orange tree. The father bird appeared, coming near to the

cage, anxious, no doubt, to begin to provide for the family. He flew off when we were around, and after a few days came no more.

We were so pleased with our treasures that we fairly lived under that orange tree to be near them. Finally, however, we decided to have them where we could enjoy them at closer range, so we moved them upon the hill, quite near to the house, where we could see and feed them from the porch.

The cage was large enough to allow plenty of exercise, and they were a bright, busy family. It was interesting to watch them grow and become tame.

In the course of a few weeks we found three motherless little quail about a day or two old down in the grove. These we put in the cage with the others, watching in some anxiety lest the mother quail might refuse to care for them. She immediately called the little strangers to her, feeding and hovering them as she had her own at that age. Her five had grown past the frequent hovering stage, but she hovered these extra babies as often as they required. About two weeks after this addition to the family, we found five more very young quail. Somehow they had gotten away from the flock to which they belonged and were running about in under the trees, soon to become a meal for the cats.

We easily captured the little fellows and carried them to the cage. Surely this time we thought the mother quail would rebel. But no; she cheerfully began the task of raising these as she had the other two flocks, and I have never seen such perfect agreement in any "bird family" as in this one.

They were now very tame, always on the alert if strangers were near the cage. If a strange person walked within sight, they would become suspicious and watchful.

One day in the fall when they were quite full-grown we decided to give them roomier quarters by enlarging the cage. We were building an addition to one end of the cage, and they were paying no attention to us, when two of our dogs came bounding toward the cage with such speed and noise that the birds became frightened and flew up and out of a small opening in the wire. Away they went, the whole precious flock! Some flew off down in the groves; some flew in the sage brush in the canon. One flew on the porch. I walked up to it and picked it up. Whether because it was tame or because it was so frightened it permitted this, I do not know. Our disappointment over our loss was great for the rest of the day, and we did no more work on the cage. Toward evening the quail came back by ones and twos; they went into the cage, began to eat and drink, and then flew up in the limbs of a small olive tree over which the cage was built and went to sleep as usual.

We made fast the cage, rejoicing that they preferred us to freedom. That the young quail which had not known freedom nor how to hunt for food, should come back was not so surprising, but for the mother quail to return was unexpected.

They had always had the best of conditions and care. We often went far afield to secure the seeds of wild plants which we found they liked. The study and care of these beautiful birds was a great pleasure.

We moved them once more where they could have larger range, and finally left the wire open so that they could come out and go back at will. As it was nesting and mating season, they made nests in a grapevine near the house. One pair of quail had a nest in the barn. They ate their food with the chickens and were treated and regarded by us as domestic fowl.

SEA MONSTERS FIGHT TO THE DEATH.

Fishermen who went to the banks several miles offshore from Venice returned one evening last week with a six-ton shark of the steel-nose variety. The big inhabitant of the deep drink was about thirty-five feet in length. It was towed into the Venice harbor, and an effort was made to raise it upon the pier, but the weight of the fish snapped the hawsers, and darkness coming on before stouter ropes could be secured, the curiosity from the sea was anchored near the pier, next day to be pulled onto the sandy beach to be inspected by Sunday visitors.

The fishermen who brought in the prize say they were attracted by the lashing of the waters within a few rods of their launch. Occasionally they would see a shark leap almost out of the water, and upon descending there would again be a commotion. Finally the splashing ceased, and a coating as of blood upon the surface of the sea told the watchers that the battle of marine monsters had terminated disastrously for at least one of the combatants. A few minutes later the dead body of the shark rose to the surface.

An examination of the carcass showed that its antagonist had been a sword fish. Gaping wounds told the story. The shark was made fast with a rope and brought into the harbor.

SALE DISTEMPER.

Are you consigning horses to any sale or buying at sales? Either way, you can look for trouble with "sale-stable distemper." Your stallions, mares, colts and all others will be well protected against attacks of these diseases if you will give Spohn's Liquid Distemper Compound. This remedy will take them through any sale without an attack of any form of distemper, and it will cure any case you may have among your horses. "Spohn's" is the very best blood purifier and conditioner. All druggists or harness dealers can supply you, or the manufacturers.

Drink Jackson's Napa Soda.

WHY OUR NATIVE TYPES OF LIGHT HORSES SHOULD BE PRESERVED.

At the annual meeting of the American Saddle Horse Breeders' Association held at Louisville, Kentucky, last week, Mr. George M. Rommel made an address on the above subject, which was reported in part by the Kentucky Farmer and Breeder as follows:

The development of types of light horses has been notable in America. In the early colonial days the Narragansett pacer was a famous type; later came the Morgan, the standard bred and the saddle horse. Although the Morgan is not so prominent in the country at the present time as it was fifty years ago, this blood entered into the pedigrees of many of the most famous horses both in the saddle breed and in the standard breed. A brief perusal of the American saddle horse register will show that many of the best sires carry large amounts of Morgan blood in their pedigrees, and while it is not fair to other lines to claim that the excellence of these horses is due entirely to the Morgan blood which is in their pedigrees, we cannot deny that a large amount of their excellence should be ascribed to this source.

Take for example the pedigree of Cabell's Lexington. This horse was sired by Gist's Black Hawk, tracing in direct line to Justin Morgan. His dam likewise traces to Justin Morgan. Coleman's Eureka also traces to Justin Morgan through his sire, Young's Morgan, and through the dam of his grandsire, Russ Butler's Eureka. This horse was thoroughbred on the dam's side. The great Peavine traces to Justin Morgan through his sire Rattler, who was also out of a Morgan mare. Indian Chief traces in direct line to Justin Morgan through his sire, Blood's Black Hawk, he by Black Hawk 5, he by Sherman Morgan, a son of Justin Morgan. These pedigrees show something of the blood which entered into many of the best horses of thirty years ago in Kentucky, and which have been of the greatest value to the saddle horse. I am informed by Major Castleman that a thorough study of the first two volumes of the Saddle Horse Register shows that of the horses entered therein over 10 per cent trace in direct male line to Justin Morgan—a truly remarkable showing.

You are all familiar with the fact that many of the best harness horses which go out of Kentucky are practically saddle bred, and a brief reference to some of these will illustrate this point. Tattersall, one of the pair which sold for \$6,000 a year or two ago, was by Bourbon Chief. His dam was by Red Cloud, a son of Indian Chief. In this pedigree we find crosses of standard bred, Denmark, thoroughbred and Morgan. Tattersall's mate, Eckersall, was by Forest Denmark, and his dam by Beauty, a son of Magic, from a daughter of Benton's Diomed. Here we find Denmark, standard bred and thoroughbred. Emma Briggs, registered 2895 in the Saddle Register, was shown in 1906 at the Chicago Horse Show under the name of Poetry as a mate to Dainty Miss, winning in class and being reserve champion at that show under 15.2. Emma Briggs was by Chester Dare out of a mare by Highlander, he by Joe Young. Here again we find Denmark, thoroughbred, standard bred and Morgan, with a slight amount of Clay blood.

In the pedigree of Wilson's King, one of the greatest sires of harness horses which ever stood in Kentucky, we are struck with the absence of Denmark blood. Wilson's King was by Harrison Chief out of a daughter of Parson's Abdallah, he by Alexander's Abdallah—thus standard bred and thoroughbred, with the Joe Downing cross, appear in this pedigree. Morgan is missing, as well as Denmark.

In the classes for horses suitable to get American carriage horses at the Blue Grass Fair at Lexington last year the winning aged stallion was a horse known as Red Harrison, a son of Harrison Chief. The winning aged mare was a daughter of Logic, tracing on both sides to Denmark stock, her dam by Magic, he tracing to Clay, thoroughbred, and Edwin Forrest. The dam of the winner was out of a daughter of Peavin, second dam by Stonewall Jackson out of a daughter of Walker's Grey Eagle. The second prize mare in this class was a daughter of Chester Lad, he by Harrison Chief; second dam by Peavine; third dam by Cabell's Lexington.

These pedigrees show quite a consistent tendency for certain blood lines in Kentucky to produce horses of carriage type, but when we get out of this section and study the pedigrees of carriage horses which have come from other States we find that there is not such a uniformity in the breeding. Take for example the pedigree of the horse shown by Mr. J. F. Carlisle of New York, under the name of Promoter. This horse was bred in Kansas and was registered in the American Trotting Register as Samuel Stone 11265. His sire was Norman Medium, a son of Happy Medium, and his dam, Susie Clay, was by Talisman, he by Cassius M. Clay, Jr. 22, a son of Cassius M. Clay 18. Talisman's dam was by Mambrino Chief. Susie Clay's dam was by Harry Pulling 2581, a son of Menelaus 226, out of a mare by Smith's Ethan Allen, a son of Vermont Black Hawk. Drummer Boy, a noted winner a few years ago in the string of Mr. James Hobart Moore, was by C. V. B. 13064, a son of Ensign, he by Enchanter, by Administration. Aside from this we know comparatively little about the pedigree of this horse.

Belford, a horse which was sold to Mr. Walter Winans of England, and shown successfully against hackneys, was a son of Bow Bells, dam by Sentinel Wilkes, a son of George Wilkes. Glorious Whirling Cloud, one of Mr. Thomas Lawson's famous four, was registered in the Trotting Register under the name

of Don Edwood 27131. His sire was Don Ogden by Kentucky Prince, he by Clark Chief, the sire of Harrison Chief. Kentucky Prince traces to Hale's Green Mountain Morgan on the dam's side. Don Edwood's dam was by Haven Star, a son of Conklin's American Star, by Seeley's American Star.

Glorious Red Cloud, the most famous of Mr. Lawson's horses, and one of the most famous harness horses the country has ever known, was by Wilson's King, dam by Red Cloud, he by Indian Chief. Please note that Red Cloud traces not only to Morgan stock but twice to Alexander's Abdallah. The great Lord Brilliant was sired by Johnnie Mack 2712 A. T. R., he by Egmont, another illustration of the value of the Abdallah blood.

Sir James, reserve champion at the last New York Horse Show in the large classes (over 15.2) was bred very much like the horse Belford, already referred to. Both were sired by Bow Bells, but Sir James' dam was by Red Wilkes, instead of by Sentinel Wilkes. The breeding of Nala, champion in the large classes at the last New York Show, is somewhat in doubt. The horse is said to have been bred in Missouri, where he was known as Dave Telluride. He is thought to have been by a son of old Telluride 16430, but may have been by the old horse himself. Nala's dam was Eliza Jane, by Harkaway 2875, second dam by France's Alexander 1886, third dam by a son of Abdallah 15. There is very little in this pedigree to shed light on the carriage horse problem. The crosses of Morgan, Abdallah 15 and Clay blood are far back in the pedigree.

In the pedigrees of these horses, however, one thing is noticeable—that in the majority of instances crosses will be found to one of the three lines mentioned, particularly to Abdallah 15 and Morgan. When these lines have been combined with the Kentucky blood some of the most remarkable successes in the show ring have resulted.

The necessity for efforts to preserve the blood lines referred to is apparent to any one who studies the horse business, or the country seriously for any length of time. In the first place, the desire for speed has had a very unfortunate effect on our native types, and although it is not now so strong as formerly, it is still to be reckoned with. Coupled with the effort to increase size in the Morgan, this breed has been most seriously injured. In the second place, nearly all Americans succumb to the lure of the foreigner, and without stopping to think of the value of native types have assisted, more or less, in the infusion of foreign blood. I have no quarrel whatever with the man who is breeding imported horses; all I want is to see the American horse given a fair show. In the third place, with all due respect to dealers whose energetic work has done a great deal to bring the value of the American horse to the attention of the public, they have at times into breeds by buying up promising horses and taking them entirely away from the breeding fields.

Our native types have every right to preservation, because they are indigenous and, therefore, are adaptable to local conditions; they do not need acclimation, and, therefore, no time is lost in putting them into use. Further, their pedigrees are more familiar to us, and any one can ascertain with a little effort the characteristics not only of their sires and dams but of more remote ancestors.

This subject cannot be passed without a reference to the service which the stud book associations have been to the country in this regard. The Thoroughbred Stud Book, the Trotting Register, the Morgan Register and the Saddle Horse Register have all performed valuable services in recording the pedigrees of horses of useful type which are native to the country.

The most of the stallions referred to in the foregoing pages as valuable progenitors of these types have been recorded in all three registers mentioned; one, however, and he one of the greatest, Wilson's King, is to be found only in the Saddle Horse Register.

The ultimate solution of the work of reviving interest in our native types will probably be the evolution of stud books, especially for these types. For example: The work of the Department of Agriculture in its breeding operations, and in co-operation with the American Association of Trotting Horse Breeders and State fairs to develop an American carriage type, can very properly be made the foundation of a stud book for American carriage horses. An organization of horsemen in Virginia has already begun a movement looking to the organization of a stud book for hunters. No criticism of a serious nature can be attached to a movement of this kind, for the reason that if we have a type which meets the market demand and which is not definitely fostered by a registry association, the blood lines which produce such a type should be given the protection and privileges which registration for a definite purpose provides.

JOINT DISEASE OF FOALS.

The following from the pen of that excellent authority A. S. Alexander, V. S., of the Wisconsin Experiment Station, appeared in the last issue of the Chicago Breeders' Gazette:

"When the foal is born and the membrane has been stripped from its nose the navel cord (umbilicus) should have instant attention. It is better to allow the cord to rupture in the natural manner than to ligate and cut it. By the natural method we mean breaking by traction which happens when the mare rises if lying down at time of parturition,

or by rupture when the foal slips to the ground, the mare being in the standing position. When rupture of the cord takes place in this way the blood vessels walls are drawn apart and the tissues retract in such a way as to prevent escape of blood and the entrance of filth and its accompanying germs. It should be remembered that the umbilicus (navel) is made up of both blood vessels and a tube leading to the bladder (urachus) and one which originally connected with the intestines of the foal.

It is necessary that all these passages should close naturally else the blood vessels may conduct germs to the liver, bladder or circulation of the foal, or the urachus allow urine to escape by way of the navel, or the open abdominal passage allow omentum to descend and cause an umbilical hernia (rupture). Cutting the umbilicus by means of an emasculator would accomplish the work of closing the open vessels properly as happens when castration is performed by this instrument. When, however, the umbilicus is ligated (tied) by means of a fine cord or string the walls of the various tubes referred to are simply shut, but not crushed or lacerated so that their tissues retract. When the cord is removed the openings of the vessels still are open, or may be open, hence entrance of filth germs is made possible or likely and either hernia or escape of urine induced. We therefore strongly favor the rupture of the umbilicus in preference to ligation and would recommend rupture by traction when found possible. When it is found necessary to ligate the navel cord, however, do it by means of a cord that has been soaked in a 1,500 solution of corrosive sublimate or a strong solution of coal tar disinfectant or carbolic acid and as soon as possible remove the ligature and squeeze out the collected clot of blood. The ligature should be tied within an inch of the body of the foal. If the cord is cut off too short there is most likelihood of escape of urine (persistent urachus) and if left too long there is most chance of hernia. When the ligature has been removed the next step should be to soak the stump of the navel in strong, cauterizing disinfectant.

Apart from ligation of the navel cord its disinfection is of most importance and it will be wholly useless or practically so to use any mild non-astringent or caustic solution for the purpose. Failure is common where simple disinfecting solutions are applied. We advise the use of a solution made as follows: Dissolve half an ounce of finely powdered corrosive sublimate (bichloride of mercury) in a pint of boiling water to which a dram of hydrochloric acid has been added to assist in dissolving the mercurial salt. When cold add to the solution two drams or so of solution of the chloride of iron to give an amber color and at the same time perhaps increase the astringent or styptic blood coagulating effect of the lotion. Label the bottle "poison" and set it out of the reach of children. Apply the lotion instantly and freely to the severed umbilical cord and repeat the application twice daily until the cord shrivels up, drops off and no raw spot can be seen. The latter hint is important as a sore or raw spot remaining and neglected after the cord has dropped off may well become the entrance place of germs."

TRAINING THE MANE.

A horse's mane which parts on top of the neck and lies on both sides never looks well. A reader says he has a stallion whose mane lies about equally on each side of the neck, and he wants to know how to braid it so as to make it all lie on one side. First of all wash the mane clean and dry it. Comb all the snarls out of it most carefully. Then while it is just slightly damp comb it all over to the side desired. Begin now right up back of the ears. Have three strands of any suitable material, raffa, worsted, what not, and right on top of the neck take up three strands of the mane. Now keep on braiding the material, say worsted, in an ordinary three strand plait, taking up strands of the mane as you go. Pick these strands of the mane up carefully so as to get in them hair from both sides of the neck. Let the plait slant downwards as you get farther back along the neck. Have some narrow strips of thin sheet lead or tea lead and braid these into your plait, allowing the strips to hang down below the plait several inches. These should be braided into every second strand taken up from the mane. They will work loose and the hair will also, so that the mane should be re-braided about once a week or oftener if necessary. It is a good deal of a trick to train a mane in this way and requires an infinity of patience.—Breeders Gazette.

THE LATEST FRAUD.

The wide and universal popularity obtained by the sale and use of Manhattan Food, Red Ball Brand, has tempted (as is invariably the case with an article of merit) the fraud and counterfeiter to come to the front with a cheap and dangerous imitation. In order to insure obtaining the genuine article, the only MANHATTAN FOOD as manufactured on this coast—which received the gold medal at the California State Fair, and is endorsed by Hicok, Holly, Goldsmith, Dustin, Gamble, Wells, Fargo & Co., Miller & Lux, etc.—consumers are requested to see to it that only that bearing the Red Ball Brand is given them, no prefix to the words "Manhattan Food" being used. Any other article purporting to be the same as Manhattan Food without the Red Ball stamped on each bag is a fraud.

Drink Jackson's Napa Soda.

THE FARM

"The miracle of individuality which does not perish with the individual's passing distinguishes Kansas Sunflower Corn. Experiments conducted at the Kansas Agricultural Experiment Station by Professors Ten Eyck and Shoemith show conclusively that of this species 'the individuality of certain ears can be utilized in the improvement of a particular breed of variety.' For after four years of successive tests it has been demonstrated that the high character of this one particular sort 'traces back to two original mother ears.'"

"These ears did not show any great preeminence in themselves. They were not peculiar in their size or quality, but they had what only the growing of several successive generations could disclose—the power to contribute to their offspring certain qualities of yield, of early ripening, of resistance to disease and frost, which made the offspring of these ears preeminent by four hundred per cent. above the other ears of corn. In all breeding work this phenomenon is sometimes noted. The American trotting horse goes back to Messenger—not himself a great performer, but endowed with the Abrahamic power to sire a race of trotting colts preeminent in the world. So, in the race of wheat, Minnesota number 169 became the parent of a progeny which added from one to two extra bushels to the acre."

"The 'Wealthy' Seedling of Peter Gideon furnished apples to all the Northwestern states—trees which would stand the long northern winter and ripen in the early fall. That parent seed—one of ten thousand planted by old Peter, had a character which was worth a million dollars in its potential yield; it had what the race horse, Messenger, had, 'the instinct to contest the race'."—Colliers.

Senator Burkett of Nebraska has introduced a bill for the extension of agricultural education. It provides for the teaching of agriculture, home economics and manual training in the normal schools of the United States, and for an appropriation of \$500,000, to be increased \$100,000 each year until it reaches \$1,000,000, to be paid annually to the various States for the support of such instruction. One-half of the money is to be divided equally among the States and the other half pro rata among the State normal schools in proportion to the length of term held and the number of students enrolled. This measure has been endorsed by the National Educational Association, and Senator Burkett hopes that with the approval of the educators and the agricultural interests the bill will pass.

PROFITABLE CATTLE FEEDING.

The Missouri experiment station at Columbia has just issued a very elaborate and handsomely illustrated bulletin on the most successful methods of fattening cattle, by Dean H. J. Waters.

This bulletin summarizes the experience and conclusions of about 1,000 of the most experienced and successful cattle feeders of Missouri, Illinois and Iowa, and contains also a summary of the results of a large number of tests with different kinds of feed, ages of cattle, etc., conducted by the experiment station at Columbia.

It considers such practical questions as the most profitable age to fatten cattle, the proper weight, the best season of the year, the best method of preparing feed, the best sort of shelter, the market demands, the best sort of roughness, etc. It is illustrated with cuts of the different types of beef cattle, including excellent illustrations of the fat steer herd exhibited by the college this season at the Interstate Fair, Kansas City, the Missouri State Fair, Sedalia, the American Royal, Kansas City, and the International Live Stock Exposition, Chicago. These steers won nine championship prizes, seventeen first prizes, sixteen second prizes, seven third prizes and two fourth prizes. Every steer won at every show, excepting one steer at one show.

This bulletin is for free distribution and may be had for the asking by any farmer or citizen. The station has other bulletins for free distribution on such subjects as cowpeas, alfalfa growing, the most profitable way to winter cattle, etc.

CREAM CASHES IN.

It is the testimony of thousands of farmers in the Western country who have been milking cows and producing cream for sale to the various creameries that the sale of cream is profitable. The sale of cream enables the farmer to have a cash income day after day and year after year, and it is this daily cash income which places the dairy farmer in a more independent position than he has ever before attained and which enables him to pay the running expenses of his farm and maintaining his household without using the money realized in lump sums from the sale of wheat, grain, hogs, etc., which can be placed to his credit either in the bank or, as in Kansas in the years gone by, pay the mortgage and in the heydays buy more land, build a better house and erect a good barn.

Three remarkable Shorthorn sales have just been made in the Central States and the prices realized will stand as the seven-year wonder among the natives. At the Searles dispersion in Sioux City the top on cows was \$1,450, on bulls \$900, with an average of \$268. H. F. Brown of Minneapolis got \$1,015 as the top for a Missie cow with an average of \$302. F. W. Harding's annual sale at Waukesha, Wisconsin, proved a winner. He made an average of \$418 on forty-seven head, with sixteen bulls averaging \$525, a cow at \$1,005 with the bull, White Sultan topping the sale at \$2,750.

SANITARY MILK FOR CALVES.

Be scrupulously clean as to pails, troughs and the food used in feeding young calves. It will save a lot of the trouble that comes with carrying calves through the scours. There is no surer cause of scours than dirty feed pails.

When horses persist in rubbing their rumps against things you better scrub the animal with a good coal tar dip to kill the mange or lice, as the case may be.

The greatest care should be exercised in buying pork, whether fresh or salted. Pork should be white and fine grained in the lean; the fat of a pinkish white and free from kernels or specks, the skin thin and the bones small. When pork is stale it is not fit to eat. Its quality and digestibility depend so entirely upon the feeding and the keeping of the pig, that it should never be bought unless from sellers who can be relied upon.

If you have good stallions in your community, get a pair of pure-bred mares and get into the most profitable horse-breeding. You will soon breed into a handsome income every year.

A Snap for Breeders

For this month only

\$3.00

is the amount you can save by cutting this ad out and sending it to us with an order during the month of April for a set of our

Ellis' Latest Improved Breeding Hobbles

Absolutely the safest and best in the world. Endorsed and used by nearly all prominent breeders. No stock farm complete without one.

Ellis' Improved Breeding Hobbles

to prevent mare injuring stallion while she is being served.

HOME OF GRATTON 2:13.

G. S. ELLIS & SON—

Gentlemen: I consider the Ellis Improved Breeding Hobbles the best in use.

F. E. MARSH.

The Ellis Improved Breeding Hobbles are made of the best quality especially selected, extra heavy, pure oak tanned, hand stuffed harness leather, all parts where there is wear are double and stitched. The pulley is solid bronze, and the workmanship throughout is the very best. Our regular price on these Hobbles is \$10.00, but for this month only we will furnish them to Breeders at \$7.00 net—provided cash accompanies order.

Order a set to-day before you forget it.

If they are not satisfactory and better than any other make you can return them to us and we will refund your money.

We have no agencies or branch houses and do not sell our goods to harness dealers or department stores to sell again, but sell our entire product direct to horsemen only, saving them the middleman's profit which is from 20 to 33 1-3 per cent.

G. S. ELLIS & SON, Harness and Tuff Goods Manufacturers Cincinnati, Ohio.

N. B.—Free: Our 448-Page Catalogue showing illustrations, giving complete descriptions and quoting prices that are beyond competition on everything used on or about the horse (many new goods) will be sent free, all charges prepaid, to any address upon application. Every horseman should have one, as it is not only instructive but will save many a dollar for him during the season. Write for one to-day, addressing Department S.

Bingen 2:06¹/₄

FOR SALE

BECAUSE WE HAVE TOO MANY STALLIONS

we are offering for sale the best we have, as well as the most fashionably bred 3-year-old stallion in the entire West.

ROBERT BINGEN 9567, sired by BINGEN 2:06¹/₄, the phenomenal sire of colt trotters and futurity winners. **First dam, EPISODE**, trotting race record 2:18, (dam of Norab 2:18), by Ambassador 2:21¹/₄ (son of Geo. Wilkes and sire of Ambulator 2:09¹/₂, Susie T. 2:09¹/₄, and grandsire of Blacklock 2:04¹/₂, a 2-minute pacer). **Second dam, SANTOS**, great brood mare, (dam of PETER THE GREAT 2:07¹/₄, winner of the Kentucky Futurity and sire of SADIE MAC 2:06¹/₄, also winner of the Kentucky Futurity). SANTOS is also dam of three others, all trotters, records 2:16¹/₄, 2:18 and 2:25¹/₄, respectively. She was sired by Grand Sentinel 865, son of Sentinel, full brother to Dictator. **Third dam, SHADOW**, great brood mare, (dam of four with standard records) by Octaroon. **Fourth dam** by Joe Hooker 185, etc.

ROBERT BINGEN is perfect in every respect. Will outshow any horse of his age. Sound, clean and a fast trotter with the high action inherited by all the Bingens. The best cross in the world for California bred mares, daughters and granddaughters of MCKINNEY, NUTWOOD WILKES, ELECTONEER, etc. We believe this is one of the only two sons of Bingen owned west of Chicago, and we own them both. **ROBERT BINGEN** should earn in the stud in California between Two and Three Thousand Dollars this season, and Five Thousand next, while he is being developed as a race horse. We have gone carefully with him and he is now ready for more strenuous work. BINGEN is only 14 years old, and young sons of his have sired more futurity winners and colt race trotters than any other family that ever lived; such as Kentucky Todd 3, 2:08¹/₄, Douglass 3, 2:12¹/₄, Cochato 3, 2:11¹/₄, Aquin 3, authenticated trial 2:09; Binvola, world's 2-year-old 3-heat record, 2:15¹/₄; Bisa 3, second to General Watts, 2:06¹/₄—Bisa timed separately in 2:08¹/₄. Address,

HERBERT STOCK FARM, 1736 Broadway, Denver, Colorado.

READVILLE GRAND CIRCUIT MEETING

August 24-28, 1908.

\$93,300 in Purses Including the **\$50,000**

AMERICAN TROTTING DERBY

EARLY CLOSING PURSES

Class No. 1—The Blue Hill, 2:30 Class, Trotting. \$4,500, divided: \$1,050 to first, \$300 to second, \$150 to third, each race.
Class No. 2—The Massachusetts, 2:14 Class, Trotting. \$9,000, divided: \$2,100 to first, \$600 to 2nd, \$300 to third, each race.
Class No. 3—The Ponkapoag, 2:11 Class, Trotting. \$3,000, divided: \$700 to first, \$200 to second, \$100 to third, each race.
Class No. 4—The Readville, 2:12 Class, Pacing. \$3,000, divided: \$700 to first, \$200 to second, \$100 to third, each race.
Class No. 5—The Norfolk, 2:08 Class, Pacing. \$3,000, divided: \$700 to first, \$200 to second, \$100 to third, each race.

EACH OF THE ABOVE CLASSES WILL BE THREE RACES OF ONE MILE.

Class No. 6--The American Trotting Derby, a Handicap Dash Race, open to all trotters. PURSE \$50,000.

To be Trotted at Readville Trotting Park, August 25, 1908.

A Handicap, dash race open to all trotters, in which the slowest horse will go a distance of one mile and one-quarter and be allowed 50 feet start by faster horses for each second's difference in speed, but no horse will be handicapped slower than up to a mile in 2:15.

THE PURSE WILL BE DIVIDED:

FIRST HORSE WILL RECEIVE	- - -	\$30,000	FOURTH HORSE WILL RECEIVE	- - -	\$2,500
SECOND HORSE WILL RECEIVE	- - -	10,000	FIFTH HORSE WILL RECEIVE	- - -	1,500
THIRD HORSE WILL RECEIVE	- - -	5,000	SIXTH HORSE WILL RECEIVE	- - -	1,000

The Entrance Fee Will be \$500

payable in installments as follows: \$100, May 11, when entries close and horses must be named; \$100, June 15; \$100, July 15; and \$200, August 22. These fees are for each horse named. The Association reserves the right to reduce this entrance fee by cancelling the second and third forfeits, either or both, or reducing their amount. Nominators will not be held for forfeits falling due after they have declared an entry out in writing. More than one horse from the same stable may start.

The total entry fee is but one per cent of the purse and nothing will be deducted from winners.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all trotters from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on August 18.

THE HANDICAPPING

will be done by three experts, who will be selected for their knowledge and ability in this line. They will meet at Readville on August 18, when the horses will be classified according to the knowledge of their ability on that date in possession of the handicappers.

RECORDS WILL NOT NECESSARILY GOVERN

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

If more horses should appear for the race than can safely, or in fairness to all competitors be started, the Association will divide them into divisions, by lot, bringing the first eight in each division together to race for the purse, it being agreed that the directors of the Association shall be sole judges of this condition. Should these elimination contests by any chance become necessary they may be contested on Monday, August 24.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

There will be at least one day between this Handicap Race and either the Blue Hill, Massachusetts, or Ponkapoag events, weather permitting.

This handicap is based on the supposition that the slowest horses to start in it will trot 6,600 feet (one mile and a quarter) in 168½ seconds, that is five-quarters of a mile at the rate of 2:15 to the mile, and that the various classes in the rear will be able to trot the distance at the rate they are

classed for one mile. While the faster horses travel farther in this race than slower ones, they are making their effort during no longer period of time, and it is believed, for instance, that a 2:05 horse can trot at the rate of 42.24 feet per second as long as a 2:15 trotter can move at the rate of 39.1 feet. Under the rules of this race a 2:05 trotter has 28 feet the best of it in distance covered, to offset the disadvantage of starting in the rear.

In all classes horses must be named at the time of the closing of entries. Hobbies will not be barred.

Except in the Handicap the entrance fees will be five per cent of the purse, and in addition five per cent of the winnings of all horses will be deducted.

CONDITIONS OF ALL CLASSES EXCEPT THE HANDICAP

More than one horse, if trained in the same stable, may be entered in a class, and one per cent of purse additional will be charged for each horse so named; but only one horse in the same ownership will be allowed to start. Any horse of a plural entry which may be separated from the stable from which they were named will be eligible to start by paying a sum in addition to that already paid on the horse, which will equal the full five per cent entrance fee.

The rules of the National Trotting Association (of which this Association is a member) will govern. Right reserved to reject any entry. Racing will begin at 2:30 p. m.

The positions of contending horses will be drawn for the first race of every event, but in the second they will start as they finished in the first, and in the third as they finished in the second.

Forfeits will be due in amounts and on dates as follows:

	May 16	June 15	July 15	August 15
Class No. 1	25	45	70	85
Class No. 2	75	100	125	150
Classes Nos. 3, 4 and 5	15	25	50	60

Nominators will not be held liable for forfeits falling due after they have declared out in writing.

ENTRIES CLOSE ON SATURDAY, MAY 16

The management believes thoroughly in the success of this race and that it will be enthusiastically supported by the horse world. It will do all in its power to make it a success and is ready to risk and sacrifice much to that end. We do not assume that any one would desire to see the Association bankrupted by giving this race if the support received is not worthy of the purse, hence the right is reserved to declare it off if it falls to fill to the satisfaction of the directors.

The American Horse Breeder Futurities—\$7000 for three-year-old Trotters, \$1000 for three-year-old pacers and \$2000 for two-year-old Trotters—will be raced at this meeting.

All entries, requests for information, etc., to be made to the Secretary.

JOHN M. JOHNSON,

President.

C. M. JEWETT,

Secretary, Readville, Mass.

THE PRECEDENCE OF BARLEY.

Statistics kept by Major P. J. Harney of the Sacramento Transportation Company show that barley growing has practically driven the wheat industry of the Sacramento Valley out of business, says the Sacramento Union. Records of the company show that during the past eight or nine years thousands of acres, formerly devoted to the raising of wheat, have been given over to barley. Where in 1899 the up-country shipping points sent out thirty-two sacks of wheat to every sack of barley, the same places are now distributing seven sacks of barley to every one of wheat.

There was a time when the transportation company received from prominent farms up the river two and three sacks of barley to as many thousand sacks of wheat a year. Conditions are now vice versa. In 1906 and also last year there was a surprising increase in the shipments of barley.

All over the Sacramento Valley wheat fields have given way to barley. Barge load after barge load of the latter article is brought downstream without a sack of wheat being taken on board. It is a fact that the flour mills of Sacramento and vicinity have found it necessary to send to Oregon for great quantities of wheat, simply because the up-country farmers have ceased raising that product. It is figured out by Major Harney that seven sacks of barley were handled by his company last year to every one of wheat. He expects this ratio to increase.

It is very likely that if we had figures we could rely upon, we would find that not one cow in ten now to be found upon farms pays for the hay and grain she consumes during the winter. In many cases we have known two or three, and often four, cows to be kept simply to supply the farmer and his family with the milk used on the table, and the cost of feeding these cows ranges from \$40 to \$60 each. The shrewd business man in the city would not do business that way. He would sell the cows, or give them away, and buy his milk. Upon every farm where cows are kept at all it would be just as easy and just as cheap to feed and care for a cow that pays, instead of one that not only did not pay but brought the owner a loss. Every farmer, whether the owner of one or 100 cows, should have these facts pounded into him until he would be ashamed to own a cow that did not earn what she ate. No matter whether the milk and butter made is used upon the farm or sold, an accurate account of the annual yield should be kept and compared with the annual yield of a good cow. Then kill off the poor cow and do not buy another until a better one can be secured. If every farmer would make it a point to follow this policy the present loss, by reason of keeping cows that do not earn their living, would be saved.

Dehorning calves becomes inhumane only when the operation is performed in awkward or careless manner. The work of killing the embryonic horn before it begins growth is simple enough. The hair should be clipped from around the button and caustic potash, slightly moistened, applied to the spot. Great care should be exercised not to spread the poison beyond the small button. A cloth should be wrapped around one of the stick of caustic to prevent burning the hands while making the applications. Each horn should be rubbed four or five times with the preparation and the calf should not be allowed out in the rain for several days after the treatment, as the potash spreads rapidly on being wet and would injure the skin beyond the protuberance of the undeveloped horn. This work should usually be done before the calf is three weeks old. When the horns are developed they may be sawed or clipped close to the head with the tools manufactured for the purpose. The head of the animal must, of course, be held firmly during the operation. If this work is done early in spring no application is necessary, although later a disinfectant, such as crude carbolic acid or tar, is useful in preventing injury.

When an exercising lot can be had, it should be long and rather narrow, so as to prevent the horse from running in a circle, which so often results in a slip or a fall, which may prove to be very injurious to the animal. In a long lot the animal will have a chance to extend itself.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's
Caustic Balsam

IT HAS NO EQUAL

For Human Body
—It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Extremities, Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

Athasham

Race Rec. 2:09 1/4.
Reg. No. 45026.

A Game Race

Horse in the Stud

Bay stallion, stands 15.3, weighs 1,150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 1/4, Athasham 2:09 1/4, Sue 2:12, Listerine 2:13 1/4 and 8 others in 2:30); dam, the great brood mare Cora Wickersham (also dam of Nogi (3) 2:17 1/4, winner of 3-year-old trotting division Breeders Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22 1/4 (sire of dams of Geo. G. 2:06 1/4, etc.). Athasham has a great future before him as a sire. He is bred right and Made right, and has every qualification one can expect in a sire. He has been timed in 2:06 1/4 in a race, and his courage is unquestioned.

He will make the Season of 1908 at **Orchard Farm, Fresno, Cal.**, for a **Fee of \$50**, with usual return privilege.

For further particulars address this place, care of

CHAS. MIDDLETON, Manager,

Or **D. L. BACHANT, Owner, R. R. 1, Fresno, Cal.**

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11 1/4, the greatest sire of extreme speed living. Dam Helena 2:11 1/4, dam of Wild Nuts 2:12 and Hyta (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04 1/4; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinnies. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of California. He cannot help being a success in the stud.

Fee: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

CHESNUT TOM 43488

Race Record 2:17 1/4. Trial 2:14.

Sired by Nutwood Wilkes 2:16 1/4 (sire of John A. McKerron 2:04 1/4, the fastest trotting stallion of the Wilkes family). Dam Zeta Carter by Director 2:17 (sire of dam of John A. McKerron 2:04 1/4); granddam Lida W. 2:18 1/4 by Nutwood 600. Chestnut Tom won the 224-trot at Salinas, 1906, in three straight heats.

STOCKTON, Cal.

Terms: \$30

Address, the owner.

Geo. T. ALGEO, 120 So. Center St., Stockton, Cal.

DO YOU WANT THE BEST?

BREED YOUR MARES TO

ZOMBRO 2:11

Son of McKinney 2:11 1/4 and Whisper by Almont Lightning.

SERVICE FEE—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Belmont 2:09 1/4, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08 1/4, holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list, ten in the 2:15 list and seventeen in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices. Address.

Geo. T. BECKERS,

3949 South Figueroa Street,
Los Angeles, Cal.

Bonny McKinney 41383

Son of
McKinney 2:11 1/4
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03 1/4
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13 1/4 (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11 1/4, trial 2:05 1/4. Dam Rita B. by Doodle Jr.; 2nd dam Gabian Girl by Gabian; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alcyone 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal.

Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

Sire of Janice 2:08¼, Dan Burns 2:15 and 2 othe s in 2:30. Sired by Sidney 2:19¼ (grandsons of Lou Dillon 1:58½); dam Cricket 2:10 (dam of 5 in 2:30 list) by Steinway 2:25¼ (sire of Klatawah 2:05¼, Bonnie Steinway 2:06¼, etc.). He is a horse of great muscular development and shows plenty of quality. All of his progeny are noted for their perfect dispositions, bone, substance and speed. He will make the Season of 1908 at a fee of \$25.

For further particulars address

C. MATTESON, Haywards, Cal.

DEL CORONADO 2:09¾

CARLOKIN 2:13½

COPA DE ORO 2:07¼

Del Coronado 2:09¾

Reg. No. 45122. By McKinney 2:11¼, dam Johanna Treat by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles, Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13½

Reg. No. 36458. By McKinney 2:11¼, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07¼

By Nutwood Wilkes 2:16¼, dam Atherine 2:16¼ by Patron 2:16¼ (son of Pancoast 2:13¼ and Beatrice, dam of Prodigal 2:16¼); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3½ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27¼ by Dawn 2:18¼. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

**Speed Under
the Watch.**

**The Greatest of
all Spring Sales.**

The Great BLUE RIBBON SALE CLEVELAND, OHIO.

MAY 18 TO 22

MR. CHAS. L. De RYDER, Pleasanton,

Will prepare for the sale and ship any horses that may be consigned to the sale. Mr. De Ryder will assume entire charge, if desired, up to the time horses are sold. His wide acquaintance among Eastern horsemen will assist in selling to good advantage.

Write to him to-day.

CHAS. L. De RYDER, Pleasanton, Cal.

THE DEMAND IN THE EAST FAR SURPASSES THE SUPPLY.

Good horses are in great demand and the supply is scarce and prices rule high. If you have a horse able to win you can get big money for him at the BLUE RIBBON SALE, the greatest of spring sales and the only sale that attracts EASTERN BUYERS—THE MEN THAT PAY BIG MONEY. It will pay you to ship your best.

BEST FOR LEAST MONEY JOHN MIDDLING'S

High Grade
Sulkies
and Carts

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

Send for catalogue and prices to

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

**Most Charming Spot on the
BAY SHORES.**

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

W. G. HOWARD, Manager,

Hotel Belvedere,

Belvedere, California.

Tuttle's Elixir

Shaw, Mgr., 1921 New England Av.** Beware of all others; only temporary relief, if any.

Ray o'Light

2-y-o Rec. 2:13½.
Reg. No. 46270.

By SEARCHLIGHT 2:03¼
King of Race Horses

His dam is Carrie B. 2:18 by Alex. Button 2:26½ (sire of Yolo Maid 2:12, Tom Ryder 2:13½, etc.); second dam Carrie Malone (dam also of Cassiar 2:22, Moorland Lass, dam of Pinkey H. 2:17½), full sister to Klatawah (3) 2:05½, holder of world's record, Chas. Derby 2:20, etc., by Steinway 2:25½; third dam Katy G. (dam of 7 in 2:30, Saraway, sire of 6, and Carrie Malone, dam of two, two dams of two in 2:30), by Electioneer 125; fourth dam Fanny Malone by Niagara; fifth dam Fanny Wickham (20-mile trotter), by Harold; sixth dam by Imp. Trustee; seventh dam by Imp. Sir Charles; eighth dam (dam of the unbeaten race horse Boston), by Ball's Florizel, etc.

Ray o'Light (2) 2:13½ is one of the handsomest as well as best bred young stallions in America. He will be allowed to serve only ten mares this year, at Salinas race track, as he will have to be prepared for his engagements as a three-year-old.

He will make the Season of 1908 at the Low Service Fee of \$40, with usual return privilege. For further particulars address

E. S. TRAIN, Salinas, Cal.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, sprains, windpuffs and all bunches it has no equal."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

W. B. Eddy & Co., Whitehall, N. Y.

MANHATTAN STOCK REDBALL BRAND FOOD

Awarded Gold Medal at California State Fair, 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition. Ask your grocers or dealers for it. Positively cures Colic, Scouring and Indigestion. Manhattan Food Co., C. P. Kertel, Pres., 1001-1003 E. 14th St., Oakland, Cal.

Campbell's EMOLLIC IODOFORM

Gall Remedy

FOR GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.
PRICE—25c, 50c and \$1.00.

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

The Annual Sale of APTOS Three-Year-Olds

Sired by DEXTER PRINCE, Cupid and Aptos Wilkes at
Chase's Pavilion
Monday Evening, May 4, 1908

It is the policy of this farm to sell without reservation, and this lot includes several ready-made race horses. The two fillies by Dexter Prince, out of Dione 2:07½ and Hulda 2:08½, are in themselves attraction enough to top any sale. The carriage horses listed along with the trotters, include single drivers, and two pairs closely matched. They are a sound lot, fearless, good mannered and fit for immediate use. These horses will be at our sale stables ready for inspection **Saturday, May 2nd.** Write for catalogues.

WE HOPE our California horses will be well represented on the North Pacific Circuit this year, as we want to see all the meetings up there successful. The gentlemen whose enterprise has led to the formation of that circuit, and the offering of purses that compare favorably with those given on the Grand Circuit, are entitled to and should receive the support of the California horsemen, for they have done more in recent years to create a demand for the California bred trotter and pacer, than we have ourselves. Last year the \$5,000 stakes at Salem, Oregon, were both won by California owned horses, and in fact the Californians got first, second and third money in both events. This did not discourage the enterprising management of the Oregon State Fair for it is out with two more stakes of the same value and asks the owners from this State to enter and try to win them, assuring everyone that he will be well and fairly treated. The associations at Portland, North Yakima, Spokane, Walla Walla, Bellingham, Everett and Seattle are all in this circuit and while their purses are not quite so large as those at Salem they run from \$400 to \$2,500, and there is not one but gives some \$1,000 purses. There are eight weeks of racing in the North Pacific this season, and we advise every California owner and trainer who wants to race where there is a chance to make something if he wins, to send to Circuit Secretary M. D. Wisdom at Portland, Oregon, for a stake book giving a full list and all the conditions of the purses offered on the North Pacific Fair Circuit. Entries to the stake races close May 25th, and the purse events do not close till August 10th and September 5th. But send and get a stake book. It will give full particulars. Do it now.

A FEATURE that would be a big drawing card for any of our fastest tracks here in California this year, and one that would advertise our horses widely and

well, would be the offering of purses for the breaking of some of the present records. There are a number of these champion records which would be in danger this year if the horses were prepared for tilts against them, and among them are the three-year-old and the four-year-old pacing records. Last year Hy-mettus by Zombro lowered the world's record for three-year-old pacing geldings to 2:08½ and we believe he could this year easily lower the four-year-old gelding record of 2:07 held by W. Wood. In a public trial last year Aerolite by Searchlight did his mile in 2:05½ and could have beaten that time which is the world's three-year-old stallion record held by Klatawah. Aerolite looks now as if he could lower Online's record of 2:04 made as a four-year-old stallion in 1897. Ray O'Light 2:13¼ as a two-year-old is working so well at Salinas this spring that he looks equal to the task of getting the three-year-old pacing record in the fall, and there are several yearlings and two-year-olds fast enough to give promise of being record breakers if prepared for the task. We should like to see good liberal purses hung up by some of the fastest tracks for the three and four-year-olds that would succeed in lowering the present world's records held by pacers of that age, as such contests would not only be very attractive features to a meeting but they would create a renewed interest in horse breeding.

THE KNOCKERS ARE AT WORK in the eastern press busily hammering the big \$50,000 trotting derby advertised by the Readville association. One of the "whacks" they are giving it is aimed at the standing start, and an energetic hammer wielder says the American horses have not been taught to stand. If this is true it is time they went to school and learned this the first and most important lesson in the education of a light harness horse.

WILL IMPROVE MARYSVILLE TRACK.

It is now safe to predict that the Marysville race track will soon witness a return of the life that was her early day portion, during the 60's, 70's and 80's. Since the property has become the city's through the will of Mrs. D. E. Knight, the City Council is custodian of the grounds and it is now up to that body to put it in shape for the amusement loving public.

As the result of the first official visit of the Council to the premises, the track proper will be immediately brought up to a standard visiting horse owners cannot but commend and which the city can be proud of. On the turns, the track will be made faster than ever before by the throwing up of the outside rim. The water supply to insure the proper keeping of the track and baseball diamond will be improved and be extended to the grove of young trees just planted out in the southeastern part of the grounds.

The stables that have given service in the southern portion of the track will be torn down and rebuilt in the space north of the spectator's stand. The fence will be repaired and kept up on all sides of the track until such time as a thick hedge can be grown in its stead. All partition fences will also be straightened up and made presentable.

The judges' stand will probably be moved to the west side of the track in the shadow of the spectators' stand. It will be remodeled so as not to interfere with the view.

A team of horses, proper sprinkling apparatus, all necessary implements and tools and a man in charge are among the things the Council is promising for the track.

NEW HORSE MARKET FOR SAN FRANCISCO.

E. Stewart & Co. have begun the erection of a new horse mart at the corner of Tenth and Bryant street, and will occupy the entire block. They will spend \$15,000 immediately in improvements which will include a sales pavilion 60x185 feet, stalls for 250 horses, a speedway the full length of the block, sections to hold horses shipped in carload lots, and all other conveniences for handling horses on an extensive scale. They will be favored with a side track from the Southern Pacific lines, enabling the firm to load and unload right at the door.

The entire floor surface will be covered with concrete except the speedway, and everything built to conform to the strictest sanitary laws. All the buildings will be made as near fire proof as possible.

The place will be opened on Tuesday, May 12th, with a grand barbecue and rough riding contest to be followed by a big sale of 300 horses, and will doubtless attract horsemen from all parts of the country.

Messrs. E. Stewart & Co. have made a success of the horse sale business and have supplied San Francisco buyers with a majority of the horses in general use in this city since the fire, that were disposed of at auction. The firm has acquired a reputation for prompt and fair dealing that has done much to make it popular with both the buying and the selling public.

SAN FRANCISCO HORSE MARKET.

Right now in the San Francisco market the demand for drafters weighing 1,500 to 1,600 pounds is a little light, but a few top notch animals in this class are selling at \$500 to \$600 a pair. E. Stewart & Co. report the most activity in drivers broke ready for business buggies, and are selling this kind readily at \$125 to \$175, the demand more than equaling the supply. There is also lots of call for stuff weighing 1,250 to 1,400 pounds ready for work in bakery and laundry wagons and are worth \$150 to \$200.

Chase & Co. report any kind of good smooth horse weighing around 1,200 pounds being in as good demand as at any time within a year and sight a top sale of past week for a pair of matched gray geldings weighing 2,400 pounds, at \$300.

Second hand stuff, not too sore for orchard work, are being picked up at \$50 to \$100. The spring demand for sore mares to take to the country to work and breed is about over and the price of this kind now depends on how much work they can do, and if ages are right to return to the city after a year's rest on soft ground.

	Poor to fair.	Good to choice.
Drafters	\$125 to 175	\$175 to 300
Business horses	75 to 100	100 to 200
Delivery wagon horses	100 to 125	125 to 175
Carriage pairs	200 to 400	350 to 600
Saddle horses	75 to 125	150 to 250
Second hand chunks		50 to 125

CHICAGO HORSE MARKET.

(From Breeders' Gazette, April 22.)

Several kinds of stock are not wanted in Chicago market circles now and will not be. Specifically they are greenish, ragged colts and common stuff in general, especially common Southerners. Drafters are selling to much better advantage than recently and are \$5@10 higher. Belated farm orders are making a good market for chunks suited to that outlet, New England buying being in evidence. Heavy feeders are active and bidding for light harness stuff is spirited. Any kind of a good, smooth horse, weighing 1,200 pounds and up, is selling as well as at any time this year. Full-aged, well-broken 1,300 to 1,400-pound chunks elicit prompt bidding, chunks of this size selling to relatively better advantage than heavier horses. Trade is about over for the season on small, common stuff and such had better be kept in the country. A contract for cavalry horses is taking any dark-colored gelding that will fill the bill. Bulk of farm chunks are selling at \$130@140 with a range of \$120@175 for common to choice. Several lots of drivers from Iowa have cleared at \$250@365, filling British and Mexican orders. Heavy drafters are selling mainly at \$190@210 with stall-finished lots at \$225@275. Ice companies are in the market for 1,400@1,600-pound horses at \$165@210 and demand for heavy stock from the East shows considerable vim.

	Poor to fair.	Good to choice.
Drafters	\$125@165	\$170@250
Loggers and feeders	60@160	160@190
Farm mares and small chunks	50@85	95@150
Light drivers	70@120	125@200
Actors and coachers	110@130	140@375
Carriage pairs	225@300	325@675
Western (branded)	15@45	60@100
Mules	75@125	150@200

CRESCUS 2:02¼ SOLD TO RUSSIANS.

A letter to the Breeder and Sportsman from Mr. M. W. Savage, manager and proprietor of the International Stock Food Farm, Minneapolis, states that he has just closed negotiations for the sale of Cresceus 2:02¼, champion trotting stallion of the world, to parties in St. Petersburg, \$25,000 being the price paid for this great horse. A large payment on the amount was cabled to Mr. Savage last week and delivery will be made during the early part of May. Cresceus has held the trotting stallion record since 1901, when he trotted the Columbus, Ohio, track in that time. Since his retirement to the stud he has not been a brilliant success, but has sired nine trotters and one pacer in the list, and one of his sons is a producing sire. The fastest of the get of Cresceus is Crescent Route 2:08¾.

Mr. Savage still owns three noted stallions: Dan Patch 1:55¼, Directum 2:05¼ and Arion 2:07¾, all proven sires.

PORTLAND HORSE SHOW DATE SET.

The Portland Horse Show will be held October 8, 9 and 10. Because the new race track, now under construction by the Country Club, will not be ready for the annual June meeting, which has always been a club feature, it was decided to postpone the race meeting until the new track is ready. The horse show this year will be a month earlier than last.

When President T. S. McGrath last year decided to give Portland its first horse show, there was only a short time in which to get the show together. In spite of the financial flurry the show was a grand success, both socially and financially. This year, with more time to give to the almost countless details, the show should be even a greater success.

NOTES AND NEWS

Go to Chase's Monday night.

The three-year-olds from Aptos Farm will be sold.

There are some extra good ones in this consignment, both trotters and pacers.

Now is the time to buy fillies by Dexter Prince. There will never be any more as that stallion is dead.

The San Francisco Driving Club will hold its first matinee of the season at the stadium track in Golden Gate Park, to-morrow, Sunday, afternoon.

Mr. E. A. Talbot of Reno, Nevada, has shipped a fast standard bred trotting mare from Reno to Santa Clara to be bred to Kinney Lou 2:07½.

Trix, the dam of Aerolite 2:11½ and Mona Wilkes 2:06½, dropped a foal by Star Pointer 1:59½ last week, but we have not learned whether it is a colt or filly.

When a yearling by Star Pointer sold for \$480 at the recent Pleasanton sale it was the remark of many present that the get of this old champion always bring the money.

Crescello, a stallion that is meeting with favor in Maine, is by Cresceus 2:02¼ out of Derby Princess 2:08½ by Chas. Derby, a mare that Millard Sanders took east and raced some years ago.

Diablo Maid, a four-year-old pacing mare by Diablo, worked a half mile over the Woodland track one day last week in 1:06. She is being trained by Det Bigelow and is owned by J. H. Robin of Dixon.

A horseman at Eureka advertises a stallion with the register number of 65,909. As in the last volume of the register the stallions had only reached 45,000, there must be some mistake about this number.

A letter has been received in this city from Gil Curry who reports that his brother, the well known driver Jack Curry, is still in a very precarious condition and there are very slim hopes of his recovery.

The Santa Rosa people are counting on the Breeders' meeting being held there this year and it probably will, although no official announcement has so far been made by the association of the place or date of its meeting.

Highfly 2:24½ by Nearest 2:22 paced a mile last Tuesday over the Brace half-mile track at Santa Clara in 2:12, too easy to talk about. This pacer looks and acts like a 2:05 horse before the returns are all in next fall.

Charley Whitehead worked the great Ray O'Light (2) 2:13½ a mile in 2:15½ last week with the last half in 1:04 and the last quarter in 30¾ seconds. The three-year-old pacer that beats him this year will have to be of championship class.

That fellow who is always telling of his trotter that he can stand flat-footed and get going at a 2:10 clip in fifty feet, will now have a chance to get \$30,000 in one race. Such a horse, if he can keep up the pace, will win first money in that big handicap.

J. W. Zibbell is working a three-year-old Kinney Lou colt at Fresno miles around 2:30. This colt is owned by J. W. Offutt of Petaluma, and his dam is Our Belle by Menlo 2:21¼ by Nutwood 600. Mr. Zibbell has had the colt but two months and thinks very highly of him.

Mr. C. A. Harrison of Seattle will send his mare Miss Cresceus, by Cresceus 2:02¼, dam Venus II 2:11¼, to P. W. Hodges at Pleasanton, who will get her ready to show some of her speed this year, although it is not likely that Mr. Harrison will consent to race her until next season.

Miss Georgie 2:08½ will not race in California after all. Mr. Clark is naming her and Bon Voyage on the Grand Circuit. Miss Georgie is in the 2:07 pace at Detroit and the 2:08 pace at Kalamazoo. Bon Voyage has been named in the 2:11 trot at Detroit and the 2:13 trot at Kalamazoo.

W. G. Durfee will leave Los Angeles about May 20th with the string of trotters and pacers that he expects to race on the Grand and other eastern circuits this year. He will probably ship to Wheaton, Illinois, where his horses will be temporarily quartered and acclimated before being keyed up for the campaign.

Every owner of a good acting trotter that can trot a mile in 2:15 or better, is alive to the fact that his horse will have a chance in the big \$50,000 race at Readville, and there is very liable to be a big list of entries in this event. We hope so, as nothing will help the sport of trotting like a successful exemplification of the handicap system in America.

Fred Hahn's fine mare Red Ruff by Chas. Derby, dropped a fine, strong filly by Bon Voyage (3) 2:12¾ on April 11th. Red Ruff, while never raced, is a very fast trotter, having worked a mile in 2:13 with the last half in 1:03. She met with a slight accident and was retired from training and put to breeding, but could be taken up and given a fast record with a little work.

Budd Doble received this week a letter from Europe asking for a price on Kinney Lou 2:07¾, together with a picture of the horse, description, pedigree, etc. We should hate to see the fastest trotting son of McKinney leave California, but those Europeans are taking many of the best stallions in America and it is a satisfaction to know that they are wise enough to pick out those that will be a credit to their native land.

Aristo 2:08¾ has been named in the \$10,000 Charter Oak Stake for 2:09 class trotters this year. It was thought when this son of Nushagak went through the Old Glory sale last winter and brought a small price, that he was "all in," but he has evidently shown his new owners something of his old form, and if he is in shape when he starts he should make a good showing as he has as much speed as any trotter.

Nate Churchill, who is connected with E. Stewart & Co., sprung a surprise on several of the speedway drivers last Sunday. He hitched the pacer Billy B. to a road cart, and dressed like a countryman went out looking for a brush. Billy B. has a mile in 2:12 to his credit, and Mr. Churchill's weight and a heavy pair of quarter boots seemed to just suit the pacer, and much to the satisfaction of his driver everything they hooked up with during the day was easy for the pair of "Rubes."

Mr. G. B. Blanchard and son Oliver of San Jose are so well pleased with two three-year-old colts they have by Kinney Lou 2:07¾ that they have decided to breed eight standard bred mares to the great son of McKinney this spring. Mr. Blanchard Sr. bred the colt Lou Kinney 47,565 that Budd Doble sold to Charles A. Smith of Phoenix, Arizona, last winter, and his son now owns a three-year-old colt by Kinney Lou, dam by Boodle 2:12½, grandam by Antevolo 2:19½, that his wife takes their children out buggy riding with. He is a handsome chestnut fellow and can trot fast for a colt that has never seen a race track.

Sacramento horsemen are taking great interest in their first matinee of the season which will be given by the Driving Club at Agricultural Park on Decoration day. Every Sunday morning finds several members of the club at the track with their horses, and speed is growing in spite of the dry weather. F. H. Hetz, secretary of the club has a perfect gaited Stam B. colt that he is stepping quarters in 33 and 34 seconds easily and the colt should be equal to a mile in 2:15 this fall barring accidents. The club expects a large number of horses from the clubs at Chico, Davis and Marysville to compete for ribbons at the first matinee.

W. W. Mendenhall, the well known horseman, is seriously ill with blood poisoning at his home in this city. When communicated with the other day in regard to his condition he sent word that he had won many a close heat and was confident he would be well again soon. We sincerely hope so, and trust he will get out soon enough to go to Pleasanton and drive his beautiful horse Charley T. another fast mile before DeRyder ships him east. The last time Mr. Mendenhall was up behind this trotter was two weeks ago, and that day the hand gelding trotted a mile in 2:10½ and did it handily.

Among the really well bred young trotting stallions recently brought to California is Baronteer Todd 47,656, owned by Mr. J. H. Torrey of Long Beach. This colt is by Todd "the greatest sire of early speed for his age," dam Bonbon, dam of four in the list, by the great futurity winning sire Baron Wilkes, second dam Mary A. Whitney 2:28, dam of five and grandam of five in the list, by Volunteer 55, third dam Peggy Slender dam of two in the list. Mr. Torrey asks: "Crossing this fellow on the Zombro, Zolock and McKinney mares in this State, what will the harvest be?" That is easy to answer: Speed and race winning qualities.

Patti McKinney, owned by Charles W. Winter of Alhambra, Cal., dropped a fine colt on April 17th, by Redlac 2:07½. The colt is marked very much like his sire. Mr. Winter had a streak of bad luck last November, as his fine stallion Andy McKinney, another horse and two cows died within one week from anthrax, all the animals taking the disease from some straw that he had purchased. He is confident the straw was infected with the germs of the disease as two colts which did not have access to it were not affected. The cause of the death of the animals was only found when Drs. Knowland and Boucher of Pasadena made post mortem examinations of the bodies. Mr. Winter writes that his two-year-old by Direcho out of Patti McKinney will be handled by C. E. Sanford at Agricultural Park track next month. This colt is bay, stands 15.2 and shows lots of speed at the trot. He trotted a quarter in 43 seconds when twelve months old.

Jack Axworthy 2, 2:15¼ by Axworthy 2:15½, out of My Trinket, by Stamboul 2:07½, second dam Trinket 2:14, is now owned by John McGuire, the well-known New York dealer. From the speed he showed recently in a brush on the speedway, he gives indications of coming back to his great form displayed when he took his record as a two-year-old at Lexington, Ky.

The Rural Spirit of Portland says: Work is progressing rapidly on the new race track in this city and when completed will be the most picturesque setting of any race track or fair grounds on the coast. Horse stalls are now being constructed and 160 of them will be completed by June first, at which time it is hoped the track will be finished.

Why could not the Pacific Coast Trotting Horse Breeders' Association get up a pacing derby for a purse of \$10,000, on the plan of the big Readville handicap. Such a race would permit Sir John S. 2:04½, Bonnie Steinway 2:06¼, Mona Wilkes 2:06½ and Inferlotta 2:04½ to get a race with a chance to win a nice big sum, whereas according to the present outlook they will all have to leave California to get any racing this year.

It looks as if the Pacific Coast circuit is about completed. The meeting at Oakland, the Breeders' meeting, and the California State Fair seem to be about the extent of the circuit meetings to be held before the horses are shipped north to Oregon. We have hopes that a splendid circuit of fairs and race meetings will be held in the San Joaquin Valley however, after the State Fair.

L. B. Daniels, the owner of Moormont, writes that work is progressing rapidly on the buildings for the new track at Chico and that when completed it will be one of the best race tracks on the Coast. Mr. Daniels is working fifteen head, Barney Simpson has seven and Joe Gamell has four head, and they are all doing well. The inside rail is up and they have commenced on the outside fence enclosing the track. The tank house and forty-five stalls, pumping plant, etc., are completed and arrangements have been made to start building the grand stand about the 15th of next month.

Budd Doble has read the conditions of Readville's \$50,000 handicap trot and says this race should get the biggest list of entries of any big purse ever opened. He believes it will do more for the good of trotting racing than anything yet devised in America, and looks for it to be a great success and become one of the big fixed events of future years. When a trotter has the opportunity annually to win a fortune for its owner in one race, in which it can be entered regardless of any record it may have, Mr. Doble says the good days of the business will again have arrived.

The road drivers and owners of trotting and pacing horses in Oakland are hoping to have a half-mile track built in the new park at the head of Lake Merritt in that city which is now being constructed. The Board of Public Works has been petitioned to lay out a track of this description and the City Council has already given its approval of the project. The location is an ideal one, protected from the winds and within easy reach from all parts of Oakland, Alameda and Berkeley by drives and by car lines. If the track is laid out and put in shape for speeding over, it will be one of the most popular resorts around the bay for those who enjoy driving trotters or pacers at speed.

There is in our collection of photographs a picture of the stallion B. S. Dillon by Sidney Dillon, taken at Santa Rosa several years ago. In this picture George Ramage is up behind the horse, and when the snap was made he remarked to the Breeder and Sportsman's representative: "This fellow has two-minute speed and will show it some day." Ramage's remark is recalled by the following from the Chicago Horse Review's Boston letter: "The pacing gelding B. S. Dillon 2:14¼, owned by T. A. Wonsloe, and driven by Fred Eldredge, lowered the quarter-mile pacing record of the Franklin Field speedway from 29¾ to 29½ seconds in the weekly matinee of the Dorchester Driving Club this afternoon."

Our front page illustration this week is a nice picture of the McKinney trotting stallion Oseto 2:13½, sire of the sensational matinee gelding Regalo 2:09 that Will Durfee has named in the M. & M. and other big stakes on the Grand Circuit this year. Oseto is now owned by Mr. C. E. Johnson, a lawyer of Bishop, Inyo County, but as there are very few if any trotting bred mares in that locality he has had and will have little opportunity in the stud. Oseto's record is 2:13½ made at Woodland in 1900 when he was eight years old. In that race he defeated a field of five others, and his record was made in the third heat. Oseto is standard and registered. He was sired by McKinney, dam Twilight by Othello 16057, (son of Sultan and a full sister to Beautiful Bells) grandam Little Skip by Odd Fellow 15265 (son of Echo, he by Hambletonian 10). It will be seen that Oseto is well bred, and should Regalo be a sensational trotter this year, there will be a demand for the get of this horse.

Drink Jackson's Napa Soda.

SECOND PAYMENTS IN LOS ANGELES STAKES.

Secretary Snowden, of Los Angeles reports the following as having made second payments April 1st on foals entered in the stakes of the California Breeders Association:

SECOND PAYMENT OF THE CALIFORNIA BREEDERS' STAKES.

Bay filly by Kinney Lou-Electress Wilkes; H. H. Helman.
Black colt by Strathway-Johanna Treat; J. C. Wallace.
Gray colt by Almaden-May Belle Blandie; M. L. Lusk.
Brown foal by Zombro-Arabella; S. C. Henderson.
Black filly by Direcho-Scrappy Nell; John W. Snowden.
Bay colt by Stanford McKinney-Donnatine; George W. Warlow.
Brown filly by Athasham-Lusterine; George W. Warlow.
Bay colt by Athasham-Sextelle; George W. Warlow.
Black colt by Stamboulette-Strathdie; George W. Warlow.
Black colt by Athadon-Cora Wickersham; George W. Warlow.
Bay filly by Athasham-Bessie; Chester H. Warlow.
Bay filly by Loring-Electa; W. H. Samson.
Bay foal by Star Pointer-Roda Fay; D. B. Mosher.
Sorrel by Stoneway-Irene; O. C. Higgins.
Bay filly by Del Norte-Lauretia; Thomas H. Brents.
Brown colt by Senator H.-Mattie Norte; Thomas H. Brents.
Bay filly by Wayland W.-Hattie Fowler; S. B. Wright.
Bay colt by Star Pointer-Trix; J. W. Marshall.
Black colt by Zolock-Madeline; J. W. Marshall.
Bay filly by Demonio-Louanna; J. W. Marshall.
Sorrel filly by Cresco Wilks-La Belle Altamont; I. L. Borden.
Bay filly by Bon Voyage-Hawthorne; William Garland.
Bay foal Bon Voyage, La Moscovita; L. Richardson.
Brown filly by Prince Ansel-Majella B.; Alex Brown.
Bay filly by Prince Ansel-Daisy B.; Alex Brown.
Chestnut filly by Prince Ansel-Mamie Martin; Alex Brown.
Bay filly by Nushagak-Kinocha; Alex Brown.
Bay filly by El Rio Rey-Josie D.; Alex Brown.
Bay colt by Bon Voyage-Reina Del Diablo; W. A. Clark Jr.
Brown colt by Bon Voyage-She; W. A. Clark Jr.
Brown colt by Bon Voyage-Ruth Mary; Ted Hayes.
Bay colt by Bon Voyage-Lucy May; W. A. Clark Jr.
Bay colt by Bon Voyage-Welladay; Frank E. Alley.
Bay filly by Bon Voyage-Mabel Wynn; Frank E. Alley.
Bay colt by Exchange-Thirza; H. P. Herman.
Bay foal by Star Pointer-Frances C.; E. M. Conroy.
Bay filly by Nutwood Wilkes-Dot McKinney; W. T. Sesnon.
Black colt by Coronado-Queen Woolsey; E. E. Sherwood.
Bay filly by Zombro-Manella; J. H. Torrey.
Bay filly by Geo. W. McKinney-Belle; Hemet Livery Stable.
Bay colt by Geo. W. McKinney-Lady Woolsey; Hemet Livery Stable.
Bay filly by Star Pointer-Effie Logan; J. C. Montgomery.
Bay filly Athadon-Nugget; D. L. Bachant.
Bay filly Direcho-Lady Madison; Fred E. Ward.
Sorrel filly by Lynwood W.-Maud Fowler; G. A. Pounder.
Bay foal by Zombro-Lady S.; J. Walker.
Bay foal by Direcho-Lassie; J. Walker.
Black colt by Zombro-Jinny; A. H. Belt.
Brown foal by California Guide-Mable; F. B. Stockdale.
Black foal by Radium-Lady Stoneway; George W. Kirkman.
Bay colt by Judge Dillon-Mowitskey; Mrs. L. J. Hastings.
Sorrel foal by Stoneway-Vivan; J. A. Kirkman.
Bay foal by Bon Voyage-The Silver Bell; L. H. Todhunter.
Brown foal by Bon Voyage-Loma B.; L. H. Todhunter.
Bay foal by Zombro-Florette; L. H. Todhunter.
Black foal by Coronado-Bonnie-Ailse; J. A. Fairchilds.
Bay colt by Zombro-La Belle 2d; Valencia Stock Farm.
Brown colt by Zombro-Puckachee; Valencia Stock Farm.
Bay filly by Amado-Rosedrop; Valencia Stock Farm.
Bay filly by Direcho-Lady L.; Frank B. Long.
Chestnut foal by Diablo-Bell; John Suglian.
Dunn filly by Del Coronado.....; J. P. Crosby.
Bay colt by Palite-Lorna Doone; E. D. Dudley.
Chestnut filly by El Rio Ray-Everette; Charles Marley.

SECOND PAYMENT OF THE CANFIELD STAKES.

Bay colt by Iran Alto-Beautiful Girl; H. S. Hogo-boom.
Brown colt by Zombro-Athalene; M. B. Mosher.

Bay filly by Bon Voyage-Hawthorne; William Garland.
Brown colt by Cedric Mac-Concha; W. C. McCully.
Bay colt by Star Pointer-Trix; J. W. Marshall.
Black colt by Zolock-Madeline; J. W. Marshall.
Bay filly by Demonio-Louanna; J. W. Marshall.
Bay foal by Star Pointer-Roda Fay; D. B. Mosher.
Bay filly by Athasham-Bessie; Chester H. Warlow.
Black filly by Direcho-Scrappy Nell; J. W. Snowden.
Brown filly by Adjutant-Connie; Robert T. Curtis.
Chestnut filly by Strathway-Bonnie Red; Thomas Broadnax.
Chestnut filly by Diablo-Bell; John Suglian.
Black colt by Stanford McKinney-Narcola; S. E. Williamson.
Bay colt by Stanford McKinney-Donnatine; George L. Warlow.
Brown filly by Athasham-Lusterine; George L. Warlow.
Bay colt by Athasham-Sextelle; George L. Warlow.
Black colt by Stamboulette-Strathalie; George L. Warlow.
Bay colt by Athadon-Cora Wickersham; George L. Warlow.
Chestnut filly by El Rio Rey-Everette; Charles Marley.
Bay colt by Palite-Laura Doone; E. D. Dudley.
Bay colt by Zombro-La Belle 2d; Valencia Stock Farm.
Brown colt by Zombro-Puckachee; Valencia Stock Farm.
Gray colt by Dalha-Patti McKinney; Charles W. Winter.
Bay colt by Oosoola-Sallie Miles; T. N. Goldsmith.
Bay filly by Nutwood Wilkes-Twenty Third; C. H. Williams.
Sorrel by Lynwood W.-Maud Fowler; G. A. Pounder.
Bay foal by Bon Voyage-LaMoscovita; L. Richardson.
Bay filly by Direcho-Lady Madison; F. E. Ward.
Bay filly by Athadon-Nugget; D. L. Bachant.
Brown filly by Mountain Boy-Miss Benton; R. W. Scott.
Black colt by Coronado-Queen Woolsey; E. E. Sherwood.
Black colt by Nushagak-Advosta; M. C. Keefer.
Brown colt by Bonnie Direct-Wanda 2d; Frank H. Burke.
Bay colt by Zolock-Wanda; Frank H. Burke.
Bay colt by Zolock-Lady Belle Isle; Frank H. Burke.
Chestnut filly by Walter Barker-Dixie W.; C. A. Canfield.
Chestnut filly by Walter Barker-Cleo; C. A. Canfield.
Brown filly by Walter Barker-Sue; C. A. Canfield.

SECOND PAYMENT OF THE FUTURITY STAKES NO. 1.

Electress Wilkes bred to Alconda Jay; H. H. Helman.
Mary Chimes bred to Strathway; Thomas Broadenax.
Lucy B. bred to Prince Ansel; C. B. Bigelow.
Zaya bred to Zombro; Dana Perkins.
Madline S. bred to Sir John S.; John Renatti.
Elisa S. bred to Bon Voyage; W. L. Vance.
Mollie McCune bred to Sir John S.; W. L. Vance.
Eralut bred to Redlac; William Manskee.
Maud Stambourect bred to Greco B.; Frank E. Alley.
Miss Hanson bred to Zolock; Fred Kline.
Grace Cole bred to Arner; Harry D. Brown.
Mascot bred to Knott McKinney 44833; C. H. Williams.
Alta Nola bred to Searchlight Rex; C. H. Williams.
Nana C. bred to Sky Pointer Jr.; Charles Middleton.
The Silver Bell bred to Bon Voyage; L. H. Todhunter.
Loma B. bred to Bon Voyage; L. H. Todhunter.
Zomitalla bred to Bon Voyage; L. H. Todhunter.
Janet B. bred to Zombro; L. H. Todhunter.
Patti McKinney bred to Redlac; Charles W. Winter.
Lou bred to Monicrat; F. P. Ogden.
Manila bred to Zolock; J. H. Torrey.
Elloretta bred to Zolock; J. H. Torrey.
Lady Woolsey bred to Geo. W. McKinney; Hemet Livery Stables.
Nealy W. bred to On Stanley; Hemet Livery Stables.
Belle bred to Geo. W. McKinney; Hemet Livery Stables.
The Bloom bred to Zombro; C. A. Spencer.
Advosta bred to Prince Ansel; M. C. Keefer.
Annie McKinney bred to Alconda Jay; M. C. Keefer.
Dimontes bred to Zombro; M. C. Keefer.
Moluhka bred to Coronado; E. F. Parker.
Elizabeth S. bred to Zombro; L. L. Pudernaugh.
Frances C. bred to Star Pointer; E. M. Conroy.
Tessie Tilden bred to Star Pointer; George W. Putnam.
Welladay bred to Bon Voyage; Frank E. Alley.
Lady Lexmo bred to Diawood; Frank E. Alley.
Diavola bred to Zolock; Frank E. Alley.
St. Gertrude bred to Palo King; Miss B. Fitzgerald.
Athene bred to Bon Voyage; A. Morris Fosdick.
Rose Drop bred to Ambush; Valencia Stock Farm.
Lady L. bred to Zolock; Frank B. Long.
Inaugurrita bred to Redlac; I. W. Hazelett.

Pelee bred to Raymon; Ralph A. Fuller.
Bay Queen bred to Murray M.; W. A. Glasscock.
Lucy May bred to Bon Voyage; William Garland.
Bon Mot bred to Moko; W. A. Clark Jr.
Majella N. bred to Prince Ansel; Alex Brown.
Daisy B. bred to Prince Ansel; Alex Brown.
Lottie bred to Prince Ansel; Alex Brown.
Lauress bred to Prince Ansel; Alex Brown.
Serpolo bred to Prince Ansel; Alex Brown.
Josie D. bred to Prince Ansel; Alex Brown.
Viola bred to Prince Ansel; Alex Brown.
Mamie Elizabeth bred to Walter Barker; C. A. Canfield.
Dixie W. bred to Redlac; C. A. Canfield.
Cleo bred to Walter Barker; C. A. Canfield.
Sue bred to Walter Barker; C. A. Canfield.
Maggie bred to Iran Alto; T. B. Gibson.
Lady B. bred to Turban; W. A. Hunter.
Wanda 2d bred to Bon Voyage; Frank H. Burke.
Lady Belle Isle bred to Bonnie Direct; Frank H. Burke.
Foxey bred to Tom Smith; John Suglian.
Miss Sidney Dillon bred to Bon Voyage; J. F. Davis.
Nora D. bred to Bon Voyage; J. N. Anderson.
Hawthorne bred to Redlac; William Garland.
Allie Cresco bred to Barney Barnato; I. L. Borden.
La Belle Altamont bred to Barney Barnato; I. L. Borden.
Trix bred to Star Pointer; J. W. Marshall.
Bee Sterling bred to Palite; E. D. Dudley.
Lorna Doone bred to Julia Verne; E. D. Dudley.
Paprika bred to Palite; E. D. Dudley.
Reina Del Norte bred to Coronado; Thomas H. Brents.
Ruth bred to Herbert Dillion; F. N. Frary.
Bell Pointer bred to Del Coronado; A. R. Fraser.
Lady Alexandria bred to Del Coronado; A. R. Fraser.
Beatrice Zombro bred to Owynex; Mrs. L. R. Bonfilio.
Lulu Wilks bred to Del Coronado; R. F. Aguilar.
Swift Bird bred to Del Coronado; Charles F. Silva.
Queen S. bred to Del Coronado; Charles F. Silva.
Lady Allen bred to Tom Smith; A. Allen.
Rita H. bred to Star Pointer; Byron Erkenbrecher.
Cora Wickersham bred to Athadon; George L. Warlow.
Narcola bred to Stanford McKinney; George L. Warlow.
Sextelle bred to Stanford McKinney; George L. Warlow.
Lusterine bred to Stanford McKinney; George L. Warlow.
Santanette bred to Baron of Glenwood; George L. Warlow.
Bessie bred to Athadon; Chester H. Warlow.
Carrie bred to Stoneway; George W. Kirkman.
Sweet Way bred to Radium; George W. Kirkman.
Happy Maid bred to Zolock; Thomas Holmes.
Lady Caretta bred to Prince Ansel; Cary Montgomery.
Lassie bred to Red McK.; J. Walker.
Grace McK. bred to Direcho; William Morgan.
Sona bred to Redlac; William Morgan.
Selda bred to California Guide; F. B. Stockdale.
Magnet bred to R. Ambush; G. W. Bonnell.
Mrs. Weller bred to Iran Alto; James W. Rae.
Lady Hackett bred to Coronado; R. L. Draper.
Lady B. bred to McKinney; W. R. Johnson.
Maud Fowler bred to Lynwood W.; S. B. Wright.

ANSWERS TO CORRESPONDENCE.

C. S., St. Helena.—John F. Payne 1779, was sired by Bald Chief 1776, he by Bay Chief, a son of Mambrino Chief 11. The dam of John F. Payne was the famous old brood mare Dolly, dam of Director 2:17, Czarina 2:21, Thorndale 2:22½, Onward 2:25½, etc. Dolly was by Mambrino Chief II out of Fanny by Ben Franklin, pacer, son of Hazrack, pacer. Her grandam was Nance by Saxe Welmar, son of Sir Archy, and her great grandam a chestnut pacing mare whose pedigree was untraced.

F. H. M., Sacramento.—Grant's Abdallah, pacer, record 2:10½ was by Abdallah Bruce out of Martha by Hoosier Jim. Abdallah Bruce was by Bruceton out of Trotting Sister (dam of Nephew 1220, etc.) by Abdallah 15. There are two trotting mares called Jean. One having a record of 2:12¾, foaled 1902, is by Heir-at-Law, dam Grace Medium by Rupert Medium 2:160; the other has a record of 2:11¼, was foaled 1895, and is by Ellerslie Wilkes out of Nadine by Mambrino Russell. We have no means of ascertaining whether either of these mares were ever owned by Mr. Stewart of Kansas City.

D. L. Meyer, Maui, H. I.—The horse Parnell, sent from San Francisco to the Islands last October, had no record so far as we know, nor was he ever raced. We do not know his pedigree.

Manager H., 4, 2:09½, the Illinois pacing colt who became sensational through his speed not only, but the misrepresentations made about his age by his breeder, as well, is being staked on the Grand Circuit.

Zomalta, trial 2:12½ trotting, last half in 1:03½. The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feet. Call on or address S. O. Fesler, Pleasanton, Cal. *

A REPLY FROM MR. LAYNG.

Editor Breeder and Sportsman: In the issue of your valued paper published March 21st, there appeared an article of mine entitled: "Thoroughbred Sires Not Wanted." Since its appearance I have failed to observe, in any of the daily newspapers or turf journals which had, before its publication, advanced opposite views, a single line showing that my article contained anything but facts. I was astonished, therefore, on reading in your issue of April 11th an editorial which to say the least was unwarranted, unmerited and not written in any spirit of fairness to me, for, in your quotation of a paragraph relating to the late Senator Stanford, his methods, and what he accomplished, you selected a few lines from my communication which you deemed strong enough to write a two-column article on, and failed to publish that portion which especially called attention to his unsuccessful efforts. Hence, rather than have your readers think that in my article I "made statements of entirely too extravagant a nature, statements that cannot be proven by the facts or the records pertaining to the case," I believe it is no more than just to me in order that I may vindicate myself of these and other charges in your criticism that you publish the whole paragraph just as it appeared, quoting that portion which you omitted:

The late Senator Leland Stanford must have expended \$250,000 to get a Palo Alto 2:08½, a very game trotter, although his legs gave way in training. Yet he never sired a trotter that could come within five seconds of his record. "Sunol 2:08½, the ex-queen of the turf and a failure in the stud with one exception, I understand, a filly in Georgia that is not like the rest of the produce of this nervous, giddy trotter, a cat-hampered knee knocker of the first class. Expressive 2:12½ was another and the best three-year-old of her day, but her Eastern campaign crippled her and when put to breeding has proven a dismal failure. Can any of the farmers of New York and Kentucky afford to spend as much money as this splendid judge and close student and get such an insignificant return? Besides he owned two of the greatest gait-controlling stallions in America, Electioneer and Gen. Benton." He lived to see how uncertain were the results of introducing so much thoroughbred blood into the ranks of his broodmares. If he could have lived twenty years longer and bred some of the pure bred trotting stallions to those mares, he might have accomplished something; but twenty years is a long time, and the probabilities are he would have died firmly convinced that he had been misled and had sunk a fortune to find that he was on a "barren lead."

Neither in this excerpt nor in any part of the whole article is there a statement "that should be left unsaid or unwritten," for every one of them is fully justified by facts, as I will show. Surely you, nor no one else, can believe for a moment that I want to "belittle the work of the early breeders whose time, money, and brains were used to build up and perfect the grand and useful breed now known as the standard bred." In saying Senator Stanford must have expended that amount to get a Palo Alto, if you will only consider that he paid the very highest prices for the best thoroughbred mares in 1876 and 1877, bred most of them to the Palo Alto stallions and employed scores of men to care for and develop the produce from the time they were yearlings up to the time in 1892 when Palo Alto was made a champion, I do not think the figure I mentioned covered the expenses. When Palo Alto achieved that fame, Senator Stanford stopped developing so many half thoroughbreds and quarter thoroughbreds on the farm. I quoted his name and his costly experiments, however, not in the manner you imply, but as a lesson to owners of trotting mares not to breed them to thoroughbred stallions. Senator Stanford was a deep student of blood lines and had the most original ideas of developing speed of any man in the world. His experiments in breeding to thoroughbreds proved costly and furnish instructive lessons for the horse breeders of the present day. Since Palo Alto stock farm has ceased as a stock farm to exist, I doubt very much if there is another in America that has as many as three thoroughbreds that are being bred to standard trotting stallions. You know the reason why, and so does every intelligent horseman in the United States.

Senator Stanford was as firm an advocate of the belief that "Thoroughbred Stallions Were Not Wanted" to improve the trotting horse as I am, but he experimented and paid dearly for his lesson. He bred the thoroughbreds Don Victor by Williamson's Belmont; Shannon, the beautifully formed son of Monday, and also the great four-mile race horse Wildidle to some of his trotting bred mares and with all the appliances and skill of the best trainers on the farm none of the produce could trot a three-minute clip. He gave up that system of breeding at once. He had enough. Your reasons why he bred to thoroughbreds are very true, but long before he passed away his enthusiasm on this subject seemed to vanish.

No one was, or is, a greater champion of Senator Leland Stanford than I. In every article I ever wrote I claimed he was the greatest man that ever engaged in the trotting horse industry, greatest from every point of view. He sent hundreds of horses East every year to be sold and his expenses for maintaining Palo Alto after the buildings were erected in 1875 until his sudden death in 1893 were from \$85,000 to \$90,000 per year. No man was his equal, no man was ever so liberal and eager to pay large sums of money to accomplish what he undertook. His pet theory about the introduction of thoroughbred blood and the development of speed in the trotter received its greatest and strongest endorsement when Palo Alto trotted that memorable mile in 2:08½ on the kite-shaped track in Stockton and was crowned "King

of Trotting Stallions." I reported that and nearly all the other great events, including Arion's great performance, during that year for the "Breeder and Sportsman" and the daily newspapers, and I believe that what I wrote then and am about to write now will prove that I am not one who is in the habit of writing inaccurately. Palo Alto was one of the greatest and gamest horses in the world, as a trotter. He only lived nine years, yet he has to his credit as a sire fourteen trotters and two pacers in the list, and his opportunities were excellent; he was bred to the very best speed-producing mares on Palo Alto, such as: Beautiful Bells, Elaine, Manette, Ashby, Elsie, Clarabel, Nelly Benton, Lula Wilkes, Mattie, Sontag Dixie, Sprite, Waxana, America, American Girl, Edith, Lulaneer, Mano, May Day, Sonnet, Sontag Mohawk, Telie, Lorita, Gazella, Gertie, Galena, etc. His full brother, Altivo 2:18, was bred to a number of mares there and then sent over to the Aptos Stock Farm and used in the stud there. Surely Senator Stanford would not have had to wait twenty years (fifteen would do) to see that he was on a "barren lead" if he kept a record of what all his sires and dams had done, for Altivo 2:18 has, at this writing, just four trotters and one pacer to his credit; Paola 2:30, another brother, has one trotter; Pacheco, another brother, has none; Diavolo, another brother, has none; Winna S., a sister, has none, while Gertrude Russell 2:23½ has two. By all the laws of heredity, according to the believers in this kind of breeding, this Electioneer mare should prove a greater speed-producing brood mare than Alma Mater (dam of eight in the list), for Dame Winnie (another great brood mare) was her dam, and she was by Planet (full brother to Exchequer, sire of Lucille 2:21 and Rigolette 2:22) out of Liz Mardis by Imported Glencoe, and her next dam, Fanny G., by Imported Margrave, was the grandam of Alma Mater.

One typographical error crept into my article which you have, I am pleased to say, corrected. Iran Alto's record is 2:12½, he is a great sire and he ought to be, for he is by Palo Alto 2:08½, out of the champion three-year-old trotter Elaine 2:20, one of the sweetest and purest gaited mares I ever saw. She is a great brood mare and her dam, Green Mountain Maid, produced Electioneer and nine others in the list; hence, Iran Alto traces to this, one of the greatest of brood mares twice. Every colt sired by Palo Alto 2:08½ should, if kept entire, prove to be a sire; every daughter should have a record or be a producer of speed, beauty and gameness, for his sons and daughters were nearly all out of famous brood mares.

Before going further, I notice in your article you refer to Sontag Dixie, but you do not mention the fact that her sire was by a horse that had for a sire and dam holders of trotting records of 2:31. Sontag Dixie had two crosses to thoroughbreds, back of that her pedigree is lost. If you had carefully read my article before mentioning the trotters Sweet Marie 2:02 or Lou Dillon 1:58½, you would have noticed that it covers these and similar cases. The dam of the former is not in the list of great brood mares yet, while Lou Milton comes into the list of 5684 against the 124 having close infusions of thoroughbred blood. As Venus, the dam of Sidney Dillon, is claimed to be by Capt. Webster, there was not as much known thoroughbred in him as there was in Venture 2:27½. I am a true believer in thoroughbred blood in the trotter on the material side, at least three generations away, and tracing to the right strain. Electioneer and his sons were decided failures when bred to mares that did not trace to Planet, Lexington, Williamson's Belmont, Imp. Hercules, Boston, Wildidle and Grey Eagle. Knowing this, in 1891, 1892, and 1893, Senator Stanford took the following mares which he had been breeding to his trotting stallions and sent them to be bred to his thoroughbred sires: Imp. Ceres, Imp. Brutus, Imp. Bridget, Evangeline, Fannie Lewis, Kathairon, Mozelle, Piney Lewis, Miss Rowat, Marigold, Livana, Lena, Hattie Hawthorne, Helpmate, Geneva and Fostress.

He was a man of broad and liberal ideas. In all my interviews with him, I found he was ever ready to listen, but, like all lawyers, he wanted to probe each fact to the bottom, and, if he saw there was any merit in it, adopted it instantly. I never spoke to a man who could comprehend a situation quicker or grasp a new thought with more avidity. So, to prove my statement that "had he lived to see how uncertain were the results of introducing so much thoroughbred blood in the trotter, and that if he could have lived twenty years longer and bred some pure bred stallions to his mares he might have accomplished something," I most respectfully refer you to the files of the "Breeder and Sportsman." In the issue of November 28, 1891 (nearly seventeen years ago), you will see my editorial on this subject. I do not want to be egotistical, but your criticism compels me to quote this. In that article I gave the names, breeding and ages of eighty-three brood mares then on the Palo Alto Stock Farm, whose ages ranged from ten to twenty-eight years, and these mares had been bred annually to the stallions there from the time the youngest were three years old and the others were brought to the farm sixteen years before! None of these mares had a record, neither had they produced a 2:30 performer, their sons had never sired one nor their daughters produced any in the 2:30 list! I called attention to the fact that Electioneer and the other Palo Alto stallions had been wasted on these mares and strongly advised Senator Stanford to sell every one and get mares by Guy Wilkes 2:15½, Director 2:17, Sidney 2:19½, Steinyway 2:25½, Alcantara 2:23, Onward 2:25, Alcyone

2:27, Simmons 2:28, Pilot Medium, or any of the leading sires of that day, and added: "It looks as if our great California sires were unheard of on Palo Alto!" As soon as this bold arraignment appeared Senator Stanford sent for me and asked where my authority was for such a statement. I replied: "From your annual stock farm catalogues." I then gave him my reasons for publishing that article and advised him to hold a sale in the spring and get rid of them. I also said that a number of the best thoroughbred mares there would do better if they were bred to the thoroughbred sires instead of the trotting stallions. He took out a catalogue and I showed him what I meant. He thanked me for the interest I had taken in the farm and gave me a very pressing invitation to come to Palo Alto. That night he visited the farm, and, with his brother-in-law, Mr. Ariel Lathrop, and Superintendent Charles Marvin, compared my statement with the books. Senator Stanford at once gave orders that Charles Chase of the well-known auctioneering firm of Killip & Co. be sent for immediately to complete arrangements to hold a sale. Catalogues were issued, and on February 24, 1892, fifty-six of the mares were sold in this city. A large crowd attended, but Messrs. Henry and Ira Pierce of the Santa Rosa Stock Farm were the heaviest buyers. I stood at their side when the following mares were sold to them: Ceta, Ladywell, Belle Isle, Juanita, Nina, Diva, Nettie Benton, Genie, Effie, Memento, Isabelle, Floweret and Captive. I remember how Mr. H. Pierce smiled when Daniel J. Murphy of Milpitas outbid him for the mare Myrtha. Frank H. Burke, D. McCarty, H. Corey, James A. Dustin, John McCord, F. C. Lusk and J. B. Iverson were also among the buyers. It was the first big Palo Alto auction sale ever held in California. The following year some forty-eight others (some with records) were also sold, and these mares and their daughters, when bred to our California sires, produced many celebrated performers.

For many years Senator Stanford had been sending hundreds of horses to the sales ring in New York City, and it was about this time he learned that the half thoroughbreds were not sought after; in fact, it was hard to find buyers for them. He saw that horsemen were seeking trotting-bred ones for campaigning and breeding purposes and were willing to pay high prices for them. He perceived that his vast expenditures of money to prove his theory regarding the improvement of the trotting breed by mating standard bred stallions with thoroughbred and half thoroughbred mares was not acceptable to the best educated horsemen who fixed the prices at public and private sales. Besides, his own experience was convincing. The highest price he had ever received for a half thoroughbred, Ansel 2:20, was \$20,000, and that was from the prince of buyers, Mr. Robert Bonner, but he realized over \$400,000 from the sale of the produce of the trotting-bred mare Beautiful Bells 2:29½; he got \$125,000 for the two-year-old champion Arion 2:10½; \$50,000 for Bell Boy; \$12,000 for May King 2:20; \$16,000 for Norval 2:17½. Anteeo 2:16½, another Electioneer, sold for \$65,000, and Antevolo 2:19½, his brother, brought \$25,000, while Axtell had just been sold for \$105,000. These sales were so vividly impressed upon his memory that he decided to make a radical change in his breeding operations before long. He realized he could not teach people to believe what their eyes and the records taught them was not so, and he acknowledged he had been mistaken before he died.

In 1891, at the time I wrote that editorial, he had the following stallions standing at Palo Alto: Half thoroughbreds—Palo Alto 2:08½, in 1908 (seventeen years afterwards) he has just sixteen 2:30 performers to his credit; Whips 2:27½, 11; Lone Pine 2:30, none; Azmoor 2:20½, 11; Hugo 2:27½, 1; Amigo 2:16½, none; Lottery, 1; Truman 2:12, 2; and Good Gift, 2. Out of half thoroughbred mares he had—Electricity 2:17½, 18; Norris 2:22½, 6; Langton 2:21½, none; and Conrad, 6. Out of trotting-bred mares he had—Advertiser 2:16½, 17; Piedmont 2:17½, 25; Wildnut, 20; Bernal 2:16, 11; Wild Boy, 5; Benefit, 2; Gen. Beverly, 2; Alban, none; Liberty, none; and MacBenton, none. Mendocino 2:19½ at that time was making a season in Glenn county, he has just 13 to his credit. Now, Mr. Editor, do you think this showing would have pleased Senator Stanford had he lived, knowing that nearly all these stallions were sent East and were widely advertised and stood for public service?

Before he died so suddenly in June, 1893, his favorite Palo Alto 2:08½ passed away; he then decided to breed all his best mares to Advertiser 2:16½, having refused a cash offer of \$75,000 for this trotting-bred stallion. During the latter part of May, of that year, he heard that Samuel Gamble, the well-known horseman, who I consider the best judge of trotting stock in California and one of the best in the United States, was going East. He commissioned Mr. Gamble to go to Miller & Sibley's Stock Farm in Franklin, Pennsylvania, and select for him the choicest trotting-bred mares there and ship them to Palo Alto to be bred to Advertiser 2:16½. He preferred Wilkes mares, and those that traced to Clara, Alma Mater, Bicara, Venus, or any of the other famous brood mares, for on his farm he had none that traced to them, neither had he any that traced to the many fashionable and famous Mambrino Patchen mares. But his death put a check to this. If he had lived to carry out his ideas he would, in time, retrieve the fortune he sank in experimenting on a plan that all other horsemen in America had given up as a "barren lead."

I will close, leaving your readers to judge if the above facts do or do not strengthen the arguments I offered in my article on "Thoroughbred Stallions Not Wanted." During over a quarter of a century's experience with trotters I cannot recall an instance where I have used language that had better be left unsaid and unwritten about them. I do not remember to have ever written an article without making deep research and using sound and accurate thought, founded on observation and personal experience, and I never attempted, for the sake of an argument, to make statements not founded upon facts.

Respectfully yours,

WILLIAM G. LAYNG.

SPECULATING ON THE M. & M. WINNER.

Palmer Clark of Chicago, writing of the \$10,000 M. & M. for this year, has this to say

Already speculation as to the probable outcome of the classic M. & M. \$10,000 stake is rife. As a large percentage of the entries in this race are horses that never started in a race, the result is more mystifying than ever before. The form exhibited by many of them in private is a matter, however, of public knowledge, and in this respect the wise ones are pointing to Spanish Queen and Vandetta as likely to be the favorites.

Spanish Queen is the mare that George H. Estabrook of Denver recently purchased from J. L. Druien of Bardstown, Ky., for \$10,000 and a portion of her winnings in the M. & M. She is now five years old and has been trained carefully from the days of her colthood with the object of making her a perfect race horse. Her education was received under the care of John Hussey, who has no superior in the art of working and manning a green trotter. She was fast as a young filly and has improved with each year's work, until last fall as a four-year-old she is said to have stepped a heat in 2:08½, and has shown a much faster brush for a piece on the road.

Vandetta is a five-year-old, trained by Dick Curtis, the driver who gave David B. 2:09¼, Pamlico 2:10, and Baron Rogers 2:09¾ their early work, as well as the first two their records. He was a colt of Futurity caliber and as a three-year-old started in two of those rich stakes. He did not start as a four-year-old, but Curtis is said to have driven him a mile considerably better than 2:10. He has been leased for the year by W. H. McCarthy. Vandetta was sired by Berna Dotte 2:29½, a son of Wilton 2:19¼, and his dam was Zoulou, a producing daughter of Electro Benton, a son of Electioneer.

As second choice I would place Bonnie Way II, 2:29½; Roy Brook, Handy J., and Fleming Boy. Bonnie Way is the four-year old filly by Peter the Great, 4, 2:07¼, out of Nowaday, 3, 2:14¼, by Lookaway, that raced so creditably last season in the Futurities. Roy Brook is also a four-year-old. His private reputation would make him first class, as it is claimed he trotted in 2:10½ last fall for his trainer, James Hogan, of Snyder McGregor 2:05¼ fame. He is by Silent Brook 2:16½ out of a mare by Alfred G., the sire of Charley Herr 2:07, etc.

Handy J. is a horse that W. L. Snow has had abiding faith in ever since he drove him a mile in 2:10½ as a three-year-old several years ago. He is by Baron H. 2:19, a son of Baron Wilkes 2:18, recently exported to Russia.

Charlie Dean has a good trotter in Fleming Boy, a horse that he has been working a couple of years. He started once in 1906 as a three-year-old, and was third to Governor Francis, 3, 2:11¼, and showed well. He was raced once again as a four-year-old to see what he had learned, and Dean was satisfied. Chicagoans will back Dean's entry if that trainer thinks he has a chance.

CALIFORNIA ENTRIES REACH DETROIT.

Advices from Detroit show that the California entries reached there in time and the Pleasanton and Los Angeles stables are well represented in the principal events.

In the M. & M. Charles DeRyder has named Thos. Ronan's roan stallion Birdson by Antrim, dam Birdie by Jay Bird, and Lewis Pierce's bay gelding Diablo Mac by Diablo, dam Hazel Mac by Director. Will G. Durfee has named the bay gelding Regalo by Oseto, dam Pastora by Judge Salisbury, and P. W. Hodges has named his brown stallion San Francisco by Zombro, dam by Nutwood Wilkes.

In the Chamber of Commerce Lee Maybury of Los Angeles has named the black stallion Phoenix by Titus, dam Lady Waldstein by Waldstein.

The 2:11 trot has the following California entries: Bon Voyage, br. s. by Expedition, named by W. A. Clark Jr., Carolin, b. s. by McKinney, and Petigru, b. s. by Kingward, named by W. G. Durfee; Charley T., br. g. by Zombro, named by Charles DeRyder.

In the 2:07 pace there are three entries from California, viz: Mrs. L. G. Bonfilio's b. s. Copa de Oro by Nutwood Wilkes, W. A. Clark Jr.'s br. m. Miss Georgie by McKinney, and Charles L. DeRyder's ch. s. Sherlock Holmes by Zolock.

A new driving club has been organized at Hynes in Southern California, and will hold its opening matinee this afternoon. Mr. R. H. Parker of Hynes is president, and John Palmer of Compton, secretary and treasurer of the new organization. Several fine roadsters are owned among the members of the organization.

Drink Jackson's Napa Soda.

THREE-YEAR-OLDS FROM APTOS.

On Monday evening next, at Chase's Pavilion, 478 Valencia street, the entire crop of three-year-olds from the famous Aptos Stock Farm, will be sold to the highest bidder, and those who want good, young, sound horses, bred in the purple and all in good order, should attend this sale. As is well known there is no reserve at these sales—the horses are knocked down to the highest bidder, and the buyers get horses that are worth the money.

Among those to be sold we will mention the following:

Bay filly by Dexter Prince, dam by Cupid, second dam by Aptos Wilkes. This is a good going trotter.

Bay filly by Cupid, dam by Aptos Wilkes, second dam by Speculation. Acts like she will pace fast.

Bay gelding by Dexter Prince, dam Psyche 2:16¼ by Cupid. A handsome fellow with good manners.

Bay gelding by Cupid, dam by Aptos Wilkes, second dam by Speculation. Good size and will make a slashing road horse.

Bay filly by Cronje (son of Cupid and Hulda 2:08½) dam Princess Christina by Dexter Prince. This is a nice turned filly, and her dam is the sensational trotting mare that Mose Hart drove two heats in 2:15 on the stadium track last Sunday.

Dark bay filly by Dexter Prince, dam Erosine by Eros, second dam by Speculation. Very gentle and a nice trotter.

Bay filly by Dexter Prince, dam the famous trotting mare Dione 2:07¼. This is a pure gaited trotter and a great prospect.

Chestnut filly by Cupid, dam by Dexter Prince, second dam Gracie S. 2:22, dam of Dione 2:07¼, by Speculation. Very handsome, good gaited and a nice one.

Chestnut filly by Aptos Wilkes, dam Chloe 2:24 by Dexter Prince. Good looking and good gaited.

Black filly by Dexter Prince, dam by McKinney, second dam Miss Valensin, dam of three in list by Valensin 2:23. Good enough for a great brood mare, and acts like she had speed.

Chestnut filly by Dexter Prince, dam by Antevolo. A full sister sold east for \$2,275.

Chestnut gelding by Dexter Prince, dam Galata, dam by Zambia 2:14¼, by Stamboul. A grand looker and good gaited.

Bay gelding by Aptos Wilkes, dam by Eros. A nicely gaited trotter and a good looker.

Bay filly by Aptos Wilkes, dam Azaline by Azmoor. A good mate for the gelding described in the last paragraph above.

Bay gelding by Dexter Prince, dam Venus II 2:11¼ by Cupid. None better bred or more likely to trot fast.

Bay filly by Dexter Prince, dam by Cupid. A natural trotter.

Chestnut filly by Cronje, dam by Dexter Prince. Will be 16 hands high. A trotter.

Chestnut filly by Aptos Wilkes, dam by Dexter Prince. With the Cronje filly mentioned in the foregoing paragraph, they make a fine pair.

Brown gelding by Cupid, dam by Aptos Wilkes. Good gaited and a nicely turned young horse. A trotter.

Chestnut filly by Dexter Prince, dam Hulda 2:08½ by Guy Wilkes. Where is there a better bred one? John Williams thinks she is about the best prospect for a race winning trotter ever bred at Aptos Farm.

Bay filly by Dexter Prince, dam by Cupid. This filly has two sisters older and both are fast. She is a pacer.

Bay gelding by Cupid, dam Zarina 2:13¼ by Dexter Prince. A fast natural trotter, and will show it in the ring.

These three-year-olds are all nicely broken, single and double, but have not been trained on the track. They have been made accustomed to steam and electric cars and the majority of them pay no attention to these sights.

There will also be offered at this sale several geldings and mares sired by the Aptos Farm's French Coach stallion and out of trotting bred mares. This stallion was imported direct from France by Mr. Claus Spreckels and is one of the finest specimens of the breed in America.

The horses are now at Chase's salesyard and the public is invited to inspect them to-day, Sunday and Monday.

Mose Hart gave the speedway Sunday crowd another surprise on the first day of this week with the mare Princess Christina by Dexter Prince, which he has been roading for the past month. Having received word from a prospective buyer that he would want the mare driven a full mile and repeated before he could think of making an offer for her, Hart concluded that Sunday was a good day to let her step a mile, thinking he would drive her around 2:20. On the first trial the Princess went along so smooth and easy that she made the mile a little faster than he intended, but getting some dust in his eyes coming down the homestretch he did not look at his watch. Much to his surprise three different parties showed him their timers and all had made the mile as 2:15 flat. The mare was hardly up to that clip, so he gave her nearly an hour to blow out and then went the second mile. This was also in 2:15 and at the finish the mare wanted to go on and went to the quarter pole before he got her pulled up. On returning to the sheds she was not distressed in the least. A three-year-old filly out of this mare is to be sold at the Aptos Farm sale next Monday evening.

PARK AMATEUR DRIVING CLUB.

A perfect day of sunshine with scarcely a breath of wind, temperature that was as near ideal for outdoor sports as anyone could wish for, a large attendance and excellent racing, made the second meeting of the spring series of races arranged by the Park Amateur Driving Club of San Francisco, a most enjoyable one to all who were at the stadium in Golden Gate Park last Saturday afternoon.

When the judges, Messrs. G. Wempe, Alfred Joseph and I. B. Dalziel called the first race on the card, Starter T. J. Crowley found a field of five good looking horses scoring for the word in the event which was for Class D trotters. The race went to Mr. J. W. Smedley's handsome Zombro mare Red Velvet, and she won the two heats so handily that the real contest was between Ena Z. and Quill for second place, and even this could not be decided as their position were 2-4 and 4-2 respectively at the finish.

In the second race for Class B trotters but three started, Lady Nell, Laddie G. and Lady Washington. These three had met two weeks previous, the race on that day going to Mr. Herzog's Lady Nell, and she was picked as the winner of this event. But Fred Thompson's Lady Washington, driven by her owner, was full of trot and steady, and she took the race in straight heats, the fastest of which was 1:44¼, a 2:19 clip. Mr. Herzog was second each time with Lady Nell. In the absence of Mr. Gay his handsome gelding Laddie G. was driven by Mr. Erlin.

The Class A pacers to start in the third race were D. E. Hoffman's Mary K. and Thomas Browne's Victor Platte. The gelding is an old campaigner and in this race he beat the mare in straight heats, the second being in 1:39¼, a 2:13 gait. Mary K. broke at the first turn in both heats, falling a distance out, but made a wonderful gain after getting her feet. In the second heats he paced the last two quarters in 1:02¼. This mare is entirely green, and while she is somewhat cranky in scoring will get over it with careful usage and should be able to race with the very best of the California pacers later on.

There were but two starters in the Class C trot, Mr. Aigeltinger's Dolador, driven by Fred Thompson, and Mr. Clayburgh's Charles II, driven by the owner. Dolador repeated his victory of two weeks previous by winning in straight heats, although he had not been out of the barn but very little since that day, and had no work.

The real contest of the day was the race for Class B pacers, in which there were three starters, T. F. Bannan's Jim Chase, W. C. Hamerton's Colonel C. and H. M. Ladd's Ringrose. Mr. Bannan drove his own horse, Colonel C. was guided by Mr. F. J. Kilpatrick, and Ringrose, looking bigger and stronger than ever before, was driven by his owner. The race was between Colonel C. and Jim Chase, and they made every heat the closest kind of a contest. After the Colonel had taken the first heat by a narrow margin, he and Jim Chase made a neck and neck race clear down the stretch in the second heat, and when the wire was reached Jim Chase was only an eyelash in front, only those at the wire being able to separate them. It was the most thrilling finish that has been seen on the stadium track this season and as one enthusiastic horseman remarked fully repaid him for standing all the afternoon with no opportunity to sit down. In the final heat Mr. Kilpatrick, by an extra good exhibition of driving, landed Colonel C. in front at the wire, and Mr. Hamerton wore a smile that would not come off when the blue ribbon was pinned on his handsome pacer as the winner of the contest.

A piece of good news to all who enjoy these speed contests is that the Park Commissioners have fully decided to erect a grand stand at the track and that work will be commenced very soon.

The next meeting of the club will be held one week from to-day. The summaries:

First race, Class D Trotters—
Red Velvet, b. m. (J. W. Smedley).....1 1
Quill, ch. g. (George D. Mackay).....4 2
Ena Z. blk. m. (F. W. Thompson).....2 4
Director E. b. g. (E. Stock).....5 3
Belle Washington, b. m. (F. J. Kilpatrick).....3 5
Time—1:53½, 1:52.

Second race, Class B Trotters—
Lady Washington, ch. m. (F. W. Thompson).....1 1
Lady Nell, blk. m. (M. W. Herzog).....2 2
Laddie G., br. g. (Mr. Erlin).....3 3
Time—1:45, 1:44¼.

Third race, Class A Pacers—
Victor Platte, b. g. (Thomas H. Browne).....1 1
Mary K., b. m. (D. E. Hoffman).....2 2
Time—1:43½, 1:39¼.

Fourth race, Class C Trotters—
Dolador, b. g. (F. W. Thompson).....1 1
Charles II, ch. g. (A. P. Clayburgh).....2 2
Time—1:54¼, 1:54.

Fifth race, Class B Pacers—
Colonel C., b. g. (F. J. Kilpatrick).....1 2 1
Jim Chase, br. g. (T. F. Bannan).....2 1 2
Ringrose (H. M. Ladd).....3 3 3
Time—1:45½, 1:43, 1:46½.

FROM THE LARGEST MONEY-WINNING STABLE ON THE PACIFIC COAST.

LOS ANGELES, California, Nov. 25th, 1907.

The Houghton Sulky Co., Marion, Ohio:
Gentlemen: I used the Houghton Sulky exclusively this year in forty-one races; also loaned them occasionally, and in every case the user was very favorably impressed. I am more enthusiastic than ever over your sulky. After having conducted a public training stable for twelve years, I have about discarded other makes. I appreciate there are other good makes, but so far I cannot find any other make that suits me as well as the Houghton.

Yours very truly,
W. G. DURFEE,
Proprietor Durfee Training Stables.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

It may safely be stated that the clean sport of blue rock shooting in this state and throughout the rest of the Pacific slope territory, including the British Columbia country, has had a most healthy impetus this season. Many new gun clubs have been organized since the first of the year and the movement, from current reports, seems to be a cumulative one, for even this late in the season new organizations of sportsmen are trailing into the game. A number of lively and well attended tournaments have been held and other tourneys are scheduled. Probably the star meeting west of the Rockies for 1908 will come off at Denver, with it is anticipated, an attendance of over 300 shooters.

Locally, blue rock shooting is just as strong in the hearts of our sportsmen as it ever was. Some comment has been made on the smaller than usual attendance at one or two recent weekly shoots. This is not an exception to what has been in vogue, at times, among the shooters of this section, to our observation, for nearly fifteen years past.

We have a regular shoot billed for the Ingleside grounds for every Sunday throughout the season of nearly seven months. Besides, there has been and will be several two or three-day tournaments sandwiched in. Taken altogether, the general average attendance is larger than has prevailed in many past years. Furthermore, quite a number of our local men, besides the trade representatives, have attended shoots at nearby interior points and will attend others. A pleasing feature of this season's devotion to the sport is the goodly number of new guns at the traps.

The card for Ingleside to-morrow will be the May club shoot of the California Wing Club.

The Golden Gate Gun Club regular monthly shoot April 19th at Ingleside brought out 25 guns on the firing line. Weather conditions were not overly good, the day being rather hazy, an unusual thing for these grounds. The main club race was at 100 targets, class shooting, added money for each class. Feudner was high gun in the champion bunch. Justins struck his regular gait for 90 per cent in the first class. Hoelle now shooting in the first class made a creditable score of 81. He was a novice when he began late last season, but has since shown more improvement than any of the new beginners and is now holding down some of the old stagers. Patrick with 70, shot below his average in second class. Noonan in third class with 53 breaks is also a new devotee of the sport and is steadily improving. Mr. Sinkey, a guest, has but his left arm available for using the gun, but even with this handicap he can outshoot a number of the boys. Miss Meyer, a visitor, made the clever score of 46, under the tutelage of Mr. Lemon. She handles a shotgun gracefully and bids fair to become a crack shot. The scores follow:

Champion class—
Holling24 24 21 22—91
Prior21 22 24 19—86
Feudner17 25 25 25—92
Haight22 20 21 21—84

First class—
King23 20 23 19—85
Iverson20 19 19 20—78

Noonan14 9 12 8—53
Valencia10 11 11 12—44

Twenty targets (10 pairs)—King 10, Leek 9, Justins 14, Ashcroft 14, Haight 14, Haupt 11, Prior 12, Sinkey 12, Hoelle 14, Feudner 12, Wood 11.

Du Pont handicap trophy race, 25 targets—20 yards: Haight 21, Holling 18, Feudner 22, Prior 21. 18 yards: King 23, Iverson 19, Klevesahl 19, Justins 17. 16 yards: Price 22, Ashcroft 16. 14 yards: Leek 16, Herring 10, Lemon 17.

The Trap Shooters' League shoot for April took place at Ingleside on the 26th inst. Instead of the regular trophy events, ten 15 target money and pool races, high guns, was the substituted program. Clarence A. Haight was high gun for the day, with a string of 141 out of 150. This was a 94 per cent run

and during which he shot 4 straight scores, a creditable performance for the best of them. The scores were as follows:

Haight14 12 15 14 14 13 15 14 15 15—141
E. Schultz13 14 13 13 11 12 14 11 13 11—135
Nauman12 15 14 13 14 12 10 13 11 12—126
Webb13 14 14 14 14 10 10 11 15 13—128

Hoelle10 9 15 14 13 12 11 13 13 11—121

A blue rock shoot, under the supervision of Ed. Fissel, the Davis crack shot, will be held to-morrow at Nelson's Grove, Woodland. The Yolo county boys are all good shots and enthusiastic blue rock devotees. There will be the usual large attendance of powder burners for the up river shooters always turn out in force.

The Santa Clara Fish and Game Protective Association propose to have, in the near future, an up-to-date trap grounds. There are over 1,000 shooters in the county, blue rock shooting, which has been rather dormant in that section for a while past, has recently taken quite a boom. Regular semi-monthly shoots are now held for medals, the big feature of the coming shoots will be the race for the handsome Du Pont cup offered the association through Mr. Clarence A. Haight.

The members of the recently organized San Mateo Gun Club shoot now regularly every Sunday on the club grounds.

At the Santa Rosa Gun Club shoot April 19th, C. A. Williams won the challenge cup for the third, and final, time. J. S. Rhodes was a two time winner also, but Williams won out by a margin of 4 targets. E. W. Beatty won the club trophy, two other members also have a single credit for this prize. A hard wind blowing cut down the scores somewhat. The results were as follows:

First event, practice, 10 targets—Morrow, 16 yards, 9; Williams, 21 yards, 5; Mead, 16 yards, 8; Beatty, 14 yards, 9; Saunders, 16 yards, 6.

Second event, for club trophy (handicap)—Saunders, 16 yards, 23 birds, 11; Mead, 16 yards, 23 birds, 16; Morrow, 18 yards, 22 birds, 16; Williams, 18 yards, 23 birds, 18; Beatty, 14 yards, 25 birds, 20.

Third event, losers paid for targets—Mead beat Saunders, 15-13; Morrow beat Williams, 13-12; Beatty beat Rhodes, 16-10.

Challenge cup shoot (Williams holder, Rhodes challenger)—Rhodes, 18 yards, 22 targets, 11; Williams, 21 yards, 21 targets, 10.

Challenge cup event (Rhodes holder, Williams challenger)—Williams, 21 yards, 20 targets, 11; Rhodes, 20 yards, 20 targets, 7.

The annual meeting and election of officers of the Riverside Gun Club of Reno, Nevada, was held last month and the following officers elected to act during the coming year: President, Sam Pickett; vice-president, W. A. Smith; secretary-treasurer, James Clark; field captain, Thomas Pickett; official trap-puller, E. J. Heidtmann. Board of directors: Dr. F. P. Quinn, Al. North, Thomas Ramsay, Dr. S. K. Morrison, Lawrence Kink.

The Richmond Gun Club shoot for April took place on the 19th inst. Picton was high gun for the day. A high wind kept down the scores in four 10 and two 20 target events. The scores were:

First event, 20 targets—Perrin, 5; Munday, 0; Neilsen, 15; C. King, 13; Wilson, 15.

Second event, 20 targets—Truax, 10; White, 13; Picton, 18; George Feudner, 15; Wolf, 8.

Third event, 10 targets—Hunger, 6; Picton, 5; Feudner, 7; Neilsen, 6; C. King, 6.

Fourth event, 10 targets—Picton, 10; White, 9; Neilsen, 7; King, 4; Truax, 7; Feudner, 8.

Fifth event, 10 targets—Feudner, 5; King, 4; White, 5; Wilson, 5; Picton, 9.

Sixth event, 10 targets—Hunger, 4; Truax, 6; King, 6; White, 5; Picton, 9; Feudner, 8.

The Orcutt Gun Club held a practice shoot at the club traps near the National Supply, last month. Quite a number of good scores were made, George Whitmer who is at the head of the club expects to bring off a number of contests in the near future with Santa Maria, San Luis Obispo and other gun clubs. At the last shoot George Whitmer was high gun. He made four clean scores and broke 89 blue rocks out of 100.

At the traps of the Napa Gun Club in East Napa on Sunday, April 19th, the team of the local club de-

feated the Vallejo Gun Club's four expert shots in two match shoots by scores of 76 to 58, and 74 to 63, out of 100 targets a side. The Napa team consisted of Clyde Shively, Sam Mayfield, William Chappell and Joe Eckert. In the second match Chappell broke 24 out of 25.

The Eureka Gun Club held the first club shoot for the season, Sunday, April 19th, at the club grounds. The next shoot will take place May 3rd. The scores follow: W. S. Parker, 24 out of 25; R. J. Jensen, 24; W. E. Stone, 10; G. L. Wolf, 13; J. W. Ferrill, 17; W. L. Perrott, 17; William Noble, 16; H. Kelly, 19; Charles Smith, 15; J. K. Durnford, 16; G. W. Smith, 20; C. O. Falk, 16; C. C. Falk, 19; G. W. Wilson, 14.

The Eureka Gun Club at the recent annual meeting elected the following officers for the ensuing year: J. K. Durnford, president; S. W. Parker, vice-president; W. L. Perrott, secretary. The following committee of arrangements was also elected: G. W. Smith, Harry Kelley and L. Greenberg. Regular shoots will be held on the first and third Sundays of each month, 11 shoots in all. Twenty trophies, including the Du Pont cup will be shot for this season. Shooters must participate in seven club shoots to be eligible for the prizes. The club has received invitations from the gun clubs of Arcata and Ferndale to attend shoots in those towns soon. It is the intention of the Eureka organization to hold a tournament shoot in the near future.

Reno and Carson City shooters shot a team match at Reno, April 19th. The Riverside Gun Club of Reno carried off the honors by a score of 83 to 79 out of 100 a side. Pat Crowe of the Carson club was "high gun" for the day, breaking 22 out of 25. The score of the Reno club was as follows: Larry King, 20; Sam Pickett, 16; Al. North, 18; Tom Pickett, 16; Dr. Walker, 11. Carson team: J. Sharp, 18; Morton, 13; Dr. Goode, 12; P. Crowe, 22; Richard Bright, 14. The meeting closed with a merchandise shoot, the winners were: Richard Bright of Carson, Sam Pickett, Larry King, Al. North, Tom Pickett.

A gun club was recently organized in Riverside, Orange County, with the following charter members: Dr. Taber, Jim Lockwood, J. H. King, Art Watkins, Lynn Watkins, Will Gray, John Knight, Frank Gardner, Owen Council, Cliff Heller, Will Heller, Floyd Jenkins, J. D. Le Brell, W. Hinde, Phil Phillips, Fred Huntoon, Archie McBain, F. A. Pequegnat. They have sent an invitation to Colton shooters to meet them in a joint shoot whenever convenient. The Colton club appreciates the invitation and in return would be pleased to have the Riverside sportsmen visit Colton and shoot with them.

FISH LINES.

The open season for taking trout with a rod and line in California began yesterday. Stream conditions, so far as low and clear water goes, are generally favorable. Fly-fishing, however, will hardly be much in vogue until later on.

At the last meeting of the Santa Clara County Fish and Game Protective Association a report was received from Mr. Charles A. Vogelsang relative to the progress of the work being carried on by the State Fish Commission on Scott's Creek, Santa Cruz County.

Many dams are being constructed on the stream and the facilities will be such that the four counties back of the project will commence to reap the benefits of the work after the finish of the trout fishing season of 1908. It is estimated that 10,000,000 trout fry will be produced annually for the benefit of Santa Cruz, Monterey, Santa Clara and San Mateo counties and that their creeks will then be the finest trout streams in the State. This will mean there will be 625 fish for every one of the 4,000 licensed fishermen of Santa Clara County.

The secretary was instructed to communicate with the Santa Cruz County supervisors and ascertain what was expected of Santa Clara County in the way of expenses for the enlargement of the Brookdale hatchery.

Captain G. H. Lambson, Superintendent of State fish hatcheries and representative of the United States government, with headquarters at Baird, Shasta County; E. M. Ball and E. V. Cassell, assistants, two weeks ago went to the Bouldin Island hatchery to take up the systematic preparation of striped bass eggs at that point.

About this date the eggs will be ready to be properly placed and hatched, and it will be the middle of June before the young fish will be turned into the San Joaquin River.

SAN FRANCISCO SHOW.

The San Francisco Kennel Club's eleventh annual show at the Auditorium Rink last week, excepting in numbers, will compare favorably with most of the club's past shows. The hall is large, well ventilated and lighted. The aisles were wide, an appreciated innovation, and the benches were well arranged. The two judging rings were so placed that exhibitors and visitors were comfortably seated and were nicely in touch with the ring functions.

Judging started at 2 o'clock on Wednesday afternoon, both judges operating at the same time. The

awards were, in some instances, the subjects of quite a deal of criticism. Both judges reversed themselves, in one case, however, where a bitch was given reserve winners dogs and also reserve winners bitches, the blame should rest with the ring steward. The bitch won first dog and bitch puppies and was allowed in for winners dogs. She was not entered in any of the regular bitch classes.

There were 301 dogs benched and 30 absentees. Southern California was not reciprocal in representation.

Mr. P. H. Bryson's classes started with:

Pointers (12 benched) were, with a few exceptions, rather ordinary. Ch. Victor Joaquin easily won out for best, being in for specials only. May, a Doctor Daniels bitch, first winners, is a pleasing type. Two field trial Pointers, Santa Rosa, a winner in last year's Pacific Derby and Raffles were placed, both are the right sort, Raffles could be fuller in muzzle. Mike Geary, reserve winners was in grand fettle. A head not quite so thick, with his grand body, would always put him in close touch with the tri-color.

English Setters (27 benched) were a nice lot generally. St. Ives first winners, the winner of the Pacific Coast Derby this year and the Northwest Derby last year, is built on typical lines, he could be fuller in muzzle, he was shown in fine condition. Going over Mallwyd Beau and Ch. Tiverton incidentally getting a reserve was an upset that bruised the talent from center to circumference. St. Ives, however, had the earmarks of what is expected from a working Setter in good condition. Rockline Flirt is a well set up bitch, just a trifle wide in skull, she was placed correctly for first. Belle Fontaine (another field trial winner) came in properly for reserve winners. Sven C. first puppies is a handsome and promising young dog. Both puppy classes were excellent, each entry securing a place. Where the judge could find a place (third novice bitches) for Chiquita and stick to type after ignoring better ones in other classes is a puzzle.

Gordon Setters (7 benched) were not above the usual order. Ch. Flora B. was easily the best shown.

Irish Setters (17 in number) were many of them on the leggy order and were ignored by the judge. Ch. Halvern Jerry, competing for specials only, won the cup for best, was the best type of the breed shown. Pal and Toronto Pat are both on the lines that have been in vogue with the breed. The recent Oakland winners were given the gate by the judge. St. Lambert's Phyllis is more like the type that has been in vogue. In limit and open bitches there was a reversal, if the catalogue is correct, St. Lambert's May was second over St. Lambert's Queen in limit. In open May was ignored, Queen took second and St. Lambert's Belle (first limit) received third. At that there was no particular upset, for they all look alike and there is not much difference between them.

Chesapeake Bay Dogs (3 benched) were only fair.

Irish Water Spaniels (8 entered) were an even lot, all good, and properly placed.

One Russian Wolfhound shown is light boned and was in poor coat.

Greyhounds were, excepting two out of the eight shown, all given a place or letters.

American Foxhounds, 8 in number, did not seem to hold the judges eye on their type, for first winners went to Dexter, one that is on the English order.

Mr. Lyndon's classes were the following:

Cocker Spaniels were strong (33 in the classes) and pleasing throughout. Mepals Saxon put down in fine condition went through for premier honors in blacks. He wears well. Laguintas Judge turned up improved and good enough to go over Sir Saxon first puppies. Ch. Cressella Nancy held her own for winners in blacks. Kentucky Bess reserve winners blacks, is excellent in head qualities. Brownland Babbie was shown in better shape than we have ever seen her. The parti-colors were a very nice lot. Gay Lad, reserve winners to Ch. Gypsy Chief is a new one here. Golden Grain, a daughter of Ch. Redlight, has the hall mark of her good sire.

Dachshunds turned out 10 in number and were rather good. Ch. Dougie E. and Ch. Nordica, both veteran benchers, are still in the winners classes.

Collies were only 17 in number. Valverde Kennels with Ch. Southport Student, Ch. Valverde Faultless, Princess of Tyton, a famous trio, and the home bred Valverde Verona is a quartette that would be hard to beat anywhere. Dictator reserve winners and Craigmore Cracksman second open to Student were both in fine fettle. The classes were easily placed.

Black Corded and Curly Poodles had more entries than usual, there were seven and all good ones. Topsy, the winner over Black III, is a younger dog with the quality and substance to pass over Black.

Bulldogs, 25 strong, brought Moston Bar-None in dogs to the front again. Endcliffe Advance reserve winners and his kennel mate Endcliffe Valentia are new arrivals. This brace are full of the qualities breeders like. The general quality of the classes was good, the large entry is an indication that the recently formed Bulldog Club means business.

Airedales mustered 11 on the benches. Motor Dace and Ingafield Wild Rose did not have a hard run to win out in their classes. The puppy class was excellent, every entry was recognized by the judge.

Bull Terriers were a fairly well filled class with 27 benched. The showing in puppies were a taking lot. In dog puppies every one of 10 shown were recognized. In bitches 4 of the 5 shown were placed, the odd one was worthy of letters at that. Ch. Brooklyn Patsy won over Ch. Silkwood Ben Ali again, the latter being in poor form. Silkwood Surprise, in great fettle, won first limit and second in open to Patsy. Ch.

Edgewood Biddy and Ch. Edgewood Jean II, who holds on smartly, won out in bitches over a likely looking lot.

Boston Terriers turned out 28 strong. Ch. Dick Dazzler first winners had a walkover. Hazelwood Statesman, a new dog here, reserve winners, will prove to be a producing sire in the stud. Two Dazzler puppies, Millbrae Allie and Millbrae Judge are a credit to the sire. Placing Clancy III over Ch. Endcliffe Tortora for first winners should have been the other way. Clancy is a grand young bitch, but Tortora passes her in finish, substance and symmetry.

Fox Terriers were rather few but classy throughout, with two exceptions. There were 15 smooths and 8 wires in view. Tallac Marlin and Humberstone Slasher for winners dogs left Sabine Ringer out of the money, much to the surprise of the Terrier men. In wires that good one, Humberstone Record was passed by Humberstone Jack and Ch. Humberstone Penance, another turnover.

Irish Terriers, 12 in number, were good enough, all but two, to find a place.

St. Bernards, of three shown, two were better than usual, Denver Boy and Prince Lion. One Mastiff was a poor specimen.

Great Danes, 8 benched, with the exception of that good Harlequin, Ch. Princess Harlequin and another nice one Ch. Isabella were indifferent.

Esquimaux dogs were three workmanlike specimens of the sledge dog.

The Toy breeds were few in number and only fair, with the exception of the Toy Pom Humberstone Masher, Toy a Toy Poodle and two Italian Greyhounds.

In the general special awards the good Greyhound Black Tralee was awarded the cup for best in the show. This special is generally a hard nut to crack, given that there are several good ones of various breeds, and there surely was here. However, it is sometimes a matter that may be influenced by one's liking for a favorite breed. The special for best of the opposite sex went to the Collie Ch. Valverde Faultless, and deservedly so. These positions would have been reversed without creating much criticism, in fact would have been the proper award. The competition for best shown and exhibited by a lady made a pleasing picture, there being over 30 ladies in the ring when the race started. The award was finally made in favor of the Toy Pom, Humberstone Masher. The team sweepstakes drew but two entries Valverde Kennels' Collies Ch. Southport Student, Ch. Valverde Faultless, Princess of Tyton and Valverde Verona which won over Mr. Gray's Irish Setters. The brace special was won by Miss Jennie A. Crocker's Bostons Ch. Dick Dazzler and Clancy III. D. P. Cresswell's Cocker Ch. Mepals Saxon and Sir Saxon reserve. There were nine braces shown. The special for best Toy Poodle was won by Mrs. H. E. Giblin's Toy.

The cups and trophies this year were numerous and, in the main, of handsome design and valuable. Club medals were awarded first (silver) and second (bronze) wins. The design is unique. The club officials deserve credit for having the medals ready for distribution early Saturday afternoon. Contrary to the usual custom, such cups and trophies as the winners desired were also given out on Saturday afternoon. The usual feature of the closing night, the distribution of cups and other prizes being, comparatively speaking, very much modified.

Catalogues were ready early on the opening morning. Typographically, the publication was entitled to much criticism for there were many grave errors in evidence. This embarrassing feature was enhanced in the marked copies, which were not offered until Saturday morning. Some of the errors in the marked catalogue were worse than we have seen for years—for instance, Ch. Med Meerlich II (marked winner of the Bull Terrier Club's prize for best dam) instead of Ch. Meg Merrilies II. Whether it was indifference or carelessness is a guess, surely such a ragged travesty on the name of a well known dog can hardly be attributed to ignorance or incompetence, if the reputation of the office secretary for executive ability is any criterion to go by. If many of the catalogue entries are correctly copied from the entry blanks there will be a raft of cancellations of wins.

Messrs. John L. Cunningham and Fred P. Butler, the bench show committee, were painstaking and energetic in their particular sphere. Mr. J. P. Norman filled the position of auditor (i. e., show secretary). Art G. Hickman, superintendent, assisted by Louis Haaf, were most efficient in making the show smooth running. Charles G. Gilbert was ring steward for Mr. Lyndon and W. E. Chute acted in a similar capacity for Mr. Bryson. Tommy Banks, Spratt's representative, benched, fed and disinfected, all this being done in a very satisfactory manner. The only drawback was the smooth flooring of the judging ring which a plentiful covering of sawdust failed to put in shape for handler and dog. There were a few upsets, this oversight, however, was early overcome by covering the rings with boarding.

Awards.

St. Bernards. Limit dogs and bitches—1 J. D. Harmer's King B. II, 2 Mrs. Jack W. Matthew's Prince Lion, absent Mrs. R. W. Bachrach's Casey. Open dogs and bitches—1 Prince Lion, 2 P. Murray's Denver Boy, absent Casey. Winners dogs and bitches—1 King B. II, res Prince Lion.

Special—Trophy for best, King B. II.

Mastiffs. Open dogs and bitches—1 D. J. Seibert's Heine.

Great Danes. Limit dogs—1 C. Grinter's Hans, 2 C. Luhrs Bill L., absent R. Reardon's York. Open dogs

—1 J. Snook's Dick, 2 Hans. Winners dogs—1 Dick, res Hans. Limit bitches—1 W. A. Burghard's Jessie Jefferson, 2 D. J. Baker's Sal, absent Mrs. R. Porter Ashe's Cunningham's Carlotta. Open bitches—1 Mrs. C. G. Saxe's Ch. Princess Harlequin, 2 Mrs. R. Porter Ashe's Ch. Isabella, absent Cunningham's Carlotta. Winners bitches—1 Ch. Princess Harlequin, res Ch. Isabella.

Special for best, Ch. Princess Harlequin.

Russian Wolfhounds. Open dogs and bitches—1 C. Givernaud's Neva.

Special for best, Neva.

Greyhounds. Limit dogs—1 William Proser's Frank Dunn, 2 G. Sharman's Onondago, 3 R. J. Carroll's Clyde, absent P. F. Callan's Primrose, J. Hurley's Barge. Open dogs—1 T. J. Cronin's Black Tralee, 2 T. W. Bartels' Trouble Brewer, 3 James Sweeney's Richard Anton, res J. O. Shea's Prince Charles, v h c J. O. Shea's Georgetown, absent Thos. Maher's Golden Tralee and Wildwood. Winners dogs—1 Black Tralee, res Trouble Brewer. Open bitches—1 Charles Saunders' Fourpaw, 2 R. J. Carroll's Gertrude, 3 James Sweeney's Baby Aurora, absent P. F. Callan's Flower Girl. Winners bitches—1 Fourpaw, res Gertrude.

Specials—Trophy for best, Black Tralee. Trophy for best of opposite sex, Fourpaw.

Esquimaux. Limit dogs—1 Mrs. Clarence S. Hanum's Bruin, 2 R. J. Dillon's Knickoli, 3 Mrs. Clarence S. Hanum's Amigo.

Special for best, Bruin.

American Foxhounds. Puppy dogs—1 Hon. Carroll Cook's Bill Ping, 2 Dr. C. E. Balzarini's Duke. Limit dogs—1 J. W. Olcovich's Dexter. Open dogs—1 Withheld, 2 Hon. Carroll Cook's Ned, 3 Hon. Carroll Cook's Judge. Winners dogs—1 Dexter, res Prince Louis, Best team—Hon. Carroll Cook's team. Open bitches—2 Hon. Carroll Cook's Ch. Queenie. Winners—Withheld.

Pointers. Puppy dogs—1 W. Gunn's Glenn. Limit dogs—1 J. W. Gibb's Mike Geary, 2 H. Walker's Sport, 3 M. D. Owen's Owen Prince. Open dogs (under 55 lbs.)—1 Mike Geary. Open dogs, field trial class—1 Dr. J. A. Wilborn's Raffles. Winners dogs—1 Raffles, res Mike Geary. Puppy bitches—1 Withheld, 2 B. C. Soule's Five Spot. Novice bitches—1 Withheld, 2 B. C. Soule's Lemo. Limit bitches—1 W. H. Esterbrook's Santa Rosa, 2 T. G. Wilson's Sue, 3 Sidney J. Pringle's Chloe. Open bitches (under 50 lbs.)—1 Lloyd Baldwin's May, 2 Lemo. Open bitches, field trial class—1 Santa Rosa. Winners bitches—1 May, res Santa Rosa.

Specials—Best dog, Ch. Victor Joaquin. Best bitch, Santa Rosa.

English Setters. Puppy dogs—1 P. M. Wand's Sven C., 2 Mrs. Thomas Murphy's Dash Montez, 3 W. H. Esterbrook's Washawa. Novice dogs—1 Dash Montez, 2 Washawa, 3 John Gardner's Jeffries. Limit dogs—1 V. A. Kuehn's Mallwyd Beau, 2 Mrs. B. Allen's Fleets Sergeant, 3 Alfred Vorrath's Pope Leo. Open dogs—1 Mallwyd Beau, 2 Fleets Sergeant, 3 Pope Leo, res Fred P. Butler's Ch. Tiverton. Open dogs, field trial class—1 S. Christensen's St. Ives, 2 J. G. Roberts' Boy Blue. Winners dogs—1 St. Ives, res. Mallwyd Beau. Puppy bitches—1 J. G. Roberts' Mallwyd Belle, 2 E. H. Cox's Countess St. Ives. Novice bitches—1 Countess St. Ives, 2 J. E. Terry's Eurydice, 3 Dr. G. Pinneo's Chiquita. Limit bitches—1 G. B. M. Gray's Rockline Flirt, 2 A. Temple's Blanch T., 3 Mrs. Thomas Murphy's Nell Montez. Open bitches—1 Rockline Flirt, 2 Nell Montez, absent M. Manning's Lady Dorrie M. Open bitches, field trial class—1 E. Courtney Ford's BeBible Fontaine, 2 J. E. Terry's Kil's Linda, 3 E. Courtney Ford's Tiburon. Winners bitches—1 Rockline Flirt, res Belle Fontaine.

Specials—Best dog, St. Ives. Best bitch, Rockline Flirt. Medal for best puppy, Sven C.

Gordon Setters. Puppy dogs and bitches—1 A. E. Drendell's Silkwood Rip, 2 J. G. Foster-Moales' Madam Butterfly, 3 Mrs. A. L. Stuart's Doc's Peerless Lad. Novice dogs—1 G. S. Lackie's Bobbie Burns, 2 Doc's Peerless Lad. Limit dogs—1 D. Heffron's Gordon, 2 H. Casey's Joe, 3 Doc's Peerless Lad. Open dogs—1 Gordon, 2 Doc's Peerless Lad. Winners dogs—1 Gordon, res Bobbie Burns. Novice bitches—1 Madam Butterfly. Open bitches—1 A. L. Holling's Ch. Flora B. Winners bitches—1 Ch. Flora B., res Madam Butterfly.

Specials—For best, Ch. Flora B. For best novice, Bobbie Burns.

Irish Setters. Puppy dogs and bitches—1 Mrs. J. Otten's Flora O., 2 and 3 withheld. Novice dogs—1 Dr. E. Scosseria's Beau of Maff. Limit dogs—1 W. W. Crane's St. Cloud's Laddie, 2 J. J. Donovan's Pal, 3 F. M. Johnson's Toronto Pat. Open dogs—1 St. Cloud's Laddie, 2 Toronto Pat, 3 St. Cloud's Liscarny. Winners dogs—1 St. Cloud's Laddie, res Flora O. Novice bitches—J. Italian Greyhounds. Novice dogs and bitches—1 E. D. Oakley's Dante. Limit dogs and bitches—1 Dante. Open dogs and bitches—1 Mrs. W. A. Dean's Duke II. Winners dogs and bitches—1 Ch. Duke II, res Dante.

READVILLE'S SENSATIONAL EVENT.

The New England Breeders' Association, of Boston, Mass., whose racing plant—one of the most famous on the light harness map—is situated at the suburban town of Readville, makes an announcement that is causing the entire trotting world to sit up very straight and take absorbing notice. That \$50,000 race has taken horsemen completely by surprise, which fact, and the conditions of the event, will serve to make it a magnet of attraction henceforth until it is decided, the last week in August.

One cannot but admire the spirit of these New England promoters of harness racing. For five years now they have been "up against" a losing game. The betting was stopped at the Readville Grand Circuit meeting of 1903, and every effort to resuscitate it has been suppressed by the Puritans who regulate the morals of the dear public in the land of the Pilgrim fathers. Nevertheless, the New England Breeders' Association has gone bravely on, finally cutting out all attempts to speculate in spite of the losses entailed by the action. Every season since has seen an annual deficit anything but encouraging, and finally, when fire destroyed the imposing and expensive grand stand about a year ago, it was taken for granted that the end was not far off.

However, the association absolutely refused to be disheartened. It put up temporary stands and held a meeting of its old-time magnitude. So well did the public support it that the week a little more than paid out. But, of course, it left nothing wherein to wipe out the old deficit or pay annual running expenses, to say naught of building a new stand.

It was then generally felt that there would probably not be another Grand Circuit meeting at Readville—if, in fact, there was ever one of any kind. But the never-say-die spirit of the Breeders' Association failed to see things in that light. During the winter plans for reorganization were perfected, and when the Grand Circuit stewards held their annual meeting Readville came forward to claim her old place and announce her usual splendid programme. This was followed but a few weeks ago, by announcement of a spectacular free-for-all trot there for July 4. And now comes the climax—the \$50,000 event, which will be the richest regular purse ever contested for by trotting horses in America or the world.

As announced, the amount of the prize is to be divided into six portions. First money will be \$30,000, second \$10,000, third \$5,000, fourth \$2,500, fifth \$1,500 and sixth \$1,000. The conditions of contest mark a new departure in the history of rich stake racing in this country. Thursday's press dispatches proclaimed them to be modeled on the "Australian system of handicapping," which was an error for "Austrian." The race is to be a single dash of a mile and a quarter with the starters handicapped according to their known speed, the stated allowance being 50 feet per second, the handicap to be announced August 18, which will be the week before the race is trotted.

As the entrance fee is to be but \$500 it is plainly to be seen that there will be a tremendous list of nominations, for no owner of a real stake trotter, whether in the free-for-all or maiden class, will feel able to stay out. Only one time proviso is made—no entry will be handicapped on anything slower than a 2:15 gait.

This will not, of course, be the first time that a handicap of this kind has been tried in America, but as above said, it will be the first time that anything more than an experimental race of minor importance has been so conditioned. The system has been in vogue in Austria and Austria-Hungary, for years past, and has proved very successful there. In recent seasons American turfmen who have witnessed the trotting racing at Vienna, Baden and Budapest have been favorably impressed with it, and these things, together with the self-evident desire of the Readville people for something which would be sensational on the score of novelty, evidently caused its adoption.

No specifications have so far been announced concerning the method of starting to be employed, but if the Austrian system is also to be followed here, the start will be a standing one, announced by a pistol shot, each horse being stationed at the place which his handicap assigns him, with an electric bell directly opposite, each bell ringing at the moment the starter fires his shot.

The merely nominal entrance fee, together with the enormous size of the purse, which will allow the sixth horse to win \$500 net, naturally foreshadows an immense list of entries and a track full of starters. It is to be imagined that the starting judge will find his hands more than full when the momentous occasion eventuates. It is also to be imagined that many of the drivers and horses will also find themselves in deep water. The system is so entirely different from that which has always prevailed in this country and to which all our trainers and race horses have been exclusively accustomed that it will not be strange if they perform as awkwardly as a one-legged man trying to walk the tight rope.

As the race must necessarily finish at the wire, or stand, which is near the lower end of the home stretch, the "scratch" will be at the three-quarter pole and the starters will be scattered all the way from the upper turn to near the seven-eighths pole. How the starter will control all these horses looks, at this distance, decidedly problematical; also how the drivers will control the horses.

The average trotter, after a few weeks at the game, gets, as the rail birds say, pretty well "racified," and, with rare exceptions, is not fond of standing still upon the track after he has been conditioned and warmed

up to step to his limit. Horses are all creatures of habit. Having been trained to score on the home stretch, when asked to do so elsewhere they often become erratic and almost unmanageable.

The writer remembers seeing a field of free-for-all pacers at Memphis in a half-mile dash, for which they had to score at the half-mile post, cavort like a pack of unbroken mustangs and delay the start until the patience of the crowd had been exhausted, whereas had they scored at the wire they would, as usual, have gotten off with very little trouble.

The object of a handicap is to bring horses of different classes together in what shall seem like a struggle upon even terms, and this is, undoubtedly the aim which the projectors of the \$50,000 race have in view. It remains to be seen whether the contest will so result or not. The very magnitude of the prize guarantees that the best horses and most able trainers in America will put forth their extremest efforts to win even a part of it—and it is to be hoped that the outcome will be satisfactory from a racing standpoint.—J. L. Hervey, in Chicago Record-Herald.

GEORGE H. ESTABROOK'S STABLE.

If there is any horseman in the United States who really deserves to win first money in the M. & M. stake at Detroit this year it is Mr. George H. Estabrook of Denver. He has paid big prices several times for trotters that he selected especially to win this race with, and through ill luck has had these horses die or be too sick to trot when race day came. Our readers will remember his purchase through Charles Dekeyder of Capt. N. P. Batchelder's fine mare Perfection for \$10,000 last year, and of the mare's death from pneumonia a few weeks later. Mr. Estabrook has now made another purchase, as will be seen by the following from a Denver paper of April 11th:

"With the purchase of Spanish Queen 2:26¼, George H. Estabrook of this city, has completed the selection of his stable to go over the Grand Circuit the coming summer. It gives him a trotter for all the fast classes, a pacer for the fast classes, an entrant for all the two-year-old trotting stakes, and one in all the three-year-old stakes.

Spanish Queen is by Onward Silver and was owned by J. J. Druien of Louisville, previous to the purchase by Mr. Estabrook. Negotiations for the mare's purchase have been going on since she was taken up for her spring work. The price was \$10,000, the former owner being given a share in the M. & M. stake should she be fortunate enough to win at Detroit.

Horsemen will remember that Mr. Estabrook has made a long and heart-broken campaign to capture that big event of the blue ribbon meeting. He made entries of Hallie Hardin, Louise Jefferson and Bessie Birchwood in this event. Two years ago he entered Silver Band and the horse was thought to have an event at his mercy. But on the morning of the race he was taken sick in his stable at Cleveland and unable to do himself justice. Last year Mr. Estabrook bought the mare Perfection, intending to hold her over till this year. But she contracted pneumonia just before time to ship her west, and died the next day. The loss was a great one financially, as she had cost \$10,000 and had not been insured. Being such a grand animal and having shown such speed, she was believed to be a sure winner of the event and was desired by every horseman and driver who had ever seen her in action.

Two years ago Mr. Estabrook bought the mare Queen's Honor, by Parole, a trotter of speed, for the purpose of trying her in the M. & M. She had been kept until this year and might have started in that event at Detroit had not the purchase of Spanish Queen been made. Queen's Honor has trotted a mile in 2:12 in her practice, going with a level head that indicated she might prove a factor. But she will return to the stable with the appearance of Spanish Queen. Spanish Queen was given a "tin cup" mark of 2:26¼ last fall, but has trotted an exhibition mile in 2:09.

For the fast pacing races Mr. Estabrook has White-lock, with a trial low enough to put him into the best of the races for sidewheelers, and is credited with going a practice mile in 2:04¼. He will be seen at Detroit.

Dorothy Axworthy is the maid that will compete in the stakes for three-year-old trotters, and those who saw her force Trampast out in the Futurity last year, which he won in 2:12¼, will rejoice to learn that she is going as fine this year as last. For the two-year-old trots Mr. Estabrook has the Tregantle filly he bought in Lexington. The same driver will likely campaign Lulu Wilkinson, the two-year-old by MacRose that belongs to George S. Newman of this city. Silver Band 2:10¾, may not go east this year, as he is not in the best of form. Tommy Gratton will not be in the Estabrook stable, as he has been sold to J. F. McGuire, the driver, who intends campaigning him through Michigan, Wisconsin and into Canada.

When the history of the "New York to Paris Automobile Race" is written, we hope due credit will be given to the many horses that have been and will be used to draw the disabled machines out of quagmires and to places where repairs could be made to enable them to continue their journeys. Old Dobbin should not be overlooked, as without him the race could not be finished.

DEATH OF FRANK FERGUSON.

Frank Ferguson, the best known stable keeper in New York, died week before last. For more than thirty years, says The Herald, Mr. Ferguson was the proprietor of the San Francisco stables in West Fifty-second street, where men of prominence kept their light harness horses in the palmy days of the road, and it is doubtful whether any other stable in the city has sheltered so many famous trotters as at one time or another found their way to Ferguson's. Goldsmith Maid, 2:14; Rarus, 2:13¼; Jay-Eye-See, 2:10; Maud S., 2:08¾; Sunol, 2:08¾; Nancy Hanks 2:04; Alix 2:03¾; The Abbot 2:03¾; Cresceus 2:02¼, and Major Del Mar 1:59¾, were among the record holders that had occupied its box stalls, and the great trotting sire Electioneer was kept there several days when sold by Charles Bachman of Stony Ford, to Governor Leland Stanford for his Palo Alto Stock Farm, in California.

In the palmy days of the road the scene at Ferguson's of a pleasant afternoon was one of the sights of New York for a visiting horseman. Bankers, brokers, railroad men and merchants whose names were as well known as the records of the fast trotters they drove thronged the place, and all was hustle in the office and on the hitching floor at the hours when the roadites were going out and coming in with their high metted horses. On rainy days and other days and nights, the cosy office usually held a group of enthusiasts seated around the stove and exchanging the news and gossip of the hour or discussing the merits or the blood-lines of the trotters. It was all horse, with rare old prints and paintings of track and road celebrities on the walls, and Wallace's stud books and year books on the shelves, convenient for the settlement of all disputes concerning pedigrees and records.

The proprietor was himself a thorough horseman, versed in every branch of harness horse affairs, from tracing pedigrees to fitting a trotter for the National Horse Show. Road horses were cared for like race-horses at Ferguson's, and were turned out with appointments perfect enough to win at Madison Square Garden. No coach horse nor coachman could find a place at the San Francisco stables. As a breeder Mr. Ferguson achieved success by mating his old show mare Ida Howe, bred and raised by the late Captain Ben E. Harris of San Francisco, with Epaullet 2:19, and producing Georgena 2:07½, winner of the \$10,000 Charter Oak Stakes at Hartford in 1900. She was then the fastest trotter that had ever been raised in the vicinity of New York.

WILL PROVIDE FOR A CONTINGENCY.

The Breeder and Sportsman, San Francisco, Cal.:—Several intending nominators have written me that one clause of the conditions of the handicap is obscure and they are unable to understand it fully. Upon reading it over I must agree with these gentlemen. May they not called my attention to it, however, I might have read it a thousand times and not noticed its shortcomings, so well do I know what was intended, but which I now see the wording does not clearly convey.

The condition referred to is that making a provision for more horses facing the starter that can in safety and fairness be started. It is probably a remote contingency that this condition will arise, but it had to be provided for. We, of course, can hardly be expected to give two purses of \$50,000, nor could we split the field and purse and make two races for \$25,000 each. What we will do if the occasion should arise is to separate the starters into divisions by lot. Each division will then race for a chance to compete for the purse, the first eight to finish in each division earning this right. Of course this will necessitate those racing for the purse going twice. In both preliminary and final contest all horses will start from their handicap rating.

C. M. JEWETT.

A horse at pasture near a lot of bee hives in Napa Valley was attacked by a swarm of bees one day last week and stung to death. Within two hours after the swarm lighted on the poor beast he was dead from the stings and exhaustion. There were no men within reach, and the women on the place were powerless to do anything to save the animal. The horse was blinded in a few minutes after the attack, but ran and kicked and rolled on the ground in its mad effort to get rid of the insects until it was thoroughly exhausted.

The assassination of Count Andreas Potocki, Governor of the Austrian-Hungary Polish province of Galicia, by a Ruthenian student, as related in the foreign dispatches last week, removes one of the most noted Austrian patrons of the harness racing turf, says Horse World. Count Potocki owned the largest breeding farm devoted to raising trotters in Austria, and among his broodmares and stallions are some of the most noted trotters sent to Austria from America. American trainers who have driven on the Austrian tracks speak in the highest terms of the dead Count. He was one of the greatest admirers of the trotter among the prominent Austrian aristocrats of Polish blood, and he did much during his lifetime to stimulate the breeding of this class of horses.

Drink Jackson's Napa Soda.

THE FARM

FOR THE COMFORT OF THE HORSE.

The efficiency of the horse during the spring months will depend very much on the condition of the shoulders, and this will depend more than anything else on the make and fit of his collar. If the collar is not made of the proper material, if it is not fitted to the horse so as to press evenly upon the shoulders, a sore shoulder will result. Naturally the horse will sweat, more or less dirt will find its way under the collar, it will gall, and if this condition of things continues will gradually get worse until the farmer in mercy, even at a serious loss to himself, will feel that he must give the horse a rest. Neither man nor horse can work well unless he works in comfort. If the hired man is suffering he can complain and kick, and if relief does not come he can leave; but the horse can not complain or tell what is the matter with him, and if he does kick, it may not strike the right person.

A merciful man will show mercy to his beast; but leaving out the quality of mercy, the sensible man looks after profit and, therefore, aims to get the maximum service from his teams. No horse with a sore shoulder, whether in its incipient or later stages, can do profitable work.

We therefore ask our readers: What is the best kind of horse collar? Should it be soft or hard? That's the question. Is there any better material than leather? When a horse begins to fret, showing that his shoulder is sore, is it wise to put a pad under the collar or not? Similarly, when a horse has a sore back, is it best to put a blanket under the harness or not? We have heard a great deal of late about the steel, zinc-lined collar. What do our readers know about it? Have they used it? If so, we would be glad to hear from you. What we are after now is to find out what other collars have been tried by our readers besides those that have been in use for generations past.

We have found in our own experience that putting anything soft under the collar when the shoulder was sore made it worse. It made the horse sweat worse than before, and hence the sore became more and more aggravated.

When a horse has a sore shoulder, what particular thing causes it? What is your way of treating it? Have you ever tried a lameless collar? If so, how did you like it? You see, we are just feeling our way to find out, if possible, how sore shoulders in horses can be prevented next summer.

The farmers' experience on this line is worth more than all the teachings and all the theories we can dig up.

If a man has used several different kinds of collars in the last twenty or thirty years, his testimony on this point is valuable. Of one thing we are certain, that every man who has the right kind of feeling toward one of the best friends he ever had, the horse, would like to have him work with the maximum of comfort. In fact, to do the maximum of work he must have the maximum of comfort. Now, what kind of a collar have you found to be the best and most easily adjusted to the shoulders of different horses?—Wallace's Farmer.

CONTAGIOUS ABORTION IN COWS.

(By Dr. David Roberts, Wisconsin State Veterinarian.)

In order to make dairying or beef raising a profitable investment, it is very important to lay a good, clean, sound foundation of the herd, and in order to do this, one must be absolutely certain that he has no tuberculosis or contagious abortion in his herd as it would be unreasonable to expect any herd to be a money-maker to the owner unless they were free from disease and especially the above

mentioned diseases. As it is within the reach of every dairyman and breeder to obtain a strong, clean, healthy, money-making herd. Too much can not be said in regard to the importance of keeping stock in a healthy condition.

One ailing or diseased animal reflects upon the whole herd; not only reflects upon the herd, but endangers the herd, owing to the fact that such an animal acts as a hot-bed for the germs of disease to propagate and multiply.

The flow of milk from cows afflicted with contagious abortion is usually reduced to 50 per cent. The flow of milk from tuberculous cows is to some extent reduced, but not nearly as much as by contagious abortion, but when a herd of cows is afflicted with both tuberculosis and contagious abortion, why should you expect any profits? On the other hand, if you discover that you have both tuberculosis and contagious abortion in your herd and have made money from them, would it not be reasonable to expect that if you clean up your herd from both of these diseases that your income would be practically doubled? This being a fact, is it not worth your time and attention to investigate and find out just exactly where you stand?

For example. Observe the dairyman or breeder who has wiped tuberculosis and contagious abortion out of his herd and I am sure that if you will investigate this to a certain extent that you will find that he is now keeping a profitable herd.

This argument has been confined strictly to the point of financial success, which is a very important one, but should not be compared for one moment with the importance of keeping good, clean, strong, healthy cattle for your own protection, and also for the benefit of the community in which you live.

I am sure that no sincere, successful dairyman or breeder would knowingly sell an animal afflicted with tuberculosis or contagious abortion to a fellow dairyman or breeder in America if he knows the exact condition of his own herd. There is no excuse for knowingly selling a diseased or sickly animal.

RINGING THE BULL.

A subscriber who failed to give name or address asks these questions: "At what age should be a bull calf be ringed, and what is the right way to do it?"

This should be done when the calf is anywhere from 8 months to a year old. The younger he is, the more easily he is handled, of course. The calf should be securely tied, either by being thrown or by being firmly fastened in a stanchion, says an exchange.

After the calf is secured so he cannot jerk his head away from the operator, and the ring has been covered with vaseline or something similar, puncture the partition between the nostrils with a trochar or some similar round sharp instrument, insert the ring, put in screw, and the job is done. In making the hole for the ring, care should be taken to get it below the hard gristle, thus saving unnecessary pain and making a better job of it. If there remain any rough edges at the joint of the ring, remove them with a fine file. Every day or so turn the ring a little in the nose and keep this up till healing of the puncture has been well completed. Do not attempt to tie or lead the bull by the ring till the wound is healed and there is no soreness.—Colman's Rural World.

HONOR TO WHOM DUE.

The Board of Regents of the Wisconsin State University contemplate establishing some mark of honor to be conferred upon Wisconsin farmers who have distinguished themselves in their calling. The Wisconsin Agriculturalist speaks approvingly of the idea and says:

It is not the intention of the regents to confer a degree upon such men as it is conferred upon certain noted professional men, but to take substantial notice of them as outstanding examples, as men worthy the attention

of the university authorities and of the public. The idea is to reward them in a way by taking notice of their achievements.

The Agriculturalist is in hearty accord with the idea. It is a move in the right direction and worthy of some adoption. The notion entertained by some people that none but men of letters—highly educated professors—should receive a mark of distinction from a great university, is all rot. Is not the man who develops a dairy herd to the point of profitable production an educated man? Has he not spent years of time in acquiring a dairy education, in studying the science of breeding and feeding, and has he not done what professional men cannot do until they have acquired a like education? Why should a man of books be picked out for favor and the farmer who has done even greater things be passed by as unworthy of notice by an educational institution?

We like this new idea and congratulate the Wisconsin regents for their foresight and wisdom in this direction. Let the Wisconsin University be the first of all similar institutions to take notice of worthy candidates, and to make deserving farmers feel that they occupy an important place in the affairs of the state, and have done something worthy of public notice.

WORMS IN HOGS.

The wormy hog is easily detected, says Dr. A. S. Alexander of the Wisconsin station. Often a cough is a prominent symptom, the pig inclines to have a pot belly, harsh coat of hair, scours or is costive, is restive, eats all manner of trash, lacks normal appetite, fails to thrive and becomes weak, staggering or paralyzed.

The finding of worms in the voidings of the hog settles the matter and the feeder should always be on the lookout for the parasites. When they are known to be present, or, indeed, when it is suspected that they are, suitable medicine should be given in the food.

First, it is necessary to starve the hog for at least eighteen hours, then place the hogs in separate pens six in each, so that the lots will be sure to get the right amount of medicine in slop, which cannot be managed when all of the pigs are fed in a drove.

Now, what shall be used? That has been a vexatious question with many, and ideas on that subject vary about as much as those regarding possible cures or preventives for cholera. Turpentine is fairly effective and perfectly safe—a good preventive possibly, but not strong enough in safe doses to destroy the worms. It is mixed in the slop at the rate of one teaspoonful for each eighty pounds live weight and given three mornings in succession and the following week.

This may be used at any time, but it often is necessary to starve the hogs into taking it, as they object to the odor of the turpentine.

Calomel and santonin are much more effective. The dose is five grains of santonin and three grains of calomel for each eighty pounds live weight. This is easily given in a piece of apple or potato and the calomel acts as a purgative to carry off the worms when the santonin has acted. Turpentine need not be followed by a purgative.

For general purposes dried sulphate of iron (copperas) probably is the best hog worm medicine for use by farmers. It usually is given in one dram doses, but we find that a large dose is better.

A good plan is to dissolve half a pound of the copperas (not bluestone) in warm water and mix in the slop for 100 pigs and give this five mornings in succession and repeat whenever it is considered necessary, or give it once a month as a preventive.

Concentrated lye also has been advised. Dissolve one-third of a teaspoonful of the lye in sufficient water to cover a quart of shelled corn. Allow the corn to soak in the solution for twelve hours and then mix it in feed and repeat the treatment the following day. This is said to be effective and is the dose for a fifty-pound pig. Starve pig for twenty-four hours before and after dosing.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. E. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

THAT....

\$50,000

....HANDICAP

AND SOME OTHER RACES

\$30,000 TO FIRST

5,000 TO THIRD

1,500 TO FIFTH

\$10,000 TO SECOND

2,500 TO FOURTH

1,000 TO SIXTH

It costs one-fifth of one per cent to nominate, and three-fifths of one per cent to stay until you see how the handicappers have treated you. Then if you are satisfied two-fifths of one per cent more to start.

TO TRAINERS OF PUBLIC AND PRIVATE STABLES.

You have a horse, perhaps several of them, who have a perfectly legitimate right to be entered in this \$50,000 race. An ability to trot in 2:15 is the minimum amount of speed needed, though all faster horses have an equal chance. It is not necessary to have a stake horse, for one of the \$1,000 variety may win it.

Perhaps in your stable there are several that look good to you for this race. Enter them all, no matter how they vary in capacity for the conditions give to each an equal chance, and it being a dash race all can start. Give your second trainers a mount. Sometimes trainers are embarrassed as to what horse shall be started in the big purses. They have several of about equal ability and each owner is desirous of having his horse race. The handicap settles that little difficulty; start them all and make all your owners happy.

Only one member of the Grand Circuit has offered an opportunity for horses with records faster than 2:08½ to race for a big purse. There are thirty-five horses that cannot get into a 2:09 class that will probably be trained this season. Perhaps there are as many more with records slower than 2:08½, but too fast to get into our 2:11 class (the best we can do this year in early-closing purses for the fast horses), all of which would not be outclassed in the handicap. Here then is their opportunity. First money in this race is more than Sonoma Girl or Highball could win all last season and they started with no record and were eligible to everything. Over \$5,000 was paid in entrance fees last season on Sonoma Girl, and great as she was her gross earnings were less than \$30,000. The handicap offers her, and all other horses a chance to win more money at the expense of one shipment and a tenth of the entrance fees paid for her last year.

TO THE OWNERS OF THREE-YEAR-OLDS.

We shall be disappointed if a very large number of three-year-olds are not entered in this event. Conceding every advantage and all the values claimed for the futurities to the sport and the horse-breeding interests the handicap is still better. Only the very best colts of the year, as we all know, can hope to compete successfully in the futurities. There are scores, perhaps hundreds, of other colts who fail to develop class enough to start in any of the three-year-old fixtures, yet do show form enough to start in the handicap with as good chance of success as any horse that can be named. The money spent in developing a three-year-old of this class need not be wasted. The no-chance in the futurity changes to a brilliant opportunity in the handicap, which at the cost of but a one per cent entrance fee and one shipment may win you more than first money in all the futurities combined. If your colt is fit to race two in three and three in five, with all the scoring incidental to colt races, there is nothing in a dash of one mile and a quarter, without scoring, that is not perfectly within his powers.

JOHN M. JOHNSON,

President.

TO THE AMATEURS.

You will all of you want to come to Readville next August to see this handicap trotted. Why not enter a horse or two and add zest to your pleasure with a chance of taking home a comfortable fortune with you? Matinee horses, as a rule, are selected for their manners as well as speed, and manners will cut a lot of ice in the distribution of the \$50,000. A glance at one of last season's programs of the Boston Club showed that no less than eleven horses performed that day, which on the form they showed, had a legitimate chance in a race like the handicap, and most of these horses were not considered of much account either. They could not win our Massachusetts race nor the Blue Hill, but in the \$50,000 event they look good, or would to me if I owned them. The best feature of this race is the opportunity offered to such a wide field of horses.

A DOUBLE OPPORTUNITY FOR STAKE HORSES.

It must not be overlooked that on May 16, we close entries for the Blue Hill, purse of \$4,500, for 2:30 trotters; the Massachusetts, with its offering of \$9,000, for 2:14 trotters, and the Ponkapoag, which distributes \$3,000 among the 2:11 trotters. It is perfectly feasible, practical and good business to start a horse in either one of the above races in addition to the handicap, which will be trotted on Tuesday with none of the others before Thursday. With an entry in the handicap and either of the others see how many chances there are for getting some of the money. The Blue Hill affords three prizes each of \$1,050, \$300 and \$150; the Massachusetts three each of \$2,100, \$600 and \$300; the Ponkapoag three each of \$700, \$200 and \$100, and the handicap six from \$1,000 to \$30,000. Each horse starting in the handicap and one of the other races has sixteen chances of getting some money, varying in amount from \$100 to the grand prize of \$30,000, at the expense of one shipment, and with a great deal less taken out of the horse than in one of the good old-fashioned three-in-five races, and where, if you win first money, you get just forty per cent of the purse net.

A WORD FOR EVERYBODY.

In entering in an ordinary early-closing purse you buy a chance for your horse to race on supposedly equal terms. After the entries are published your purchase may depreciate rapidly in value for before race day arrives it may have developed that there are several horses that can defeat yours. An entry in the handicap is value received. Nothing can occur to lessen the value of a nomination in it except what may happen to the horse it was taken for. Whatever chance an entry has in that race remains until the event is decided.

If you are interested in any of these events or the 2:12 and 2:08 pacing classes, with purses of \$3,000 each, offered by the New England Trotting Horse Breeders Association, write to the secretary for an entry blank, and remember that entries close on Saturday, May 16.

C. M. JEWETT,

Secretary, Readville, Mass.

CONDENSED DAIRYING.

We've heard of intensive farming, but a farmer on Long Island has almost gone into the condensed milk business by keeping thirty-two cows on one acre of land, says Successful Farming. The milkers can almost squirt milk over the boundary line. And that farmer is going to build more barn room, which means that he hasn't yet reached the full capacity of his one-acre farm.

He accomplishes this feat by simply using the acre as a housing place for his cows. He raises no feed at all. Buys it all. He sells milk at 10 cents a quart.

Do you suppose he has just any kind of an old cow? Do you suppose that he is foolish enough to feed cows that do not give enough to pay their board? Do you suppose that he feeds timothy hay and corn stalks because clover and alfalfa are more expensive? Not much! He buys the best feeds he can get, and has to pay outrageous prices for them, too, but he makes money just the same.

You can't keep a good man down by limiting his area. It doesn't take all out-of-doors to make a paying farm when the market is right.—Colman's Rural World.

If your pigs are getting nice and sleek and stick to the nest pretty close, only getting out to suck, and then lying down again to sleep, look out for thumps, for you have just the right kind of a subject. All the preventive necessary is exercise. Get into the pen when the dam is out, two or three times daily, and with a whip make them scamper about until quite tired out. Mr. Piggie will not thump. Given a chance, they generally take exercise enough of their own accord, but will bear close watching. A thumpy pig never does any good, even though he should continue to live.

MARKETING LIVE STOCK.

Many a man is wearing patches on his pants who would be in good shape financially today were it not for the fact that he made the mistake of consigning his cattle to an irresponsible commission firm.

A man can hang out his shingle and go into the commission business with less money and less brains than any other business in the world, for there are always a lot of "suckers" who will patronize him.

Most commission men in the live stock business are honest, upright and O. K. financially, but "there are black sheep in all flocks" is an old saying and very true, so take the time to look up the commission man financially, and if you find him right then go ahead.

In handling live stock perhaps more than in any other line of business a man must be alive to the situation and ready to take advantage of every point which will aid him in making a success in the business.

In connection with this I am reminded of a story which is told of the old-fashioned horse doctor who told his assistant to administer powdered borax to a horse by blowing it down his throat through a tube. Later, when the old doctor arrived on the scene, he found the assistant choking and spitting in an unseemly manner and on inquiry was informed that the horse blew first.

Equally so in the live stock business misfortune apt to come to him who allows the other fellow to blow first.

One other vital point I wish to call your attention to. Don't put any strings on your commission man. If he who is on the market every day does not know more than you, when you do not go on the market more than three or four times a year—if he does not know how to handle it in every way to get you the "high dollar" and when to cut loose, he is not the man to ship to, for you pay him for knowing more than you do, and if he does not it is time to hunt another salesman.

Don't tell him to water your stock at 10 o'clock and have him miss all the best buyers who often get filled up by 9:30 for the buyers will not look at cattle that are not watered.

And then, again, Don't, with a big "D," tell him not to sell your cattle for less than \$5 per hundred when they are worth from \$5 to \$4.50 and thereby put yourself clean out of the running and be compelled to take the low price at the tail end of the market when they have lost their fill.

Early sales on all kinds of stock, as a rule, are the highest and best in every sense of the word. In other words, make the sale when buyers want the cattle if you can and not after they get on Easy street and don't care whether they buy or not.

A ZOMBRO TROTTER

WILL BE PRICED

WORTH THE MONEY.

Ramona S.,

a handsome bay mare 16 hands, sired by Zombro 2:11; 1st dam by Antevolo; 2nd dam by Major Tourtelotte, a son of Rhode Island. Ted Hayes worked her a mile last week at Los Angeles in 2:17½. She is ready to go right on and race, and anyone interested can see her work at the Dixon, California track.

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Caustery or Firing. Invaluable as a CURE for

FOUNDERS,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENEY,
BONY TUMORS,
LAMENESS FROM
SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES
BUNCHES or
BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.
SAFE FOR ANYONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard
VETERINARY REMEDY

Always Reliable. Sure In Results.

None genuine without the signature of

U.S. & CANADA, CLEVELAND, O

NOTHING BUT GOOD RESULTS.

Have used GOMBALT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. HAYBOND, Prop., Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBALT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and all other causes of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CRANER, Training Stable, 990 Jennings Street, New York City.

The Greatest of
all Spring Sales.

The Great BLUE RIBBON SALE CLEVELAND, OHIO.

MAY
18
TO
22

MR. CHAS. L. De RYDER, Pleasanton,

Will prepare for the sale and ship any horses that may be consigned to the sale. Mr. De Ryder will assume entire charge, if desired, up to the time horses are sold. His wide acquaintance among Eastern horsemen will assist in selling to good advantage.

Write to him to-day.

CHAS. L. De RYDER, Pleasanton, Cal.

THE DEMAND IN THE EAST FAR SURPASSES THE SUPPLY.

Good horses are in great demand and the supply is scarce and prices rule high. If you have a horse able to win you can get big money for him at the BLUE RIBBON SALE, the greatest of spring sales and the only sale that attracts EASTERN BUYERS—THE MEN THAT PAY BIG MONEY. It will pay you to ship your best.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the
BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

W. G. HOWARD, Manager,
Hotel Belvedere,
Belvedere, California.

Free Veterinary Book

Be your own horse doctor. Book enables you to cure all the common ailments, curb, splint, spavin, lameness, etc. Prepared by the makers of

Tuttle's Elixir

"SAVE-THE-HORSE" Registered Trade Mark SPAVIN CURE

JAMES M. HARTON,
Manufacturing Confectioner.

Enclosed find check for \$5.00, for which send me one bottle "Save-the-Horse." It certainly is the greatest thing I ever used. About two years ago I had a horse go lame for me, and it cured him. I gladly recommend it to my friends.

J. M. HARTON.

BROOKSIDE MILLS, Knoxville, Tenn.
Please forward one bottle of your Spavin Cure. I used a bottle some time ago, and I am glad to report that it entirely cured my horse of ringbone. Yours very truly,

WM. T. LANG.

I have used "Save-the-Horse" on side bones, and find it all right and doing good work; has stopped all soreness and lameness. I have used it on other cases, such as sprained tendons and bog spavin, and it worked to perfection.

Respectfully, JOHN SOMERVILLE.

Box 144.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual. \$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.

At Druggists and Dealers or Express Paid.

Consign Your Horses to the Big Sale

TUESDAY, MAY 12, '08

When the fleet is here and the city is full of people from all over the State, we will sell 300 horses at our new pavilion at 10th and Bryant streets, where we will have room for horses to show and people to see. All horses consigned must be at our stables by May 9th. No cripples, wind broken, thin or unsound horses will be listed. Communicate with us at once if you wish to make consignment to this sale. We shall have to offer a large consignment of fancy road horses, sired by the best stallions in the country, many stylish carriage teams, and plenty of gentle business horses; also a large shipment of the famous Double Square Brand Horses, being the first consignment of this season's crop. In addition several fast pacers and trotters, among them such horses as Peter Pan, trial 2:16; Billy B., trial 2:12; Allen Pollock 2:23 1/2, and several other fast ones by such sires as Nutwood Wilkes, Educator, Alex Button and Chas. Derby, all out of great brood mares. This sale will be held at our new pavilion and salesyard, the finest arranged horse market west of Chicago, located at

S. E. Corner TENTH AND BRYANT STREETS.

We shall open this place with a grand barbecue and riding contest, open to all riders. Valuable prizes will be given. We have now on hand at private sale forty head of gentle broke horses.

MAGNUS FLAWS & CO. 358 Dearborn St. CHICAGO.

Bonny McKinney 41383

Son of
McKinney 2:11 $\frac{1}{4}$
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1906, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03 $\frac{1}{4}$
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:17 $\frac{1}{2}$ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11 $\frac{1}{4}$, trial 2:05 $\frac{1}{2}$. Dam Rita B. by Boodle Jr.; 1st dam Gablian Girl by Gablian; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal. Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

BARON BOWLES (3) 2:25

Fee: Alconda Jay, \$40. Season of 1908 at Pleasanton Race Track and Santa Rita Stock Farm

Usual return privilege.

Apply to

H. H. HELMAN, Pleasanton, Cal.

The Blood That Produced LOU DILLON 1:58 $\frac{1}{2}$ and SWEET MARIE 2:02

GRECO B. 43129

Trial 2:12 $\frac{1}{2}$. Black colt, foaled 1900. Sire McKinney 2:11 $\frac{1}{4}$, sire of Sweet Marie 2:02, 17 in 2:10 list, world's champion sire of speed. Dam Aileen 2:26 $\frac{1}{2}$ (dam of Mowitza 2:20 $\frac{1}{2}$, Sister 2:20 and Greco 2:32, trial 2:20) by Anteeo 2:16 $\frac{1}{2}$, sire of dams of Directum Kelly 2:08 $\frac{1}{2}$, Grey Gem 2:08 $\frac{1}{2}$, W. Wood 2:07, etc. Grandam Lou Milton (dam of LOU DILLON 1:58 $\frac{1}{2}$, Redwood 2:21 $\frac{1}{2}$, etc. Greco B. is a handsome young stallion and a splendid representative of the McKinney family. His oldest colts are 3 years old, only two have been trained and they show 2:20 speed at the trot.

Will make the Season of 1908 at the State Fair Grounds, Sacramento

Fee: \$40. For particulars call or address

JOHN QUINN,

3710 Cypress, Ave., Sacramento, Cal.

NEAREST MCKINNEY 40698

Brown horse, 5 years old, stands about 16 hands high, sired by McKinney 2:11 $\frac{1}{4}$, the greatest living sire of 2:10 speed, sire of Coney 2:02, Sweet Marie 2:02, China Maid 2:05 $\frac{1}{4}$, Zolock 2:05 $\frac{1}{4}$, Pou Bet 2:07 and 12 others in 2:10 list.

First dam Maud J. C. by Nearest 2:22 $\frac{1}{2}$, the first eight-year-old horse to get one below 2:10, sire of Alone 2:09 $\frac{1}{4}$, Just It (3) 2:19 $\frac{1}{4}$, High Fly (2) 2:24 $\frac{1}{2}$, and brother to John A. McKerron 2:04 $\frac{1}{2}$, the fastest trotting stallion of the Wilkes tribe.

Second dam Fanny Menlo, dam of Cladius 2:13 $\frac{1}{4}$, by Menlo 2:21, by Nutwood 2:18 $\frac{1}{4}$, greatest broodmare sire in the world. Third dam Nellie Anteeo by Anteeo 2:16 $\frac{1}{2}$, sire of Antezella 2:10 $\frac{1}{4}$, Angelina 2:11 $\frac{1}{4}$, and 52 others, dams of Sonoma Girl 2:05 $\frac{1}{4}$, W. Wood 2:07, Directum Kelley (4) 2:08 $\frac{1}{4}$, 24 others in the 2:30 list, and grandsire of Tuna 2:08 $\frac{1}{4}$ and Brilliant Girl 2:08 $\frac{1}{4}$.

Fourth dam Fanny Patchen, dam of California Nutwood 15119, sire of Maud C. 2:15, Annie C. 2:23 $\frac{1}{4}$ and dams of George B. 2:12 $\frac{1}{4}$, Irvington Boy 2:17 $\frac{1}{4}$, Central Girl 2:22 $\frac{1}{4}$, and L. E. C. 2:29 $\frac{1}{4}$, by George M. Patchen Jr. 2:27.

This is the only stallion living or dead that carries the five great crosses—Nutwood 2:18 $\frac{1}{4}$, Guy Wilkes 2:15 $\frac{1}{4}$, Director 2:17, Electioneer and McKinney 2:11 $\frac{1}{4}$.

Will Make the Season of 1908 at San Jose.

TERMS—\$50 for the Season, with usual return privilege. Good pasture at \$4 per month. No wire fences; will not be responsible for accidents, but best of care taken of mares sent to me.

T. W. BARSTOW,

1042 Alameda Ave.,

R. O. NEWMAN, - - - Visalia, Cal.

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12 1/4

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08½ (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 3-year-old record of her day. She is the dam of four and granddam of 12 in the list. Next dam Green Mountain Maid, dam of Electioneer and of nine in the list. Iran Alto is the sire of Dr. Frasse 2:11½, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

TERMS: \$30 for the Season. Usual return privilege.

Pasturage \$3 per month.

Will make the Season of 1908 in charge of
H. S. HOGBOOM, Woodland, Cal.

Four more in 2:15 have already been credited this season to

"McKINNEY" 2:11 1/4

Making his wonderful list still more remarkable.

When writing kindly mention this journal. The Empire City Farms, Cuba, N. Y.

Ray o'Light

2-y-o Rec. 2:13 1/2. By SEARCHLIGHT 2:03 1/4
Reg. No. 46270. King of Race Horses

His dam is Carrie B. 2:18 by Alex. Button 2:26½ (sire of Yolo Maid 2:12, Tom Ryder 2:13½, etc.); second dam Carrie Malone (dam also of Cassiar 2:22, Moorland Lass, dam of Pinky H. 2:17½), full sister to Klatawah (3) 2:05½, holder of world's record, Chas. Derby 2:20, etc., by Steinway 2:25½; third dam Katy G. (dam of 7 in 2:30, Saraway, sire of 6, and Carrie Malone, dam of two, two dams of two in 2:30), by Electioneer 125; fourth dam Fanny Malone by Niagara; fifth dam Fanny Wickham (20-mile trotter), by Harold; sixth dam by Imp. Trustee; seventh dam by Imp. Sir Charles; eighth dam (dam of the unbeaten race horse Boston), by Ball's Florizel, etc.

Ray o'Light (2) 2:13½ is one of the handsomest as well as best bred young stallions in America. He will be allowed to serve only ten mares this year, at Salinas race track, as he will have to be prepared for his engagements as a three-year-old.

He will make the Season of 1908 at the Low Service Fee of \$40, with usual return privilege. For further particulars address

E. S. TRAIN, Salinas, Cal.

General Watts 2:06½, World's Champion three-year-old stallion by

ABSOLUTELY CURES
QUINN'S
OINTMENT
REMOVES
SPLINTS
SPRAINS
WIND PURTS
BURNS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. R. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials etc.

OUR CRITICISM of certain statements made by William G. Layng in an article recently published by him entitled "Thoroughbred Stallions Not Wanted," was evidently taken much to heart by that gentleman, as in last week's issue of this paper he replied in great length to said criticism occupying more than a page in so doing. After again reading Mr. Layng's original article and also his lengthy reply of last week, we are convinced that the criticisms made by us were neither "unwarranted" nor "unmerited." We do think, however, that the space thus far devoted to this controversy is entirely sufficient, and that it is not of enough importance to pursue further, and we will dismiss it by congratulating Mr. Layng on the great work he accomplished when he showed the late Senator Stanford the mistakes he was making, and also on the fact that he has proved, to his own satisfaction at least, that had the Senator lived twenty years longer and bred his horses along the lines laid down by Mr. L. might have accomplished something.

McKINNEY'S PRE-EMINENCE.

The Horse Review of Chicago recently printed a list of all the stallions that have sired ten or more 2:15 trotters. McKinney heads the list with 35 to his credit. The Review makes the following editorial comment on this wonderful showing:

"Thirty-five trotters with an average record of 2:11¼, all with race records except Sweet Marie, whose 2:02 was made against time, but who has a winning race record of 2:03¾, made in a second heat! It is more than remarkable—it is truly and unqualifiedly wonderful. The nearest approach, in mere numbers, to this list, is Simmons' list of 23 performers, and he has nothing with a record faster than 2:09¼, while the average record of his 23 is but 2:13¼, against the 2:11¼ of McKinney's 35. In the entire roster of 20 sires the fastest average record is credited to the get of Chimes—2:10½ for 14 performers. But if the records of McKinney's 14 fastest be

taken separately they will average 2:08¾. He has in the 2:10 list no less than 11 trotters, which is more than twice as many as any other of the 20 sires. Again with the sole exceptions of Expedition and Directum, credited with 11 and 10 performers respectively, and at the foot of the list, who are two years his juniors, he is the youngest horse in the list, being now 21. The three horses that rank next below him are Simmons, 29 years, Baron Wilkes, 26, and Onward, 33.

But what will appeal most strongly to every one who analyzes this unusually interesting table is McKinney's extraordinary percentage superiority, based on the number of his entire list of Standard trotters with 2:15 or better records. His standard trotters number 79, all told, which, with 35 in 2:15 or better, gives him a percentage of .44 in that list. The nearest approach to this is made by Directum, with 28 Standard trotters and 10 in the 2:15 list, a percentage of .35. Simmons, with 23 in 103 scores 22 per cent., Chimes, with 14 in 68, and Prodigal, with 14 in 69, each score 20 per cent. When the entire list is examined it shows McKinney to stand but fifteenth as a sire of Standard (2:30 or better) trotters, and his overwhelming superiority as a sire of 2:15 speed—almost another case of "Eclipse first and the rest nowhere"—becomes doubly significant.

A second fact which brings his fairly phenomenal sirehood into bold relief is this one: His 35 2:15 trotters are out of 35 different mares by 34 different horses. To breeders this will strike home as a demonstration of individual potency bordering on the marvelous. There is absolutely nothing so far as we are aware, that parallels it in breeding history as a demonstration of ability to beget speed independent of any aid from particularly happy nicks or crosses. McKinney's consorts, as shown by his 2:15 list, have been of all varieties of blood lines, and more of them, by far, have been of unfashionable than of fashionable pedigree. As a farther instance of this phase of his capacity as a speed transmitter it may be pointed out that of his 11 2:10 trotters only one is out of a mare by a horse any other of whose daughters has produced a 2:10 trotter to the cover of any other sire."

LOW PRICES AT APTOS FARM SALE.

The horse market in San Francisco is a little off at the present time. There are many reasons for this, the two principal ones being the condition of all kinds of business and the poor outlook for grain and hay crops throughout the State. Owing to this condition of things, the sale of three-year-olds from Aptos Stock Farm, held at Chase's Pavilion, Monday night, was not as successful as the stock offered warranted. There was a fair attendance but bidding was slow and the average, \$160 per head, was the lowest the farm has received for years. The sales were as follows:

Bay filly by Dexter Prince, dam Lady Aptos Jr. by Cupid, J. E. Boyle, \$140.
Bay filly by Cupid, dam Lady Aptos by Aptos Wilkes, S. Ackerson, \$155.
Bay gelding by Dexter Prince, dam Psyche 2:16¼ by Cupid, W. J. Kenney, \$135.
Bay gelding by Cupid, dam Lady Ashcat by Aptos Wilkes, Thompson Bros., \$135.
Bay filly by Cronje, dam Princess Christina by Dexter Prince, F. P. Norton, \$95.
Bay filly by Dexter Prince, dam Erosine by Eros, John Renas, \$235.
Bay filly by Dexter Prince, dam Dione 2:07¼ by Eros, E. Rhemke, \$300.
Chestnut filly by Cupid, dam Gracie S. Jr. by Dexter Prince, S. Vandervoort, \$155.
Chestnut filly by Aptos Wilkes, dam Chloe 2:24, William Birss, \$105.
Black filly by Dexter Prince, dam Countess by McKinney, C. A. Durfee, \$235.
Chestnut filly by Dexter Prince, dam Point Lace by Autevolo, A. L. Scott, \$210.
Chestnut gelding by Dexter Prince, dam Galata by Stamboul, A. L. Scott, \$210.
Bay gelding by Aptos Wilkes, dam Niniche by Eros, S. Vandervoort, \$135.
Bay filly by Aptos Wilkes, dam Azaline by Azmoor, F. P. Norton, \$110.
Bay gelding by Dexter Prince, dam Venus II 2:11¼ by Cupid, J. E. Boyle, \$90.
Bay filly by Dexter Prince, dam Lady Aptos Jr. by Cupid, J. M. McGrath, \$115.
Chestnut filly by Cronje, dam Princess Louise by Dexter Prince, S. Ackerson, \$115.
Chestnut filly by Aptos Wilkes, dam Livingston mare by Dexter Prince, S. Vandervoort, \$125.
Brown gelding by Cupid, dam Satilla by Aptos Wilkes, J. E. Boyle, \$95.
Chestnut filly by Dexter Prince, dam Hulda 2:08½ by Guy Wilkes, H. S. Cowell, \$300.
Bay filly by Dexter Prince, dam Emma S. Jr. by Cupid, \$150.
Bay gelding by Cupid, dam Zarina 2:13¾ by Dexter Prince, Mahone & Mahoney, \$110.
Bay mare by Cupid, dam Lady Ashcat by Aptos Wilkes, A. Schofield, \$185.
Pair seven-year-old bay geldings by French Coach stallion out of trotting bred mares, \$575.
Bay gelding five years old by French Coach stallion, dam Sunrise Jr., H. Olsen, \$160.
Bay mare, five years, by French Coach stallion, J. E. Boyle, \$160.
Brown gelding, four years, by French Coach stallion, Hulda Stables, \$110.
Roan saddle mare, Joe McTigue, \$50.

Drink Jackson's Napa Soda.

FOALS AT NUTWOOD STOCK FARM.

Mr. Martin Carter, proprietor of the Nutwood Stock Farm, Irvington, Cal., who bred the fastest trotting stallion ever foaled on the Pacific Coast, and the second fastest in the world, viz., John A. McKerron 2:04½, was in the city on business during the early part of the week. He reports the hay and grain crops on his farm as in good shape in spite of the light rainfall this spring, and says stock on pasture in that section of Alameda county all look well. Mr. Carter says that barley and oats headed out early and while the straw is short, he expects that fair crops will be harvested. He reports the following foals of 1908 at Nutwood Farm:

March 18th, the mare Bonnie Light by Bonnie Direct 2:05¼, dam Record Searcher by Searchlight 2:03¼, second dam Zeta Carter, dam of Chestnut Tom 2:17, by Director 2:17, third dam Lida W. 2:18½, dam of Nutwood Wilkes 2:16½, by Nutwood 600. Bonnie Light has been bred to Star Pointer 1:59¼, since foaling this filly, and Charles De-Ryder, after looking over her pedigree, said that she was about the best bred mare ever bred to the first two-minute horse.

Stambina by Stam B. 2:11¼, dam Mora Mac by McKinney 2:11¼, second dam by Autevolo 2:19½, third dam Foutana, dam of Silas Skinner 2:17, by Almont 33, produced a nice bay colt on March 22nd, by Lord Alwin, own brother to John A. McKerron 2:04½.

On April 16th, the fast and handsome mare Excella, by Monbells 2:23, (son of Mendocino and Beautiful Bells,) dam Expressive (3) 2:12½ by Electioneer, grandam Esther, thoroughbred, and dam of four in the list, foaled a solid bay colt by Nutwood Wilkes that is as fine a looker as a man ever saw. Excella was bred to Lord Alwin this year.

April 19th, the mare Manila by Bob Mason owned by P. W. Hodges, foaled a nice chestnut filly by Nutwood Wilkes.

April 24th the fast pacing filly Azmoor, that took a three-year-old record of 2:20¾, foaled a bay filly by Lord Alwin. Azmoor is by Nutwood Wilkes out of Azrose (dam of Little Louise 2:17) by Azmoor, second dam by Piedmont, third dam Arol 2:24 by Electioneer, and fourth dam Aurora 2:27 by John Nelson.

April 27th Record Searcher by Searchlight 2:03¼ foaled a fine large colt by Star Pointer 1:59¼. It is a natural pacer and Mr. Carter is greatly pleased with it, and in accordance with his plan of continual progress in breeding has sent Record Searcher's daughter, Bonnie Light to be bred to Star Pointer this year.

A full brother to North Star 2:11¼ arrived on the farm May 2nd, when the mare Ivoneer by Eugeneer, owned by Mr. J. B. Iverson of Salinas, dropped a big colt by Nutwood Wilkes. This youngster stood 43 inches high and was after his breakfast as soon as he got on his feet. He is a bay with no white and is a round fellow with big shoulders and quarters.

Marque, the Horse Review correspondent, visited Charley Dean's training stable at Palatine, Illinois, recently, and from his report we extract the following about California bred horses: The three-year-old filly by Sidney Dillon, out of the dam of Sonoma Girl 2:05¼, is a beauty, full made, straight-legged and nicely finished. She was charged with only a little work last season and a quarter in 39 seconds. I saw her on the track, but she was only asked to jog. Kate Dillon, 3, 2:24¼, pacing, who trialed in 2:08¾ for Millard Sanders last season, is well thought of and is a good looking mare. I also took my first look at High Admiral, the two-year-old colt by Admiral Dewey 2:04¾—Palita, 2, 2:19½, by Palo Alto 2:08¾, bought by August Uihlein the past winter. This is the colt Dr. J. C. McCoy, his breeder, and others, pronounced the fastest yearling they have ever seen.

Among the mares that will be bred to the great young stallion Todd 2:14¼ this season is the California bred mare Phoebe Childers 2:10½ by Sir Roderick. Phoebe was owned and raced by Mr. L. E. Clawson, the well-known merchant of this city, and trotted many good races. She is a mare of fine conformation and mated with Todd should produce something extra good. Other California bred mares that have been bred to Todd this season are Consuela S. 2:07¾ by Directum, Sunol 2:08¾ by Electioneer, Lottie Dillon by Sidney Dillon, and Adioo Dillon by Sidney Dillon. Lottie Dillon is a half sister to Carlokin 2:13¼ and Inferlotta 2:04¼.

Mohammed, according to tradition, set great store by the readiness of horses to obey any signal to which they had been made accustomed, and he selected mares for breeding purposes by a test of their obedience. He shut up a drove of mares within sight of water and kept them without drink till they were almost famished with thirst. Then the drove was released, and, naturally, started at a headlong gallop for the water. When they were in full flight a trumpet sounded the "halt." Only five, some say three, mares obeyed the call and stopped, the rest being intent on assuaging their thirst. The three obedient mares were chosen as dams, and were honored by the title of "The Prophet's Mares."

The Roman 2:09¼, bred by Mr. Frank H. Burke of San Francisco, and now owned by George H. Smith of Chillicothe, Ohio, is again in training for the races.

NOTES AND NEWS

Reports of matinee races, etc., received late, will be found on pages 11 and 12.

The big \$50,000 handicap closes next Saturday. Better have an entry or two.

Mr. Ronan, owner of the Pleasanton track, has recovered from his recent illness sufficiently to be out again.

The Portland auction sale was a big success and proved that the horse market is good in our sister state of Oregon.

A full brother of the Eastern trotter, Dr. Strong 2:05½, is a very promising pacer, and will be raced at that gait this year.

Consuela S. 2:07¾, by Directum, foaled a bay filly recently by Directum Kelly, 4, 2:08¼, which died the day after it was foaled.

George Wilkes, managing editor of the Horseman and Spirit of the Times for the past year, has resigned and will return East.

The cream-puff trotter Tempus Fugit, 2:07¾, in Ed. Geer's stable last year, is now one of the kingpins of the New York speedway.

A syndicate at Vancouver, B. C., has purchased the trotting stallion Oro Wilkes, Jr., 2:12¾, by Oro Wilkes 2:11, for breeding purposes.

Andy McDowell has a string of seven horses at the Poughkeepsie track, and expects to go down the line on the Grand Circuit again this year.

William Cecil will again try the eastern tracks this year. He has but one horse in his string and will ship from Los Angeles about May 23d.

The Alameda track is now in very good shape, the rain of last week helping it out very much. Fast work can now be given horses there with safety.

An own sister of that great trotter Wilkes Heart 2:06¼, owned by E. D. Howard, Litchfield, Mich., has been booked to John A. McKerron, 2:04½.

Under the handicap system no horse can lose his racing value so long as he remains sound, and no horse will ever be outclassed by his record.

Will Durfee will probably take a chance at that \$50,000 race with one or two of his trotters. He has several very likely ones for that event in his string.

The San Francisco Driving Club will hold an afternoon of matinee racing at Golden Gate Park Stadium to-morrow, Sunday afternoon. Five good races are carded.

The Crabtree string, including Sonoma Girl 2:05¼, has been shipped to Billy Andrews at Poughkeepsie. It is expected that Lynwood W.'s daughter will trot in 2:03 this season.

Sonoma May 2:29¾, full sister to Sonoma Girl 2:05¼, is working nicely this spring and has already trotted miles better than 2:20 at Selma, Alabama, where she is in training.

Col. J. C. Kilpatrick thinks his horse John Caldwell 2:08¾ would make a good showing in the \$50,000 handicap, and he may enter him in the big race. Caldwell is now in Ed. Geer's string.

Any horse that has speed enough to trot a mile and a quarter at the rate of 2:15 to the mile has a chance to win first money in the great \$50,000 handicap. Entries close Saturday next, May 16th.

Al. Thomas, who took Nathan Straus 2:03¼ after he was considered knocked out for good, will see what he can do with the California trotter, Bonnie Russell 2:10¼ by Conifer this year.

Lou Dillon 1:58½ has another nice bay filly at foot. It is a full sister to her foal of last year, being by John A. McKerron 2:04½. The champion trotting mare will be bred to McKerron again.

M. W. Savage, Minneapolis, Minn., has purchased from James Bingham, Logansport, Ind., the pacing mare, Dana Patch 2:05¼, by Dan Patch, for \$8,000. She will be raced again by Harry Hersey.

Zombro 2:11 will be in Oregon from June to September this year. The owner who does not get a Zombro colt when he has the opportunity is standing in the way of his own success as a breeder.

Henry Titer is training a big stable at the Readville track and his most promising candidate for the three-year-old events is the black filly by Bingen 2:06¼ out of Eleato 2:08¾ by Dexter Prince.

W. G. Durfee will take the Zombro mare Zomalta east with him. Mr. Clark gave up his lease on this mare and her owner has turned her over to Mr. Durfee again as she trotted very fast while under his training.

There are at least fifty trotters in training on the Pacific Coast that would have a chance to win \$30,000 for their owners if they were entered in the big \$50,000 handicap at Readville, entries for which close next Saturday.

Charles DeRyder will leave for the east during the latter part of this month with a good string of horses. There may be no world beaters among them, but Mr. DeRyder has a number of useful horses that should get some of the money in any country.

Daedalion 2:08½ is being jogged on the roads and will not be seen at speed on the track until his new owner, William Higginbottom, has jogged some of the fat off him. Daedalion never looked better in his life than he does at the present time.

William Leech of Marysville, recently shipped his handsome five-year-old mare Hiawatha to Pleasanton to be bred to Star Pointer. The mare is by Baron Bretto, son of Silver Bow, and out of Silver Bells by Silver King, son of Whipple Hambletonian.

All the horses in training which Mr. F. J. Kilpatrick had at Pleasanton in charge of Richard Ables, have been shipped to San Francisco. Mr. Kilpatrick believes the Stadium track at Golden Gate Park is as good a track to train horses on as any in the State.

The New England Trotting Horse Breeders' Association has engaged the well-known turf writer and horseman, Frank G. Trott, to canvass all the principal training tracks in the East, soliciting entries for the \$50,000 trotting derby. It looks as if the entry list will be very large.

Four of the five mares bred to Henry Helman's Jay Bird colt Alconda Jay last year as a two-year-old, have already dropped their foals, and the other mare is due. Every one of the four that have thus far appeared is a filly. Alconda Jay will have at least twenty in the crop of foals of 1909.

Speed carts and speed wagons were sold out of W. J. Kenney's establishment this week like hot cakes. Among those who purchased either carts, sulkies or speed wagons were: H. Schottler, J. W. Bonney, E. Stewart, J. J. Butler, A. Ratto, James McGowan, Jerry Driscoll and Jim Finch.

Fred. H. Chase & Co. have selected July 27th as the date of their next combination horse sale, entries for which will close June 10th. This sale will be held at Chase's Pavilion, 478 Valencia street, and a number of good horses will be consigned. If you have anything to sell better write Chase & Co. about it.

Mambritonian 2:20½, died April 1 at Cloverdale Stock Farm, Knoxboro, N. Y., which had been his home since he was a three-year-old. He was foaled in 1883 at Woodburn Farm, and was by Belmont and out of Sonnet, by Bourbon Chief. He was the sire of twenty-one in the list, including Timepiece 2:10¼.

It is rumored that the trotting mare Angiola 2:06 by Gregory the Great will be raced again this year and may start in the big Readville handicap. It was reported last year that she trotted a mile in 2:10 on July 4th over W. H. Smollinger's farm track at Iron Mountain, Mo., and as there were no 2:06 classes she was thrown out of training.

A driving club is being organized at Ukiah, Cal., and the following temporary officers have been elected: Thomas L. Charlton, president; Otis Redemeyer, vice-president; George P. Anderson, secretary, and Lewis Charlton, treasurer. A small membership fee is charged, the money to be used to keep the track in repair. There is an excellent half mile track at Ukiah, and many good horses owned in that vicinity.

Thomas Smith of Vallejo writes that his stallions are all doing well this season, and have as much business as he cares to give them, as they will be put in training soon. A two-year-old by Gen. John B. Frisbie is the best prospect Mr. Smith has ever had, and he has developed several stake winners. A six-year-old trotter by Tom Smith 2:13¼ out of May Girl can step a mile close to 2:20 and has been worked but very little.

The opening matinee of the Davis Driving Club was reported for the Breeder and Sportsman by Mr. James W. Marshall, and the May Day races at Dixon were written up for us by Mr. E. D. Dudley. Neither of these gentlemen are professional scribes, being extensive farmers and stock breeders of Dixon, but their reports were so neatly done that they went to the printer without revision and made good reading. Messrs. Dudley and Marshall have set an example in reporting races held in their sections of the country that we hope will be followed by other readers of this journal. It is impossible for us to have a representative at all matinees and race meetings, but our readers are much interested in the contests and these reports are always read. The two gentlemen named will please accept our thanks for their contributions, and we shall be pleased to hear from them often.

Every California horseman should make entries and arrange to race his horses on the North Pacific Circuit. They treat visitors right up north and there is as much money in sight as there is on the Great Western or any other circuit in the United States except the Grand Circuit. Secretary Wisdom is now in California and before returning home will visit Pleasanton, Fresno, Los Angeles, Sacramento and other points where horses are in training. Give him all the entries you can.

Branded broncos from Oklahoma brought remarkable prices under the hammer at the American Horse Exchange in New York last week, when Minnick Brothers disposed of their holdings at a special auction on Wednesday evening, under Francis M. Ware's management. John R. Downey paid \$500 for one of the well trained, wiry little ponies, and several others sold for \$450, \$400 and \$350 each. The total for twenty-three head was upward of \$5,000, and the average around \$225.

William Higginbottom, who went to Portland to auction the trotting bred horses in the big sale last week, returned last Saturday greatly pleased with his trip. He reports Portland as the best horse market on the coast at the present time, and says the horses sold well. He also speaks in the highest terms of Messrs. M. D. Wisdom and G. A. Westgate, under whose management the sale was given and says they treated him royally.

"The greater the ability of a mare to perpetuate 2:10 trotting speed with uniformity at the present time the greater her value, says the Horse Breeder. Miss Russell undoubtedly surpasses all the other great brood mares in this respect. Miss Russell is represented by 2:10 trotting speed in the first, second, third, fourth and fifth generations. In this respect she is in a class by herself." She was out of a thoroughbred mare, her dam having been Sally Russell by Boston.

The Abbe, 3, 2:10½, will emerge after a year's stud duty to renew his activity on the turf in Ben White's hands. The full brother to The Abbott 2:03¾, is said to have grown and developed wonderfully with his year's rest. He was a first-class horse in 1906, when he ranked well in the van of the three-year-olds of the season. In fact, more than a majority of harness-horse lovers proclaimed him the very best. If he is like The Abbott he should improve and that means about at least 2:08 in 1908.

William E. Maston of Porterville, writes us that the Star Pointer-Roda Fay colt owned by D. B. Mosher is a square trotter and acts like a race horse. He is now a yearling and has been handled two months. When eight months old this colt weighed 560 pounds and he has grown a great deal since. Mr. Maston says there are several Stonewalls being worked in that section and are very promising. Mr. Maston may take in the Grand Circuit this year and see the big \$50,000 handicap at Readville.

C. K. G. Billings cabled from Europe to enter all his fast trotting saddle horses in the horse show at Durland's Riding Academy, New York. Among them is the big bay gelding Turley 2:07¾, that Ed. Geers campaigned in the Grand Circuit last year. Another is the bay gelding Frank A., that won a heat in 2:11½ at Lexington, Ky., in 1905. The champion trotter Charley Mac, whose record of 2:13¾ under saddle is the fastest ever made, will be exhibited at the show, but not in competition for prizes.

The matinee of the Los Angeles Driving Club which was set for Saturday last, had to be postponed on account of rain. The races may be held this afternoon. The free for all cup race did not fill, Helen Dare being the only entry. As this mare has already won two legs of this event, she would undoubtedly have gained permanent possession of the cup for her owner had the race filled and been decided Saturday as she was in fine condition and capable of a mile in 2:10. As Mr. Beckers will leave with his horses for Oregon on June 1st, he will not have another chance at this cup until next fall. He only needs one more win to secure the cup for his own.

A nag about which there has been much gossip since last fall, when she raced successfully at the minor eastern meetings, is Nahma 2:11½, by Peter the Great. Some pretty fierce tales were floating around the stoves last winter as to what Nahma could do with the average 2:10 horse, and among the thrilling tales was one about a trial mile so fast it seems useless to repeat it. That the Nahma people think the mare is away above the average 2:12 trotter is shown by the way they are naming her this year, and as Sadie Mac and Icon have given ample proof that Peter the Great sires topnotchers the belief, firmly held in some places, that Nahma will win the Charter Oak is not without foundation.

"Sky," as the successful trainer Schuyler Walton is familiarly called by his many friends and admirers at Fresno and elsewhere in California will have a fine stable on the Pacific Coast Circuit this year. Among the record horses he will race and which have already been entered are the good money winner of last year, Athasham 2:09¼ by Athadon, owned by Mr. D. L. Bachant, Nogi (3) 2:17, winner of all the Pacific Coast three-year-old trotting stakes last

year, owned by Mr. George L. Warlow, and Miss Idaho 2:09½ the fast and game pacing mare owned by Mr. Kimball of Hanford. In addition to these three Walton will have several promising colt trotters and pacers that are entered in the stakes.

It has been suggested very often by trainers and owners that the Pacific Coast Trotting Horse Breeders' Association should give four or five meetings this year, making up a circuit of towns where there are mile tracks, and where the local association is not in shape to give one. Santa Rosa, Vallejo, Woodland, Marysville and Chico are mentioned as towns where the Breeders' Association would be welcomed. Prof. Heald, President of the Breeders' Association, recently expressed the opinion that a series of four or five meetings this year under the auspices of the association would be very beneficial to the horse interests, and said he would bring up the matter at the next meeting of the Board of Directors. The association would expect the free use of the tracks and a cash bonus from each town.

Mr. M. D. Wisdom, editor of the North Pacific Rural Spirit, of Portland, Oregon, one of the best farm journals printed, arrived in San Francisco in time to see Admiral Evans bring the great battleship fleet into the harbor and also saw the great parade the next day. Mr. Wisdom was here a year ago, and he could not suppress his astonishment at the building that has been done in this city since then. As he is Secretary of the North Pacific Circuit of Fairs, Mr. Wisdom will visit many sections of California before returning home, and hopes to induce a large number of owners to enter their trotters and pacers through the Oregon and Washington meetings. He will get a hearty reception wherever he goes in this State, as no man has more friends among the harness horsemen than he.

George A. Kelley, owner of the McKinney station Bonnie McK., and who formerly resided at Pleasanton where he managed the track there for Mr. Roman, writes us from his home in Walla Walla, Washington, that he expects to race in California this year, as his colt Bonkin by Bonnie McK. is entered in all the three-year-old trotting stakes here. He will also race Bonnie McK. here if there are races for him. Bonkin worked a mile in 2:21 the other day. Mr. Kelly owns a filly by Bonnie McK. that he thinks is the most intensely bred Wilkes nominated in the Pacific Breeders' Futurity, as she traces no less than six times to the founder of the Wilkes tribe. Della McK., as he calls this filly is out of Birdel 2:17½.

The young Nutwood Wilkes mare out of Expressive 2:12½ was injured and never trained and has been put to breeding. She is now six years old. There is a yearling trotter of hers by Iran Alto 2:12½ that recently trotted a quarter in 39 seconds at the Woodland track. This yearling would very likely have met with the late Senator Stanford's approval as to breeding. Its grandam, Expressive, was by Electioneer out of a thoroughbred mare that produced four trotters, and its grand sire Palo Alto 2:08¾ was by Electioneer out of a thoroughbred mare that produced five. As the late F. W. Covey, Superintendent of Palo Alto Farm, often remarked during the dispersal sales of the farm's stock, the young colts and fillies being sold were of the breeding which Senator Stanford had in view when he founded this great breeding farm, and the way the colts and mares sold from Palo Alto have produced since, confirms the belief of many horsemen that the Senator was on the right track.

RIVERSIDE MATINEE.

A good program of races was presented May Day at the matinee meet at the Riverside Driving Park, and only two heats were required to decide the result in each event. In the 2:50 class, H. J. Elkenbrod's Monk finished first in each heat over J. F. Backstrand's Buena B.; time 2:41½, 2:37½.

The second race, a 2:35 pace, was won in straight heats by Mammy, owned by A. B. Miller; time 2:38, 2:34½. Redlands, owned by R. T. Curtis, was a close second.

In the 2:40 trot, Stanton McGregor, owned by Ed. Simmons, won in 2:27½ and 2:31. E. F. Binder's Eugenia finished second.

W. A. Hayt's Lauretta won the fourth race, 2:22 mixed; time 2:36, 2:30. J. T. Garner's Marigold was second.

The quarter-mile dash was an exciting one. Peter Beatty's Pluma won in 0:25½. In the half-mile dash, A. Ingram's Grip won; time 0:52. The officials of the meet were Thomas Holmes of San Bernardino, Thomas Nolan of Riverside and F. P. Ogden of Highgrove, judges; H. G. Stanley, starter; G. W. Prescott, E. F. Binder and F. S. Pond, timers; W. L. Scott, clerk of the course, and F. A. Ramsey, secretary.

Pearl Russell, dam of the pacers Cubanola 2:06½ and The Duchess 2:05½, by Mambrino Russell, died last week at the home of her owner, Emmett Cushwa, Frankfort, Ind., aged twenty. She was in foal to Moko and dropped dead, apparently from heart disease. Mr. Cushwa fortunately has two living foals out of the great mare, one by Sidney Dillon.

Drink Jackson's Napa Soda.

SAN FRANCISCO DRIVING CLUB.

An immense crowd turned out to attend the opening races of the San Francisco Driving Club at the Park Stadium Sunday afternoon, May 3rd. In spite of the fact that the accommodations for comfort at the track at the present time consist of waiting in the rigs, standing straight up or sitting on a barb wire fence, the majority of the throng stayed the program through. Big fields, and a few bad actors made considerable tedious scoring, but the racing was close and interesting. In the free for all pace, and the 2:18 pace it took three heats to decide.

In the free for all trot, first on the card, Walter Wilkes won in one, two fashion, though Homeway had him straight in both heats. In the 2:25 class trot Lucero had the most step at the finish of each heat and won by a short but safe margin, though Young Lauterwasser, driving Lillith, had him guessing until well into the stretch.

The free for all pace was a regular horse race. Kitty D. had all of her speed in the first heat and standing the others on their heads the first quarter of a mile drew clear and won handily in 1:39, a 2:12 clip; the day and track considered, this heat was a wonderful performance. George Perry was a little rank in the first heat, but in the second heat went right out for the ribbon from fourth position showing close to a two-minute clip. Going down the back stretch he had his field dizzy when they turned for home and won this heat, eased up in 1:40 1-5. Joe Cuicello was up behing Kitty D. in the third heat and with watch in hand rated the little mare almost over to the half mile ground, and when he set her down, she had enough left to win from old Harry Hurst. George Perry had the pole in this heat and taking the word nearly two lengths back was shut off going around the first turn. This loss of ground and a bad break cost him the race as he showed all kinds of speed when once straightened out.

In the 2:20 mixed class there was nothing to it but Dynamite. All the racing came form the struggle for second and third ribbons.

Every horse in the 2:18 class pace looked to have a chance. Sidney B. tried to duck the issue by bolting for the fence when returning to score and delayed the game considerably, but finally got away in good position and out-footed the field all the way and won from Lady Jin in 1:44. Mr. Burton in trying to encourage his sour acting pacer leaned well over to leeward and waving his whip at him looked to be trying to intimidate the contenders in the heat, and was promptly disqualified and set last. The moral is: Set straight if you drive crooked. Scofield set Albert S. down to win the next heat and he gamely shook one after another and won from Schley B. in 1:41, and took the third and deciding heat from the same horse in 1:41½. Results: All races, three-quarter mile heats, best two in three.

First race, free-for-all trot—
Walter Wilkes (Becker) 1 1
Homeway (Lindauer) 2 2
Babe (O'Kane) 3 3
Time: 1:46, 1:45.

Second race, 2:25 class, mixed—
Lucero (Campodónico) 1 1
Lillith (Lauterwasser) 2 2
Darby M. (Hill) 3 4
Lady Cupid (Butler) 4 3
Ed. F. (Finn) 5 6
Roy S. (Scott) 6 5
Time: 1:49, 1:50.

Third race, free-for-all pace—
Kitty D. (Hoffman and Cuicello) 1 3 1
George Perry (Giannini) 3 1 4
Harry Hurst (Becker) 4 2 2
Little Dick (McGrath) 2 4 3
Charlie J. (Leear) 5 5 5
Time: 1:39, 1:40½, 1:41.

Fourth race, 2:20 class mixed—
Dynamite (Todd) 1 1
Nico (Burton) 4 2
Ed. Ray (Faulkerson) 2 5
Monk (Felsen) 3 4
Sycamore (Becker) 5 3
Volma (Lawlor) 6 6
Time: 1:44½, 1:44.

Fifth race, 2:18 class pace—
Albert S. (Scofield) 3 1 1
Lady Jin (Machado) 1 4 3
Schley B. (Becker) 2 2 2
Lady Falrose (Benson) 4 3 4
Sidney B. (Burton) 5 5 5
Time: 1:44, 1:41, 1:41½.

RACES AT CONCORD.

Mr. C. R. Windeler has taken charge of the excellent track at Concord, Contra Costa County, and if given the proper encouragement will give a race meeting of two or three days in the fall, with good purses. Concord track is a mile oval and the soil is excellent. There are stables for fifty or sixty horses. When the proposed electric road from Oakland to Walnut Creek and the San Ramon Valley is completed, Concord will only be an hour distant from Oakland, and the track should then be a very popular training ground for trotters and pacers.

On Saturday, June 20th, Mr. Windeler will give an afternoon of racing at the Concord track, and has offered two purses.

\$75 will be given the 2:20 class pacers and trotters. \$50 will be given the 2:40 class pacers and trotters.

These races will be free to all horses eligible to the class in which they are entered. Five per cent entrance will be charged.

There should be plenty of entries and good racing, and Mr. Windeler assures horsemen that all will get fair treatment who come there to race. Entries will close June 13th.

MAY DAY AT DIXON HALF-MILE TRACK.

Dixon, May 2nd, 1908.

Despite the threatening weather Friday morning, the crowd began to gather early for the annual May Day picnic and races advertised to take place at the Dixon Driving Park, and given by the manager, F. C. Horrigan.

The early train from the north brought quite a crowd, among the number being Det Begelow, Charley Spencer, Mel Keefer, George Stephens, Charley Johnson and others, from Woodland; while from Sacramento come Frank Wright and John Quinn, and from far away Pleasanton came the genial James Sutherland and wife. By the way, this is the second time Mr. Sutherland and lady have favored Dixon with their presence on the 1st of May. It rained hard enough on their first visit to spoil the racing, and yesterday while kindly waiting long enough to pull off the races, the weather was cold and blustery and wound up the day's sport with quite a shower, and now Mrs. Sutherland says she won't come to Dixon again on May 1st, unless, like this year, rain is needed.

Before dinner the management pulled off the auto races, which were very good and exciting, but I have neither the results nor the time at hand. The harness races commenced at about 2 o'clock p. m. with the following officials in the stand: Judges: Frank Wright and John Quinn of Sacramento, E. D. Dudley of Dixon, with Mr. Wright acting as starter. Its a good thing for Magnus Flaws, Frank Walker and other would-be starters on the Grand Circuit that some of the patrons of the sport, and Father Geers and other drivers were not here to enjoy the perfect starts, impartial judgment, and pleasant geniality of Starter Wright, or they would sure lose their jobs and Sacramento one of her best sports and businessmen. If you don't believe this just ask Monte Montgomery?

The timing was neatly done with no suppression by J. W. Marshall, W. Madden and Harry McFadyen. The summaries:

First race, named horses—
Seymour M., b. g. by Diawood (E. Montgomery) 1 1 1
Smiley, br. g. by Bayswater Wilkes (B. Franklin) 2 2 2
Little Dick, b. g. by Son of Oro Wilkes (Smith) 3 3 3
Time: 1:12½, 1:15, 1:09½.

This was easy for the winner as he paced the last eighth of the last heat in 15 seconds flat.

Second race, buggy horses—
Chiquita, b. m. by Diablo (E. Montgomery) 2 1 1 2 1
Solano Boy, br. g. (Stadfeldt) 1 2 2 1 2
Jessie E., ch. m. by Dictatus (B. Franklin) 3 3 3 3 4
Diablo Maid, ch. m. by Diablo (D. Bigelow) 4 5 4 4 3
Glenn, ch. g. by Prince Almont (Smith) 5 4 5 dr.
Time: 1:08½, 1:07, 1:09, 1:07, 1:08.

Third race, three-year-olds, mixed—
Demonio Wilkes, br. g. by Demonio (Smith) 2 1 1 1
Dewdrop, ch. m. by Demonio (B. Franklin) 1 3 3 2
Nusto, br. m. by Nushagak (C. Spencer) 3 2 2 3

MATINEE AT FRESNO.

The May Day races at the Fresno Fair Grounds were well attended and the racing was excellent.

In the 2:16 pace which had three starters, the old favorite Newport started without a driver, he having been in training for some time to go "guideless." He made a fine showing and came in second, the dash being won by Mr. J. W. Zibbell with the black stallion Advertiser in 2:20.

The match race between Keno and Minniehaha went to the former, although Minniehaha got the second heat.

In the buggy race which was for horses hitched to a buggy in which a gentleman and lady were seated, was won by Mr. Welborn's Mabel C. by Strathway.

During the afternoon Mr. Zibbell drove the mare Lady Seymour, owned by George Estabrook of Denver, an exhibition half-mile, the official time being 1:04, last quarter in 30 seconds and last eighth in 14 seconds. Lady Seymour is by Seymour Wilkes, and is a great prospect.

Another pleasing feature was an exhibition mile by the Tom Smith filly Katalina 2:22½ driven by J. W. Zibbell, and Sister driven by Willard Zibbell, who though without hands, owing to the awful railroad accident in which his companion Blaine McMahon of the Breeder and Sportsman, lost his life, is still an excellent reinsman.

The judges of the races were J. W. Kelly, Dr. A. J. Hullinger and P. Donnelly. The summaries:

Pacing, 2:16 class, one mile dash:
Advertiser, blk. s. by Advertiser (J. W. Zibbell) 1
Newport, r. h. (no driver) 2
Milton Gear, ch. s. by Harry Gear (Depoister) 3
Time 2:20.

Match race, \$100, mile heats:
Reno, br. h. pacer (Owens) 1 2 1
Minniehaha, blk. m. trotter (White) 2 1 2
Best time 2:37.

Buggy race, two h. in buggy, one mile dash:
Mabel C., pacer (H. H. Welborn) 1
Bonnie Boy, pacer (White) 2
Time 2:50.

Miss Adbell, 3, 2:09½, after two years of retirement, is to be campaigned again.

THE ARAB HORSE.

The following expert opinion on the Arab horse appeared in the Rider and Driver of April 25th:

The Arab horse is the maker of desert poetry, as he is the companion of the tents and comrade in war of the Arab himself.

Without the Arab horse, Arabia would never have been; with him it doesn't amount to much, notwithstanding the fact that the Arab horse is—for what he is—a jewel, and particularly is this the case when he is made to be the central figure of a love song and a desert sunset.

I am a great admirer of the Arab for what he is, for I spent ten years of my life living with him and mostly on his back, and during those ten years I learned much about him.

I learned to admire his boldness, his grand temper, his sagacity, his wonderful—for his size and speed—endurance and bottom, his extraordinary constitutional and physical soundness, the exquisite beauty of his form, the quality and textural fineness of his hair, skin, nervous, bony and muscular structure, his wonderful eyesight and magnificent courage. I admired and loved him for all this.

But I found that he could not gallop faster than an ordinary man could kick his hat. I found that he was not fast enough to take to England to play polo; indeed, that he was not even fast enough to compete with the ordinary country breeds of India in that great game. I found that in long marches, and particularly forced ones, he had to keep at top speed, so to speak, to maintain his place in the ranks where the walers (Australians) and English horses were taking things easily. I found that when it came to downright want, work and hardship, the flame in his large, soft, brown, but lustrous eyes, went out, and that he drooped and died by the way.

I found, in short, that where he was pitted against thoroughbreds or half-breeds, he was a useless incubance, and that his real value and usefulness belonged to the country where he came from and the civilization that existed there.

As a hack he is the very worst. He has but one pace, and that is the gallop; he knows no other, can go no other. He cannot walk a dozen yards on a level road without sticking his toe in the ground, and his trot is the worst imaginable.

Over rough ground or in the jungle amongst dry mullahs, holes and hidden dangers, he is the safest transport in the world, and I love him for this.

As a cross for breeding purposes history records what he has done. He has stamped himself as the generous giver of all that is good, useful and valuable in the fashionable horse world of to-day, but the potency of his blood only manifested itself many generations after the original cross.

First Arab crosses amount to absolutely nothing, and it takes years and years of the most careful selection and breeding to develop the splendid characteristics of which he was the early possessor.

In the early crosses he only succeeds in losing his splendid individuality and giving nothing in return.

Bred to the biggest, soundest, most perfect specimens of the best families and greatest stayers of the English thoroughbred mares, he would, perhaps, produce in one hundred and fifty years from now a constitutionally and physically sounder thoroughbred than exists to-day, but this is all he possibly could do, and this only because of the superior class and quality of the thoroughbred mare of to-day and those of the days of Roxana and Selim.

Some years ago I advocated a cross between the pure Arab pony mare and the small sons of small families of the English thoroughbred, for the purpose of producing a fast, active polo pony with bottom and endurance, and keeping within the height limit (a most difficult necessity in polo pony breeding) by a further Arab cross through the sire, and finally by careful selection developing a thoroughbred type of polo pony that I thought would be possible as time went on. English sportsmen, however, working upon a plan of their own, are now producing the most extraordinary thoroughbred ponies the world has ever seen, and which any Arab cross of any kind would only serve to deteriorate.

We have tried the Arab in every possible, every conceivable, way. We have given him every chance with every kind of a mare, and all we have succeeded in doing is to lose entirely his superb and valuable characteristics and breed a lot of useless wastrels.

The pure Arab blood, the excellent quality of his texture, his wonderful bone and nerve, his magnificent courage and temper, and his extraordinary constitutional and physical soundness, were the priceless assets he instilled into the race horse of to-day. We thank him for them from the bottom of our hearts, we take our hats off to him, and respect him as we always will do.

In the fullness of his heart, the Arab horse has given us the very best he has, and we will keep it for ever in un fading remembrance and grateful appreciation.

One word for the Arab dealer. Oil and honey, Oriental politeness, courtly Eastern dignity, and to whose voice the music of the nightingale lilting o'er the restful glade and mingling with the bubbling streamlet of the dell amidst the silver moon gleams of the softest night in May, is loud and tempestuous; eyes into whose depths you might gaze for ever as they open wide and languidly to receive your fruitless search; the soft touch of the hand, as with gentle pressure he unlocks your very soul and learns all that you fain would hide, he invites you to his tent,

offers you his coffee and a seat on his carpet, observes that Allah is Good, and to make a long story short, "sells you an 'oss."

Begone! vulgar phrase. Spoil not this Eastern softness (slickness, really), but memory recalls. Oh! that we could forget. How often I've tried to, but memory haunts me still:

"Twere folly to remember,

"Twere wisdom to forget."

But I shall never forget that delightfully fascinating Arab who sold me a wonderfully good looking "Gulfer," and called him a child from the heart of the Nejd.

I have yet to see the man who has visited Arabia in search of an 'oss who has not been "stuck," and stuck good to the tune of:

"Are there any more at home like you?"

Yours very sincerely,

A. H. WADDELL.

Brooklyn, N. Y., April 19, 1908.

AN ARMY SURGEON'S HORSE.

No man, who has not thrown his leg across the back of a good horse and been carried on journeys that occupied days, traversing roads and trails where mistakes and mis-steps would probably be fatal to horse or rider, can realize the love and faith which one develops for the animal that carries him safely and cheerfully to the journey's end. In the army this regard for one's mount, and the reciprocal esteem of the horse for his master are often apparent, and to the civilian looker on is one of the most pleasing features and phases of army life as seen from the outside.

The half tone engraving which appears on this page is from a recent photograph of the handsome

16-hands, black charger "Nigger," now ridden by Surgeon E. K. Johnstone of the 3rd Squadron, 14th United States Cavalry, stationed at Yosemite Valley. The picture of the horse and rider, taken with the grand Yosemite Falls in the background is one that will appeal to every lover of the beautiful in nature. "Nigger" has quite a history. He is now between twelve and fourteen years old, and was originally purchased by the Government for the Black Horse Troop of the 8th United States Cavalry, when Gen. Moore was Colonel of this regiment. He was such a proud fellow and so kind that the Colonel took him from the troop and decided to use him as his own mount. When the Colonel received his promotion the horse came to the Presidio in San Francisco. Later, after General Moore's retirement "Nigger" became the charger of General Funston, then in command of the department of California. When Lieutenant-General McArthur took command of the Division "Nigger" was the horse selected for his use. He afterwards went back to General Funston and was used by him during the maneuvers at American Lake.

The following year General McArthur again had him, and it was from his chief quartermaster Colonel Clem that Surgeon Johnstone received him. Surgeon Johnstone, states that he believes "Nigger" is capable of leading a regiment of troops without a rider. The horse is never happy except when at the head of the column, in fact he frets and is even a little hard to manage when taken to the rear. "Nigger" has all his army life, been the commanding

officer's mount, and his present master considers himself as very fortunate indeed, in having such a horse assigned to him. "When being ridden in these mountains," wrote the surgeon to a representative of the Breeder and Sportsman recently, "sometimes a bugle call will float up from the camp in the valley miles away. 'Nigger' invariably answers it. Although such a big horse, he is as clever on the hardest trails as any mountain bred little mule. In fact he has made the trip from the floor of the Yosemite Valley to Glacier Point and back quicker than any animal I have heard of. He has a splendid fast walk, an easy canter and a very good trot with plenty of action. I might add I have made three marches of three hundred miles each during the last twelve months on him, and he comes in just as he started, just as proudly, and he is never sick or sorry."

A LETTER FROM SECRETARY JEWETT.

READVILLE, Mass., April 24, 1908.

Editor Breeder and Sportsman, San Francisco, Cal.

Dear Sir: I want to thank you for your hearty support of the handicap. In common with the other turf papers you grasp the important bearing the success of the race has on the future of the sport and breeding interests.

One important point has escaped you and that is that records will not count in the handicapping—that is of necessity. The handicap is designed to overcome the injustice of handicapping by records. You use Major Delmar and Sweet Marie as illustrations. Now, I don't know what disposition the handicappers may make of these horses if entered, but taking their last season's campaign—they raced together quite a number of times—they did not show an ability to beat 2:06 much, therefore I should not expect to see them rated in the race better than 2:06. At that point they would have a chance, but to handicap them by their records would put them clearly out of the running.

The best feature of the handicap is that it furnishes employment to such horses as those mentioned above and many others, the best in training, who now have no chance to earn their oats in regular competition. Handicapping by records puts a good horse out of the running after one year's campaign, takes away his earning capacity and destroys his value. It is this tremendous depreciation in values that makes the sport so expensive and drives owners out. Getting a fast record, making a horse famous by his performance instead of making it more valuable destroys racing value. A horse winning an M. & M., a Massachusetts, a Charter Oak or a Transylvania event, or even winning a heat in them, can never start in those races again. Go to the expense of getting a winner and his usefulness is destroyed in a year.

A horse can win the handicap this year and come back and start in it season after season if he remains sound. Win our "Massachusetts" race and you detract from the value of the horse. Win the handicap and you have added to his value. Handicapping by records pulls down, destroys values—handicapping by performance builds up, increases values.

It is probable that many defects may be found in our method or conditions. The principle is right, and its defects will be disclosed by the race and can be corrected. The success of the race means more than financial and sentimental rewards to its promoters, for these are superficial and of no widespread importance. But it is of vital consequence to every owner, trainer and breeder of trotting horses. A successful issue for this great race means added and stable values to his horses; increased earning capacity and lessened expense; it cuts the usual entrance fee in fifths, and of winners into tenths. It is not then a mere platitude, a figure of speech, to state that every owner and every breeder should exert himself to the utmost to make it a success, for they have more at stake in the issue of the event than the association giving it.

Yours very truly,

C. M. JEWETT.

THE LEADING PACING WINNERS.

The list of last year's money winning pacers compiled from the Year Book shows that fifteen side-wheelers won \$5,000 or over. Leland Onward was the leading winner among the stallions, Kruger among the geldings, and Dana Patch among the mares. Citation won thirteen straight races, and was unbeaten. No other harness horse out last year made such a showing in number of races won. Hedgewood Boy, Joe Wilke, Fleety J., and Northern Spy won twelve races, Lady Maud C. and Rex Guard eleven, and Anna V. Brino and Young Chimes ten each.

The unbeaten winners of five or more races number six, and are: Citation with thirteen victories, Jeanette Wilkes with eight, Sir John S. with seven, Dan Jeffers with six, and Kewanee Kate and Lincoln Barnett with five. Dick McMahon, the Chicago reinsman, had three of the \$5,000 winners in Citation, Hedgewood Boy, and Lady Maud C. He drove the latter in all her important victories. Lon McDonald and E. F. Geers were the only other drivers to have more than one to their credit. Twelve of these large winners are descendants of Hambletonian, and the other three from the noted Hal tribe. Five of the Hambletonians are from George Wilkes, three from Alexander's Abdallah, and one each from Strathmore, Artemas, Electioneer, and Dictator.

THE PORTLAND SALE.

Market for Standard Bred Horses Is Excellent and Good Prices Result.

The Spring Auction Sale held at Portland last week by the Portland Horse Sale Company was a big success. The horses sold readily, and brought good prices in nearly every instance. Auctioneer William Higginbottom of San Francisco, who attended the sale and assisted on the auction block, returned on Saturday and reports the sale as one of the best he has ever seen on this coast, that the attendance was large and the bidding spirited. The highest-priced animal of the sale was the three-year-old filly Mary Mims 2:30 by The Bondsman. She brought \$1,400 and was purchased by Mr. W. B. Clemens of Idaho. The following is a list of horses sold and prices brought:

Aga, bay gelding, 4, by Alcone-Ani, F. H. Coffin	\$ 90.00
Amsel, bay mare, 4, by Alcone-Erne, W. J. Ball, Salem	140.00
Bird Music, bay mare, 4, by Alcone-Belle. J. M. Murchie, North Yakima	150.00
Britomart, bay mare, 4, by Alcone-Bab Ballad. George McKinzie, Yelm, Wash.	150.00
Charee, bay mare, 4, by Alcone-Clee. A. F. Garrison	130.00
Duncan, bay gelding, 4, by Alcone-Ida Dolan. J. T. Robertson, The Dalles	160.00
Sea King, bay gelding, 4, by Alcone-Sea Wand. A. F. Garrison	125.00
Fairy Ally, bay stallion, 2, by Alcone-Fairy. A. K. Stranahan, Hood River	205.00
Goldstone, bay gelding, 4, by Alcone-Gold Cup. S. T. Smith, Roseburg	110.00
Lirelia, bay mare, 4, by Alcone-Kuskus. Same. Merriment, bay mare, 4, by Jubilee de Jarnette-Missel. Same	130.00
Lochinvar, bay gelding, 4, by Alcone-Lella. Same	115.00
Luma-Chella, bay mare, 4, by Alcone-Pearl Berry. A. K. Fleming	152.50
Alarm Bird, bay stallion, 2, by Jubilee-Alamire. S. T. Smith, Roseburg	140.00

Winnie West, brown mare, 7, by Westfield-Achieve. J. T. Robertson, The Dalles, Ore.	145.00		

A. D. Hughes of Chicago, has been instrumental in effecting the sales of three \$10,000 trotters within the past year. They were Perfection, Trampfast, 2, 2:12½, and Spanish Queen, 4, 2:26½. Hughes has sold many good ones in his day.

TRAINING DISTEMPER.

Due to over-exhaustion or too rapid work in the training of horses at all ages. There is the indifferent appetite, a cough usually, though often absent, hal coat, unclear eyes, feverish mouth, colored urine, and in most cases a peculiar nervousness, not observed in ordinary forms of distemper. It has cost many owners and trainers the whole season of service of an otherwise good race horse, and it positively can be avoided and the horse race to his full power and speed the whole season, so far as this affection "training distemper" is concerned. Spohn's Liquid is your true hope of relief. Give it in small doses every few days when your horses are getting their stiff "prep work." It will save you all.

CONDUCTED BY J. X. DeWITT.

Three wins of the medal are necessary for individual ownership.

[illegible]

*Dead out. **Guests. †Back score.

A. Miller, 24 out of 25; J. Cooney, 17-23; F. E. Watson 18-22; W. G. Watson, 21; J. G. Wallace, 18-19; J. E. Caine, 17-18; F. Brewster, 18-16; W. Masterson, 17-16; C. Williamson, 17-19; A. J. Thorn, 18-19; A. A. Weckel, 21-15.

W. E. Potter of the revolver club carried off the high individual medal with a fine score of 195 out of 200. Ensign Stephen Doherty, ex-football hero

The foregoing reminds us of another trap shooting episode which happened some fifteen or more years ago, somewhere down the San Joaquin Valley, whether at Fresno, Bakersfield or elsewhere we will not say. At all events there was a tourney on and quite a gathering of shooters from various points were in attendance. Among those participating was Martines Chick of San Diego. Chick will be remembered by the old guard, as a nervy and skilled shot who was always in the money at all of the big meetings of those days, whether shooting in the program events or in a challenge race with another shooter. Knowing that Chick was ready to shoot for a big side purse, a match was arranged between him and a shooter belonging to the town where the shoot was held. To cut a long story short the local shooter won by a fair margin and Chick was out over \$100. The trappers had been properly instructed and Chick was given enough hard plaster-of-paris targets to lose the race. Chick took his medicine and said nothing, but evidently he figured out that some thing was wrong and being a man of resources soon perfected a plan to play even. A part of the program arranged for was a duck shoot, for the entertainment of the guests and visitors, after the tournament. Here is where Chick came under the wire "on the chin strap." It proved a very easy matter for Chick, in his diplomatic way, to secure for a duck shooting partner, the shooter who won his money through the medium of the plaster blue rocks. There is not much further to say, saving, that the two huners, as well as a number of others, were out early after ducks on the appointed morning. Chick and the "wolf," side by side in an isolated blind. The two had a nice duck shoot, Chick had the additional pleasure of getting his money back and some more. What his particular argument was is not on record—it must have been very effective, for his companion had the reputation of loving a dollar as much as he did his right eye. Arooh!

When the fleet of battleships, cruisers and the flotilla of torpedo destroyers passed through the Golden Gate Wednesday noon the forts on both sides of the "Heads" as well as the defensive works of the inner harbor welcomed "Fighting Bob" and his thousands of sailors with salvos from large and small ordnance. The shore batteries' salutes were returned by the warships until the roar of hundreds of guns made one believe an actual battle was in progress. The welcoming salutes and the answers were fired with Du Pont powder in the greatest cannonade and artillery demonstration, albeit a peaceable one, that has ever taken place on the west shores of the Western Hemisphere. In this, as in every other line the products of the Du Pont Powder company is used; results were perfect.

WHERE OREGON ANGLERS FIND SPORT.

The McKenzie river, in Lane County, can truly be called a fisherman's paradise. For years this stream has been noted for its excellent trout fishing and people from all other the United States have gone there to enjoy the excellent sport that the stream affords.

It was on the banks of the south fork of the McKenzie that James J. Jeffries, the world's heavy-weight champion pugilist, and a party of Los Angeles people camped for two or three weeks during the summer of 1906, while they spent the time hunting and fishing. Again in August, 1907, Jeffries' friends who were in the party the year before spent a week or ten days there, the champion being unable to come north on account of pressing business, although he had made arrangements to do so until a few days before the party left.

Jeff's party was up near the headwaters of the south fork, where very little fishing had ever been done before. Their catch during the few days they stayed there was little short of phenomenal. Jeffries himself was the champion fisherman and caught more than did any other member of the party and also held the record for the largest fish caught during the outing. Other well known persons from different parts of the country have fished in the McKenzie and all have declared that the stream cannot be beaten for such sport.

The best fishing during the past few years has been above Blue river, the sport below there having been spoiled to some extent by logging and mining operations. In former years the fishing was good all the way down the stream, even to its confluence with the Willamette, near Eugene, and even now at times some very good catches are reported by Eugene people who either walk or drive over to the river for a few hours of the sport.

The residence, said to be one of the gamest trout that abounds in any stream in the country, is the principal fish caught in the McKenzie, although the Dolly Varden holds a close second in the race for supremacy. The residence varies in length from six inches to two feet, the meat being of a pink color and of delicious taste. The Dolly Varden attains a much larger size and it is often that experts catch them as long as three feet.

Eugene is the starting point for the resorts on the McKenzie, and each year hundreds of persons from other parts of the coast outfit here for a fishing and hunting expedition up the valley that bears the name of the stream. Belknap and Foley hot springs and the resort at McKenzie Bridge are the gathering places for the anglers and each season there is a veritable city of tents at each of the places.

The finest fishing stream in Oregon, perhaps in the world, is the Rogue river, which winds through the emerald valleys and verdure-clad hills of southern Oregon. The Rogue river, with its tributaries, is the home of all varieties of western trout, from the small brook trout to the gigantic steelhead.

The fish that inhabit the cold waters of this stream are the gamiest in the world, it is claimed, and put up the best fight for their size of any species known. All varieties take the fly at almost all seasons of the year. Many anglers are successful with both bait and the spoon.

In the upper waters of the Rogue, western brook trout, cutthroat and rainbow abound. On some of the upper branches eastern brook trout have been planted and they have thriven wonderfully. In the lower Rogue steelhead, which are taken with a fly up to the length of three feet, rainbow, cutthroat and hybrids of these species are found in abundance. Chinook salmon and silversides can also be found in season, and occasionally will take the fly, though the spoon is usually employed.

One must be an expert angler to be a successful fisherman in the Rogue. The stream is too swift for boats and one must wade to a depth of three or four feet in order to reach by skillful casting a favorite loafing spot of the larger fish. The stream is an exceedingly dangerous one and filled with many holes along its rocky bottom. Many anglers have lost their lives stepping off some ledge into a hole, where they were seized by the rapid current and carried to their death.

At the bottom of some large ripple in midstream the bigger fish can be found at certain times of the day, and the fisherman who is skilled enough to make a successful cast with flies alluring enough to attract the big steelhead or rainbow is sure to have the fight of his life in landing him. It sometimes takes several hours to accomplish the feat, the fish fighting for every inch of the way.

Besides the Rogue river proper, Butter creek, Elk creek, Big Butte, South Fork and other tributaries abound with gamey fish, experience showing the more inaccessible the tributary the greater the chance of securing a heavy creel. The larger fish, however, are found in the main stream.

To the Rogue come fishermen from all parts of the United States to enjoy the sport. Large catches are not the rule, and one must know both the river and the fish to secure the best results. The favorite fishing season is from midsummer to late in the fall.

Dams in the Rogue for power plants have interfered to some extent with the fishing, though ladders have been constructed around the obstructions. Below the dam the fishermen at Grants Pass are working havoc with the salmon. Near the mouth of the Rogue R. D. Hume, known as "the lord of the Rogue," has an immense salmon cannery. He operates a hatchery, feeding the young salmon along original lines

with remarkable success. Fish hatcheries are also located on the Illinois river and on the upper Rogue near the mouth of Elk creek. From these hatcheries many trout eggs are taken and the output shipped to other states by the bureau of fisheries in spite of the protest of local fishermen who strenuously object to having the fish supply of the Rogue depleted.

Medford boasts of the champion fisherman of Oregon, perhaps of the coast—W. F. Isaacs. He has fished alongside of nearly all the famous fly-casters and anglers of the west and many of the east and more than held his own. Mr. Isaacs can cast his fly over a hundred feet and knows the favorite lurking places of the wary trout, but, however, it does not follow that everyone can, and the novice is apt to be disappointed. Still, anyone that can cast a fly moderately well is almost sure to find sport enough to justify a long trip to the Rogue.

FLYING TUNA AT AVALON.

Excitement was at a high pitch last Thursday afternoon, when the cry was raised that flying fish and tuna were running in the outer harbor off Avalon. Hundreds of persons crowded down to the water front to verify the report. The landing of a sixteen-pound blue-fin tuna by V. Evans of Fort Worth, Texas, was the cause of the excitement. He was fishing for albacore, when the prodigal tuna took the bait. Evans landed the fish after a fight of an hour and forty minutes.

The members of the Tuna Club believe that the Tuna caught by Evans is a specimen of the Thunnus Thynnus, or leaping tuni, which have been very scarce in Catalina waters for the last four years.

Despite the fact that many of the Coast clubs are lamenting the general dearth of fish, the clubs at Catalina and nearby are rapidly increasing their membership. Fifty fishing launches are being used daily by tourists.

Several good catches of halibut, rock bass and barracuda were made early in the week.

The following new members have been taken into the Catalina Light Tackle Club and have received buttons this week: Silver buttons, Albert H. Elliot of San Francisco; G. S. Barron of Pittsburg; V. Evans of Fort Worth, Texas; bronze buttons, R. V. Gibson of Newark, N. J.; R. Pearson of Los Angeles; D. M. Leatherman of Fort Worth, Texas; Mrs. F. G. Leatherman of Fort Worth, Texas; C. C. Hillis of San Francisco; W. M. Krug of Omaha, Neb.; Dr. and Mrs. C. Beach of New York; F. W. Hallbird of Los Angeles; W. W. Simpson of Whalley, Lancashire, England.

While many sportsmen and campers will regret the determination of the Great Western Power Company not to issue permits this season for hunting and fishing in the district known as the "Big Meadows Division" of that company, yet the purpose to be conserved, the increase of game and fish, will go a long way toward offsetting their disappointment. In an interview Superintendent A. R. Bidwell thus explains the situation:

"In past years the lands owned by this company were always accessible to the general public while held in small tracts under private ownership. Up to this season the company has gratuitously issued permits to fish and camp upon its holdings, but the system has become so unsatisfactory, owing to the constantly increasing number of visitors each year, that the company has now withdrawn all of its lands from public use. By this means the streams will become restocked and the fishing preserved until such time as the Western Pacific is completed, when adequate tourist accommodations will be provided, and the valuable fishing privileges owned by the company will be maintained as the main attraction, by a subsidiary hotel company then to be formed."

The prophecy that the opening of the present trout season would be a most successful one among the fishermen of Santa Clara county proved true, judging from the average size of the catches taken Friday, Saturday and Sunday last, says the San Jose Mercury. With the exception of a few streams which were crowded with rod-wielders, most of the creeks yielded limit baskets. An immense number of fish, even for an opening day, were taken from the streams in the mountains surrounding the valley.

A greater number of those who fished Saturday, Friday and yesterday used either bait or spinners. Most of the limit baskets and the prettiest fish were taken from the rifles with flies. The creeks were low and the fish which refused to take bait, or were frightened by spinners, struck greedily at light-colored flies. Some of the creeks—notably the Los Gatos, Guadalupe, Smith, Llagas, Uvas and the Saratoga—which are easy of access, were practically stripped of their finny inhabitants over five inches in length, the law requiring that trout under this length shall be returned to the water.

Fully fifty of the Izaak Walton host waged a war of extermination on the Los Gatos Creek Friday, and it is estimated that fully as many participated in the clean-up Saturday and Sunday. The Saratoga Creek was also lined by an unusually large number of fishermen during the first three days of the season.

The fish were all of an average size of six inches. A few eight and ten-inch fish were killed.

Very few of the fishermen who tried their luck on the Arroyo Honda or the Santa Ysabel Creeks or the Coast streams have reported their success as yet. Some exceptionally large fish are generally obtained in those sections, although this season may prove an exception to the rule.

HUNGARIAN PARTRIDGES.

A crate containing thirty pairs of Hungarian partridges, all in first-class condition, reached San Francisco last week. The shipment was consigned to the Fish Commissioners, who have already imported nearly 300 pairs of this splendid game bird from Europe for distribution throughout this State. The fund arising from hunters' licenses has made this possible. The climatic conditions prevailing here are peculiarly suited to the Hungarian partridge, it is claimed, and if the birds released are not molested it is but a question of time, it is to be hoped, when they will be plentiful throughout a greater part of the State. Already birds have been placed in Mendocino, San Mateo and San Bernardino counties, and are reported to be adapting themselves nicely to their new surroundings. This last shipment will be released on Mr. Richard Hotaling's ranch, near San Anselmo, in Marin county, where they will be well protected from unscrupulous shotgun artists.

SAN MATEO COUNTY GAME LAW.

Ordinance No. 186 passed and adopted by the Board of Supervisors of San Mateo county on April 6th, 1903, regulating the hunting of game in the county, makes it now unlawful to hunt cottontails and bush rabbits between January 1st and July 1st of each year: To kill rail between the 15th of November of any year, and the 16th day of October of the following year, hunting rail in a boat an hour before high tide is prohibited; it is unlawful to kill any tree or gray squirrel at any time of the year; it is unlawful to kill any song bird, destroy their nests and take the eggs; it is unlawful to kill male deer between the first day of October of any year and the first of August of the following year. The open season for other game is governed by the State game laws.

Truckee anglers will be pleased to know that Senator George S. Nixon, of Nevada, has introduced a bill in the United States Senate providing for an appropriation of \$2,500 for the establishment of a Fish Culture Station on the Truckee River in Nevada. At the present time the trout in the Truckee River are rapidly disappearing.

A RECORD OTTER HUNT.

(By Marshman.)

Look! If that's not the spur of an otter, I'm a Dutchman! exclaimed my friend M. to me one morning as we were jogging along the bank of the Klip River on our Basuto ponies after an impromptu game of polo on the ground which to-day, I believe, forms the playing-field of the Rand Polo Club.

In a moment I was out of the saddle and examining the patch of grey mud which my companion had pointed out to me. Yes; there could be no doubt about it, the pad-prints were those of Master Lusta and upon searching the banks of the stream a little lower down we discovered the half-eaten remains of a yellow-fish, which had probably afforded him a breakfast that very morning for the fish had not been out of the water many hours.

"Tell you what, D.,” went on M., as he puffed out a great cloud of rank Boer tobacco smoke until the pure morning air simply reeked of "burned rags," "we'll get together a bobbey pack, and have an otter hunt; I'm simply wasting to see a little bound work of some sort."

I agreed that the suggestion was excellent, but wondered the while where the material for the pack was to come from.

"Oh, don't worry your noble head on that score," remarked M., as we cantered across a wide stretch of veldt which lay between the river and our bungalow. "We'll go into town this evening, and if we can't borrow dogs, we'll steal 'em" (he spoke quite seriously), "and if we can't get together a pack by borrowing and stealing, hanged if we won't buy up the Dog's Home. I saw the catchers net some devilish vermint-looking curs in Commissioner street yesterday, and you may bet that old pony of yours against a ticky" (3d)—"you won't stand to lose much, for he's twenty years if he's a day—that there will be no lack of dogs awaiting their turn in the lethal chamber, poor devils," rattled on my mercurial companion as he cast a covetous leer at my pony. Bushman, who, although somewhat aged, was as good and clever a little animal as ever looked through a bridle.

"I should hate to offer you old Bushman for thirty any way, M., for I know you'd jump at the offer, and I should lose the best pony I ever threw leg across."

That same evening M. and myself rode into the golden city, and having dined at the club, my friend proceeded to try and borrow a dog from every man with whom he had a "nodding acquaintance."

"Well, I've got a pointer," or "You may have my setters," were the kind of replies made to M.'s cool request. But in most cases the owners of the dogs Mason, and no fond mother ever hugged her offspring closer in passing through a mob than did honest Tom his couple of aristocratic English foxhounds, when that canine rabble tried to strike up an acquaintance with them. "Ware cur dog, Guardsman." "Come in, Amazon." "Get out, you

ugly yaller varmint" (as he took a flying kick at one of the Kaffir dogs which had evidently fallen violently in love with old Amazon). "Dear me, I never set eyes on such a lot o' rag-tail devils in all me born days," cried Tom in dismay, as he whipped off the nondescript "pack" from his beloved hounds. Gad! would, after consenting to lend their setter, pointer, or retriever, as the case might be, ask, "What do you want the dog for—korhaan?" "No, otters." "Otters be d—d, you can't have him for that kind of game," and away would go the dog's owner in a huff. We—or rather M.—managed to "bag" two and a half couple from different members of the club, namely, a bull-terrier (blind of an eye), one Irish and two fox-terriers, an ancient spaniel (he went on three legs by choice), and a powerful skewald animal, of doubtful breed, which was promptly christened "Window-shutter."

After leaving the club we visited the stables of the principal horsedealer in the place, who promised to bring as many dogs as he could commandeer to the "meet," which, by the way, was to take place at a certain small hostelry on the bank of the Klip River, the hour of five o'clock being fixed, for, as many of our readers are aware, the South African veldt holds practically no scent after the heavy night dews have been dissipated by the hot rays of the sun.

Bidding the worthy merchant in horse-flesh "good evening," we walked down Commissioner street until the Dog's Home was reached. It was now nearly nine o'clock, and the Dutchman in charge of the Home did not appear over-pleased at being disturbed by a couple of "verdamme rooineks." A golden disc, bearing the effigy of Oom Paul, gave us the entree to the kennels, however, and ten minutes later we were being towed up the principal streets of Johannesburg in the wake of a spotted weasel-like Kaffir dog and a powerful half-bred Airedale terrier, which subsequently proved herself to be the best of the whole pack.

"We'll call this a day's work, D., for I'm about tired of dog-catching for one evening," said my companion, as we discussed a long schooner of iced lager beer before we set out on our ponies homewards. The idea of calling it a day's work appealed to me amazingly, for, to tell the truth, I had become heartily sick of the very sight of a dog since the Kaffir cur had started to tow me from the Dog's Home.

On the evening preceding the important fixture, men of all sorts and sizes, accompanied by dogs of many breeds and colors, from stately mastiffs down to weasel-bodied Kaffir mongrels (pointers, setters, and sporting dogs generally, were conspicuous by their absence), began to turn up at our modest four-roomed bungalow until we were at our wits' end where and how to accommodate them for the night, while the "pack," which was kennelled pro tem in the stables behind, set up a perfect pandemonium, howling and fighting like so many devils incarnate. It is a poor heart that never rejoices, however, and having dispatched a couple of natives with a four-wheeled buggy to bring in all the available chairs (i.e., empty barrels and boxes) from a neighboring store, M. and I set to work to prepare a huge iron pot of stew from a fine blesbok which my friend had shot a few days before. Our thirteen guests sat in the stoep smoking their after-dinner pipes, and discussing the prospects of sport on the morrow over a glass of Scotch whisky, and M. and myself were placing "shake-downs" for them, when Tom P., the jovial huntsman of the then lately imported pack of English foxhounds, which was kennelled a few miles away, rode up to the bungalow with a couple of old hounds.

"Good evening, gentlemen; the Master's compliments, and he sent old Amazon and Guardsman for you to try: I doubt neither of 'em have ever seen an otter since they were whelped, but they took kindly enough to both jackal and buck," said Tom, before burying his nose in a long sleeve of "Bass."

"It's very good of Mr.— (M.F.H.), and I hope you will lend us a hand to-morrow, Tom."

"Well, gentlemen, I've only been out with otter-hounds once in my life, and that was a good many years ago; but as it's an off day with me to-morrow, I should be glad to hunt with you, was Tom's reply; and as the nights were fine and dry, he elected to take up his quarters on the stoep that night.

The first bright spears of the sun were beginning to bathe the summits of a distant chain of low-lying kopjes in a golden flood, when old Mamba, our Swazi servant, awoke the slumbering echoes of the bungalow by playing the devil's tattoo on a kettle, saucepan, or other instrument of torture. Very soon every man was out of the blankets, and a general rush was made for the little bathing-place which M. and myself had made by deepening a small willow fringed spruit or brook that ran at no great distance from the bungalow, and which formed our maternal place of ablution in fair weather and in foul.

It was well that we laid in a goodly store of provisions, for our guests by this time numbered no fewer than twenty-two hungry men, nearly half of whom had either hacked or driven out of Johannesburg long before sunrise, and the wife of the horse-dealer mentioned earlier herein, a keen little Irish sportswoman, who informed us in the richest of brogue, that "Sure if she had a five-pound note for ivery drag she'd seen with the King's it's a warm woman she'd be that day indade."

The expression on Tom P.'s weather-beaten face when we took him round to inspect the "pack" which was playing up merry hades in the stables, would have been worth a "Jew's eye" to Finch

they were a lot of devils, in very truth, as I, their huntsman, was bound to confess.

No sooner had the noble animals been released from durance vile than two and a half (I stick religiously to hunting technology) of the twelve and a half couple (including the three-legged spaniel started off across the veldt in a bee-line for Johannesburg, while the Kaffir mongrel and his late companion in distress—the half-bred Airedale bitch—commenced a battle royal on the stoep to decide which of them should retain possession of a shoulder of blesbok that had been commandeered from the breakfast-table by the former. With much yelling and cracking of thongs a couple of men galloped off to try and turn the fleeting deserters back. They (the deserters divided forces, however, and the gallant whippers-in only succeeded in capturing the ancient spaniel which, as before mentioned, carried a hind leg up by choice. No use in crying over spilt milk, or rather sped curs, however, and having coupled what remained of the "pack" with pieces of old reins and rope, off we trotted for Dick Sullivan's saloon, where we found some twenty fresh recruits waiting to be initiated into the art of otter-hunting.

It was now a good half-hour after the appointed time, and away we all started to the river, with the exception of one or two thirsty souls who remained in the bar for a second or third nerve-binder, possibly fearful that the excitement of the sport in hand would prove too much for them.

Just before the bank of the stream was reached a hare sprang from her form in a patch of rank grass, and away across, the veldt she sped with the coupled, yapping curs, scrapping and falling over one another like so many boys in a sack race, in their anxiety to get on terms with Mistress Lepus Carpen-sis, who, with one lug laid down and the other pricked quietly lopped over the arid plains as though she rather enjoyed the fun. Suddenly the air was rent with, "Ware hare, ye varmint: ware riot, dang your blood! Ye ought to know better, ye fools, after all the larning ye had in the old country," etc.

The staid old couple of foxhounds, suddenly seized with the rioting fever of the canine rabble, had—probably for the first time in their lives since puppyhood—broken away from the astonished and outraged huntsman, and across the veldt they raced in the wake of the hare, their deep, bell-like voices almost drowning the yapping of the struggling rabble of cur-dogs.

Still rating and cussing, Tom jumped on to the pony of one of the field, who, owing to a great breadth of beam had been granted permission to ride to "hounds," and off he galloped in pursuit of Amazon and Guardsman, as if his Satanic Majesty was behind him, while the rest of the field—including M. first whip, and myself—laid into the pack with hearty goodwill. At length we had them in hand again, and five minutes later the banks of the river were being drawn; one-half, led by the Airedale, working the right and the other half the left-hand side. For perhaps forty minutes nothing wearing fur or hair was moved, then suddenly one of the Kaffir dogs made a rush into a patch of scrub that grew down to the water-edge, and out bolted a meerkat, which led the pack a merry burst across the veldt for quite a minute-and-a-half's duration. Then with a flirt of his tail, as though to wish his pursuers "good-bye," he disappeared into his burrow, which ran for many feet under the surface of the hard-baked earth. Some little time was wasted in getting the pack to the water again, but finally they were whipped back to draw for the legitimate quarry, the Airedale, after feathering round a growth of dry rushes for a few moments, gave a whimper, and away along the bank she drove, with the whole canine rabble—barring the foxhounds, which, possibly mindful of the trouble they had already got into through running the hare, refused to work a yard of the trail, but kept religiously at their huntsman's heels—yowling and yapping for all they were worth.

The fun was fast and furious while it lasted, and the manner in which the man of weight rode to the flying pack and wheezingly cheered it on—in spite of antbear earths, meerkat holes, and other horse-traps, with which in parts the veldt was honeycombed—was refreshing to see. "Hounds" very soon came to a check, however, at the junction, a narrow but very deep spruit of the river.

Thinking it not improbable that the otter—I knew the quarry to be an otter from the working of the dogs—had taken to the smaller stream, I took the Airedale bitch and half-a-dozen of the most likely of the mongrels (amongst them the "Kaffirs," which, although wild as hawks, possessed wonderful scent, a short distance along the spruit, while M. tried forward with the remainder.

The old bitch proved herself a rattling good worker, and along under the shelving bank she hunted until, with a whimper, she was on the trail again and going hell-for-leather, with the others close in her wake.

With a "halioa" to the rest of the field—only three of whom had accompanied me—I "footed it" for all I knew to keep on terms with my "flying hounds," which ran eagerly enough, and at a pace which proclaimed a breast-high scent.

Suddenly a loud "hien gaze," from a youngster whose long legs enabled him to pass every one on the field, caused me to put on a spurt, and looking forward I saw a fine otter running under the far

bank of the stream, about three hundred yards ahead of the leading dog.

In spite of the pitiable pack of mongrels I was hunting, every nerve in my body quivered with excitement; and how I longed for a few couples of good English otter-hounds at that moment. On and on ran the gallant animal, now on the level veldt, now under the steep bank of the narrow waterway; and now those weasel-barrelled Kaffir mongrels begin to press him, and the old Airedale bitch is no laggard. The spruit widens out, and the quarry takes to the water. The dogs are puzzled at the sudden disappearance of their game, enabling M. and a few of the field to bring up the rest of the yapping, howling pack. "Chain the stream below! there he blows!" cries the leggy youngster, who comes rushing towards us pointing to a chain of air-bubbles which rise to the surface from below the turbid stream. The youngster, a West-countryman, and no novice at the sport in hand, is right. The otter finds he has made a mistake in leaving the main stream, and is trying to double back to it under cover of water.

In a moment half a dozen of us were up to our breasts in water, hand in hand, and with our feet moving from side to side to stop the gallant amphibian's passage. The motley pack are now yapping all round us, some on the bank and some in the water, amongst the latter the three-legged spaniel.

"Look out! here he comes!" shouts some one from the bank, as a volume of bubbles rise to the surface, not a dozen yards away.

"Gad! he touched my leg!" cries the centre man of the chain, in a half-scared manner. A great swirl of churned-up water as the otter, frightened by the moving legs, turns, tells us that the "middle-link" does not err in the statement.

"There he blows!" and begad old three-legs has him, but the old spaniel's collared him too far astern, and the otter, turning, fastens on to his canine enemy, and the pair disappear from view into the oozy depths of the stream.

"For Heaven's sake, save my dog!" cries the weighty horseman, as he rools himself out of the saddle, and commences to run up and down the bank, as though debating within himself as to whether he should dive into the spruit and rescue gallant old "three-legs."

Suddenly the leggy youngster jumped into the stream, and as the tip of the otter's "pole" appeared above the surface of the water, he had it; and the next moment, with a great swing, both dog and otter lay gaping on the veldt, for neither had released their hold, and both were too done to show further fight.

It was not without a feeling of repugnance that I saw my bobbey pack worry the last spark of life out of their gallant quarry, but were I to say that I did not enjoy my first and only otter-hunt on a South African Klip River I should scarcely speak the truth.

DOINGS IN DOGDOM.

Mrs. E. L. Morgan's excellent Boston terrier Vixen III whelped April 22 5 puppies to Wonderland Kennels' Ch. Dick Dazzler.

Two Vixen puppies by a prior breeding to Dick were winners at the recent Frisco show.

The Honolulu Kennel Club show will be held during when the fleet is in the harbor.

Mr. George A. Cranfield has been engaged to judge all breeds. The island sportsmen are to be congratulated on the choice they have made. Mr. Cranfield has had an experience that will enable him to do justice to the various classes.

Doggy affairs have taken on quite an upward turn in the far away Pacific Territory and no doubt there will be a large entry, the judge is deserving of it.

J. I. Sparrow has made a top notch mark as a breeder of bull-terriers. There has been some question as to his eligibility for the breeders' cup at the recent Frisco show. We are informed a protest was entered against the judge's award to him of the Dr. H. S. Tevis' cup (this making the third and necessary win for permanent possession).

The protest, we take it, is without avail as against the judges' award, that stands of record. Should the award have been made without cause, as is claimed, in that the wins did not comply with the original conditions that governed the award, it is up to the American Kennel Club to adjust the mater when taken properly before that body, or its coast representative, the Pacific Advisory Committee.

J. I. Sparrow's good bitch Silkwood Molly was due to whelp on the 5th inst to Croydon Czar, the well-known producing sire.

Ch. Ivel Damon served Mr. W. F. Weiss' fine young bull bitch Nairod's Duchess of Salano April 24th. We look for something rather good from this mating.

Wonderland Kennels purchased the reserve dog winner in Bostons, Hazelwood Statesman, a corking good young dog brought out here by George S. Thomas. Statesman should prove to be a very useful stud dog for the San Mateo Kennels.

THE OLD CAMPAIGNER.

A Conversation on the Betting Proposition by One Who Thinks.

(Ky. Stock Farm).

"I have found something in one of the Chicago daily newspapers which I can not understand, and which I would like to have you interpret for me, if you can," said the Amateur, as he carefully deposited upon the desk a clipping containing this:

"Can not those who are interested in the continuance of horse racing in New York discourage the use of the dead heat signs in the daily racing reports? From a long-distance view it would seem that scandal would be ameliorated if coups, killings, plunges, dumps, upsets, and that sort of thing were not made the burden of the regular story. The worst enemies of the game are those who would have no raison d'être if the things were entirely crabbled. Of course it is none of the business of us out this way. We have been thoroughly tamed."

"Well," queried the Old Campaigner, "what about that you have just read, it is too heavy to percolate into your guess tank? To me it is as plain as the lines of ignorance that no sort of intellectual massage appears to be able to wipe off your map. I don't know whether you know it—but to be sure you don't or you wouldn't be in here this morning bothering me about a matter that every school boy knows as well as he knows the alphabet. But what I was about to say is this, that every reporter who has been allowed, in recent years, to put his stuff in daily or turf paper has had twice or three times as much to say about the betting as he has had to say about the racing. The reason for that is plain enough and it is a sorry indictment of the intelligence of newspaper publishers, and is this: and nothing more than that the men assigned to report races never had any training at the work, do not know one feature of a race, of any kind, from any other feature, hence can not write an intelligent story about the contest, if there was a contest. But, my boy, there is one thing they can do, and that is tell what is going on in the betting ring. That's the easy pie. That's the stuff that will justify the scare heads and the pictures of the prominent plungers and all the wild talk about the 'ring lost a fortune to the lucky players who have been watching and waiting for this good thing for over a month' and more rubbish of that kind: Pick up any daily paper printed in, or around, a town that supports a race meeting and it is a safe bet of a million to one that the bulk of the day's story of the races consists of the odds and the plunge that was made or the coup that failed. Fine reading, that. So much of a help to the lover of horses who wants to know a little bit about how the races were run and from that information get some idea as to the value of the blood of the winners. One would imagine, if he judged solely by the race reports, that blood had ceased to be a factor in horse racing and that all there is to a modern race course is the betting ring and the pay gate. I do not know that the newspaper publishers are entirely to blame for hiring men to report races who do not know which end of a horse to feed at. It may be possible that they imagine racing is a matter of importance to the rabble only and do not care to bother with putting it in the hands of intelligent men. Or, they may believe that all the public cares for is news from the betting ring. At all events that is all the reader of the average daily gets and that is why he comes to believe that all there is to the race track is, as I said a minute ago, the pay gate and the betting ring. He gets an idea that the race track is conducted for the benefit of a few millionaire sportsmen and several fat bookmakers. And it may be no bad guess that he guessed right. However I do not think the case is quite so bad as that. But I have told you before, and the repeating of it will do no harm, that every branch of horse racing has paid too confounded much attention to the betting end of the sport. That feature is poked eternally and always into the faces of people who would at least not be the enemies of the game even though they could not be its friends. And it is not so certain but that a whole heap of people who delight in watching horse races would be its best friends instead of its worst enemies if there was not so much prominence given to the betting ring."

"But you do not mean to indicate that in your opinion the followers of harness racing have been guilty of the mistakes which have done so much to bring the sport of thoroughbred racing into disfavor?"

"Most assuredly, I do," retorted the Old Campaigner, and he straightened in his chair in the way that always indicated he might hit any head he saw even if that head be his own. "I do not intend to name any names because it is not at all necessary to do so. But I beg to ask you to let your memory float back a few yards to the time when the brigade of plungers went through the Grand Circuit and came on to Lexington. What was the feature of the stories the boys on the horse papers sent to their respective publications? You don't remember? Well I do. It was a photograph of the biggest ticket sold in the auction pools. And the story of the betting on that particular race took up every bit as much room as the picture and the history of the winner of it. There's a fine lot of boys do the big races for the papers and some of them know what is going on out in front of them. But the main trouble with the most of them is that they have forgotten that

the races are supposed to be trotted and paced out on the track and not down in the betting ring. Not that some of them are not decided in the betting ring, to be sure. But some of them are not, fact is that most of them are not. Which is all the more reason why the betting should be left to those who engage in it and to the supervision of the judges. Where the racing is straight the odds on this that or the other horse are of no interest to the general reader of any paper and if the race is crooked the story of the crooked odds will come to the surface as a matter of course. Take it down the Grand Circuit for instance. More than half the newspaper representatives, the boys who try to do the work for the local papers make more out of their 'best bets' for the day than they do about all other features of the racing put together. They seem to fairly dote on the matter of odds and they think (and appear to know) vastly more about the betting ring than all the rest of the race course and its appurtenances. Most of their tips and best bets are silly guesses that only serve to deceive a few misguided people who believe everything they see in an otherwise reputable newspaper, and who after following the tip and losing their money are ready to declare their belief in the absolute dishonesty of all horse races. Bearing all that in mind can you find real reason to wonder why there is a strong sentiment against the featuring of the betting angle of the sport? We ought to be tickled to death to think that the day of the plunger on the trotting turf appears to have passed out for keeps. I hope I am not mistaken about it. I hope that the entire fraternity will confine their operations to Wall Street, the Chicago Board of Trade and thoroughbred racing, what little is left of it. And there will be a whole lot less when the special session of the New York legislature gets through with its May house cleaning for you can take it from me and from every other man who can read the signs of the times that Hughes is 'gwine to have his way' and it makes no difference what you and I and the other fellow may think the day of the big gamble on the ponies in and around the big town on Manhattan Island is rapidly approaching its sunset and its dusk. Largely due, let me assure you, is that unpleasant situation, to the head-lining of the betting ring doings and the side-tracking of the real news features. It is a lesson that the promoters of every sport must heed or they will find that it is under the ban and headed for the garbage dump. If I had to do with the printing of news relating to racing I would see to it that never a mention was made of the betting ring nor of the odds. There is no need of going to the trouble to wave a red rag at a bull. To do it won't help you get across the field and not to do it may save your precious life. Furthermore there is no certainty that the life of the sport depends upon the betting. I know we all believe, or in the past have believed that racing without betting is very much like roast goose with no goose. But that belief may have been born of conditions and fostered by the fact that harness racing has been conducted in the same old sweet way for over half a century. Of one thing I am sure, though, and that is that if it is finally put up to the promoters of the sport to get along without betting or go out of business they won't go out of business. Look at the Readville crowd. No betting allowed in Massachusetts, yet here those men come along with a purse of \$50,000 to be raced for in a single dash! That makes it look to me as if there is so much life in the sport of harness racing and the interests which surround it that it is not going to die just because the privilege of doing a little betting is denied the few gyps who follow the Grand Circuit and most of whom seldom or never put down a bet unless they are reasonably sure they have a sure thing. They have been catered to for a good many years and they have stood in the way of all the reforms that have been proposed and that are absolutely necessary. Once they are set aside by the lack of an opportunity to get their usual play in the auctions and the books there will be an improvement that can but make the sport the best and most popular of all."

"My, Oh, Me, Oh, My, but that sounds nice," chuckled in the Amateur, "but how are you going to square it with your own conduct and your former opinions? You have gone down the Grand Circuit dozens of times and have backed your choices whenever you pleased and have said a thousand times, in print and a million times out of print, that you are in favor of allowing any man to bet his own money on the races whenever he desires to do so. Now you plant yourself on a high moral plane and back up the reformers who are trying to kill the sport."

"Guess again, young man, guess again and try to guess right," said the Old Campaigner. "Your statement of the facts is strictly correct but your deduction from them is about as woody as anything I ever heard you elucidate and that means it is pretty punk. The point I have been trying to impress upon your very dull thick box is that the welfare of no sport should be sacrificed for any individual, his opinions or his desires. I can live without the privilege of betting on the races. But can the sport live if all there is to it is to grant you and me and the other fellow that privilege? Under existing circumstances the thing to look out for is not the betting privilege but the right to exist. If base ball had been built on the pool box it would have been strangled to death years ago. But it was built on a surer foundation and the easiest way to kill it to-day is to legalize betting on it, or permit open betting

on it where professional games are played. There are a lot of men who would like to see open betting on the game but they have about as much chance to get it as you have to become the owner of a winning stable on the Big Ring. If we could have betting on harness races without public opposition and without having to bribe a lot of hobo politicians and cheap John officials every time a string of purses was announced there would be nothing to complain of. But we have the public opposition and we have the other things just mentioned and every now and then a state legislature takes another whack at our pool box and that is why I have come to the conclusion that the sooner we get rid of the box and the stink it raises the sooner we will have what we want and what will be best for us. If you don't think so, think again and think hard."

VANDERBILT GETS HISTORIC WHIP.

Just before leaving New York for England last month Mr. Vanderbilt received as a present from Edward Duplessis Beylard of San Mateo, California, a four horse whip with a history, to be used in driving the Venture on the Brighton road. It is said that this whip was used by the late W. G. Tiffany on the Brighton road in 1873, when he used to drive daily the nine miles between Reigate and Crawley in thirty minutes, stopping once at a tollgate on the stage. The whip was made in London by George Schomberg, a celebrated whipmaker, whose daughter is now Mrs. Morris E. Howlett. Mr. Tiffany, so the story goes, presented it to Mr. Beylard many years ago. The handle, or hand piece, is covered with the skin of a sheep's tail.

Appropos of four horse whips, Mr. Howlett drives with one that bears on the cap and ferrule this interesting inscription:

To Morris E. Howlett, from his friends, Fairman Rogers and W. G. Tiffany, as a testimonial to his fine coachmanship. May 1, 1900

The stick was made from a hickory sapling cut in Mr. Rogers' dooryard in Philadelphia. From the butt to the point it is eighteen feet long lacking an inch. Its owner is something of an adept with a four horse whip, as some of his friends can attest. Guy Ward, for example, once expressed doubt about Mr. Howlett's ability to put a pin in the point of his lash and send it into an object twenty feet away. He held out his hand to try Mr. Howlett's skill. The pin just grazed it at the first attempt. After the second Mr. Ward needed the services of a surgeon. The pin was driven half its length into his hand.

One of Howlett's amusements is to put three or four pennies in a row, half an inch apart, and then pick them off, one at a time, as designated, with the point of his lash. Though he confesses to being fairly expert he says one must go to Switzerland, among the diligence drivers, to see the real wizards of the four-in-hand stick and thong. Some of these mountain drivers will, he avers, set up a wax taper on end, light it and then snuff out the flame with the point of the lash without disturbing the taper enough to make it fall.—New York Herald.

William W. Bair, who trained and developed Maud S. 2:08½, and drove her to her record nearly twenty-five years ago, died at his home in Philadelphia on the 15th inst., at the age of 69 years. Mr. Bair jumped into prominence on the turf with Maud S., in 1881, when he drove the mare to a record of 2:10½ to beat 2:10½, at Pittsburg, on July 13. On July 20, 1881, he brought the mare to Belmont track, Philadelphia, under the management of the late M. Goodin, for a \$2,500 purse, to beat 2:14, and drove her three heats in 2:12, 2:13½, 2:12½. Maud S. reduced her record to 2:10½ at Rochester, N. Y., on August 11, 1881, and at Cleveland, July 30, 1885, trotted to her world's record of 2:08½. Two years ago Bair purchased the mare Czarina Dawson 2:11½, by Czar, from William Hughes, of Bryn Mawr, and re-entered the game. But his health failed and he retired, being unable to stand the duties of training. The funeral was held on the 17th inst., at the home of his brother, Oliver H. Bair, at Philadelphia.

A VALUABLE HORSE REMEDY.

Readers of a little book which the Lawrence-Williams Co., of 1013-1017 Oregon avenue, Cleveland, Ohio, have issued, can't help being convinced that the horse remedy Caustic Balsam, manufactured by this company, will do what they claim it will do. Letters which they reproduce in this booklet from users of Caustic Balsam prove it to be thoroughly satisfactory and a remedy that can be depended upon. They claim that it will cure curbs, splint,weeney, capped hock, strained tendons, founder, wind-puffs, all throat difficulties, all inflammation, all swelling, all lameness from spavin, ringbone or other bony tumors, and that it will positively remove all lumps or blemishes on horses, cattle, and sheep without leaving any scar or other injurious effects. As the name indicates, it acts like a blister, but without the unpleasant consequences. It penetrates the skin like the blister, causing a slight engorgement or obstruction, and a profuse exudation or serosity of watery fluid, and it is said to have four times the power of a blister. It takes the place of cauterization with a red hot iron and has the same strength and the same intensity and produces the same effects, equally thorough and equally penetrating. It can be used, however, without fear or danger of leaving a mark or blemish. The manufacturers of Gombault's Caustic Balsam state in a clear and concise and brief way their claims for their remedy and give hundreds of testimonials from users in the little booklet above mentioned, and they would like to send a copy of same to any reader of Breeder and Sportsman who has horses having anything the matter with them. Just write them a letter addressed to Cleveland, Ohio, mentioning Breeder and Sportsman, and it will be forthcoming.

Drink Jackson's Napa Soda.

FINE SPORT AT STOCKTON.

(Stockton Record).

Between five and six hundred people attended the opening race matinee of the season last Sunday afternoon at the race track. The Stockton Driving Club presented a fine card, and the crowd was well pleased. The events demonstrated that Stockton has some fine horses.

The club is making the sport strictly amateur and all gambling is absolutely prohibited. A majority of the spectators were women. There was not a drunken man on the grounds yesterday, and everything was conducted in a manner that was thoroughly clean. The Directors of the new association are to be congratulated on the success of their first meet.

All of the races were exciting but the second event was the race of the day. In the first heat, Chestnut Tom led to the quarter by half a length. They were lapped at the half and almost lapped until the stretch was reached, when Cranky Thorn forged ahead and won by a half length. Cranky Thorn had the pole in the second heat, but Chestnut Tom out-trotted him on the first turn and led him by about a half length all the way until about fifty yards from the wire, when Cranky Thorn forged ahead and won by a neck.

The first race was won by A. L. Archambeault's Babe, ably driven by her owner. Grigsby's Genevieve G., driven by Algeo, came in second and McRey, driven by Murray, was third. Ellen M., driven by Miller, came in fourth.

In the third race, Chappo, well driven by his owner, landed the first heat in 2:28. Gilt Edge Dick, who made two breaks in this heat, was second, and Ramus third. In the second and third heats, Dan Lieginger had Gilt Edge Dick on his good behavior and landed the two heats in an easy manner in 2:27 and 2:29 respectively. Chappo came in second and Ramus, who was not up to form, was withdrawn.

Race No. 4 was also highly exciting. The first heat was a race from wire to wire. Roy L., driven by Dan Lieginger, landed the first heat by a neck. Derby Mc., a good trotter, was second and Lady Irene third. In the second heat Roy L. led to the quarter with Derby Mc. second and Lady Irene third. Down the back stretch, Lady Irene secured the lead only to be passed at the three-quarter pole by Derby Mc. All the way down the stretch, first one and then the other had the lead until within a few yards of the wire, when Lieginger shook up Roy and landed him a winner by a nose from Derby Mc., who beat Lady Irene by only a slight margin. Roy L. is by Mr. M. Henry's Educator, and is the first of that horse's get to start in a race.

Several members of the Sacramento Driving Club were in attendance and of their officers, Messrs. Christy, who is President of the club, and Directors Silvia, Dittus, Wheeler and Smith, acted with John Galway and Frank Lieginger as judges and time-keepers of the Stockton meet. Fred Johnson was the marshal and President Sherwood was there as the general overseer.

First Race—
A. L. Archambeault's ch. m. Babe, (Archambeault) 1 1
John Grigsby's s. m. Genevieve G. (Algeo) 2 2
F. A. Murray's b. h. McRey (Murray) 3 3
W. J. Miller's b. m. Ellen M. (Miller) 4 4
Time: 2:59½, 2:55.

Second race—Free-for-all.
Charles Helm's b. g. Cranky Thorn (Helm) 1 1
George T. Algeo's ch. h. Chestnut Tom (Algeo) 2 2
Time by quarters—33¾, 1:07½, 1:45, 2:19, 3:36, 1:10½.
1:46, 2:20.

Third race—Pacing.
G. F. Willie's b. g. Gilt Edge Dick (Leiginger) 2 1 1
G. T. Donovan's br. g. Chappo (Donovan) 1 2 2
Ed. Lavin's blk. h. Ramus (Lavin) 3 dr.
Time: 2:28, 2:27, 2:29.

Fourth race—
Dan Leiginger's b. h. Roy L. (Leiginger) 1 1
Charles Fagan's b. h. Derby Mc. (Fagan) 2 2
Joseph Jones' ch. m. Lady Irene (Jones) 3 3
Time: 2:41, 2:40.

THE STARTING IN THE \$50,000 HANDICAP.

Of course everybody will appreciate the impossibility of a starter being placed so that he can observe his entire field and get the horses away with satisfaction to the drivers, the spectators or himself. Handicapping by distances requires a new method of starting therefore, and that which the New England Trotting Horse Breeders' Association has adopted makes the starting in a measure automatic. The starting signal will be the ringing of an electric gong or bell of sufficient volume of sound to be heard by all the drivers. This bell will be placed on a high post remote enough from the track so that it will not startle the horses. Each class or division of horses in the race will be in charge of a starter whose sole duty will be to watch and start the horses in his division. Each of these starters is connected with the gong by an electric wire; when the horses in his charge are in proper position he presses a button, and keeps it pressed so long as his horses remain in position; if any get out of position he removes his finger from the button. When all the buttons are pressed in unison the gong rings, but it cannot ring otherwise.

Permanent Cure for Ringbone, Curb, Grease Heel and Thoroughpin.

I have effected permanent cures for ringbone, curb, grease heel, thoroughpin and seed warts with Gombault's Caustic Balm. I have recommended it to several of my neighbors and they have been equally successful in its use. It will do all you claim for it if properly used.—P. G. LILLARD, Williamstown, Mo.

IF YOU WANT TO WIN \$30,000 or any part of the balance of the \$50,000 which the enterprising New England Trotting Horse Breeders' Association offers for the much talked about handicap race for trotters, you must make your entry on or before Saturday next, May 16th. Candidly, we believe the offer of this big purse, the largest ever hung up for trotting horses, has done more for the trotting horse industry than anything devised for years. This purse gives every horse that has speed enough to race in good company, an earning capacity that does not end by winning this event or taking a fast record. The winner of this year's race, even though he should trot fast enough to break all records, will not be barred from starting in it next year. The handicap regulates this, and every trotter from the champion down will be started at a distance from the scratch where he will have a chance to win, and all others starting will also have a chance. Every California owner who intends racing his horses on Eastern tracks this year should have an entry in the big handicap if he has a trotter capable of a mile in 2:15 or better. The chance to win a fortune of \$30,000 (enough to buy three hundred acres of \$100 land) should not be permitted to pass, especially as it only costs one per cent of the purse to start. Read the conditions of this race over carefully, and the deeper you study them the surer you will be that it is the best plan of racing horses ever devised. If it succeeds we will have handicaps at all our trotting meetings in the future, and when this is the case there will be twice as many trotting horses raced and four times as many bred as at present. The thanks of every harness horseman in America is due the enterprising association which has inaugurated and advertised this race.

RACING AT LOS BANOS.

At the matinee races at Los Banos on May 2d, at least 1,000 people were at the track. The day was bad for racing, as it was cold and windy.

The first race was the free for all, which was won by the pacer Albert E. by Altamont. It was a five-heat race, Wild Bill getting the first two heats, and Albert E. the next three.

The second race was for buggy horses and was won by Sid E., a three-year-old by Sidmoor 2:17½, dam Ethel C. 2:20 by Sidney. The colt took this race in three straight heats. The last heat he was obliged to pull a heavy road cart. He had only three weeks' work and had never been driven in company before, but was as steady as any old campaigner. He has lots of speed, with a good head. Some think his head is too large, but then he is not like some men that wear No. 7 hats, with nothing under it but hot air. The colt has brains.

Summaries:

First race—
Albert E. by Altamont (Miller) 2 2 1 1 1
Wild Bill (Allen) 1 1 2 2 2
Time: 2:24½, 2:24½, 2:21, 2:22, 2:23.

Second race—
Sid E. by Sidmoor (Allen) 1 1 1
Henry M. (Lewis) 3 2 2
Alfalfa (Farmer) 2 3 3
Time: 2:35, 2:31, 2:32.

Running race, quarter-mile dash—Joe P., won. Time 24 seconds.

Running race, half-mile dash—Johnny S. won. Time 1:02.

The judges were Messrs. Eachus, Shannon and Acman.

F. H. CUMMINGS.

According to the railbirds' story, Winnipeg horsemen have offered about \$9,000 for the gray pacer The Eel, owned by Mr. Frank Entricken of Tavistock, Ont. The veteran reinsman Dan McEwan of London, Ont., drove this horse a mile close to 2:06¼ over the Syracuse, N. Y., track a couple of years ago, and won a barrel of money in Ottawa, Ont., the past winter with the fleet stepper. This gray pacing horse was formerly called Silver Joe, and is registered under that name.

The death of Advancer 2:11½, is reported from Brandon, Vt., where he was owned by I. N. Chase, his breeder. This was the gelding that created such a sensation in the West three years ago when he dropped, apparently, from the clouds, and won the \$5,000 trotting events at both Milwaukee, Wis., and Libertyville, Ill. He trotted three heats in 2:11½, 2:11½, 2:12¾, at the former place, and three in 2:11½, 2:12¾, 2:11½ at the latter, and beating a high class field so easily that he was thought to be a ringer, but was later proved to be all right. He was sired by Ormonde, son of Happy Medium, dam by Advance.

The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feet. Call on or address S. O. Fesler, Pleasanton, Cal.

BREEDING FOR PROFIT.

There is no question in regard to the profit of breeding the trotting horse if one can obtain the proper crosses—in other words, a successful "nick." The truth of this has been proven many times and frequently considerable wealth has been acquired from one fortunate mingling of the right strains of blood. Many a brood mare in America has brought a fortune to her owner when bred to a stallion of great prepotency. California is full of good brood mares that would make their owners rich if bred to the right horse. The foundation stock of California came largely through long-distance thoroughbred strains and this has left us a class of brood mares equal to any in the country. What is needed to bring fortune and success to the farmers and horsemen of this State are stallions of strong prepotency. This has been well illustrated in the case of the great stallion McKinney. He proved a success on all strains of blood in California. Few of the mares bred to him here were from fashionable families or had fast records, yet they produced speed and gameness from this wonderful sire, inasmuch as the foundation stock was right, coming as it did from early-day, thoroughbred crosses—the blood that breeds on. Since McKinney was shipped to the Eastern States he has been bred to the best in the land, to the stoutest, the fastest and the most fashionable mares in all the country. His great name and individuality have attracted to his harem the choicest individuals that America can produce. Yet we predict that he will never again equal the great record made by him in this State in producing fast and consistent race horses, not that his Eastern mates are not worthy of this great sire, but that our brood mare blood is equal to the best in the world. This has been amply proven by the history of every great stallion sent from California to the other side of the Rocky mountains. Where can one be named who has equaled his California record, foal for foal? Does not this demonstrate the superiority of our stout California blood and afford a reason why every owner of a good brood mare in this State should breed her to some high-bred stallion that has demonstrated his merit as a sire? There is good money in it for those who select their crosses wisely. The important question is what strain of blood is best and what individuals of that strain are greatest. None of our readers will dispute the fact that the McKinney family stands in the front rank to-day as producers of early and extreme speed. We believe that no son of that great horse will fail in the stud when the blood is right on the dam's side. Witness Zombro, Zolock, Washington McKinney and some of the younger sons of McKinney now coming to the front. Of these latter we believe that Tom Smith 2:13¼ promises to be one of the greatest. We know that his record was no criterion of his speed, he having repeatedly demonstrated his ability to beat 2:10. After carefully examining his conformation, studying his blood lines and looking over his produce, we unhesitatingly predict for him one of the greatest successes as a sire of any living stallion. We have watched him closely since we first saw him trot in the Occident stake as a three-year-old, and we have always liked him. It was the opinion of every horseman who saw him race that he should have won the stake if he had been properly handled, but his driver was a young man with very little experience at that time.

Tom Smith would prove a fortune to any of our larger stock farms. His first crop of colts would far more than repay his cost. His stud service thus far has been very limited and his produce are extremely few, but every one of his colts show speed as soon as harnessed. He was a colt trotter himself and he produces colt trotters. This is a matter of vast importance to breeders, as the most money is now in the colt stakes. Katalina, the only one of Tom Smith's get yet trained, won the two-year-old trotting division of the Breeders' Futurity last year at Santa Rosa in 2:22½. This filly could have gone much faster if it had been necessary, as she showed a quarter in 33 seconds not long after her track education began. If no accident befalls her, she now bids fair to win \$9,000 in the various three-year-old events during the coming racing season. Some families mature slowly and some quickly. It is of great importance to the breeder that his colts should mature early if he wishes to race them or dispose of them for track purposes. This matter will never be overlooked by the wise breeder, since the profitable side of breeding should ever be kept in mind by horsemen. In addition to speed, beauty is a great factor in harness horses, and we have always admired Tom Smith for this quality, which in him is of the masculine rather than of the feminine variety. His strength and symmetry is well illustrated in the excellent likeness of him which we publish on the first page of this issue.

ANSWERS TO CORRESPONDENCE.

W. E. N., Salinas—Captain Kohl was standard and registered. His number is 12,966. He was sired by Whipple's Hambletonian (Register No. 725), and his dam was the famous old mare Lady Livingston (dam of Lady Blanchard 2:26¼, and the producing sires Whippleton and Western). Lady Livingston was by the old 30-mile champion Gen. Taylor, and her dam was the Low Mills mare, whose pedigree was untraced. Whipple's Hambletonian was by Guy Miller (son of Hambletonian 10) out of Martha Washington by Washington 332, granddam by Abdallah 1.

THE FARM

QUALIFICATIONS FOR RANGE ANIMALS.

The range conditions are so adverse to the conditions on the eastern farms that when we think that most of our breeding stock of western country is taken from these intense artificial conditions and placed upon the range, where grazing is scarce, and where the weather conditions are liable to sudden changes, we are not astonished at the poor results and come to realize the demand for a breed of animals which will do well under range conditions. But here the question arises: "Can pure bred stock stand these severe conditions or must this range breed be developed by the grading and improvement of the stock already upon the range?" I believe the general opinion agrees with the latter and if so let us consider the animals and the qualifications which they should possess.

The character of any breed depends exactly upon the qualities of the animals taken individually and collectively which are kept for breeding purposes.

The size which represents over 50 per cent are ideal in form and size, be of good color, and possess all the style finish and quality possible. In a word he should be the model of the herd.

In selecting a sire for range cattle he should be of fair size and above all have stamina and constitutional vigor, he should possess a good symmetrical form, have good bone, and transmit his characteristics with certainty. Time, distance nor money should not be spared in buying the sire.

In selecting the cow too much care cannot be given. They should be of the same general type as that of the sire and must possess stamina and constitutional vigor. Too much stress cannot be laid upon these points. She should be from medium to large in size, have a symmetrical body and possess quality and finish. As she is the mother of a breed she must be kind, quiet in disposition, a good feeder and an excellent mother.

The fact that food and shelter on the range is different from that upon mixed farms requires different characteristics in the two types. The range animals must be smaller because the supply of food is not uniform and during the winter months there is cessation of growth. Shelter on the range is often absent or very poor and the animals must be protected by a thicker hide, longer, finer, and denser hair or wool and their scant supply of food is demanded for the purpose. Activity is required because the animals must cover a great amount of land in order to secure their food and a disposition to be persistent in the matter of foraging is very necessary. Range stock must have good constitution and show no lack of vigor, even if these are obtained at the expense of size, quantity of meat, and smoothness of outline.

In order to secure these qualifications each and every man should strive for the same end. Harmony should exist between the breeders and by selecting the best animals each year, a good breed for the range would be established in a comparatively short time. In conclusion we must keep in mind that whatever breed is produced must be brought forth and developed under the conditions of soil, forage, climate and handling which must be the lot of its ancestors.—E. Morris.

It has been found that 36 pounds sheep manure is equal as a fertilizer to 160 pounds of ordinary farmyard manure, being richer in nitrogenous substance than that of the cow or horse, ranking next in ammonia and richer in phosphates than guano or the droppings of fowls. Considering these facts, the possession of a flock of sheep is undoubtedly one of the best assets of the farm, and it should be to the interests of the farmer who raises sheep to see that none of the manure is wasted.

POULTRY NOTES.

As in all other businesses, management counts for most in the production of poultry. The ration may be ever so perfect, the battle with the pests and diseases may be ever so effective, but without management profits will be turned into losses every time.

If you are contemplating raising capons this year you should begin to study the question now. Send to the Department of Agriculture for its bulletins and write the Journal of Agriculture for any additional information. Both will be given free of charge.

An old poultryman says: "Very few men have it in them to start out with 3,000 or 4,000 hens and make a success of it. Better leave the thousand off and start with three or four, and work in gradually. Trying to step from the bottom of the mountain to the top in one grand leap is nice on paper, but when it gets right down to business there are lots of things a man needs to learn, even about so humble a thing as a hen."

Remember that this is the time when lice eggs hatch as well as the hen's eggs. Provide the birds, especially the setting hen, with a box filled with dust and lice killers in which the dust bath may be taken at will.

There are many outlets for the egg besides the consumer's table. It takes over a million dozen per year in the manufacture of calico.

The lazy man should never engage in the poultry business. Poultry raising requires more hard and continuous work per dollar of profit than any other division of the farm.

A small flock of hens pays better per hen than a large flock because the birds have more range around the farm buildings and more floor space in the houses and coops. Give the birds plenty of room and air and a thousand can be made to return as large a profit per bird as a hundred.

There is no domestic animal, so easily handled that will remunerate its owner more profit than a good breed of sheep. Unless one wants to be a specialist in sheep husbandry it is not necessary that his sheep be thoroughbreds. By a careful selection of good, prolific ewes, bred to a well-matured, thoroughbred ram, one will be surprised in a few years to find what fine, high grade sheep he has. The point which should always be held in view is never to breed to an inferior ewe or ram. Invariably strive to breed to something just a little better. Having started with a well-bred flock, the secret of success lies in the careful management of the flock. If you do not love to handle and care for your flock, for your own good as well as that of the flock, dispose of them at once. No one will ever make a success of any business unless he is in love with that department of work.

For several years western range flockmasters, through their organizations, have been protesting to the Bureau of Forestry regarding matters of great importance to the sheepmen who graze flocks in the national forests. It has been asserted time and again that the reserves include large areas of land on which there are no trees and the sheep associations have kept up a never-flagging fight to have these areas restored to the public domain. Many such tracts have already been restored to entry and the assurance now comes from Chief Forester Pinchot that more tracts will be restored from time to time as the investigations show the justness of the action. It has been claimed for some time that users of the national forests have been arrested and fined for trespass when the alleged trespassers had no means of determining when they were on the reserves; that they were fined without a trial and there was no appeal, but the chief forester advises that all this has been changed and hereafter the sheepmen will get something more like a square deal.

DAIRY NOTES.

Some folks object to coloring butter, but if the average butter were sent to market without a little coloring, it would not find a sale at half its value, no matter how perfect it might be in other respects. Butter should be colored to suit the person, or the market, for which it is intended. In no case, however, should it be given a deeper color than is given it when the cow is on grass, supplemented with enough grains and concentrates to properly balance the ration.

Never use coarse salt in salting butter intended for market. It will be impossible to properly distribute the salt through the butter and if the distribution is not perfect the butter can never command anything like a respectable price on the market. Most dairy experts advise salting the butter in the churn when it is in the granular form; however, excellent results are obtained by salting when the working is being done.

A Kansas dairyman has this to say in regard to salting butter: "Take the butter from out of the churn, drain and press out a part of the water on the worker, then weight and salt one ounce to the pound and work enough to get the salt evenly incorporated. Some more water or brine will run off in the working and leave the butter salted about right. In this way it will be found that one churning will be salted very nearly like every other churning."

In preparing butter for market, remember that it is for some one else—not for your own table. So prepare it to suit that some one else and not your own tastes and notions. It is to your interest to make the butter suit those who will consume it whether it suits your tastes or not. The writer knows an Iowa woman who is an expert butter maker, but taking a contract to supply butter for a camp of a certain class of foreigners who preferred butter with a great deal of butter milk in it, she catered to their notions. In three weeks she was getting mail orders from adjoining counties asking shipments to other camps. She was not making what she considered an ideal product, but she was giving the trade what was wanted. Study your market, then make the article it wants.

Do not try to get along without a cream separator. If you can not afford one, enter partnership with your nearest neighbor and own one with him. Of course this will not be as satisfactory as having one of your own, but it is infinitely better than no separator.

HINTS FOR FARM HORSES.

It is not hard work, but poor care, which ruins the average farm horse.

When the nights become warm enough there should be a night pasture ready for the work horses. Turn them out, not to eat, but to rest.

Always give them a good cleaning and brushing after they have eaten their supper and before they are turned out.

When a horse is cared for in this way, he will do more work and always keep in fine condition.

Always remove the harness at the noon hour, and use as little harness as possible when doing farm work.

Unless it is necessary to use blinds on the headstall, don't do it.

Again we say, look well to the work collars. See that they are wiped clean and dry every time they are taken off the horses. Keep them soft and pliable by frequent manipulation, and if they become too stiff to yield to such treatment, pound the face gently with a round stick.

If the horse is heated, he should never be left standing uncovered, no matter what the weather may be.

In summer a light-weight woolen blanket should always be at hand.—Colman's Rural World.

Are you thinking of investing in mining stock at 50 cents per share? Do not do it. Better invest in hens at 50 cents each. You will get larger returns.

Ellis' Improved
Hutton Patent
Checking Device

**Absolutely
the Greatest
Controller on
Earth for Road
or Track Use.**

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

CHARCOAL FOR HOGS.

"I recently read an article on burning cobs, the writer of which condemned the way I have been practicing for some years and recommended a plan which I used to practice. He said to rake the cobs into the wind-rows, set them on fire in the open air, and as fast as the fire gets through them throw on water enough to put out the fire. This writer loses sight of the chief value gained by feeding hogs charcoal, viz.: the carbon. By this method the carbon mostly passes off in blue smoke. The plan I have set on is as follows:

"We keep over one hundred hogs. Where we feed them we have a pit about five feet long, three feet wide, and three feet deep. This pit we surround with a fence to keep hogs and other animals out of it. In the morning I commence by spreading over the entire bottom of the pit something dry and fine that will burn readily. Set this on fire, first having the cobs all ready to shovel on. Put in the cobs fast enough to smother all the blue smoke; watch this carefully. As soon as the blue smoke appears put on more cobs. If the cobs are dry, there is no difficulty in getting the fire to the top of the pit in six hours. When you have the pit full and well rounded up sprinkle a little fine dirt over the spots where the blue smoke begins to appear. Keep following it up, following lightly as fast as the blue smoke is seen. Shutting off this smoke drives the fire to where the cobs are not yet made into charcoal. It will take about an hour to complete the work, and by this time the water smoke will be nearly exhausted. Then at once spread over the entire surface an inch or so of fine dirt. Rake it with a garden rake or manure fork; this makes the covering air-tight, and brings the few unfinished cobs to the surface. Throw these to one side. Now put on about two more inches of dirt and rake it tight and smooth. Now you have every chance for the charcoal to set-

tle is shut off. If you have done the work right you are sure to have several bushels of pure cob charcoal. I have followed this plan for many years and have never lost a bit by being burned up. In the evening before going to bed I examine the pit to be sure there is no blue smoke coming up."—Iowa Farmer.

When a young calf is removed from the cow it should be given its mother's milk for a few days and then any whole milk will answer, but it is better to give milk low in per cent of butter fat than that which is high. Feed small rations in clean pails. When the calf is from ten days to two weeks old it may be changed from whole milk to skim-milk by adding a small amount of the latter each day until the change is complete and the calf is on a skim-milk ration. The skim-milk to be the best for calves should be fresh and warm from the separator. Then begin feeding a butter fat substitute in the milk until the calf is able to eat ground feed. Oil meal makes a good calf feed and a little added to the skim-milk will answer the purpose. A calf stanchion will come handy, for with such an equipment the calf can be taught to eat grain much earlier because it is held in front of the grain and is free from the annoyance of other calves.

Don't keep your flock on the same pasture for more than two years, for the reason that it will certainly become infested with the stomach worm and will then be "sheep sick." All sheep carry more or less stomach worms. These do not seem to injure the older ones nor the very strong ones, but are sure death to the weaklings, particularly late lambs. As we have stated before, the pastures become infected from the droppings, and the worms multiply very rapidly, especially in wet seasons or where the sheep have access to slough water. Were it not for this, blue grass pasture would be ideal for sheep.

Washington McKinney 35751

Lady McKinney by Washington McKinney trotted a mile in a race on March 21st at Pleasanton in 2:12½, the fastest mile ever trotted on that historic track in a race. McKinney Belle, four-year-old, trotted a mile in 2:26 a few days later. Ray McKinney a mile in 2:24, Fabia McKinney in 2:25. Wednesday, April 29th, Belle of Washington trotted a mile on the Stadium track in 2:23. Reed McKinney and Rex McKinney a six-year-old team, driven for the past two years to a surrey by a lady in Santa Rosa, which has been turned out for six months, was taken up last Friday and driven one-eighth at the Rosedale Stock Farm track, one trotted in :19, :19½, and :19, the other in :18¼, :18, :17½, and :18. Neither of these horses ever had a single workout in their lives. They will get the best of training from now on. John Quinn has a five-year-old son of Washington McKinney at Sacramento which has trotted in 2:22. Dolly McKinney, owned in Oregon, the owner writes can trot in 2:10. This is the complete list of the get of Washington McKinney that have had any work. If you breed your good mare to him you are certain to get a fast trotter and a beautiful horse. There is no handsomer trotter in the world, and from now on he will have a chance—something he has never had before—Hulda 2:08½, Annie Rooney 2:17, Robizola 2:12¼, have been booked to him this season. A foal by this horse will be worth something next year. He will surely have ten new ones "in the list" this year.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: \$35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for \$1.50 per month at owners' responsibility and risk.

KING DINGEE

is by the greatest son of McKinney—the magnificent Zombro. His dam is by Diablo and his grandam has 2 in the 2:15 list. He is a grand individual and trotted a mile last year as a 4-year-old in 2:22.

Readville Grand Circuit Meeting

Some Indisputable Facts Concerning the

\$50,000 HANDICAP....

Each horse entered has the same chance.
As fair for the champion as the 2:15 horse.
The 2:15 horse becomes the equal of the stake horse in earning capacity.
Records no longer bar best trotters from racing.
No horse outclassed because of his record.
Best race ever devised for three-year-olds.
Because it offers a chance to compete with hope of success to 100 times as many colts as is offered in the Futurities.
A nomination in the Handicap is value received, because nothing can occur to destroy the value of an entry except what may happen to the horse it is made for.
This is secured by handicapping horses at the post and not three months in advance of the race; by handicapping by what they can do and not by their records.
Under the handicap system no horse can lose his racing value so long as he remains sound, and no horse will ever be outclassed by his record.
The handicap makes possible a \$50,000 purse at a one per cent entrance fee. The winner of the handicap will get for \$500 paid in entrance as much as would cost at least \$7,000 for entrance fees to win the old way.
Think this over, and see if it concerns you. Is it worth while to support such a race?
Will its success mean anything to you, to the sport, and to the breeders?

Entries to the handicap and our other early closing purses close on **MAY 16th**

JOHN M. JOHNSON,

President.

C. M. JEWETT,

Secretary, Readville, Mass.

THE DAIRY COW.

There seems to be no limit to the production of the dairy cow. Year by year new records are made until at present we have an authentic record of around 1,100 pounds of butter as the product of a single cow during one year. This means an actual product worth \$275 to \$300, besides the calf and the skim milk. Twenty years ago one would have said that this was utterly impossible.

The cows are not only improving in quality, but the man behind the cow is improving even more. We are learning to feed and care for the cow better than ever before. We better understand the laws of breeding and are able to breed more to a certainty. We are learning that environment means much to the good dairy cow and adds largely to her comfort.

Along with good warm quarters we must have pure air and sunshine. Nothing will add more to the thrift and comfort of the dairy cow than these two factors. What a feeling of gloom comes over one as he enters a dark room; no matter how well it is furnished, if darkness and gloom fill the space it will not contribute to his comfort. The good dairy cow is quite as sensitive and is never quite as well satisfied as when she is lying in a warm, light stall, chewing her cud with the bright sunlight shining all over and about her. The sunlight is life-giving as well as germ-destroying. We should have fewer cow stables and more cow homes.

Again, the cow gives a more uniform revenue than any other stock grown on the farm, and more than any grain crop grown. The cow will, as a rule, under like conditions, give just about the same amount of milk one season with another and the price of butter fluctuates less than any other farm product. We can just about tell the season before what she will do for us next season. That's worth much to the farmer. Year by year as cows increase in quantity and quality their product increases in value on the market. Probably the improved methods of handling the milk, the cream and the butter have much to do with the price, as the quality of our butter has improved wonderfully within the past few years, thus the greater demand.

There is no fear that the business will be overdone, as dairying calls for a higher degree of intelligence and more painstaking work than the average man wants to contribute. The lines of work that can be handled most easily and the products that can be secured with the least attention are the ones that will not suffer. The things that can be done most easily are as a rule the things that pay the least. On the other hand, those things that come by the better exercise of the brain and the closest attention to detail are never overcrowded.

The Northwest is certain to be the great source to which our nation must look for her dairy products. Nowhere else does nature so combine forces in growing her most nutritious grains and grasses to feed the dairy cow upon, or a better climate to feed her in, or to manufacture her raw material into those condensed products of butter and cheese that the world at large is calling so loudly for, and is so eager to get even at a high price. Never before did the pathway of the good, up-to-date dairyman look so bright.—Forest Henry.

DAIRY KNOWLEDGE.

Prof. C. L. Beach of the Vermont Experiment Station condenses the science of feeding cows into the following few paragraphs. The same should be studied by cow farmers everywhere.

1. The more food the cow can be induced to eat the more milk she will produce. Cows do not usually consume more food than they can properly digest. The ration therefore should be made as palatable as possible in order to induce the cow to eat large quantities.

2. The larger the amount of protein in the ration the larger the milk flow. Protein in the ration is essential to the production of the milk.

3. The less energy required to di-

Bonny McKinney 41383

Son of
McKinney 2:11½
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustie; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03¾
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13¾ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11½, trial 2:05½. Dam Rita B. by Boodie Jr.; 2nd dam Gabilan Girl by Gabilan; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal.

Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

THE PALMS, ½ mile east of Visalia

For further particulars address

R. O. NEWMAN,

Visalia, Cal.

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12 1/4

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08¼ (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 3-year-old record of her day. She is the dam of four and granddam of 12 in the list. Next dam Green Mountain Maid, dam of Electioneer and of nine in the list. Iran Alto is the sire of Dr. Frasse 2:11½, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

Will make the Season of 1908 in charge of
TERMS: \$30 for the Season. Usual return privilege.
Pasturage \$3 per month.

H. S. HOGBOOM, Woodland, Cal.

Four more in 2:15 have already been credited this season to

"McKINNEY" 2:11 1/4

Making his wonderful list still more remarkable.

When writing kindly mention this journal. The Empire City Farms, Cuba, N. Y.

Ray o'Light 2-y-o Rec. 2:13 1/2

By SEARCHLIGHT 2:03 1/4
Reg. No. 46270. King of Race Horses

His dam is Carrie B. 2:18 by Alex. Button 2:26½ (sire of Yolo Maid 2:12, Tom Ryder 2:13¼, etc.); second dam Carrie Malone (dam also of Cassiar 2:22, Moorland Lass, dam of Pinky H. 2:17¼), full sister to Klatawah (3) 2:05½, holder of world's record, Chas. Derby 2:20, etc., by Steinway 2:25½; third dam Katy G. (dam of 7 in 2:30, Saraway, sire of 6, and Carrie Malone, dam of two, two dams of two in 2:30), by Electioneer 125; fourth dam Fanny Malone by Niagara; fifth dam Fanny Wickham (20-mile trotter), by Harold; sixth dam by Imp. Trustee; seventh dam by Imp. Sir Charles; eighth dam (dam of the unbeaten race horse Boston), by Ball's Florizel, etc.

Ray o'Light (2) 2:13½ is one of the handsomest as well as best bred young stallions in America. He will be allowed to serve only ten mares this year, at Salinas race track, as he will have to be prepared for his engagements as a three-year-old.

He will make the Season of 1908 at the Low Service Fee of \$40, with usual return privilege. For further particulars address

E. S. TRAIN, Salinas, Cal.

General Watts 2:06¼, World's Champion three-year-old stallion by

"AXWORTHY" (3) 2:15 1/2

And winner of American Horse Breeder Futurity. It pays to book to such a sire.

When writing kindly mention this journal. The Empire City Farms, Cuba, N. Y.

TRAINING DISTEMPER...

Ever hear of this? Yes, of course you did, but under a different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces, and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHN'S"

Is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and \$1 a bottle; \$3 and \$10 a dozen. Sold by all good druggists, horse goods houses, or express prepaid by manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Indiana.

LIMONERO

Reg. No.
33389

3-Year-Old Race Rec. 2:15 $\frac{3}{4}$

Winner of \$5000 Stake at Lexington for 3-y-o

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the

BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

W. G. HOWARD, Manager,

Hotel Belvedere,

Belvedere, California.

Campbell's

EMOLLIC IODOFORM

FOR HARNESS & SHOULDER GALLS, BARBED WIRE CUTS, CALKS, SCRATCHES AND OTHER AILMENTS OF THE SKIN.

JAS. B. CAMPBELL & CO. Manufacturers, CHICAGO, ILL. U.S.A.

GUARANTEED UNDER THE FOOD AND DRUG ACT, JUNE 30, 1906. Serial Number 1219.

Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.

PRICE—25c, 50c and \$1.00.

Besides winning the Gallery Championship Match of the Zettler Rifle Club shoot, held in New York City, March 14-21, Winchester Cartridges were tied for first in the CONTINUOUS MATCH—H. M. Thomas, 5 perfect scores of 75; 2nd in the BULLSEYE MATCH—A. F. Laudensack, target of 6"; 2nd in the ZIMMERMAN MATCH—R. Gute, 5 scores of 39, 16 scores of 38. Mr. Gute's average for the 100-Shot Matches that he has competed in is over 2465—the highest of any shooter. His perfect score of 0° made on the Bullseye Target at Rochester remains unequalled. This shows that Winchester Cartridges—

THE RED W BRAND—Still Hold the Palm.

CONDITIONS.—Races set in black-faced type are early closing events, in which entries close May 25. Purse events close Sept. 5, except at Bellingham, Everett and Seattle, where purse events close August 10. Entrance fee 5 per cent of purse and 5 per cent additional from money winners (except where otherwise specified), payable 2 per cent May 25, when horse must be named, balance before starting. All races mile heats, 3 in 5 (except the two and three year old races, which shall be mile heats, 2 in 3), but no race longer than 5 heats, and money paid according to summary at end of fifth heat. Right to declare off any stake that does not fill satisfactorily or change order of program. Two-year-old stakes are for colts owned in the district January 1, 1908. Nominators have the right to enter two horses from the same stable in any one race by the payment of one per cent additional for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race unless sold and transferred as provided in rules of racing. Rules of the National or American Associations to govern, except where otherwise specified. Entries can be made with the circuit secretary or the individual secretaries. FOR FULL PARTICULARS SEND FOR STAKE BOOK.

M. D. WISDOM, Circuit Secretary, Portland, Oregon.

THE SIGNS OF THE TIMES are that race track betting will within a very short time be prohibited in nearly every part of the United States. If there is any section of the country where the "reformers" would hardly be expected to have much influence it is in New York, but even there race betting is doomed. Gov. Hughes met temporary defeat by having his anti-betting bill defeated in the Senate by a tie vote after it had passed the lower house by a big majority, but he immediately called an extra session of the Legislature and the signs all point to the bill being passed and signed very soon. At a special election held in the Niagara district this week, for the purpose of electing a Senator to fill a vacancy the anti-race track candidate won. The dispatches say: "At no stage of the fight have the race track gamblers been so demoralized as they were to-day with the election of Wallace to the Senate on the anti-gambling issue. So confident were they of carrying the election that they were offering yesterday to bet 3 to 1 on their candidate, Henry A. McMahon. So uncertain was the result regarded by keen political forecasters that there were no takers. 'The election of Wallace in the Niagara-Orleans district makes it appear that the anti-race track gambling bills will pass,' said Senator John Raines. 'I assume that the bills now have the necessary twenty-six votes.'" And the cause of all this wild attack on race betting is bookmaking, which in this country has become the sole reason for the existence of the majority of running tracks. The professional gamblers are in control in New York, New Orleans, Los Angeles and San Francisco, and the people are becoming indignant. The handwriting is on the wall, and it is only a question of time until race betting is prohibited at all these points. Just as the "wide-open" town, and bookmaking killed the district fairs in California a few years ago, so will the form sheet,

the bookmaker, the tout and all the disreputable gangs that thrust themselves into prominence at the race meetings, be the cause of radical legislation that will eventually close all the tracks in the country. A few far-seeing managers, who have the sport of horse racing and the improvement of the breeds of horses really at heart, have already read these signs of the times and thrown overboard the Jonah to save the ship. The Oregon State Fair now prohibits all betting on races, and permits no liquor to be sold on its grounds. The result last year was the largest attendance and the most profitable fair in the history of the association. The Minnesota State Fair, the greatest annual fair held in the United States has built up its tremendous patronage by eliminating all betting and prohibiting liquor selling. The California State Fair abolished the bookmaker two years ago, and allows no liquors on the grounds. Last year the crowds that attended this fair were not only larger in number than they had been for years, but were noticeable for the absence of the tin-horn fraternity and the large attendance of farmers, mechanics, merchants, and others who had kept away from the fair during the years it was run in the interests of the gamblers. It is the progressive managers who see the trend of affairs all over the country, and who recognize the fact that the breeding of fine horses and the holding of high-class racing do not depend upon and are not benefited by the gamblers. It is the progressionists who are giving the successful fairs these days and doing the most to build up the great industry of breeding high-class horses.

THE NORTH PACIFIC CIRCUIT, entries for which close May 25th, which is one week from next Monday, offers California horse owners the best chance to race for good-sized purses they have ever had on this Coast. If the reader will cast his eye on page 2, just opposite, he will see the entire program of this circuit, which consists of eight meetings, fully outlined, and the stakes and purses should surely tempt any person who owns a good trotter or pacer to enter him clear through this string of meetings, unless he has already entered on the California Circuit, in which event he can figure to join the North Pacific Circuit at Seattle, where racing starts September 7th. There are five stakes of \$1,000 at Seattle, four of \$1,000, and two of \$5,000 each at Salem, two of \$1,000, two of \$1,500, and two of \$2,500 each at Portland, three of \$1,000 and two of \$2,500 each at North Yakima, six of \$1,000 each at Spokane, two of \$1,000, one of \$1,500, and one of \$2,000 at Walla Walla. Such stakes as these are worth winning and the North Pacific Fair Circuit management deserves the support of every horse owner on this Coast for being so liberal and doing so much to give the trotting and pacing horse an earning capacity and therefore an increased value. Did you read the account last week of the recent big horse sale held in Portland, and note the good prices obtained? The eight weeks' harness racing for good big purses which they have up North is what made those horses sell so well. If we could have eight or ten weeks of racing for good purses here in California the horse market would be vastly better than it is. It behooves every horse owner and breeder, therefore, to do what he can to aid and encourage the managers of the North Pacific Circuit, and the best way to do this is to be liberal with your entries at their meetings. Read the full page advertisement opposite and make up your mind that some of that good money shall be yours.

THE \$50,000 HANDICAP closes for entry to-day, and we shall be greatly pleased to see a goodly number of California horses named in it when the list of entries is published. It is the greatest boost that has been given the trotting horse for years. No betting is permitted at Readville, but the association rising to the occasion, provides something better. It gives a horseman a chance to win \$30,000 in one race, a nice fortune to retire on and big enough to keep his family in good style for the rest of his life. Second horse wins \$10,000, a nice sum in itself, and the four other moneys are worth trotting for. The fact that it only costs one per cent of the purse to start in this race should appeal to every person who has been paying five per cent to start and then have five per cent deducted from winners. There are no deductions in this race. If you win you will be paid \$30,000. Read the full page advertisement on page 13 of this issue and make your entry to-day.

AT THE MEETING of the Board of Review of the National Trotting Association held in New York last week, Mr. A. B. Spreckels, member of the Board of Appeals of the Pacific District, tendered his resignation, which was accepted, and Mr. Jacob Eveott of Saskatchewan, Canada, was elected to the position. Mr. Spreckels has been a member of the Pacific District Board for the past twelve years, and he has made an excellent official, having the confidence of all who had business of any sort with the Board. His successor resides in a section of country so remote from San Francisco that he cannot be expected to attend meetings of the Board except occasionally, but he will be able to look after the interests of the National Trotting Association in Canada, where harness racing is very popular with the people and is making great strides as a sport. The Pacific District Board of Appeals now consists of Hon. Ben F. Rush of Suisun, Col. J. C. Kirkpatrick of San Francisco and Mr. Jacob Eveott of Saskatchewan, with Prof. E. P. Heald of San Francisco an ex-officio member, he being second vice-president of the National Association.

SECRETARY JEWETT TO THE HORSEMEN.

With this week's advertising we leave the \$50,000 handicap to the horsemen in full confidence that it is in friendly hands, and will be supported in a manner worthy of the purse and the opportunities it offers.

The Association stands ready to do its part, and if the horsemen realize what the success of the race means to them and rise to their opportunities great things will be accomplished on May 16th for owners, trainers, breeders and racing associations.

The principal objection, in fact the only real objection, that has been made to the race, is the doubt as to whether the horses can be properly handicapped. Of course that remains to be seen. It is a fact, however, that horses have been handicapped and successfully ever since they have been racing thoroughbreds; also that American trained trotters are successfully handicapped in all parts of Europe at the present time. It may be that Americans can not handicap their own horses as well as foreigners, but the race will settle that. The assumption that it can be done, however, has made possible a purse of \$50,000 with one per cent. entrance fee, and does not the opportunity of winning \$30,000 for a \$500 entrance warrant taking a chance that the handicappers may not do their work so badly after all and justify an entry in this race?

If they can do this, it makes the race an open one, and gives, as the conditions design it should, a fair and equal chance to every trotter, three-year-old and over, from the 2:15 horse down to the fastest that may be entered. It may, as some assert, be all a lottery, but the prizes are magnificent, and the risk relatively very small. Making an entry in any race is taking a chance and a long one. In our regular events a horse may train on and up to the fullest expectations and yet long before race day it will be developed that he really has no chance to win in the race in which he is engaged. An entry in the handicap, on the other hand retains all the value it had when made until the race is over, if the horse remains sound.

There is nothing freaky about the handicap. It is offered in good faith by an association that has played the game on the level, kept faith with the horsemen, and has a name and reputation to maintain. It is not offered as a mere expedient to tide over hard luck and discouraging condition, but is an honest effort to improve not only our own position and affairs, but that of all owners, trainers, breeders and racing associations.

C. M. JEWETT.

A subscriber at Hanford, writes us as follows about the stallion Waterford 10,165, which is credited in the Year Book with a record of 2:27 made at Fresno in 1888 when he was six years old:

"Waterford made a record of 2:27 at Fresno at three years old. I saw him reduce it at Glenbrook Park, Nevada County, to 2:24½, Pasha 2:27½ by Echo, defeating him. Waterford won the second and third heats. Pasha won the fourth, fifth and sixth heats. Pasha lowered his own record in the sixth heat."

The records in the Year Books do not agree with our correspondent's statements. Waterford's record of 2:27 was, according to the Year Book, made in 1888, when Waterford was six years old. In that race Waterford won the first heat in 2:27, the fastest heat of a five-heat race. Johnny Hayward and Viking were the other contestants, the former getting two heats. As Waterford started in the 2:35 class in 1887, it is not possible that he took a record of 2:27 in 1888, as our correspondent states. The race at Glenbrook Park, in which he says Pasha took a record of 2:27½ in the sixth heat was trotted in 1892, when Waterford was ten years old. In this race according to the Year Book, Melrose by Sultan won the first heat in 2:35, Pasha by Echo won the second heat in 2:33½, and the third heat was a dead heat between Pasha and Waterford in 2:30. The fourth heat was won by Waterford in 2:29 and Pasha won the next two in 2:30 and 2:27½. This is the official record, and if Waterford trotted any heat in that race in 2:24½, time was suppressed.

NOTES AND NEWS

The Blue Ribbon sale opens at Cleveland Monday next.

Entries close to-day for the big \$50,000 trotting handicap.

The San Joaquin Valley Circuit announces its program in this issue.

The early closing stakes of the North Pacific Circuit close one week from next Monday.

It looks as if California will be well represented on the North Pacific Circuit again this year.

The Pacific Coast Trotting Horse Breeders' Association will offer \$1,500 for a handicap for pacers.

The Stanford Stake for trotting foals of 1907, to trot as three-year-olds in 1910, will close June 1st.

Charles Morgan is going to Seattle to locate and will be open to engagements to train trotters and pacers.

None of the entries in the State Fair harness races have dropped out, not a horse having been declared on May 1st.

Aerolite (3) 2:11½ has been bred to about 25 mares this year, and there are some very highly bred ones among them.

P. W. Hodges worked his Zombro-Hazel Kinney stallion a mile in 2:17 at Pleasanton Saturday, and it seemed easy for the handsome trotter.

Black Patchen, 2:16¼, by Wilkes Boy, a noted Ohio half-mile trotter, was the first nomination to the great \$50,000 Readville handicap race.

Col. Kirkpatrick has decided to send his Memo mare, the dam of Charley D., to be bred to C. L. Crellin's great four-year-old The Limit this season.

There will be a big combination sale of trotters and pacers at Chase's, July 27th. Write to Fred H. Chase, 478 Valencia street, San Francisco, about it.

Six good purses offered by the California State Fair Association for trotters and pacers will close on Monday, June 1st. See the advertisement in this issue.

The mare Freely Red that Henry Helman is working at Pleasanton is looking extra good at the present time, and should give a good account of herself this year.

Dr. Boucher is working Harry Logan 2:12¾ at Pleasanton. The son of Harry Gear and Miss Logan, 2:06¾ is fat as an alderman and looks as strong as a plough horse.

Alto Down 2:17¼, trotter by Iran Alto 2:12¼, brought \$1,150 at the sale at Richmond, Virginia, May 1st. This is the horse Farmer Bunch raced in Virginia last year.

The two three-year-olds by John A. McKerron 2:04¼, out of Mazette 2:04¼ and Anzella 2:06¼, in Lon McDonald's stable at Selma, Ala., are reported to be of unusual promise.

The San Diego Driving Club has been organized with Fred Fanning as president, George Todd as secretary and Jack Rice as treasurer. The first meeting is scheduled for May 30th.

The Sacramento Driving Club will hold a matinee May 30th. The Driving Clubs of Chico, Marysville and Stockton have been invited to participate in the racing and will probably accept.

The Kentucky Court of Appeals recently upheld the constitutionality of the statute which permits parimutuels and auction pools to be sold on a race track during a regular race meeting.

W. R. Murphy of Los Angeles, reports that his horse Red McK. has a full book for this season. Having a good horse, and a well bred one, and using printers' ink liberally, brings results.

Nearly a dozen horses are in training at the Arcata, Humboldt County, track, and it begins to look busy there on workout days. Several good races will be pulled off at the matinee on July 4th.

At the recent meeting of the Board of Review of the National Trotting Association, J. H. Brooks of Vancouver, B. C., was expelled for ringing Aunt Jennie 2:18¼ under the name of Nellie B.

Alv, 2:03¼, may have left a fast daughter in the six-year-old mare named Queen's Heiress, by Hand-spring, 2:18¼. At least Mike Bowerman, who is training her, thinks she will trot and trot fast.

Four meetings of five days each, with purses of \$500 should get a lot of entries. The San Joaquin Valley Circuit offers such a program. Fresno, Hanford, Tulare and Bakersfield will make up the circuit.

There is a demand for full grown and fully broke trotters and pacers in San Francisco at the present time. Fred H. Chase & Co., will hold a sale Monday evening, July 27th. If you have any horses to sell write them about it.

The effort to organize a driving club at Woodland is meeting with success. About fifty members have already signed and a meeting for organization will soon be held. The new club will have charge of the meeting this year if one is given at Woodland.

Patsy Davey was working Mr. F. H. Burke's mare Vallejo Girl 2:16¼ last Saturday at Pleasanton, and it was the general remark that the daughter of McKinney is in better form and better gaited than she was last year. She should lower her record materially.

Among the California bred mares nominated in the Kentucky Futurity for foals of mares bred in 1907, are Phoebe Childers 2:10½, Pasante 2:13, Gazelle 2:11¼, Derby Princess 2:08½, Ollis McKinney 2:16¼, Humboldt Maid 2:13½, Primrose 2:13, and others.

Robert A. Smith, of Los Angeles, who in stopping a pair of runaway horses attached to an ambulance, suffered a fracture of the leg, is gradually improving and while his recovery has been slow, it is confidently expected that he will be fully recovered within a few months.

Albata 2:11¼, the pacer that James Thompson took East two years ago, was sold at auction at Richmond, Virginia, May 1st, and brought \$625, C. Heinaman of Charleston, South Carolina, being the buyer. Albata is by Altivo 2:18½ out of Adbuta by Advertiser.

Red Robin, a fine large son of Robin, owned by Paul Beanchi of Gonzales, trotted a mile in 2:25¼ over the Salinas track last week, the last half of the mile being in 1:11. This horse is entirely green, but is acting like one that will do to race. He is in Chas. Whitehead's string.

Count Potocki, the Austrian nobleman who was assassinated recently, was the importer and owner of Caid, 2:07¼; Glenwood M., 2:07¼; Dolly Dillon, 2:06¼; Lord Revelstroke, 3, 2:12¼; Iva Dee, 2:12½, etc. It has not yet been definitely decided what will be done with his stud.

George G. 2:05¼, who is considered by his present owner to be as good a trotter as Major Delmar 1:59¼, will have a chance of showing his class on the Fourth of July at Readville, when he will meet Sonoma Girl 2:05¼ and two or three others in the free-for-all trot for a prize of \$5,000.

Miss Adbell 2:09¼, the futurity winner of 1905, has developed into a very rugged mare, and is working so well that her trainer Lon McDonald expects her to be one of the heavy money winners of 1908. She will carry the colors of her owner, Ralph B. Williams, in Readville's \$50,000 purse.

In the Metropolitan Driving Club's matinee races on the Charles River speedway at Boston last Wednesday, Chase 2:07¼, owned by C. H. Belledeau, made a new world's record for trotters for a half mile on a speedway. The first heat was trotted in one minute flat, lowering the previous record held by Mack Mack of 1:02¼.

The black roan mare by Bonnie Direct 2:05¼, out of Nettie O. by Lakeland Pilot, that was bid in at the Pleasanton sale last month at \$900, has been sold to Mr. A. B. Cox of Paoli, Penn., and will be shipped to him in the car with Charles De Ryder's horses when they leave Pleasanton. The price paid by Mr. Cox was \$1,000. She is a very fast trotter.

Mrs. DeRyder, wife of the popular trainer, Charles DeRyder, is very proud of a colt that was discovered in the pasture a few days ago, following Mrs. D.'s favorite driving mare. The colt is by Almaden 2:22¼ and is a trotter that can keep up with its dam while she strikes a good fast clip through the pasture. The mare we believe is by the old hero of the home-stand, Robert McGregor.

Charles Whitehead drove Della Derby 2:17, the Occident Stake and Breeders' Futurity winner of 1906, a nice mile in 2:14¼ one day last week at Salinas. Her owner, James Anderson, was greatly pleased with her performance, and as the mare has been acting well all spring, he has hopes that she will make a good showing this season. She is well entered on the California circuit.

Lon McDonald's stable contains a second edition of Joe Patchen 2:01¼ in a four-year-old son of the old horse owned and bred by G. S. Barry of Springfield, Mass., from a fast record daughter of Hal Parker. In looks, gait, and disposition, he is a duplicate of his famous sire, and he gives every promise of being sensationally fast.

Mr. Ed. Erlanger of Lemoore, Cal., is the proud owner of a four-year-old filly that is said to be one of the most beautiful pieces of horse flesh ever seen in that section. She is coal black, stands 16.2 and weighs 1300 pounds. The filly was sired by Roy Rose dam Maud Fox. Mr. Erlanger will exhibit her at the fairs in the San Joaquin Valley this year. He recently refused an offer of \$350 for her.

The old "war horse" Turley, 2:07¾, captured the blue ribbon offered at the recent Durland horse show in New York for the best trotter under saddle. Turley is now owned by C. K. G. Billings, who rides him in Central Park almost every day when he is in New York. Delight, trial 2:10, by Allerton, 2:09¼, and Frank A. 2:11½, also owned by Mr. Billings, won the red and yellow ribbons in the same class.

Before leaving Pleasanton for Logan, Montana, Riley Kent traded his horse Gen. Sherwood 2:28¾ to W. W. Mendenhall for the McKinney trotter Sir John, paying a neat sum to boot. Gen. Sherwood is now at Pleasanton. He is by Bob Evans 3:0668, son of Woodford Wilkes. The dam of Gen. Sherwood is Silk by Combination 2684 (son of Dictator), second dam Lady Atwood by Atwood 2:27¼, son of Nutwood.

The talk of the track at Pleasanton is the pacer Tom Murphy which Fred Chadbourne is training. He belongs to Mr. F. J. Yandle of Santa Rosa, and is by Gossiper 2:14¼ out of a mare by Memo. His fastest mile so far has been one in 2:11, but he does it so nicely and seems to be able to show so much speed whenever asked, that he looks as if he might beat some of the horses that are thought to have a good chance to win the big stakes for the 2:20 class pacers this year.

Uncle Ben Palmer, a colored man, and one of the early settlers of the Carson River Valley, Nevada, died last week, aged 82 years. Uncle Ben was well known to all the horse and cattle breeders of that section, and was among the first to introduce good stock into Nevada. He was well-to-do, and during the early days of Nevada performed many acts of kindness to the emigrants and others who were in need of help. He bred many horses of trotting blood, owning a horse called Bonner.

The Monterey mare May T. owned by Jos. Twigg of Irvington, is in training again this year at Pleasanton and is acting nicely. She showed great speed last year, but only started twice and failed to win, as she was a little unsteady. She is a highly bred and finely formed mare and will yet be heard from as she is a good gaited trotter. As her sire has a record of 2:09¼ and her dam is an own sister to Georgie B. 2:12¼, by Nutwood Wilkes, she has a right to be fast and to win races.

Henry Dunlap of Pleasanton met with a serious accident last week. He had purchased a three-year-old at the Spreckel's sale Monday evening and on Thursday started to drive it to Pleasanton hitched to a cart. In the suburbs of Oakland the filly became frightened at something and in jumping from the cart to secure better control of her, Mr. Dunlap fell and broke his left thigh bone just above the knee. He was taken to his home at Pleasanton, and Dr. Boucher reduced the fracture. Mr. Dunlap will be confined to his bed for several weeks.

The three-year-old filly by Bonnie Direct 2:05¼ out of Miss Logan 2:06¼, has been sent by Griffith & McConnell to be bred to Star Pointer 1:59¼. Here is a combination of speedy ancestors that should give the prospective foal an inheritance of first moneys in the pacing futurities. The filly has never been worked for speed, simply broken to harness and turned out to grow and develop. She is of good size and nicely turned, going on the trot in the pasture until startled or frightened at something, when she takes to the lateral gait with grace and speed enough to arouse enthusiasm in a Gov. Hughes.

News reached Pleasanton the other day of the death at Ogden of the mare Polly Garr 2:18½ that was trained at Pleasanton a few months during the past winter and spring by Riley Kent. She was owned by Dr. Conroy of Ogden, who valued her very highly, as she was a great favorite with his entire family. Polly Garr was by Wasatch 10,916, dam Bessie Wilkes by Arthur Wilkes, second dam Fancy by Garner's Blackbird, third dam Posey, dam of Martha 2:18, by Flaxtail. Bessie Wilkes was an own sister to Hobo 2:14¼ and Lady A 2:24¼. Polly Garr was thirteen years old, and was quite a celebrity in Utah, where she was a successful race mare.

Dr. Defoe, the well-known veterinarian of San Jose, who recently removed to Pleasanton, has a four-year-old stallion by Nutwood Wilkes 2:16¼, dam Carrie Malone, own sister to Chas. Derby, by Steinway, that comes as near being a show horse as anything we have seen lately. He is not a large horse, about 15.1, and is a chestnut in color, with mane and tail that are lighter in color. He is as round as a barrel and his coat has the sheen of a polished chestnut. And how he can bend his neck, lift his knees and step. He is green, but shows a lot of speed at the trot. In the hands of a trainer of high steppers we believe this horse would be able to win prizes in almost any show ring, as he has the snap and nerve force to go through work.

Entries will close Monday, June 1st, with Secretary Flicher, Secretary of the California State Board of Agriculture, for the following purses: 2:12 pace, \$800; 2:10 trot, \$1,000; 2:17 trot, \$800; 2:15 pace, \$700; 2:24 trot for four-year-olds, \$500; 2:14 trot, \$800. Look over the advertisement carefully and get your horses ready by June 1st, so that you will know just where to enter them.

The 2:20 class trotters for which both the State Agricultural Society and the Breeders' Association have hung up \$2,000, and the Alameda Fair Association \$2,500, have so far developed no horse among those entered that looks to have an easy thing of winning either first or second money. It will be an open race from present outlook at every meeting. Of the twenty-three or twenty-four trotters entered, a well posted horseman who is pretty well acquainted with the capabilities of all of them, remarked the other day that there was not one he would be willing to bet on at even money, and that the field would have a big following even with four or five of the best ones sold out. That's the sort of a race that fills the grand stand.

C. D. Crutcher, M. D., of Rollins, Montana, who owns the Diablo stallion Inferna 2:15½, sire of Inferlotta 2:04½, writes that this horse is getting about all the registered mares in that valley this season, as well as many good ones non-standard. Fern Dot, a three-year-old by him out of Lady of the Period by Kentucky Volunteer, is entered in the Montana stake races for three-year-olds, and barring accidents it will take a race horse to beat him. Three foals by Inferna have already arrived this spring, one out of Mildred C., full sister to The Bishop 2:06 by Argot Wilkes, second dam Cactus by Cuyler, third dam Sweepstakes, the dam of Star Pointer 1:59½. This colt is a pacer, chestnut in color, and certainly has some speed inheritance.

Catalogue No. 12, just issued by G. S. Ellis & Son of Cincinnati, Ohio, is one of the largest, most complete and best printed catalogues ever sent out by dealers in harness. It is a book of 416 pages, filled with illustrations of everything in the harness line from a hame strap to a four-in-hand harness. Many fine half tone engravings of the fast trotters and pacers also beautify its pages. To look through this catalogue is like visiting a wholesale house and looking over everything in stock. Prices of everything are appended and if any horseman wants any of the Ellis goods all he has to do is to select them from this catalogue and send for them. Ellis & Son have discontinued selling their goods through harness dealers and department stores and are now selling their entire output direct to horsemen at the wholesale prices formerly charged dealers.

George Ramage has one of the best trotters we have seen working this year in his bay gelding by Sidney Dillon out of Oakley Russell. Last Saturday at Pleasanton this horse trotted three heats in 2:18½, 2:17½ and 2:16½ and it looked easy for him each heat. The remarkable thing about it is that he has only been at the track two months, and prior to his being taken there had been running out for two years, or since the earthquake of 1906. Ramage had worked him a mile around 2:15 just before the big shake and intended to take him east that year, but the tremor changed the course of a good many events and Ramage turned the horse out and went into other business for a while. He took him up in March and the three heats trotted last Saturday shows the horse to be more than an ordinary trotter. Ramage will enter him on the North Pacific Circuit in all probability and should get some of the money with him. The gelding is a line trotter and there is nothing that seems to bother him in the least, scoring alone or with a bunch equally well. He never needs a whip and while quiet and cool all the time, is always ready to do his best when asked. We consider this fellow a great prospect.

One of the grandest two-year-olds we have seen this year is in the string at Pleasanton which Jos. Twiggs is training for Martin Carter of Nutwood Stock Farm. The filly is very large and just "a big slob" as Mr. Carter terms her as she has not yet learned to act like anything but a green one. She is by Lord Alwin (own brother to John A. McKerron 2:04½), and her dam is Excella by Monbells (son of Mendocino and Beautiful Bells), second dam Expressive (3) 2:12½ by Electioneer, third dam the thoroughbred mare Esther, dam of four in the list. With such breeding as this one would expect something good, and when Mr. Carter went to Pleasanton last Saturday to see her work, he thought a quarter in 37½ seconds would be highly pleasing to him. Just as he reached the track Mr. Twiggs went round with her, and when Mr. Carter's watch marked 35½ for the last quarter he thought it had failed to register correctly, but Twiggs and several others had the same figures and it was correct. The filly is a straight, true made trotter, and should fill out into a grand mare. Anyone who will study her breeding over for a minute cannot but be impressed with the combination of rich blood and early and extreme speed possessed by her ancestors. Excella herself is very fast, but Mr. Carter thought best to get a colt or two from her, before developing her speed, as he bought her for a brood mare on her breeding alone.

HO, FOR THE SAN JOAQUIN VALLEY!

Eight purses of \$500 each, open to the world, two purses of \$400 each for district horses, and four colt stakes with \$200 added money in each instance, is the excellent program arranged by the Fresno Association for its meeting to follow the California State Fair. Hanford, Tulare and Bakersfield, the other towns on this circuit will each have the same program with the exception of the colt stakes. The program provides for five days racing at each town and should attract a large entry list. After the State Fair is over, the fastest of the trotters and pacers will go north to the North Pacific Circuit, but there will be many horses remaining and the San Joaquin associations should secure generous entry lists. The Fresno program, which, with the exception of the local colt stakes is a duplicate of all the others, has been sent to us by Secretary Powell and is as follows:

Tuesday.

1. Walton Stakes, for two-year-olds, pacing; added money \$200.00
2. Trotting, 2:14 class 500.00
3. District pace, 2:35 class 400.00

Wednesday.

4. Athasham Breeders' Stakes for three-year-olds, trotting, 2:30 class; added money 200.00
5. Pacing, 2:25 class, Raisin City Stakes 500.00
6. Trotting, 2:10 class 500.00

Thursday.

7. Zibbell Stakes for three-year-olds pacing added money 200.00
8. Pacing, 2:14 class 500.00
9. District trot, 2:40 class 400.00

Friday.

10. Nogi Breeders' Stakes for two-year-olds, trotting; added money 200.00
11. Pacing, 2:10 class 500.00
12. Trotting, 2:18 class 500.00

Saturday.

13. Pacing, 2:20 class 500.00
14. Trotting, 2:24 class 500.00

A HANDICAP FOR PACERS.

The 2:05 class pace for which \$1,000 was offered by the Pacific Coast Trotting Horse Breeders' Association, having failed to fill, the association has decided to offer \$1,500 for a race for pacers, on the plan of the big \$50,000 handicap which the New England Trotting Horse Breeders' Association has offered for trotters. This pacing event should meet with immediate and popular favor, as every pacer on the coast will be eligible to start in it. Horses that can pace a mile in 2:15 will be started at scratch, and the handicap will be fifty feet for each second. The distance will be a mile and a quarter for scratch horses. Further particulars of this race will be announced next week, but as all the various phases of such an event have been fully set forth in the advertising of the Readville race, horsemen doubtless have a clear idea of the conditions by this time. This race should attract the attention of every owner who has a pacer he is desirous of racing, and it will offer an opportunity to start Sir John S. 2:04½ and every other pacer with a record on this coast, as well as any green horse that can pace a mile in 2:15.

The U. S. Army McClellan Saddle is considered the best Military Saddle in the world. For over fifty years it has been the U. S. Army regulation saddle, having been first adopted in 1858 after the design of its inventor, then Captain McClellan, while Military Attache in Europe, who conceived the idea from the Hungarian saddle on which he improved. Captain McClellan became, during the Civil War, the Commanding Officer of the Union Army of the Potomac, familiarly known to the soldiers as "Little Mac," father of Mayor McClellan of New York City. During the Civil War, the McClellan saddle was in use with the tree covered with raw hide calf skin, with large leather skirts. The South to-day uses more McClellan saddles than all the rest of the United States, probably from the fact that from their extensive use in the South during the Civil War, they know its merits best. After the Civil War, the McClellan saddle had the skirts removed, and from the fact that the raw hide sometimes got broken and left rough ragged edges, it was covered over the raw hide with fine black leather. In this shape it was used until the recent change in army uniforms from the blue to olive drab, when in order to match the uniforms, the saddle and equipments were changed from black to russet leather. During the Allied Army attacks on Peking, China, the British Army officers, who had chance to examine the U. S. Army McClellan saddle, became very much interested in it, and declared it the best saddle of all the nations.

The grand stand at the Galesburg, Ill., tracks was completely demolished by the wind storm on April 24th. The barns were also greatly damaged and in consequence the Great Western Circuit meeting scheduled to be held there this year has been declared off. It has been announced that the Libertyville, Ill., association will seize the dates, August 10 to 14, and will hold a meeting to take the place of Galesburg.

STRAIGHT HEATS AT LOS ANGELES.

Every race in the matinee card of the Los Angeles Driving Club at Agricultural Park last Saturday afternoon was won in straight heats, and the only change in positions at the finish was when Glennetta and Phyllis C. reversed their places in the second heat of the 2:20 trot.

The free-for-all pace, in which the two fast side-wheelers, Siegfried and Moy, were entered, was declared off on account of a slight ailment affecting W. C. Morris' horse. This was to have been the event of the day. Isabella was withdrawn from the 2:15 pace and Charles M. and Sadie McKinney were absentees in the 2:20 trot, leaving only three horses to go. The meeting throughout suffered the usual fate of postponed events, both in the matter of attendance and the class of horses entered.

Shecam, splendidly rated in the remaining feature of the day, the 2:15 pace, was taken out in front most of the way, but had to succumb to Lohengrin at the end of both heats. Golden Nut, nicely driven by Frank Williams, stayed in front all the way in both heats of the 2:20 trot, while The Adjutant, closely pressed by Maxine in the first heat, won the 2:25 pace handily. Although the track was not particularly fast, the average time was good, the fastest heat being the second heat of the 2:15 pace, which Lohengrin covered in 2:17¼.

Angie Duryea, not in any too good form, was beaten by Billy W. handily in the 2:20 pace. The driving of J. D. Springer back of Phyllis C. was one of the features of the afternoon, he succeeding in bringing in the slow-beginning mare right up close to the leaders at the finish of each heat. G. A. Pounder, driving Shecam in the 2:25 pace, also did some nice work with the reins, being right there with his horse notwithstanding the tremendous stretch rushes of the good horse Lohengrin in each heat.

An additional cup will be contested for this year, the gift coming from Ackley Cloyes Schuyler of the New York Driving Club. It is to be given to the trotter going the fastest mile during the season of 1907-8, and will be known as the Delatour cup. Special effort is to be made to make the next matinee a record-breaker in every way. It will be held Saturday, June 6th, and there will be both a free-for-all pace and free-for-all trot on that day.

The 2:20 pace—

Billy W., b. g. (Dr. Humebaugh)	1	1
Angie Duryea, b. m. (Nickson)	2	2
Miss Thelma, b. m. (Messmore)	3	3
Time: 2:22, 2:22.		

The 2:15 pace—

Lohengrin, b. g. (Dr. Dodge)	1	1
Shecam, b. g. (Pounder)	2	2
John S., b. g. (Watkins)	3	3
Zomevolsey, b. h. (Williams)	4	4
Time: 2:17½, 2:17¼.		

The 2:20 trot—

Golden Nut, s. h. (Williams)	1	1
Glennetta, b. m. (Keller)	3	2
Phyllis C., br. m. (Springer)	2	3
Time: 2:18, 2:20.		

The 2:25 pace—

The Adjutant, b. g. (Shaw)	1	1
Maxine, b. m. (Lowe)	2	2
Gray Bess, gr. m. (Ramroth)	3	3
Time: 2:27, 2:31.		

SOLANO BOY AND HIS BREEDING.

Mr. H. G. Boyce, a member of the fruit growing firm of Buckingham, Boyce and Wooley, of Winters, California, who has been as he says "an appreciative subscriber of the Breeder and Sportsman for twenty-five years," attended the May Day picnic and races at Dixon this month. In the report of the races sent us the breeding of Solano Boy, a starter in the buggy race, was not given, and Mr. Boyce kindly sends us the following to supply the omission:

Solano Boy is owned by C. J. Uhl of Vacaville, but was bred and raised by Hon. Ben Rush and is by Jules Verne (Demonio-May Norris) and out of Minerva by Guy Wilkes. He had just one month's work and two weeks of that on a country road. Driven by Joseph Stadtfeldt, a novice at the game, in fact his first race, Solano Boy won the first and fourth heats of his race in 1:08½ and 1:07, and was second in the second, third and fifth heats in 1:07, 1:09, 1:09, a mistake right at the finish costing him the race. It seemed to me a most creditable performance. The timers were E. D. Dudley and James Marshall. Solano Boy is entered in the 2:20 pace at Sacramento. Jules Verne, his sire, is now owned by Sam Hoy, of Winters."

E. Stewart's Wild West show at his new stock yards, corner Tenth and Bryant streets, attracted large crowds during the week past. Several of the best riders in the west took part in the contest of riding wild horses. The honors were close between Broncho Jim of New Mexico, Ike Brooks of Sonoma, and Bill Callaghan of Reno. These riders can keep a comfortable seat at any kind of game the horse proposes. Owing to a delay in the improvements Mr. Stewart intends putting in, he was compelled to hold his sale of fast road horses this week at his old place on Valencia street. When complete with pavilion and stabling, the new sale yards will be about the best place of its kind on the coast, the railroad conveniences making it especially handy for receiving consignments.

SAN FRANCISCO DRIVING CLUB.

President W. J. Kenney, who acts as starter for the San Francisco Driving Club as well as presiding over all its business meetings, made a record for himself last Sunday at Golden Gate Park Stadium, where he started five races during the afternoon and had four of them finished before the shower came up at 3 o'clock.

The racing was good, and while there was not a split heat race during the day, the contests were close and keen in nearly every event.

There were no attempts at betting as on the previous Sunday, when outsiders tried to make hand books, the club's officials and the Park police keeping a watchful eye and letting it be known that any parties found trying to make bets would be ejected from the Park.

The racing, all at three-quarter mile heats, was as good as any seen on the Stadium track since it was finished. Following are the summaries:

Free for all trot—Three-quarter mile heats:

C. L. Becker's Walter Wilkes (Becker).....	1	1
G. Lindauer's Homeway (Lindauer).....	2	2
Time—1:41½, 1:43.		

2:20 pace:

George Giannini's Lady Jin (Giannini).....	1	1
Charles Mitchell's N. L. B. (Mitchell).....	4	2
T. H. Corcoran's Lady Falrose (Corcoran).....	2	4
H. Schottler's Dynamite (Schottler).....	3	3
Time—1:40, 1:41.		

Free for all pace:

George Giannini's George Perry (Giannini).....	1	1
A. Hoffman's Kitty D. (Hoffman).....	2	2
G. C. Nutting's Byron Lace (Nutting).....	3	3
Time—1:39½, 1:39.		

2:18 pace:

L. Marisch's Little Dick (T. McGrath).....	1	1
A. H. Scofield's Harry Hurst (Scofield).....	2	2
C. J. Lecarl's Charley J. (Lecarl).....	3	3
Time—1:41, 1:43½.		

2:25 class:

F. E. Burton's Nico (Burton).....	1	1
H. A. Boyle's Margaret (Boyle).....	3	2
D. Siebert's Ed Ray (Siebert).....	2	5
C. L. Becker's Sycamore (Becker).....	5	3
H. Schottler's Wood Be (Todd).....	4	4
Time—1:48½, 1:48.		

MAY DAY RACES AT HANFORD.

Hanford, May 6, 1908.

May Day was celebrated at the Kings County fair grounds in gala style, horse racing and bicycle contests being the main amusement. The free-for-all for trotters and pacers was first on the card, the entries being the trotting stallion Stamboulette 2:10½, P. M. Richardson, owner and driver; Friday 2:11½, pacing gelding, owned by Mr. Kimball, and J. H. Nelson's Allie Glen, piloted by the well-known driver, Moody Liggett. Stamboulette went away in the lead, nicely trailed by Allie Glen. Friday's driver, who by the way was not Mr. Kimball, his owner, got stage fright when the word was given and pulled the good horse up to a 2:50 gait, which he maintained through the heat. The half was made in 1:06½, the gallant bay stallion in the lead. Up near the three-quarter pole Moody let the mare have her head and she came home a winner in 2:19, Stamboulette second.

The second heat Allie Glen won in the slow time of 2:29, Stamboulette second and Friday third prize.

The next race was the same distance, mile heats, two in three. Martinez Boy and Hanford Jim, wearing the straps, and Philip C. Byrne's brown bay pacing mare Oleander, no hoppers, were the starters. Moody Liggett drove Martinez Boy and put up a great drive, beating Oleander after a real horse race. Hanford Jim was third. In the next heat Hanford Jim and Oleander had it hammer and tongs all the way, the flower girl winning by half a neck. The third heat was won by Jim. Each horse now had a heat and three to one was freely offered that Hanford Jim would defeat the dainty little mare, Martinez Boy having gone to the stable. A perfect start was given and it was Nip and Tuck clear to the three-quarter pole, where the big Athby gelding had to succumb to the petite Oleander, who won in the fastest heat of the race. Summaries:

First race, free for all:

Allie Glen (Liggett).....	1	1
Stamboulette (Richardson).....	2	2
Friday.....	3	3
Time—2:19, 2:29.		

Second race, pacing:

Oleander (Byrne).....	2	1	2	1
Hanford Jim (Turner).....	3	2	1	2
Martinez Boy (Liggett).....	1	3	dr.	
Time—2:30, 2:34, 2:32½, 2:26.				

The dates of the Inter-Mountain Fair to be held at Ogden, Utah, have been changed from the last week in August to September 30th, October 1st, 2d and 3rd. All horsemen and live stock exhibitors who expect to visit this fair should make a note of this fact.

One of the great prospects in Charley Dean's string at Palatine, Illinois, is a two-year-old colt called High Admiral. He is by Admiral Dewey 2:04½, out of Avena (2) 2:19½ by Palo Alto 2:08½. The blood of Palo Alto is breeding on and is getting more prominent every year.

Drink Jackson's Napa Soda.

DAISY HAYWARD A GREAT BROOD MARE.

Dyerville, May 5, 1908.

Breeder and Sportsman: Being a constant reader of your valuable paper I would like to make a few remarks about old Daisy Hayward, one of the best brood mares that lives in Humboldt County to-day, or has ever lived anywhere. Daisy Hayward has produced more consistent performers than any brood mare in this county, living or dead. She is the dam of Iora 2:11½, Ruby M. 2:14½, Joe 2:19, Teddy R. 2:22, and altogether I believe she has raised twenty-two colts. Daisy Hayward was bred and raised by that veteran trainer of Humboldt County, Robert Noble, who raced her for years and gave her a mark of 2:28. Old Daisy was to be bred to Humboldt Dillon this year, but the sad news has just reached us that the grand and game little horse is very low with distemper. It is to be hoped both for Humboldt Dillon and his owner, Dr. Jack Lane, that he pulls through. Robert Noble, who drove him last year to his mark, is with the colt night and day and will bring him out all right if possible.

Going back to Daisy Hayward, I must relate her experience last winter. She was running out as feed was very short up here. A large limb from a dead pine tree fell on her, and the forks of the limb had her pinned to the ground across the loins. She was in that position for two days when found. I went up with an ax and cut her away, but found she could not stand up. I went for a sled and brought her off the mountain to the barn, where I built a stall just wide enough for her to stand in. I raised her up with a block and tackle, and when I had her up, built a padded cushion under her belly so she could rest. After a week the game old mare pawed to get out. I let her out and in a few days she was down again, but I got her back in the stall. Altogether she was down four times, and the last time I went out with my rifle to end her troubles, but to my surprise old Daisy flew the coop and took to the tall timber. She got along all right and yesterday she produced a beautiful black filly, and the most surprising part of it is that the filly is perfect.

Yours,

J. H. HEISTER.

[Daisy Hayward is given in the books as by Poscora Hayward 2898, dam Mandy by Wellwood. We cannot find Daisy credited with a record, however, and she is only credited with one standard performer, Iora 2:11½. If the records of Ruby M., Joe and Teddy R. can be established, also the record of Daisy Hayward herself, we hope our correspondent will secure the necessary proofs and send them in to the American Trotting Register Association, as such a mare should have full credit in the books for what she has accomplished in the breeding ranks and on the race track.—Ed. B. and S.]

BROUGHT GOOD PRICES AT MELBOURNE.

Our readers will remember that on January 4th of this year there was printed in the Breeder and Sportsman an account of the shipment to Melbourne, Australia of twenty-one head of trotting bred horses, eighteen of which had been purchased from various California owners during the winter by Mr. Andrew Robertson, agent for Messrs. A. & G. Tye of Alledale Stock Farm, Mentone, Australia. Word was received in due time of the safe arrival of all the horses at Melbourne, and word now comes of the sale of two of them for enough money to pretty near cover the expenses of buying all the others and getting them to Australia.

The Melbourne Argus of April 2d gives an account of a public inspection of the stock after reaching that city, and the sale on the same day of the four-year-old black stallion Medium Direct for one thousand pounds, or \$5,000 United States money, and of the two-year-old colt Lou Doble for five hundred pounds, or \$2,500.

Medium Direct was bred by the late George A. Davis of Pleasanton and sold to Mr. Robertson by Ed. Parker, acting for the Davis Estate. Medium Direct was formerly known as Little Rey. He is by Rey Direct 2:10, dam Missie Medium by Rampart, second dam Belle Medium 2:20, the dam of Stam B. 2:11½, by Happy Medium.

Lou Doble is a black colt foaled in 1906, was bred by Mrs. J. L. McCord of Sacramento and sold by Henry Delaney to Mr. Robertson. He is by Kinney Lou 2:07¾ out of Marguerite by Tom Benton and we believe is the first son of Kinney Lou ever sent to Australia. As the Melbourne Argus says:

"Mr. Robertson is deserving of credit for purchasing such a fine lot of horses as he landed at Melbourne, and Messrs. Tye are to be congratulated upon having added materially to the trotting horse stock of Australia by their enterprise."

Baron Dillon 2:12, one of the most notable speed siring sons of Baron Wilkes 2:18, while being jogged on the road at Lexington, Ky., on Tuesday morning, fell and broke both of his fore legs and was later destroyed. He is the sire of twenty-four trotters and ten pacers in the list. His most notable performers are Dillon Boy 2:09½, trotting, and the pacers Baron Rogers 2:07¾ and George A. Fuller 2:08½.

M. E. McHenry is at Poughkeepsie, N. Y., in charge of James Farley's horses, including Locust Jack 2:11, and others.

DEATH OF JAMES W. DALY.

NEW YORK, May 4.—This community was deeply surprised and pained to learn on Monday morning last of the death of James W. Daly, proprietor of the Mt. Kisco Stock Farm, which occurred the day previous, after a short illness of Bright's disease, at his farm at Mt. Kisco, N. Y. Mr. Daly was one of the oldest and best known breeders of trotting horses in this State, his identification with that pursuit dating back more than a quarter of a century. Although his interests in breeding and trotting were large and important they were conducted more as a diversion than anything else, as his regular occupation was that of a contractor, at which he had amassed a fortune. His beautiful home and farm near Mt. Kisco, consisting of upwards of 500 acres, has at various times during its career sheltered some of the most distinguished trotters and trotting sires and dams to be found in the records. His most successful stallions were Delmarch 2:11½ and Oro Wilkes, 4, 2:11, which he owned for some time, but which he sold about three or four years ago, when he had decided to retire from the breeding business. One of the best trotters which he ever bred was Deloree 2:09½, that he sold for a few hundred dollars, and repurchased for about \$4,000 after she had acquired her record. She is now a brood mare upon the farm.

The stallions at present on the farm are Baron Oakland 2:21½ by Oakland Baron 2:09½, dam by Happy Medium; Bingeneras by Bingen 2:06½, dam by Wilkes Boy 2:24½; Wilsonoro by Oro Wilkes 2:11, dam by Gambetta Wilkes 2:19½, and several others. Mr. Daly had decided to give up breeding two years ago, and had greatly reduced his stock, but later reconsidered the matter and gradually increased his holdings until now there are something over 100 head of horses on the farm.

James W. Daly was born near Limerick, Ireland, sixty-eight years ago, and his dying request was that his body should be taken to that place for interment in the family burying ground. He came to this country when he was 19 years old and accumulated a fortune. For more than forty years he was a prominent railroad contractor. His first large work was helping to build the Lackawanna railroad. For more than twenty years he was in general charge of all the contracts of the New York, New Haven & Hartford railroad. At the time of his death he had the contract from the New Haven Company for making its branch from the Harlem river to New Rochelle, a six-track road, at a cost of more than \$5,000,000. He was also connected with the firm which built a section of the subway. Mr. Daly was a widower and leaves a son, John W. Daly, who is also in the contracting business, and a daughter, who is the wife of Senator Wills of California. The funeral services have been deferred until Saturday to enable distant relatives to be present.

ANSWERS TO CORRESPONDENTS.

Enquirer, Pleasanton—Alameda Maid, gray roan mare, foaled in 1890, was bred by James G. Fair and is registered in Vol. 10. She is by Eros 5326, dam Oakland Maid 2:22 by Speculation 928, grandam Lady Vernon 2:29½, pedigree not traced. Alameda Maid, chestnut mare foaled 186—, was bred by John Livingston and sold by him to Senator Stanford. She had a record of 2:27½, was sired by Whipple's Hamblonian 725, dam Lady Livingston by Rattler.

N. R., Reno—Stamboulette 2:10½ is a registered horse, his number 20,884. Any colt by him out of a registered mare, can be registered. He took his record in 1898 at Old Orchard, Maine, in a six-heat race, which he won. He stood 6-2-5-1-1 in the summary and the time was 2:11½, 2:15, 2:10½, 2:13, 2:14½. He is now sixteen years old having been foaled in 1892. He has no representatives in the list of standard trotters and pacers.

G. Morrill, Milton—The only way to breed to get a French Coach horse, is to get a registered French Coach mare and breed her to a registered French Coach stallion. The record for a quarter mile running is 21¼ seconds, held by Bob Wade. The fastest pacer is Dan Patch 1:55½. The fastest trotter is Lou Dillon 1:58½.

DRIVING CLUB AT SAN DIEGO.

As a result of a spirited meeting of the prominent horsemen of the city, held last week, there was organized the San Diego Driving and Matinee Club and at the same plans were discussed for the holding of a number of meets on the Coronado track.

Fred Fanning was elected president of the club, with George Todd as secretary and Jack Rice as treasurer. It is stated that it is the object of the club to advance and promote horse interests and to hold matinee meetings, the first of which is scheduled for May 30th, Decoration Day. For this meet the program will consist of a 2:29 pace, a free-for-all pace, 2:30 trot, 2:40 trot and possibly, a half-mile dash.

It is the intention to hang up some good purses and every effort will be made to provide a good card. The horsemen desire to make the initial meet a big success and it is hoped that sufficient interest will be aroused to make the club a permanent organization.

The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feed. Call on or address S. O. Fesler, Pleasanton, Cal.

SECOND PAYMENTS IN STAKE NO. 8.

The Pacific Breeders' Futurity, \$7,250 guaranteed, for foals of 1908, closed December 2, 1907, with 417 mares nominated, the largest number in the history of this stake. On May 1st, second payment of \$5 was due, and payment was made on 252 foals, which is the greatest number of second payments in the last two stakes. The list of payments is as follows:

A. Allen's foal by Tom Smith, dam Lady Allen by Echo Chief.
 Alex Anderson's foal by Expressive Mac, dam Lady Arnett by Sidney Arnett.
 J. N. Anderson's bl. c. Farewell by Bon Voyage, dam Nora D. by Del Sur.
 Frank E. Alley's foal by Diawood, dam Lady Leemo by Memo; foal by Zolock, dam Diavola by Diablo; foal by Bon Voyage, dam Welladay by Steinway; foal by Greco E., dam Oniska by Nutwood Wilkes; foal by Greco E., dam Fortuna by Guy Wilkes; foal by Greco E., dam Maud Stambouret by Stamboul.
 Byrne & Curtis' foal by Direct Heir, dam Dixie S. by Zolock.
 Frank H. Burke's foal by Bon Voyage, dam Wanda II by McKinney.
 G. W. Bonnell's foal by R. Ambush, dam Magnet by Geo. Steck.
 L. Button's foal by Iran Alto, dam by Waldstein.
 Harry D. Brown's foal by Arner, dam Grace Cole by Nutwood Wilkes.
 I. L. Borden's foal by Bon Voyage, dam Hester McKinney by McKinney; foal by Barney Bernato, dam La Belle Altamont by Altamont; foal by Barney Bernato, dam Allie Cresco by Cresco.
 E. M. Barber's foal by Strathway, dam Dawn by Athaneer.
 L. E. Barber's foal by Nutwood Wilkes, dam Madge by Silver Bow, Jr.
 Mrs. S. V. Barstow's foal by The Angeles, dam Maud J. by Nearest.
 T. W. Barstow's foal by Nearest McKinney, dam Aunt Joe by Iran Alto.
 George T. Beckers' b. f. Princess Brack by Prince Ansel, dam Bena Brack by McKinney.
 C. B. Bigelow's f. by Prince Ansel, dam Lucy B. by Alex Button.
 H. F. Bliss' foal by Strathway, dam Iris S. by Iris.
 Thomas H. Brents' foal by Caution, dam Saffrona by Antelope.
 Robert S. Brown's foal Bon Voyage, dam Arios by Mendocino.
 R. S. Brown's b. c. Nolas by Redlac, dam Hope B. by Paloma Prince.
 E. L. Bartlett's foal by Bonnie Steinway, dam Gertrude D. by Grand Moor.
 T. W. Brodnax's foal by Strathway, dam Mary Chimes by Chimes.
 Charles Burlcock's foal by Strathway, dam Tia Juana by Kewanna; foal by Strathway, dam Dorothy Wellborn by St. Vincent.
 Fulton G. Berry's foal by Tom Smith, dam Maude.
 Bert Baker's foal by Strathway, dam Edith R. by Milton R.
 Alex. Brown's foal by Prince Ansel, dam Majella B. by Nushagak; foal by Prince Ansel, dam Daisy B. by Waldstein; foal by Prince Ansel, dam Laureus by Mendocino; foal by Prince Ansel, dam Seryolo by Mendocino; foal by Prince Ansel, dam Josie D. by Nutwood Wilkes; foal by Prince Ansel, dam Viola by Gen'l. Benton; foal by Nushagak, dam Zanita by Electricity.
 W. S. Barry's foal by Athadon, dam Thais by Directum; foal by Derby Direct, dam Babe by Lynwood W.; foal by Derby Direct, dam Phyllis by Lonnie; foal by Derby Direct, dam Maggie Gwynn by Hawthorne Derby.
 Mrs. M. F. Case's foal by Arner, dam Black Gypsy by Kentucky Baron.
 I. D. Chappell's foal by Gray Grattan, dam Nidda by Teddy Gratton; foal by Hal B., dam Lenmetta by Nocatur.
 S. Christenson's foal by Bon Voyage, dam Simone by Simmons; foal by Bon Voyage, dam Perza by Allie Wilkes.
 E. M. Conroy's foal by Star Pointer, dam Frances C. by Wasutch.
 F. B. Crane's foal by Sir John S., dam Pal by Falrose.
 R. A. Cushman's foal by Zolock, dam Daisy McKinney by McKinney.
 John Clark's foal by Palo King, dam Diorene by Diablo.
 W. A. Clark Jr.'s foal by Moko, dam Bon Mot by Erin.
 L. C. Cleveland's foal by Red McK., dam Celandine by Ignis Fatuus.
 A. E. De Poe's foal by Greco B., dam Sadie Moor by Grand Moor.
 John H. S. Deal's foal by Sky Pointer Jr., dam Edith M. by Strathway.
 William G. Devlin's foal by Timothy B., dam Jean Waldstein by Waldstein.
 John R. Dimick's foal by Zolock, dam Queen Alene by Coeur d'Alene; foal by Bonnie Tangent, dam Goldie Goldust by Diablo.
 L. Y. Dollenmayer's foal by Nutwood Wilkes, dam Ida May by Grosvenor; foal by Albert Direda, dam Belle by Pasha.
 R. L. Draper's foal by Del Coronado, dam Lady Hackett.
 E. D. Dudley's foal by Palite, dam Bee Sterling by Sterling; foal by Palite, dam Paprika by Oro Belmont; foal by Jules Verne, dam Lorna Doone by Bayswater Wilkes.
 H. A. Duffield's foal by Palite, dam Nell by Don Marvin.
 E. R. Dunn's foal by Zola, dam Bonner Bell by Bonner N. B.
 William G. Durfee's foal by Zolock, dam Irene S. by Petigru; foal by Del Coronado, dam Subito by Steinway; foal by Del Coronado, dam Tacoma by Guycresco; foal by Del Coronado, dam Caphro by Robt. McGregor.
 J. F. Davies' foal by Bon Voyage, dam Miss Sidney Dillon by Sidney Dillon.
 A. Edstrom's foal by Athadon, dam Carmon by News Boy.
 E. L. Elliott's foal by Wayland W., dam Icehee by Chas. Derby.
 F. G. Ennie' foal by Teddy A., dam Miss Lynmont by Lynmont.
 Byron Erkenbrecher's foal by Star Pointer, dam Rita H. by McKinney.
 J. L. Field's foal by Nearest McKinney, dam Cammaneer by Nearest.
 E. L. Bissel's foal by Athamax, dam Babe by Diablo.
 Miss B. Fitzgerald's s. c. Diablo McKinney by Palo King, dam St. Gertrude by Diablo.
 Ernest Fleet's foal by Strathway, dam El Mae by Electricity.
 F. N. Folsom's b. c. by Lord Dillon, dam Decoration by Diawood.
 A. Morris Fosdick's foal by Bon Voyage, dam Athene by Dexter Prince.

 A. D. Wolfe's foal by Robt. Direct, dam Fannie by Strathway.
 W. W. Yandell's foal by Oseto, dam Sadie M. by Hillsdale.
 Zibbell & Son's foal by Tom Smith, dam Kate Lumry by Shadeland Onward; foal by Tom Smith, dam Evan-gie by Shadeland Onward.

Highball has been a mile in 2:13 for Geers at Memphis. The gelding shows no trace of his lameness of last season and the "Silent Man" believes that he will be faster than ever this year. He is big and has the speed of a hurricane. His fast mile was just play, and it would not be beyond his reach to equal his record this week, if asked. Geers has a novel rig to control him, and he does so well in it that he will wear it in company. It is a simple idea, just an extra pair of reins which fasten into a halter. Now when the speed marvel ducks his head to fly away he does not go up against the bit, but lays into the nose strap of the halter, and in a stride is steady. He is to be an entry in the \$50,000 race, and is being schooled to break away from a standing start. He has proved an apt pupil, and perhaps he cannot show something in the way of speed when turned loose!

Cross-breeding, that is breeding a pure-bred of one breed with a pure-bred of another, results in half breeds. The crossing of half breeds for a few generations results in scrubs. To prevent a large number of scrubs, never cross-breed.

G. & C. P. Cecil of Danville, Ky., have booked twelve of their fast record mares by Gambetta Wilkes to Searchlight 2:03½. Among the lot will be Credette 2:05½.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

PORTLAND SHOW.

The Portland Kennel Club's ninth annual bench show, April 29-30 and May 1-2 had 252 dogs entered (39 absent entries). The general class and quality of the exhibit was up to past averages, but Portland seems to be gradually dwindling in entries as compared with the shows of previous years. There is an indication that the influence of the dog broker and professional handler is beginning to have a depressing effect on northern entries.

The largest breed showings were English Setters, Bull Terriers, Bostons, Collies, Pointers and smooth Fox Terriers in the order named.

Victor Kuehn's Mallwyd Beau won out over the northern dogs in English Setters. Queen Racket, a Ch Rumney Racket bitch owned in Seattle won in bitches. Managett bred by Dr. A. W. Smith of Portland was reserve winners bitches. H. M. Papst's Mason's King was awarded winners and specials in Pointers. Pointers and English Setters, we are informed, were a fine lot throughout.

In Bull Terriers, a Ch Edgacote Peer puppy Wilamette Defender owned by G. B. Story of Portland won out for winners and best. Mrs. Chas. Reid Thorburn's Stiletto Flash (Bloomsbury Baron-Ch. Meg Merrileis II) was reserve winners dogs. In bitches Frank Watkins' Willamette Starlight (Ch Edgacote Peer-Iris) romped through her classes for everything in sight, beating both Iris and Edgewood Biddy, the latter reserve winners and going over Iris. Iris is now the property of George C. Israel of the South End Kennels, Olympia. The change in ownership was due to a friendly rivalry between the two sportsmen fanciers which culminated in a bet—the two bitches being the stakes. Watkins bet Israel that Iris was a better Bull Terrier than Biddy, the wager to be determined by the Portland award. George Thomas gave Biddy the blue, following which Watkins turned Iris over to Israel at the Seattle show. Mr. Watkins, although he gamely parted with a grand bitch has the consolation of knowing that he has a bitch in his kennels that can beat either. The Bull Terriers are mentioned as being a decidedly classy turnout.

Bostons were made up mainly of local dogs, the winner Arroyo Ameer was sold to Mr. Harry Litt and won again at Seattle (under the judge who sold him).

Collie honors went to Glen Tana Kennels with Shadeland Kennels in secondary position. Fox Terriers had some very good smooths benched with leading positions divided by Multnomah Kennels and two of Sabine Kennels' breeding.

Brownland Babbie, owned by K. N. Stevens of Pasadena, won the special for best Cocker bitch other than black.

A. H. Hayes Jr.'s Bulldog Endcliffe Advance won two specials for best, of any breed, shown.

The number of dogs benched, entries and absent entries follows:

Breeds	Dogs	Entries	Absent
Bloodhounds	2	2	2
St. Bernards	2	2	—
Great Danes	4	6	1
Newfoundlands	3	3	—
Russian Wolfhounds	3	3	—
Deerhounds	1	1	—
Greyhounds	1	2	—
Am. Foxhounds	2	2	—
Pointers	24	39	—
English Setters	32	45	3
Gordon Setters	2	5	—
Irish Setters	7	170	1
Chesapeake Bay	2	2	—
Irish Water Spaniels	3	5	1
Cocker Spaniels	18	29	1
